TOWARDS A BALANCED ASSESSMENT FOR 4-6 EVERYDAY MATHEMATICS

MATHEMATICS FOR ELEMENTARY SCHOOL TEACHERS

Cengage Learning Mathematics for Elementary School Teachers is designed to give you a profound understanding of the mathematical content that you are expected to know and be able to teach. The chapters integrate the National Council of Teachers of Mathematics (NCTM) Standards and Expectations and the new Common Core State Standards, as well as research literature. The five NCTM Process Standards of problem solving, reasoning and proof, communication, connections, and representation highlight ways that teachers present content, the ways that students learn content, and various ways that students can demonstrate procedural and conceptual understanding. The worked examples and homework questions provide prospective elementary school teachers with opportunities to develop mathematical knowledge, understanding, and skills that they can apply in their own classrooms effectively. The learning path begins with the Where Are We Going? Chapter Openers, worked Examples with Yellow Markers that indicate the Process Standards throughout the text, to the Concept Maps, to the Section Question Sets with their refreshers of Process Standards, to the Chapter Organizers with Learning Outcomes and a list of the corresponding Review Questions, and finally, conclude at the Chapter Tests with their overarching Learning Outcomes. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

GEOMETRIC ANALYSIS AND NONLINEAR PARTIAL DIFFERENTIAL EQUATIONS

Springer Science & Business Media This book is not a textbook, but rather a coherent collection of papers from the field of partial

differential equations. Nevertheless we believe that it may very well serve as a good introduction into some topics of this classical field of analysis which, despite of its long history, is highly modern and well prospering. Richard Courant wrote in 1950: "It has always been a temptation for mathematicians to present the crystallized product of their thought as a deductive general theory and to relegate the individual mathematical phenomenon into the role of an example. The reader who submits to the dogmatic form will be easily indoctrinated. Enlightenment, however, must come from an understanding of motives; live mathematical development springs from specific natural problems which can be easily understood, but whose solutions are difficult and demand new methods or more general significance." We think that many, if not all, papers of this book are written in this spirit and will give the reader access to an important branch of analysis by exhibiting interesting problems worth to be studied. Most of the collected articles have an extensive introductory part describing the history of the presented problems as well as the state of the art and offer a well chosen guide to the literature. This way the papers became lengthier than customary these days, but the level of presentation is such that an advanced graduate student should find the various articles both readable and stimulating.

ADVANCES IN NONCOMMUTATIVE GEOMETRY

ON THE OCCASION OF ALAIN CONNES' 70TH BIRTHDAY

Springer Nature This authoritative volume in honor of Alain Connes, the foremost architect of Noncommutative Geometry, presents the state-of-the-art in the subject. The book features an amalgam of invited survey and research papers that will no doubt be accessed, read, and referred to, for several decades to come. The pertinence and potency of new concepts and methods are concretely illustrated in each contribution. Much of the content is a direct outgrowth of the Noncommutative Geometry conference, held March 23–April 7, 2017, in Shanghai, China. The conference covered the latest research and future areas of potential exploration surrounding topology and physics, number theory, as well as index theory and its ramifications in geometry.

AN INTRODUCTION TO THE GEOMETRY AND TOPOLOGY OF FLUID FLOWS

Springer Science & Business Media Leading experts present a unique, invaluable introduction to the study of the geometry and topology of fluid flows. From basic motions on curves and surfaces to the recent developments in knots and links, the reader is gradually led to explore the fascinating world of geometric and topological fluid mechanics. Geodesics and chaotic orbits, magnetic knots and vortex links, continual flows and singularities become alive with more than 160 figures and examples. In the opening article, H. K. Moffatt sets the pace, proposing eight outstanding problems for the 21st century. The book goes on to provide concepts and techniques for tackling these and many other interesting open problems.

GEOMETRIC MODELING

John Wiley & Sons Incorporated The first comprehensive and complete coverage of geometric modeling. This text accurately treats the parametric geometry of curves, surfaces and solids, the construction of geometric models and the analytical techniques that can be used and applications. Extensive use is made of end-of-chapter problems.

TAKING CHARGE OF PROFESSIONAL DEVELOPMENT

A PRACTICAL MODEL FOR YOUR SCHOOL

ASCD How can every teacher, school, and district improve the quality of their schools? The answer is to empower teachers to take charge of their own learning, says author and teacher Joseph H. Semadeni. In this book, you'll learn how the Fusion professional development model can help you do just that. This accessible, customizable, and affordable model gives you proven ways to successfully establish teaching and learning practices that are grounded in solid educational research. In some schools, you may wish to begin the program with just a few teachers and let it gain recognition, support, and buy-in from the biggest skeptics. In other schools, the whole staff may be inspired to create their own lists of best practices, funding levels, and new school-day schedules. In both scenarios, schools have successfully implemented Fusion where it was needed the most. What's most appealing to teachers is that this approach gives them the chance to determine what strategies they want to learn, how much professional development they want to access, and when it best fits their schedules. As teachers learn, use, observe, and are observed practicing the strategies in their classrooms, they determine which practices best fit their students and foster achievement. With experience, teachers become eligible for related pay increases and Fusion helps teachers to foster the qualities, attitudes, and behaviors necessary to establish and nurture a collaborative culture within the school community.
