Experimental Psychology

Cengage Learning **Focusing on experimental methods, authors Anne Myers and Christine Hansen lead students step by step through the entire research process, from generating testable hypotheses to writing the research report. The major sections of the book parallel the major sections of a research report (Introduction, Method, Results, and Discussion), giving students the skills they'll need to design and conduct an experiment, analyze and interpret the research findings, and report those findings. Although the main focus is on experimentation, alternative approaches are discussed as important complements. Critical Moral Liberalism

Theory and Practice

Rowman & Littlefield In this important book, Jeffrey Reiman responds to recent assaults on liberal theory by proposing a 'critical moral liberalism.' It is liberal in maintaining the emphasis of classical liberalism on individual freedom, moral in adhering to a distinctive vision of the good life rather than professing neutrality, and critical in taking seriously the objection-raised by feminists and Marxists, among others-that liberal theories often serve as ideological cover for oppression of one group by others. Critical moral liberalism has a conception of ideology, and resources for testing the suspicion that arrangements that look free are really oppressive. Reiman sets forth the basic arguments for the liberal

moral obligation to maximize people's ability to govern their own lives, and for the conception of the good life that goes with this. He considers and answers objections to the liberal project, and defends liberal conceptions of privacy, moral virtue, economic justice, and Constitutional interpretation. Reiman then takes up specific policy issues, among them abortion, infanticide, euthanasia, moral education, capital punishment, and threats to privacy from modern information technology. *Critical Moral Liberalism* will be of interest to scholars and students of ethics, social and political philosophy, political theory, and public policy.

Huether and McCance's Understanding Pathophysiology, Canadian Edition - E-Book

Elsevier Health Sciences Introduction to Pathophysiology provides an entrance to the science of pathophysiology and explains why it is important. Lifespan coverage includes nine separate chapters on developmental alterations in pathophysiology and special sections with aging and pediatrics content. Canadian drug and treatment guidelines familiarize you with aspects of clinical practice you will encounter. Coverage of diseases includes their pathophysiology, clinical manifestations, and evaluation and treatment. The Power of Critical Thinking

Provides the broadest range of tools, enabling students to think critically about their lives and the world around them. This comprehensive and engaging introduction to critical analysis delivers clear, step-by-step guidelines that provide students with the tools they need to systematically and rationally evaluate arguments, claims, and evidence. Fully up-to-date with examples from contemporary culture, politics, and media, this text helps students develop the skills they need to engage meaningfully with the world around them.

Pop Culture and Power

Teaching Media Literacy for Social Justice

University of Toronto Press Literacy education has historically characterized mass media as manipulative towards young people who, as a result, are in need of close-reading "skills." By contrast, Pop Culture and Power treats literacy as a

dynamic practice, shaped by its social and cultural context. It develops a framework to analyse power in its various manifestations, arguing that power works through popular culture, not as everyday media. *Pop Culture and Power* thus explores media engagement as an opportunity to promote social change. Seeing Deeming pop culture as a teaching n opportunity rather than as a threat, Dawn H. Currie and Deirdre M. Kelly worked with K-12 educators to investigate how pop culture can support teaching for social justice. Currie and Kelly began the research for this project with a teacher education seminar in media analysis where participants designed classroom activities using board games, popular film, music videos, and advertisements. These activities were later piloted in participants' classrooms, enabling the authors to identify and address practical issues encountered by student learners. Case studies describe the design, implementation, and retrospective assessment of activities engaging learners in media analysis and production. Following the case studies, the authors consider how their approach can foster ethical practices when engaging in the digital environment. *Pop Culture and Power* offers theoretically -informed yet practical tools that can help educators prepare youth for engagement in our increasingly complex world of mediated meaning making.

Teaching Critical Thinking

Using Seminars for 21st Century Literacy

Routledge Help students meet today's literacy demands with this new book from Terry Roberts and Laura Billings. The authors show how a seminar approach can lead students deeper into a text and improve their speaking, listening, and writing skills, as recommended by the Common Core State Standards. Roberts and Billings provide easy-to-follow information on implementing Paideia Seminars, in which students discuss a text and ask open-ended questions about

it. When teachers use this lesson format, students are exposed to a wide range of increasingly complex texts. They also learn how to collaborate, talk about, and reflect on what they're reading, to make meaning independently and together. Seminars can be done in English class and across the curriculum, using social studies documents or math problems as the texts under discussion. Teaching Critical Thinking also offers an array of practical resources: teacher lesson plans student samples a list of possible ideas and values for discussion a guide to asking good questions during a seminar six full seminar plans (including the texts), covering literature, social studies, and science topics

Power to the People

Teaching Political Philosophy in Skeptical Times

Lexington Books **Power to the People** examines the teaching of political philosophy in what is taken to be skeptical times. Author Avner de-Shalit encourages political philosophers to remain committed to the analytical achievements of political philosophy while also revising and improving the teachings of the discipline to be more in tune with the demands of democratic society. Using highly accessible language, de-Shalit argues that distinguishing political philosophy from politics is methodologically and normatively wrong; that political philosophy can empower its students; and that political philosophy should be democratized. De-Shalit's radical and provocative theory will fascinate anyone involved in politics, philosophy, and education.

Critical Thinking

An Appeal to Reason

Routledge In **Critical Thinking: An Appeal to Reason**, Peg Tittle empowers students with a solid grounding in the lifelong skills of considered analysis and argumentation that should underpin every student's education. Starting with the building blocks of a good argument, this comprehensive new textbook offers a full course in critical thinking. It includes chapters on the nature and structure of argument, the role of relevance, truth and generalizations, and the subtleties of verbal and visual language. Special features include: • an emphasis on the constructive aspect of critical

thinking—strengthening the arguments of others and constructing sound arguments of your own—rather than an exclusive focus on spotting faulty arguments • actual questions from standardized reasoning tests like the LSAT, GMAT, MCAT, and GRE • graduated end-of-chapter exercises, asking students to think critically about what they see, hear, read, write, and discuss • numerous sample arguments from books, magazines, television, and the Internet for students to analyze • many images for critical analysis • analyzed arguments that help students to read critically and actively • an extensive companion website for instructors and students A companion website features: • for instructors: an extensive instructor’s manual; a test bank; and PowerPoint slides • for students: extended answers, explanations, and analyses for the exercises and arguments in the book; supplementary chapters on logic and ethics; downloadable MP3 study guides; interactive flash cards; and thinking critically audio exercises.

Critique and Power

Recasting the Foucault/Habermas Debate

MIT Press **The book juxtaposes key texts from Foucault and Habermas; it then adds a set of reactions and commentaries by theorists who have taken up the two alternative approaches to power and critique. The result is a guide for those seeking to understand and build on an unfinished debate between two of the 20th century's most important**

philosophers. Which paradigm of critique—Foucault's or Habermas's—is philosophically and practically superior, especially with regard to the nature and role of power in contemporary society? In shaping this collection, Michael Kelly has sought to address this question in relation to the ethical, political, and social theory of the past two decades. Michel Foucault and Jurgen Habermas had only just begun to come to terms with one another's work when Foucault died in 1984; they had even discussed the possibility of a formal debate on "Enlightenment" in the neutral arena of the United States. In the decade since, Habermas and his supporters have continued to respond to Foucault in various ways, but Foucault's followers have not shown as strong an inclination to keep up his side of the dialogue. For this reason an invaluable exchange on the nature and limits of philosophy in the present age has never achieved its full potential. In this anthology Michael Kelly recasts the debate in a way that will open it up for further development. The book starts by juxtaposing key texts from the two philosophers; it then adds a set of reactions and commentaries by theorists who have taken up the two alternative approaches to power and critique. (Two of these essays were written especially for this volume.) The result is a guide for those seeking to understand and build on this important but unfinished debate. Essays by: Michel Foucault. Jürgen Habermas. Axel Honneth. Nancy Fraser. Richard Bernstein. Thomas McCarthy. James Schmidt and Thomas E. Wartenberg. Gilles Deleuze. Jana Sawicki. Michael Kelly.

When Students Have Power

Negotiating Authority in a Critical Pedagogy

University of Chicago Press **What happens when teachers share power with students? In this profound book, Ira Shor—the inventor of critical pedagogy in the United States—relates the story of an experiment that nearly went out of control. Shor provides the reader with a reenactment of one semester that shows what really can happen when one applies the theory and democratizes the classroom. This is the story of one class in which Shor tried to fully share with his students control of the curriculum and of the classroom. After twenty years of practicing critical teaching, he unexpectedly found himself faced with a student uprising that threatened the very possibility of learning. How Shor resolves these problems, while remaining true to his commitment to power-sharing and radical pedagogy, is the crux of the book. Unconventional in both form and substance, this deeply personal work weaves together student voices and thick descriptions of classroom experience with pedagogical theory to illuminate the power relations that must be negotiated if true learning is to take place.**

Doing Process Research in Organizations

Noticing Differently

Oxford University Press **This book takes up the challenge that process philosophy and process ontology pose to conventional, entity-based empirical research, even daring to question the relevance of 'methodology' in contemporary process organization studies. A process ontology demands reimagining and ongoing reinvention of how researchers inquire into and engage with the movements and moments of a morphing world. This in turn requires us to notice differently in our empirical engagements. Contributors to this book share a commitment to research that is more-than-representational in its concern to notice and act-with the latencies and diversities of living experience. Drawing inspiration from process philosophies, posthuman subjectivities, post qualitative inquiry, art, poetics, cinematics, and aesthetics, the chapters actively manifest the doing, reading, and writing of process research by attuning to occasions, moments, atmospheres, affects, agencements, with-ness, difference, and multiplicity. In bringing these ideas alive, the authors engage with their own empirical unfoldings by means of communing, corresponding, caring, performative writing, depersonalization, subject proliferation, mindfulness, relating, slow seeing, rhythmanalysis, listening, chromatic empiricism, and diffraction. Each chapter offers a unique worlding constituted in the particular elements it brings together, affording a style of reading that is oriented towards sensing rather than knowing or mastery. The chapters can be read in any order, alone or with and through each other. Collectively they evoke a mycelial web of resonance travelling across, between, and beyond the contents of this book.**
