RELEVANT TOPICS IN EATING DISORDERS

BoD - Books on Demand Eating disorders are common, frequently severe, and often devastating pathologies. Biological, psychological, and social factors are usually involved in these disorders in both the aetiopathogeny and the course of disease. The interaction among these factors might better explain the problem of the development of each particular eating disorder, its specific expression, and the course and outcome. This book includes different studies about the core concepts of eating disorders, from general topics to some different modalities of treatment. Epidemiology, the key variables in the development of eating disorders, the role of some psychosocial factors, as well as the role of some biological influences, some clinical and therapeutic issues from both psychosocial and biological points of view, and the nutritional evaluation and nutritional treatment, are clearly presented by the authors of the corresponding chapters. Professionals such as psychologists, nurses, doctors, and nutritionists, among others, may be interested in this book.

TRUTH ABOUT ART, THE

John Hunt Publishing 'Both knowledge and truth are beautiful things, but the Good is other and more beautiful than they.' — Plato, Republic, 508e. This book traces the multiple meanings of art back to their historical roots, and equips the reader to choose between them. Art with a capital A turns out to be an invention of German Romantic philosophers, who endowed their creation with the attributes of genius, originality, rule breaking, and self-expression, directed by the spirit of the age. Recovering the problems that these attributes were devised to solve dispels many of the obscurities and contradictions that accompany them. What artists have always sought is excellence, and they become artists in so far as they achieve it. Quality was the supreme value in Renaissance Italy, and in early Greece it offered mortals glimpses of the divine. Today art historians avoid references to beauty or Quality, since neither is objective or definable, the boundaries beyond which scholars dare not roam. In reality subject and object are united and dissolved in the Quality event, which forms the bow wave of culture, leaving patterns of value and meaning in its wake.

BODY LANGUAGE

FIRST OF ALL DO NO HARM

Purdue University Press Body Language is a testament to survival, to the healing power of nature. Connie built a home by the shores of Grand Lake, the lake the Indians called "Spirit Lake." Watching the river fill up the lake year after year renewed her faith in the sense of continuity and progression. Grand Lake, with its bird calls and bombastic waves, was a magic marriage between the visible and invisible, a landscape that refreshed the eye, cleansed the heart, recharged the spirit. Sometimes the body sings hymns, sometimes the blues but always the body hums along. Healing is a process, a journey toward balance, connectedness, meaning, wholeness, rather than an outcome.
