Realising REDD+

National Strategy and Policy Options

CIFOR REDD+ must be transformational. REDD+ requires broad institutional and governance reforms, such as tenure, decentralisation, and corruption control. These reforms will enable departures from business as usual, and involve communities and forest users in making and implementing policies that affect them. Policies must go beyond forestry. REDD+ strategies must include policies outside the forestry sector narrowly defined, such as agriculture and energy, and better coordinate across sectors to deal with non-forest drivers of deforestation and degradation. Performance-based payments are key, yet limited. Payments based on performance directly incentivise and compensate forest owners and users. But schemes such as payments for environmental services (PES) depend on conditions, such as secure tenure, solid carbon data and transparent governance, that are often lacking and take time to change. This constraint reinforces the need for broad institutional and policy reforms. We must learn from the past. Many approaches to REDD+ now being considered are similar to previous efforts to conserve and better manage forests, often with limited success. Taking on board lessons learned from past experience will improve the prospects of REDD+ effectiveness. National circumstances and uncertainty must be factored in. Different country contexts will create a variety of REDD+ models with different institutional and policy mixes. Uncertainties about the shape of the future global REDD+ system, national readiness and political consensus require flexibility and a phased approach to REDD+ implementation.

A History of Interior Design

Laurence King Publishing Delivers the inside story on 6,000 years of personal and public space. John Pile acknowledges that interior design is a field with unclear boundaries, in which construction, architecture, the arts and crafts, technology and product design all overlap.

Export Management

Discovery Publishing House Contents: Product Suitability and Packaging for Export, Small Business in Export, Export- Oriented Financial Institutions, The Banking System: Its Role in Export Development, Protecting Your Product, Export Marketing Techniques, Monitoring Competitors Promotional Activities, Import Operations, In-House Information Units for Import Agencies.

Organizational Behaviour and Work

A Critical Introduction

Oxford University Press A critical yet accessible introduction to organisational behaviour and work, this book will help you understand the complexities of organisational life and evaluate modern business practices. Classic organisational behaviour topics such as team-working, motivation, and change are complemented by core critical approaches such as power and control, organisational misbehaviour, and health and well-being through a clear three-part structure. Students are encouraged to look beyond a descriptive approach and truly engage with the content. Examples and 'Stop and Think' boxes placed throughout chapters, as well as end-of-chapter case studies with accompanying questions, provide the opportunity for this engagement and show how each chapter's theoretical coverage applies in real-life business situations.

Global Warming in Local Discourses

How Communities Around the World Make Sense of Climate Change

Global news on anthropogenic climate change is shaped by international politics, scientific reports and voices from transnational protest movements. This timely volume asks how local communities engage with these transnational discourses. The chapters in this volume present a range of compelling case studies drawn from a broad cross-section of local communities around the world, reflecting diverse cultural and geographical contexts. From Greenland to northern Tanzania, it illuminates how different understandings evolve in diverse cultural and geographical contexts while also revealing some community.

Why Does Cargo Spend Weeks in Sub-Saharan African Ports?

Lessons from Six Countries

World Bank Publications This book proposes policy options to reduce cargo dwell time in ports in Sub-Saharan Africa.

The Science and Practice of Landscape Stewardship

Cambridge University Press This book introduces the principles of landscape stewardship in relation to sustainability governance, applying them to a broad range of land-use systems.

A Theoretical and Practical Contribution to Supply Chain Robustness

Developing a Schema for Robustness in Dyads

Universitätsverlag der TU Berlin In dieser Doktorarbeit werden vier individuelle Untersuchungen im Bereich der Supply Chain Robustheit durchgeführt. Das übergeordnete Ziel dieser ist die Entwicklung eines konzeptionellen Rahmens der Supply Chain Robustheit. Dafür wird aktuelle Literatur in diesem Forschungsfeld zusammengeführt und ein Schema mit Bestimmungsfaktoren zur Erhöhung von Robustheit in Käufer-Lieferantenbeziehungen entwickelt. Motivation für diese wissenschaftliche Arbeit ist ein beobachteter Anstieg von Unterbrechungen in Supply Chains sowie eine weiterhin anhaltende Outsourcing-Tendenz und die dadurch wachsende Bedeutung von Beziehungen in Supply Chains. In dieser Arbeit werden zwei Literaturstudien sowie zwei empirische Untersuchungen durchgeführt. Erstens wird die Methode der ‚Systematic Literature Reviews‘ für das Forschungsgebiet des Supply Chain Managements überarbeitet. Zweitens erfolgt die Entwicklung eines konzeptionellen Rahmens sowie eine Definition des Konstruktes Supply Chain Robustheit. Drittens werden Bestimmungsfaktoren zur Schaffungen von Robustheit in Käufer-Lieferantenbeziehungen identifiziert und in einem vierten Schritt validiert. This doctoral thesis develops four individual research studies on supply chain robustness. The overall goal of these studies is to develop a conceptual framework of supply chain robustness by consolidating current literature in the field, and, drawing on that framework, to construct a schema of determinants that facilitate robustness in buyer-supplier relationships. This

research is motivated by an observed increase of supply chain disruptions, as well as an increasing trend towards outsourcing and a subsequent rise in the importance of supply chain relationships. It methodologically builds on two literature studies and two empirical studies. The thesis develops refined methodology guidelines for conducting literature reviews in supply chain management, proposes a conceptual framework for supply chain robustness putting forward a formal definition of the construct, and identifies and validates four relational determinants that facilitate robustness against disruptions in buyer-supplier relationships.

Understanding Development

Polity "Drawing on a wide range of case studies from across the globe, this book explores such areas as: health and population growth, conflict and security, global inequality and poverty, fair trade and trade liberalization, gender and education, foreign aid and debt, and sustainability and the environment. This issues-driven text focuses on the debates that have generated the most interest and passion among practitioners and non-practitioners alike. Always attentive to the contested and plural nature of the field, it makes the case for a genuinely interdisciplinary approach which takes full account of the impact of globalization."--Publisher.

Business for Society

Routledge This book is about promoting corporate responsibility in its original meaning: businesses should have a positive impact on society, and society should not only be a lever of making a profit. When we treat social responsibility as an external function of the core business, we are exposed to the worst. Business for Society seeks to redress the balance and promotes the original idea of corporate responsibility. This first book in the series of the same name sets the scene and presents the key theories across the various management disciplines to answer the following questions: 'How, why and under what conditions can business act for society?' The book narrows and discusses examples of businesses which are making impressive strides in delivering positive impacts for society as well as their bottom lines; but as the concept of corporate responsibility has become more mainstream in recent years, many organisations have adopted the term and reduced it to a marketing message. Areas covered include a historical perspective on the hijacking of business responsibility towards society, management knowledge and value, the Business for Society project against hijacking, accounting for society, finance for society and governance for society and democracy. The book will be of interest for scholars and students in the fields of corporate social responsibility, business ethics and governance.

Seafood research from fish to dish

Quality, safety and processing of wild and farmed seafood

Wageningen Academic Publishers In this book, scientists from various disciplines address the advances in seafood research with respect to quality, safety, consumer's demands and processing of wild and farmed fish. The nutritional properties of marine lipids and lipid oxidation from model systems to seafood are presented. Several contributions on the effects of natural anti-oxidants to prevent oxidation are also included. Effects of dietary factors on muscle tissue quality, pre-rigor processing and brining of farmed cod are covered. The development of rigor mortis and the quality of muscle in relation to commercial and experimental slaughter techniques are also discussed. Consumer's knowledge, perception and need for information about seafood are discussed. Topics such as shelf life and microbial quality of seafood are covered in a range of contributions. Inactivation of micro organisms or biopreservation of seafood are included. Attention is paid to the development of the Quality Index Method for the evaluation of the quality of fresh fish and products. The characterisation and the quality of processed by-products are also presented. The presence of trace elements and organic contaminants in variety of seafood products is highlighted. Finally, several contributions regarding advanced methodologies to determine the quality of seafood are presented. This book will be of interest to anybody concerned with quality and safety of fish throughout the entire chain from catch to consumer.

The CDC Field Epidemiology Manual

Oxford University Press, USA Preceded by Field epidemiology / edited by Michael B. Gregg. 3rd ed. c2008.

Governance and Business Models for Sustainable Capitalism

Routledge *Governance and Business Models for Sustainable Capitalism* touches upon many of the central themes of today's debate on business and society. In particular, it brings attention to a recurrent tension between efficiency, innovation, and productivity on the one hand, and fairness, equity, and sustainability on the other. The book argues that we need radical rethinking of business models and economic governance, beyond the classical doctrine, which sees social and ecological responsibility as lying with public-policy regulation of purely profit-seeking firms. In spite of the popular CSR agenda, business – as we know it today – is both too transient and too limited in its motivation to carry the regulatory burden. We need to adopt a much wider concept of 'partnered governance', where advanced states and pioneering companies work together to raise the social and environmental bar. The book suggests that civil engagements based on moral rather than formal rights, and amplified through the media, may provide a healthy challenge both to autocratic planning and to solely profit-centered commercialization. The book also proposes a triple cycle theory of innovation for sustainability: a novel framing of the efficacy of green and prosocial entrepreneurship as intertwined with political visions and supportive institutions. In addition, the book offers reflections on the ways in which further digital robotization may enable transition to an 'Agora Economy' where productive efficiency is combined with expanded civic freedoms. Aimed primarily at researchers, academics, and students in the fields of political economy, business and society, corporate governance, business ethics, corporate social responsibility, and sustainability, the book will additionally be of value to practitioners, supplying them with information regarding the challenges associated with the shaping of sustainable or 'civilised' market capitalism for a better world.

The Governance Revolution

What Every Board Member Needs to Know, NOW!

Walter de Gruyter GmbH & Co KG Boards of directors are sitting ducks. Shareholders complain and even attack, management manipulates, and individual board members have little power, able to act only as part of the board as a whole. Governance issues are front and center, yet there is often little understanding, even among board members, of the key role that they play. Written in an accessible and human voice, *The Governance Revolution: What Every Board Member Needs to Know, NOW!* provides information and context essential to anyone seeking to understand how corporations and their stewards—the board of directors—can and should function in the volatile world we inhabit. Deborah Hicks Midanek offers useful insight into what board members of corporations actually do, the current standards for board members and why they exist. She includes a timely discussion of how clarity of purpose can improve board and director effectiveness. Informed by her long experience serving public, private, and family owned corporate boards as well as those of charitable, and government organizations, she provides essential context regarding the evolution of board practice as well as candid discussion of the issues involved in the relentless effort to improve corporate governance processes. Focused mainly on the dominant public corporation, she also explores the special challenges of serving private and family owned as well as nonprofit and public agency boards. Written by a seasoned board member, and liberally laced with stories and cases illustrating the tricky issues directors wrestle with, this book is the essential common-sense companion for anyone working with a board, serving on a board, or wanting to do so. Directors, aspiring directors, investors, and students of corporate behavior will benefit from this highly readable description of the cloistered boardroom. Clean Electricity from Photovoltaics

World Scientific Photovoltaic cells provide clean, reversible electrical power from the sun. Made from semiconductors, they are durable, silent in operation and free of polluting emissions. In this book, experts from all sectors of the PV community — materials scientists, physicists, production engineers, economists and environmentalists — give their critical appraisals of where the technology is now and what its prospects are. Contents: The Past and Present (M D Archer) Device Physics of Silicon Solar Cells (J O Schumacher & W Wettling) Principles of Cell Design (J Poortmans et al.) Crystalline Silicon Solar Cells (M A Green) Amorphous Silicon Solar Cells (C R Wronski & D E Carlson) Cadmium Telluride Solar Cells (D Bonnet) Cu(In,Ga)Se₂ Solar Cells (U Rau & H W Schock) Super-High Efficiency III-V Tandem and Multijunction Cells (M Yamaguchi) Organic Photovoltaic Devices (J J M Halls & R H Friend) Quantum Well Solar Cells (J Nelson) Thermophotovoltaic Generation of Electricity (T J Coutts) Concentrator Cells and Systems (A Luque) Cells and Systems for Space Applications (C M Hardingham) Storage of Electrical Energy (R M Dell) Photovoltaic Modules, Systems and Applications (N M Pearsall & R Hill) The Photovoltaic

Business: Manufacturers and Markets (B McNelis)The Economics of Photovoltaic Technologies (D Anderson)The Outlook for PV in the 21st Century (E H Lysen & B Yordi) Readership: Physicists, chemists and engineers. Keywords:Electricity;Photovoltaics;Cadmium;Solar CellsReviews:"... is an excellent resource for its intended readership of students, scientists and technologists working in the area ... it is well indexed, and includes a handy list of useful web and library references. At the very least, the book deserves a place in the library of every research institution and company working on renewable energy."Nature "With a broad range of coverage, many references in each chapter, and an appendix listing useful quantities, factors and symbols, this book would be an excellent reference source for any one working in the field of photovoltaics."IEEE Electrical Insulation Magazine "It is timely, up-to-date and a very comprehensive work. The chapters are written by leading experts in their field who are able to communicate the technology and their enthusiasm ... Photovoltaic R&D is a multi-disciplinary activity, and most chapters should be accessible to advanced undergraduate students, postgraduates and researchers with a wide range of backgrounds. It can be recommended to those starting a PhD in the area and to existing researchers in other fields who wish to find out what all the excitement is about."Contemporary Physics

Final Report of the International Commission for the Study of Locks

PIANC

Medicinal Orchids of Asia

Springer This unique book brings together a wealth of data on the botanical, ethno-medicinal and pharmacological aspects of over 500 species of Asian medicinal orchids. It starts off by explaining the role and limitations of complimentary and herbal medicines, and how traditional Asian medicine differs from Western, "scientific" medicine. The different Asian medical traditions are described, as well as their modes of preparing herbal remedies. The core of the book presents individual medicinal orchid species arranged by genera. Each species is identified by its official botanical name, synonyms, and local names. Its distribution, habitat and flowering season, uses and pharmacology are described. An overview sums up the research findings on all species within each genus. Clinical observations are discussed whenever available, and possible therapeutic applications are highlighted. The book closes with chapters on the conservation of medicinal orchids and on the role of randomized clinical trials.

The Rasputin Effect: When Commensals and Symbionts Become Parasitic

Springer This volume focuses on those instances when benign and even beneficial relationships between microbes and their hosts opportunistically change and become detrimental toward the host. It examines the triggering events which can factor into these changes, such as reduction in the host's capacity for mounting an effective defensive response due to nutritional deprivation, coinfections and seemingly subtle environmental influences like the amounts of sunlight, temperature, and either water or air quality. The effects of environmental changes can be compounded when they necessitate a physical relocation of species, in turn changing the probability of encounter between microbe and host. The change also can result when pathogens, including virus species, either have modified the opportunist or attacked the host's protective natural microflora. The authors discuss these opportunistic interactions and assess their outcomes in both aquatic as well as terrestrial ecosystems, highlighting the impact on plant, invertebrate and vertebrate hosts.

Inflammatory Breast Cancer: An Update

Springer Science & Business Media Inflammatory breast cancer is the most deadly subtype of breast cancer because it can spread to other organs despite of multidisciplinary approach. However, the molecular characteristic of this aggressive disease is yet to be established. This book is the one of the few textbooks that summarizes the latest information dated to inflammatory breast cancer. The uniqueness of this book is that it has summarized the latest molecular and mechanistic findings, which may lead to novel diagnostic tool or therapeutic approach to fight this deadly disease.

Democracy in an Age of Corporate Colonization

Developments in Communication and the Politics of Everyday Life

SUNY Press According to Deetz, our obsolete understanding of communication processes and power relations prevents us from seeing the corporate domination of public decision making. For most people issues of democracy, representation, freedom of speech, and censorship pertain to the State and its relationship to individuals and groups, and are linked to occasional political processes rather than everyday life decisions. This work reclaims the politics of personal identity and experience within the work environment as a first step to a democratic form of public decision-making appropriate to the modern context.

Devolution, Port Governance and Port Performance

Elsevier The relationship between ports and governments has changed profoundly over the past quarter of a century. Many governments have sought to extract themselves from the business of port operations and, in many cases, the provision of port services has devolved to local governments, communities or private management and administration. As such devolution implies a change in governance model, this trend raises questions about consequent performance. This issue examines the changed port management environment, focusing particularly on government policies such as devolution, regulatory reform and newly imposed governance models, all of which have exerted a significant influence over the nature of that changed environment. The issue is structured so as to first explore the devolution and port reform approaches for 14 countries or regions, before examining how ports are governed and what the choice of governance might mean for their performance. Part I introduces the issue, and provides a framework for defining the basic concepts involved in devolution; it paints a picture of the current port environment, its likely future evolution and the expected impact this will have on the functioning of ports. Part II examines the port industry in 14 countries or administrations, and presents the thinking behind any devolution programs that have been implemented. Part III focuses on port governance and devolution generally, and examines governance from both strategic management and economics perspectives, including topics such as governance models, supranational governance and stakeholder conflict. Part IV examines the measurement of port performance and closes by providing conclusions and a future research agenda. This issue will be of interest to port managers, government officials and academics alike. *Examines the relationship between ports and governments with a focus on devolution *Divided into sections that provide an overview, evaluate the port industry, discuss port governance, and suggest new measures of port performance *14 countries or regions are addressed

The Welfare of Fish

Springer Nature This book investigates how fish experience their lives, their amazing senses and abilities, and how human actions impact their quality of life. The authors examine the concept of fish welfare and the scientific knowledge behind the inclusion of fish within the moral circle, and how this knowledge can change the way we treat fish in the future. In many countries fish are already protected by animal welfare legislation in the same way as mammals, but in practice there is still a major gap between how we ethically view these groups and how we actually treat them. The poor treatment of fish represents a massive animal welfare problem in aquaculture and fisheries, both in terms of the number of animals affected and the severity of the welfare issues. Thanks to its interdisciplinary scope, this thought-provoking book appeals to professionals, academics and students in the fields of animal welfare, cognition and physiology, as well as fisheries and aquaculture management.

Quantitative Methods for Business

Financial Times/Prentice Hall Taking a non-threatening, non-theoretical approach to a subject students often find difficult, this book avoids rigorous mathematics and concentrates on applying quantitative ideas to the work situation.

Signal Transduction by Reactive Oxygen and Nitrogen Species: Pathways and Chemical Principles

Springer Science & Business Media This was the idea behind the conception of this new book.

Export Planning

A 10-step approach -2nd edition-

BoD - Books on Demand When a company initiates export development and internationalisation, it is essential to follow a systematic strategy formulation and decision-making process. Export Planning (2nd edition) provides a methodology to plan and achieve globalisation. This process of export planning consists of four phases: export policy, export audit, export plan, and export roll-out. Export Planning describes these 4 phases, and provides a 10-step guide for the construction of an international marketing plan. Export Planning will enable readers to: 1. systematically select and plan entries into new international markets; 2. enhance the chances of success through an integrated review of analysis and strategy by means of marketing, logistics, organization and finance; 3. assemble a sound line of reasoning from strategy to implementation. Export Planning is a practical book. It describes export and international marketing at a strategic, tactical and operational level, and combines theoretic models with relevant practical experience. New to this 2nd edition is an additional chapter on the implementation of the export transaction. This book is intended for bachelor and graduate students at business schools and universities. This book is also useful for anyone who wants to know more about export planning, international marketing and international market development.

Printing Images in Antwerp

The Introduction of Printmaking in a City : Fifteenth Century to 1585

Major Chemical and Petrochemical Companies of Europe 1989/90

Springer

Histories of Technology, the Environment and Modern Britain

UCL Press Histories of Technology, the Environment and Modern Britain brings together historians with a wide range of interests to take a uniquely wide-lens view of how technology and the environment have been intimately and irreversibly entangled in Britain over the last 300 years. It combines, for the first time, two perspectives with much to say about Britain since the industrial revolution: the history of technology and environmental history. Technologies are modified environments, just as nature is to varying extents engineered. Furthermore, technologies and our living and non-living environment are both predominant material forms of organisation - and self-organisation - that surround and make us. Both have changed over time, in intersecting ways. Technologies discussed in the collection include bulldozers, submarine cables, automobiles, flood barriers, medical devices, museum displays and biotechnologies. Environments investigated include bogs, cities, farms, places of natural beauty and pollution, land and sea. The book explores this diversity but also offers an integrated framework for understanding these intersections.

The Republican Alternative

The Netherlands and Switzerland Compared

Amsterdam University Press The Republican Alternative seeks to move beyond the mere notion of scholarly inquiry into the republic—the subject of recent rediscovery by political historians interested in Europe’s intellectual heritage—by investigating the practical similarities and differences between two early modern republics, as well as their self-images and interactions during the turbulent seventeenth and eighteenth centuries. Among the world’s most economically successful societies, Switzerland and the Netherlands laid much of the foundation for their prosperity during the early modern period discussed here. This volume attempts to clarify the special character of these two countries as they developed, including issues of religious plurality, the republican form of government, and an increasingly commercially-driven agrarian society.

Materialising Identity

The Co-construction of the Gotthard Railway and Swiss National Identity

Amsterdam University Press Since 1882, the Gotthard Railway, with its fifteen-kilometer long tunnel under the Gotthard Mountains, has provided a crucial international link through the Swiss Alps, between North-Western Europe and Italy. Its symbolic meaning has never sunk into oblivion. In Swiss society today, references to the railway evoke images of a technological railway project, with allusions to Swiss history, alpine nature, and national identity. Reading this book helps us understand contemporary discussions about the future of the Gotthard Railway, the region in which it lies, and the Swiss national identity. To illustrate to what extent historical actors co-constructed the railway and Swiss identity, the book starts with an engineering discussion about tunneling methods. Then it examines reactions in Switzerland to the inauguration of the railway line. Subsequently, it describes how the railway line was portrayed in travel guides of the belle époque. The last chapter captures the glory days of the Gotthard myth, before and during the Second World War, with a focus on novels and plays in which the Gotthard Tunnel construction occurs. This historical overview offers insight into the multiple roles that technology plays in the construction of a sense of national identity.

The Naval Arms Trade

Oxford University Press The naval arms trade has been the focus of attention in recent years owing to such events as the tanker war in the Persian Gulf and the acquisition of a nuclear-powered submarine by India. This book discusses the interrelated factors involved in the transfer of naval systems, including maritime aircraft and guided missiles, and technology. It also describes the production processes for selected naval arms. The book presents an overview of the naval arms market, focusing on the principal supplier countries, and a detailed analysis of the procurement processes as illustrated by Argentina, Australia, Brazil, Canada, India and New Zealand.

Rethinking L1 Education in a Global Era

Understanding the (Post-)National L1 Subjects in New and Difficult Times

Springer Nature This book brings together a range of scholars from 10 different countries to address the contemporary state of play in national standard language education – i.e. the L1 subjects. It seeks to understand the field from within a comparative-historical and transnational frame. Four thematic threads are woven through the volume: educationalisation; globalisation; pluriculturalism; and technologization. The chapters range over various aspects of L1 as a school subject: literature, language and literacy; reading and writing; media and digital technology; the dialogue between curriculum inquiry and Didaktik studies; the continuing relevance of Bildung; the significance of history and nation; and new challenges of culture and environment in the face of climate change. The book concludes with a reflection on the prospects for L1 education today and tomorrow, in a now thoroughly globalised context and, accordingly, deeply implicated in a necessary new project of nation re-building.

Luxury in the Low Countries

Miscellaneous Reflections on Netherlandish Material Culture, 1500 to the Present

ASP / VUBPRESS / UPA Painting a panoramic view of conspicuous consumption in the Netherlands and Flanders from 1500 to the present, this collection of essays explores the economic forces that produce a boom in luxury goods. Working from disciplines such as archaeology, art history, historical ethnology, linguistics, and media studies, these scholarly contributors explore both the wealth and the social display that fuels the search for rare commodities.

Comparative Law

A Handbook

Bloomsbury Publishing This innovative, refreshing, and reader-friendly book is aimed at enabling students to familiarise themselves with the challenges and controversies found in comparative law. At present there is no book which clearly explains the contemporary debates and methodological innovations found in modern comparative law. This book fills that gap in teaching at undergraduate level, and for postgraduates will be a starting point for further reading and discussion. Among the topics covered are: globalisation, legal culture, comparative law and diversity, economic approaches, competition between legal systems, legal families and mixed systems, comparative law beyond Europe, convergence and a new *ius commune*, comparative commercial law, comparative family law, the 'common core' and the 'better law' approaches, comparative administrative law, comparative studies in constitutional contexts, comparative law for international criminal justice, judicial comparativism in human rights, comparative law in law reform, comparative law in courts and a comparative law research project. The individual chapters can also be read as stand-alone contributions and are written by experts such as Masha Antokolskaia, John Bell, Roger Cotterell, Sjef van Erp, Nicholas Foster, Patrick Glenn, Andrew Harding, Peter Leyland, Christopher McCrudden, Werner Menski, David Nelken, Anthony Ogus, Esin Örüçü, Paul Roberts, Jan Smits and William Twining. Each chapter begins with a description of key concepts and includes questions for discussion and reading lists to aid further study. Traditional topics of private law, such as contracts, obligations and unjustified enrichment are omitted as they are amply covered in other comparative law books, but developments in other areas of private law, such as family law, are included as being of current interest.

Sustainable Modernity

The Nordic Model and Beyond

Routledge The Open Access version of this book, available at <https://www.taylorfrancis.com/books/e/9781351765633>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. In the 21st century, Norway, Denmark and Sweden remain the icons of fair societies, with high economic productivity and quality of life. But they are also an enigma in a cultural-evolutionary sense: though by no means following the same socio-economic formula, they are all cases of a "non-hubristic", socially sustainable modernity that puzzles outside observers. Using Nordic welfare states as its laboratory, *Sustainable Modernity* combines evolutionary and socio-cultural perspectives to illuminate the mainsprings of what the authors call the "well-being society". The main contention is that the Nordic uniqueness is not merely the outcome of one particular set of historical institutional or political arrangements, or sheer historical luck; rather, the high welfare creation inherent in the Nordic model has been predicated on a long and durable tradition of social cooperation, which has interacted with global competitive forces. Hence the socially sustainable Nordic modernity should be approached as an integrated and tightly orchestrated ecosystem based on a complex interplay of cooperative and competitive strategies within and across several domains: normative-cultural, socio-political and redistributive. The key question is: Can the Nordic countries uphold the balance of competition and cooperation and reproduce their resilience in the age of globalization, cultural collisions, the digital economy, the fragmentation of the work/life division, and often intrusive EU regulation? With contributors providing insights from the humanities, the social sciences and evolutionary science, this book will be of great interest to students and scholars of political science, sociology, history, institutional economics, Nordic studies and human evolution studies.

The Palgrave Handbook of Critical Physical Geography

Springer This handbook is recognition of the need to better integrate physical and human geography. It combines a collection of work and research within the new field of Critical Physical Geography, which gives critical attention to relations of social power with deep knowledge of a particular field of biophysical science. Critical Physical Geography research accords careful attention to biophysical landscapes and the power relations that have increasingly come to shape them, and to the politics of environmental science and the role of biophysical inquiry in promoting social and environmental justice. The Palgrave Handbook of Critical Physical Geography lays out the scope and guiding principles of Critical Physical Geography research. It presents a carefully selected set of empirical work, demonstrating the range and intellectual strength of existing integrative work in geography research. This handbook is the first of its kind to cover this emerging discipline and will be of significant interest to students and academics across the fields of geography, the environment and sustainability.

Corporate Governance Regimes Convergence and Diversity

Oxford University Press on Demand This book seeks to examine the relationship between corporate law rules and economic performance. Contributors examine the design of the two main systems of corporate governance to ascertain which bundle of rules is likely to support the emergence of a strong system of governance. They seek to show that the performance of companies is linked to different patterns of shareholding, legal rules, and non-legal relationships.

A Global History of Early Modern Violence

This is the first extensive analysis of large-scale violence and the methods of its restraint in the early modern world. Using examples from Asia, Africa, the Americas and Europe, it questions the established narrative that violence was only curbed through the rise of western-style nation states and civil societies. Global history allows us to reframe and challenge traditional models for the history of violence and to rethink categories and units of analysis through comparisons. By decentring Europe and exploring alternative patterns of violence, the contributors to this volume articulate the significance of violence in narratives of state- and empire-building, as well as in their failure and decline, while also providing new means of tracing the transition from the early modern to modernity.

Leaf Defence

Oxford University Press, USA Leaves are among the most abundant organs on earth and are a defining feature of most terrestrial ecosystems. However, a leaf is also a potential meal for a hungry animal and the question therefore arises, why does so much foliage survive in nature? What mechanisms protect leaves so that, on a global scale, only a relatively small proportion of living leaf material is consumed? Leaf survival is in large part due to two processes: firstly, leaf-eating organisms fall prey to predators (top-down pressure on the herbivore); secondly, leaves defend themselves (bottom-up pressure on the herbivore). Remarkably, these two types of event are often linked; they are controlled and coordinated by plants and the molecular mechanisms that underlie this are now beginning to emerge. This novel text focuses exclusively on the leaf, on the herbivorous organisms that attack leaves, and the mechanisms that plants use to defend these vital organs. It begins with an assessment of the scale of herbivory, before examining direct physical and chemical defences on leaf surfaces and within the leaf itself. Although some leaf defences are easily seen, most operate at the molecular level and are therefore invisible to the naked eye. Many of these recently elucidated mechanisms are described. Throughout the book, perspectives from both the laboratory and the field are combined. A central feature of the work is its emphasis on the coevolution of leaf defences and the digestive tracts of animals including humans, making the book of relevance in understanding the role of leaf defences in agriculture. Leaf Defence is suitable for senior undergraduate and graduate students taking courses in plant science, as well as a broader audience of biologists and biochemists seeking a comprehensive and authoritative overview of this exciting and emerging topic.

Finance and Economy for Society

Integrating Sustainability

Emerald Group Publishing The latest volume of Critical Studies on Corporate Responsibility, Governance and Sustainability examines the social, economic and environmental impacts of corporations, and the real effects of corporate governance, CSR and business sustainability on societies in different regions.
