## **KEY=PHYSICIANS - HEATH CRANE**

---

**Physician's Guide to End-of-life Care** ACP Press Patients want better end-of-life care, and physicians want to provide it. But in a society where high-tech interventions are often emphasized, moving from curative treatment to comfort care is sometimes difficult. Often, patients in the last phase of life want both continued aggressive treatments and the benefits of palliative measures. Many physicians have never been trained in palliative measures and end-of-life care. It is a challenging area but one in which clinicians can enhance the quality of life for seriously ill patients. **End-of-Life-Care: A Practical Guide, Second Edition** McGraw Hill Professional The most thorough text available on providing patients and families with quality end-of-life care "The study/learning questions at the end of each chapter make this book an excellent resource for both faculty who wish to test knowledge, and individual learners who wish to assess their own learning....The book is well written and easy to read. 3 Stars."--Doody's Review Service End of Life Care: A Practical Guide offers solution-oriented coverage of the real-world issues and challenges that arise daily for clinicians caring for those with life-limiting illnesses and conditions. End of Life Care: A Practical Guide includes specific clinical guidance for pain management and other common end of life symptoms. The second edition has been made even more essential with the addition of chapter-ending Q&A for self assessment and board review, new coverage of multicultural medicine, an increased number of algorithms to assist decision making on complicated clinical, legal, and ethical issues. Six sections walk you through the complexities of caring for patients who are nearing the end of life: Preparing Patients for End of Life Management of Symptoms Diagnostic and Invasive Interventions Ethical Dilemmas Special Populations Diversity No other text better assists physicians and other clinicians in providing patients near

the end of life with support, guidance, and hope in the face of “hopelessness” than *End of Life Care: A Practical Guide*. **Physician's Guide to Coping with Death and Dying** McGill-Queen's Press - MQUP In "A Physician's Guide to Coping with Death and Dying" Jan Swanson and Alan Cooper, a physician and a clinical psychologist with many years of experience, offer insights to help medical students, residents, physicians, nurses, and others become more aware of the different stages in the dying process and learn how to communicate more effectively with patients and their families. They also discuss the ways physicians and other caregivers can learn to reduce their own stress levels and avoid the risk of burnout, allowing them to achieve balance in their lives and be more effective professionally. **A Physician's Guide to Pain and Symptom Management in Cancer Patients** JHU Press Janet L. Abrahm argues that all causes of suffering experienced by people with cancer, be they physical, psychological, social, or spiritual, should be treated at all stages: at diagnosis, during curative therapy, in the event that cancer recurs, and during the final months. In the second edition of this symptom-oriented guide, she provides primary care physicians, advanced practice nurses, internists and oncologists with detailed information and advice for alleviating the stress and pain of patients and family members alike. The new edition includes the latest information on patient and family communication and counseling, on medical, surgical, and complementary and alternative treatments for symptoms caused by cancer and cancer treatments, and on caring for patients in the last days and their bereaved families. Updated case histories, medication tables, Practice Points, and bibliographies provide clinicians with the information they need to treat their cancer patients effectively and compassionately. **Physician Assistant: A Guide to Clinical Practice E-Book** Elsevier Health Sciences Prepare for every stage of your physician assistant career with *Physician Assistant: A Guide to Clinical Practice, 5th Edition* - the one text that takes you from your PA coursework through clinical practice! Concise, easy to read, and highly visual, this all-in-one resource by Ruth Ballweg, Edward M. Sullivan, Darwin Brown, and Daniel Vetrosky delivers the current, practical guidance you need to know to succeed in any setting. Consult this title on your favorite e-reader with intuitive search tools and adjustable font sizes. Elsevier eBooks provide instant portable access to your entire library, no matter what device you're using or where you're located. Master all the core competencies you need to know for certification or recertification. Navigate today's professional challenges with new chapters on NCCPA Specialty Recognition; Communication Issues; the Electronic Health Record; Patient Safety and Quality of Care; Population-Based Practice; and Physician Assistants and Supervision. Meet ARC-PA accreditation requirements with coverage of key topics such as Student Safety in Clinical Settings, Health Care Delivery Systems, Population-Based Practice, and Mass Casualties/Disasters. Keep up with the PA competencies that are endorsed by the AAPA, PAEA, NCCPA, and ARC-PA. Master key concepts and clinical applications thanks to a succinct, bulleted writing style; convenient tables; practical case studies; and clinical application questions throughout. Retain what you've learned and easily visualize every aspect of clinical practice with a new full-color design and illustrations throughout. Explore global options with expanded coverage of physician assistants in international medicine. **Taylor's Diagnostic and Therapeutic Challenges A Handbook** Springer Science & Business Media Primary care

physicians in the U.S. and abroad widely trust and use Dr. Robert Taylor's acclaimed "Family Medicine: Principles and Practice, 6/E". This derivative handbook capitalizes on that success to address clinical problems that pose diagnostic and therapeutic challenges for primary care physicians. Chapters cover the diagnosis of a multitude of difficult diseases and disorders, including diabetes mellitus, fatigue, and chronic pain. The etiology of the conditions is also highlighted to help physicians select the most effective therapeutic courses of treatment. Contributors to the text include some of the most prestigious names in the field. **The Medicalization of Birth and Death** Johns Hopkins University Press The Medicalization of Birth and Death is required reading for academics, patients, providers, policymakers, and anyone else interested in how policy shapes healthcare options and limits patients and providers during life's most profound moments. **A Physician's Guide to Coping with Death and Dying** McGill-Queen's Press - MQUP Education about death and dying has been almost ignored in medical schools. Recently, however, it has become increasingly obvious that the preferences of dying patients are being ignored, leaving many patients to die lonely, scared, and in pain. There is a growing realization that physicians can help dying patients achieve a more peaceful death and increased recognition that good end-of-life care is not just the province of specialized hospice physicians or nurses. In *A Physician's Guide to Coping with Death and Dying* Jan Swanson and Alan Cooper, a physician and a clinical psychologist with many years of experience, offer insights to help medical students, residents, physicians, nurses, and others become more aware of the different stages in the dying process and learn how to communicate more effectively with patients and their families. They also discuss the ways physicians and other caregivers can learn to reduce their own stress levels and avoid the risk of burnout, allowing them to achieve balance in their lives and be more effective professionally. The authors use case examples and thought-provoking exercises to provide a personal learning experience. *A Physician's Guide to Coping with Death and Dying* includes an extensive bibliography and a unique web resource section with contacts to many organizations working with patients suffering from life-threatening illnesses. **Office Care Geriatrics** Lippincott Williams & Wilkins This practical, ready-access reference provides clinicians and students with evidence-based strategies for the care of older patients. The book is organized to yield quick answers to questions arising during the patient encounter. The contributors offer pragmatic management guidelines appropriate for the complexities of multiple problems and advanced age, and emphasize a disease management approach. **Resolving Ethical Dilemmas A Guide for Clinicians** Lippincott Williams & Wilkins This timely Fourth Edition offers clinicians expert guidance in approaching a wide range of ethical dilemmas and developing an action plan. Most chapters include real-life sample cases that the author walks through, discussing the salient issues and how to approach them. This edition includes a new chapter on ethical issues in cross-cultural medicine and new material on conscientious objection by physicians in reproductive health and other areas. Other topics addressed include disclosure of errors to patients, gifts to physicians from drug companies, involuntary psychiatric treatment, genomic medicine, and ethical issues during public health emergencies such as pandemics. The updated discussion of organ transplantation includes increasing the donor pool and non-heart beating donors.

**Advanced Therapy of Breast Disease** PMPH-USA The information surveyed in this volume is designed to provide the clinician with an expert overview of the current state of the art in breast cancer management. It should provide at least a flavor of the major paradigm shift that is occurring in this rapidly evolving field. Breast cancer management is moving away from a "kill or cure" model and advancing toward a model focused on strategies of prevention and of long-term management of breast cancer as a chronic disease. The acceptance of this new paradigm by patients and clinicians alike will represent a major focus for the twenty-first century.

**Issues in Palliative Care Research** Oxford University Press Symptom control, management of psychosocial and spiritual concerns, decision-making consistent with values and goals, and care of the imminently dying that is appropriate and sensitive are among the critical issues in palliative care. This book explores progress made and future goals.

**The Best Care Possible A Physician's Quest to Transform Care Through the End of Life** Penguin A doctor on the front lines of hospital care illuminates one of the most important and controversial social issues of our time. It is harder to die in this country than ever before. Though the vast majority of Americans would prefer to die at home—which hospice care provides—many of us spend our last days fearful and in pain in a healthcare system ruled by high-tech procedures and a philosophy to "fight disease and illness at all cost." Dr. Ira Byock, one of the foremost palliative-care physicians in the country, argues that how we die represents a national crisis today. To ensure the best possible elder care, Dr. Byock explains we must not only remake our healthcare system but also move beyond our cultural aversion to thinking about death. The Best Care Possible is a compelling meditation on medicine and ethics told through page-turning life-or-death medical drama. It has the power to lead a new national conversation.

**Textbook of Palliative Medicine** CRC Press Textbook of Palliative Medicine provides an alternative, truly international approach to this rapidly growing specialty. This textbook fills a niche with its evidence-based, multi-professional approach and global perspective ensured by the international team of editors and contributing authors. In the absence of an international curriculum for the study of palliative medicine, this textbook provides essential guidance for those both embarking upon a career in palliative medicine or already established in the field, and the structure and content have been constructed very much with this in mind. With an emphasis on providing a service anywhere in the world, including the important issue of palliative care in the developing nations, Textbook of Palliative Medicine offers a genuine alternative to the narrative approach of its competitors, and is an ideal complement to them. It is essential reading for all palliative care physicians in training and in practice, as well as palliative care nurses and other health professionals in the palliative care team

**Cardiovascular Disease in the Elderly** Springer Science & Business Media Aging of the heart and arteries : relevance to cardiovascular disease / Samer S. Najjar and Edward G. Lakatta -- Frailty : keystone in the bridge between geriatrics and cardiology / William Russell Hazzard -- Cardiovascular risk factors in the elderly : evaluation and intervention / Susan J. Zieman and Beth R. Malasky -- Stable coronary artery disease in the elderly / Beth R. Malasky and Joseph S. Alpert -- Age and mortality and morbidity in ST-segment elevation myocardial infarction / Steven P. Schulman and Gary Gerstenblith -- Unstable angina/non-ST-elevation myocardial infarction in the elderly /

Schwartz -- Medical treatment of the cardiac patient approaching the end of life / Lofty L. Basta, W. Daniel Doty, and Michael D.D. Geldart. **Every Californian's Guide To Estate Planning Wills, Trust & Everything Else** Nolo You can find estate planning books that focus on reducing taxes, and basic books that explain the necessary documents in simple terms, but no book deals with the complex issues that many Californians face when putting their estate plans together: Prop 13: keeping low property tax rates in the family Understanding community property and how it affects your plan Trump's tax law: What's effect on estate planning? international issues (such as people who want to make gifts to family members living abroad, non-citizen spouses, or naming international guardians) and blended and non-traditional families. **Abeloff's Clinical Oncology E-Book** Elsevier Health Sciences Carrying on the tradition established by its founding editor, the late Dr. Martin Abeloff, the 4th Edition of this respected reference synthesizes all of the latest oncology knowledge in one practical, clinically focused, easy-to-use volume. It incorporates basic science, pathology, diagnosis, management, outcomes, rehabilitation, and prevention - all in one convenient resource - equipping you to overcome your toughest clinical challenges. What's more, you can access the complete contents of this Expert Consult title online, and tap into its unparalleled guidance wherever and whenever you need it most! Equips you to select the most appropriate tests and imaging studies for diagnosing and staging each type of cancer, and manage your patients most effectively using all of the latest techniques and approaches. Explores all of the latest scientific discoveries' implications for cancer diagnosis and management. Employs a multidisciplinary approach - with contributions from pathologists, radiation oncologists, medical oncologists, and surgical oncologists - for well-rounded perspectives on the problems you face. Offers a user-friendly layout with a consistent chapter format • summary boxes • a full-color design • and more than 1,445 illustrations (1,200 in full color), to make reference easy and efficient. Offers access to the book's complete contents online - fully searchable - from anyplace with an Internet connection. Presents discussions on cutting-edge new topics including nanotechnology, functional imaging, signal transduction inhibitors, hormone modulators, complications of transplantation, and much more. Includes an expanded color art program that highlights key points, illustrates relevant science and clinical problems, and enhances your understanding of complex concepts. **EBOOK: A Practical Guide to End of Life Care** McGraw-Hill Education (UK) Are you involved in caring for people at the end of their life? Do you have a role in supporting the families of those who are dying, or is this an area of your work you find personally difficult? This book is an accessible guide for all those working in health or social care and caring for people at the end of their lives. This will include people in roles such as healthcare assistant, hospice worker, volunteer, nurse or other

carers. Written by experts with extensive experience in delivering high quality end of life care, this book is full of real life examples, reflection exercises and case studies. It also includes insights into what can help make a good death, and how to help support families at the end of life. The easy to read chapters emphasise treating people who are dying with dignity using a person centred approach. The book supports the delivery of quality care by recognising physical and non-physical symptoms, and thinking about various emotional and physical needs people might have. It is also important that care givers look after themselves and advice is given on how best to do this. An essential purchase for anyone looking for guidance or support in this area, and suitable for those working in the community, care homes, hospices, hospitals or other settings where people are cared for. With a Foreword from Dr. Ros Taylor, MBE, National Director for Hospice Care, Hospice UK. "This is a beautifully presented learning tool to support the delivery of end of life care. I particularly like the 'signposts' which reinforce the intention of the book to enable 'carers' to apply what they read to their role in practice." Liz Bryan, Director of Education and Training, St Christopher's Hospice, UK "This book is a very welcome addition to the literature on end of life care, as it does exactly what it says – it is a practical guide. It is written by an inter-professional group of clinical experts who have managed to create a concise, accessible resource which would be perfect for carers, volunteers, Health Care Support Workers or health care student working in any clinical setting who wants to make a difference for individuals approaching the end of their lives. The book addresses all of the important aspects of care at this crucial time, including attitudes to death and dying, communication issues, common physical and psycho-social symptoms, and care in the last hours of life. The case studies of three individuals are threaded throughout the book and are an excellent way to illustrate theoretical content and demonstrate its clinical application. The glossary of terms is particularly useful for a non-specialist audience, as are the resources for further reading. I particularly welcome the use of 'signposts' to different activities at key points which encourage the reader to reflect and apply the knowledge to their own situation. I highly recommend this book to any individual who wants to develop their confidence and competence in this challenging, but critically important area of care." Mick Coughlan, Programme Leader, The Royal Marsden School, UK "I found the chapters easy to read and the link to a case study really brought the words 'to life'. The chapter on self-care was helpful – this is an area hospice managers are having to focus on in detail as our staff strive to maintain the high levels of quality care hospices are renowned for with compassion and dignity . Giving emotional support throughout a shift to patients, families and colleagues can lead to a feeling of 'exhaustion' and 'fatigue', which if not recognised and addressed leads to time off sick and a feeling of being 'powerless' for staff . Healthcare professionals must recognise this as well as their managers, who then need to provide different levels of interventions that staff can access – as described in the book. I think all palliative care libraries should have this book on their shelves and perhaps it could be a 'core' reading book for training. I also used it on the ward to discuss with nurses – it's not that what is written is necessarily new but it is well written, concise and relevant. I feel this book would be very useful for those new to palliative care as well as those studying the subject. Relating theory to practice is always powerful and for new nurses and

other healthcare professionals this provides context and meaning." Clodagh Sowton, Director of Patient Services, Phyllis Tuckwell Hospice Care, UK "This is a welcome book to the field of end of life care. This practical guide is accessible and is an excellent bridge between the 'Lay Person' and those health care professionals caring for the individual as they approach the end of life. The authors present their subject areas in a most readable and engaging style. While reviewing the case studies (which are weaved throughout the whole book); you feel they have come from experienced carers who have had 'lived experiences' of end of life care. This therefore, makes the chapters much more relatable and applicable to practice and real world life. This is also a personable book and I would recommend it to health care professionals and lay persons alike- who need to address or who may require further insight into the realms of: Physical/psycho-social symptoms, communication challenges and differential perspectives on dying and death. Finally, I will also be directing students of healthcare towards this impressive, insightful book." Robert Murphy, Senior Lecturer - Adult Nursing, London South Bank University, UK "The material covered is very helpful and the range of authors has been well selected from individuals who are active in clinical practice. The book is practical and clear, and Clair deserves high praise for the contribution it will make to clinicians seeking to improve their palliative care knowledge and skills." Professor Max Watson, Medical Director Northern Ireland Hospice, Visiting Professor University of Ulster, UK **Current Therapy in Pain E-Book** Elsevier Health Sciences This unique resource focuses on the diagnosis and treatment of painful conditions—both acute and chronic—from a multi-disciplinary perspective. Joined by a team of nearly 200 international contributors representing a wide range of specialties, Dr. Smith presents the best management options within and across specialties. Succinct treatment and therapy guidelines enable you to quickly access clinically useful information, for both inpatient and outpatient pain management. Offers a cross-discipline approach to pain management for a comprehensive view of the best treatment options within and across specialties including internal medicine, gynecology, physical medicine and rehabilitation, orthopedics, and family medicine. Provides succinct treatment and therapy guidelines, enabling you to locate useful information quickly. Organizes guidance on acute and chronic therapies in a templated format, to facilitate consistent, quick-access consultation appropriate for inpatient or outpatient pain management. **Oxford Textbook of Old Age Psychiatry** Oxford University Press, USA Part of the authoritative Oxford Textbooks in Psychiatry series, Oxford Textbook of Old Age Psychiatry, Third Edition has been thoroughly updated to reflect the developments in old age psychiatry since publication of the Second Edition in 2013, and remains an essential reference for anyone interested in the mental health care of older people. **The Health Care Professional's Guide to Disease Management Patient-centered Care for the 21st Century** Jones & Bartlett Learning Disease Management **CURRENT Geriatric Diagnosis and Treatment** McGraw Hill Professional The most up-to-date source of clinically focused information on the medical care of the increasing elderly population. This text features relevant diagnostic and treatment content needed by every provider of healthcare to older adults. The text covers the major diseases and disorders of the elderly with particular attention to the care of the elderly. **Comprehensive Textbook of AIDS Psychiatry A Paradigm for Integrated Care**

Oxford University Press The Comprehensive Textbook of AIDS Psychiatry: A Paradigm for Integrated Care is the first book to provide insight into the interface between the psychiatric, medical, and social dimensions of HIV and AIDS and the need for a compassionate, integrated approach to the HIV pandemic with an emphasis on humanizing and destigmatizing HIV. Drawing from the expertise of 135 contributors in clinical and evidence-based medicine, the book provides information on the prevalence, incidence, medical and psychiatric aspects of HIV, as well as on the prevention and care of persons with HIV/AIDS. **Hematology: Diagnosis and Treatment** Elsevier Health Sciences The Hematology: Diagnosis and Treatment eBook is the ideal mobile resource in hematology! It distills the most essential, practical information from Hematology: Basic Principles and Practice, 6th Edition - the comprehensive masterwork by Drs. Hoffman, Benz, Silberstein, Heslop, Weitz, and Anastasi - into a concise, clinically focused resource that's optimized for reference on any e-reader. Focusing on the dependable, state-of-the-art clinical strategies you need to optimally diagnose and manage the full range of blood diseases and disorders, this eBook is a must-have for every hematologist's mobile device! Apply the latest know-how on heparin-induced thrombocytopenia, stroke, acute coronary syndromes, hematologic manifestations of liver disease, hematologic manifestations of cancer, hematology in aging, and many other hot topics. Get quick, focused answers on the diagnosis and management of blood diseases - in a portable digital format that you can carry and consult anytime, anywhere. View abundant images that mirror the pivotal role hematopathology plays in the practice of modern hematology. Count on all the authority that has made Hematology: Basic Principles and Practice, 6th Edition, edited by Drs. Hoffman, Benz, Silberstein, Heslop, Weitz, and Anastasi, the go-to clinical reference for hematologists worldwide. Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability. Compatible with Kindle®, nook®, and other popular devices. **American Journal of Respiratory and Critical Care Medicine** Compassion, Continuity and Caring in the NHS Royal College of General Practitioners Compassion takes as its starting point 'Cum scientia caritas', the motto of the Royal College of General Practitioners. Translated as 'Science with compassion', it captures the technical and caring aspects of being a doctor. Science is continually developing but compassion is unchanging. But how relevant is compassion to the NHS today? Compassion is central to the practice of health care. Patients require compassion as much as they require knowledge and technical skill from their healthcare professionals. Compassion should be a motivation for anyone choosing a career in primary care. However, in recent years there have been startling instances where compassion has not been shown. Compassion: Compassion, Continuity and Caring in the NHS is a reminder that compassion is at the heart of good medical practice. The book is split into sections on patients, education and training, clinicians and future developments. There are overview chapters on access to health care, the changing model of NHS care, a history of GP selection procedures and ways of preparing the next generation of GPs. This wide-ranging book also contains chapters on specific topics: the role of the multidisciplinary team, homeless patients, prescribing, nursing in primary care, post-conflict symptoms, suicide prevention and more. Personal perspectives are also given: A layman provides a personal account of the end-of-life care his wife received. A

junior doctor reflects on the different factors that guide compassion. And a doctor from the United States offers a worrying picture of primary health care's possible fate. This book looks to the future too with chapters on scholarship, building resilience, mindfulness, continuity of care and the development of a new professionalism. This book will help the reader reconsider and re-evaluate compassion - the characteristic so important in creating a long-term relationship between health professional and patient. **Dying Well** **Peace and Possibilities at the End of Life** Penguin Explores the important emotional work accomplished in the final months of life and offers advice on dealing with doctors, talking with friends and relatives, and managing end-of-life care **Priorities in Critical Care Nursing** Elsevier Health Sciences Ensure you are up to date on all the common and urgent issues in the critical care unit with **Priorities in Critical Care Nursing, 7th Edition!** With its succinct coverage of all core critical care nursing topics, this evidence-based text is the perfect resource for both practicing nurses and nursing students alike. Using the latest, most authoritative research, this book will help you identify priorities to accurately and effectively manage patient care. Content spans the areas of medication, patient safety, patient education, nursing diagnosis, and collaborative management and much more to equip you for success in all aspects of critical care nursing. This new edition also features new case studies, new QSEN-focused call-out boxes throughout the text, a complete digital glossary, and revised chapter summaries. Evidence-based approach offers the most accurate and timely patient care recommendations based on the latest and most authoritative research, meta-analyses, and systematic reviews available. **UNIQUE!** **Nursing Diagnosis Priorities** boxes list the most urgent potential nursing diagnoses, with a page reference to the corresponding **Nursing Management Plan**. **Nursing Management Plans** provide a complete care plan for every **Priority Diagnosis** that includes the diagnosis, definition, defining characteristics, outcome criteria, nursing interventions, and rationales. **Case studies with critical thinking questions** test your understanding of key concepts and their practical applications. **Concept maps** help students understand common critical health conditions, including acute coronary syndrome, acute renal failure, ischemic stroke, and shock. **Collaborative Management boxes** guide you through the management of a wide variety of disorders. **Patient Education boxes** list the concepts that must be taught to the patient and the family before discharge from the ICU. **Priority Medication boxes** offer a foundation in the pharmacology used most in critical care. **NEW! QSEN Evidence-Based Practice boxes** use the PICOT framework to cover a timely topic and the research that underlies current patient care. **NEW! TEACH for Nurses manual** includes unique case studies, outlines, instructor resources, student resources, answer keys, and more. **NEW! PowerPoint slides** with unfolding case studies have been updated to include interactive questions and sample handoff information in the ISBARR format for appropriate chapters. **NEW! Cultural Competency boxes** provide information on basic cultural topics, including what cues to watch for and how to better provide culturally competent care. **NEW! QSEN Teamwork and Collaboration boxes** offer concise guidelines for effective handoffs, assessments, and communications between nurses and other hospital staff. **NEW! QSEN Patient Safety Alert boxes** highlight important guidelines and tips to ensure patient safety. **NEW! QSEN Internet Resources boxes** identify key organizations and websites for both general critical

care practice and for each specific body system. NEW! Key points at the end of each chapter offer a quick study tool for students. NEW! More-detailed objectives now include every disorder covered in the chapter. NEW! Digital glossary on the Evolve companion site help to increase students' critical care nursing vocabulary. **Hamric & Hanson's Advanced Practice Nursing - E-Book An Integrative Approach** Elsevier Health Sciences Edited and written by a "Who's Who" of internationally known thought leaders in advanced practice nursing, Hamric and Hanson's *Advanced Practice Nursing: An Integrative Approach*, 7th Edition provides a clear, comprehensive, and contemporary introduction to advanced practice nursing today, addressing all major APRN competencies, roles, and issues. Thoroughly revised and updated, the 7th edition of this bestselling text covers topics ranging from the evolution of advanced practice nursing to evidence-based practice, leadership, ethical decision-making, and health policy. Coverage of the full breadth of APRN core competencies defines and describes all competencies, including direct clinical practice, guidance and coaching, evidence-based practice, leadership, collaboration, and ethical practice. Operationalizes and applies the APRN core competencies to the major APRN roles: the Clinical Nurse Specialist, the Primary Care Nurse Practitioner, the Acute Care Nurse Practitioner (both adult-gerontology and pediatric), the Certified Nurse-Midwife, and the Certified Registered Nurse Anesthetist. Content on managing APRN environments addresses factors such as business planning and reimbursement; marketing, negotiating, and contracting; regulatory, legal, and credentialing requirements; health policy; and nursing outcomes and performance improvement research. **Prognosis in Advanced Cancer** OUP Oxford Predicting survival and other outcomes is increasingly being recognized as an important skill for palliative care doctors and nurses, oncologists, and other healthcare professionals who treat patients with advanced cancer. Accurate prognosis is essential if we are to offer quality of care and 'a good death', as well as to aid decision-making. There is much prognostic information available that is scattered throughout the palliative care and oncological literature but this is the first time it has been gathered systematically in one place. Glare and Christakis, leaders in the field of prognosis, bring together a team of international contributors from across the fields of palliative care and oncology. This comprehensive but practical guide begins with the principles of prognostication, including formulating the prediction and then communicating it. Topics such as statistical issues, evidence-based medicine, and the ethics of prognostication are also covered. The second section addresses prognostication in 15 specific cancer sites once they have reached the advanced stage, following a standard template for consistency and easy access to the key information. The third section deals with prognostication in patients with a variety of common clinical conditions at the end of life, such as bowel obstruction, hypercalcaemia, and brain metastases. In addition, survival curves are provided within each chapter, palliative care conditions are examined for the first time, and a summary table of long and short term prognosis ensures this book remains practical. **Demystifying Hospice Inside the Stories of Patients and Caregivers** Rowman & Littlefield Hospice care helps make the end of life the best it can be, yet the experience can be both rewarding and stressful to those involved. Karen Clayton's stories address end-of-life choices, palliative care, mixed feelings about hospice, care for the caregivers, managing dramatic incidents and fear, social

isolation, saying goodbye, and remembering. **Understanding Human Behavior: A Guide for Health Care Providers** Cengage Learning Instructors have been trusting UNDERSTANDING HUMAN BEHAVIOR for years to give their students the reliable, practical information they need to gain a solid understanding of basic psychological concepts from a health care perspective. This all-new eighth edition is no exception. Packed with expanded content and updated with current industry trends and examples, this resource retains the features that made previous editions so successful -- a concise size and focus that offers students need-to-know information without overwhelming them, and an easy-to-read writing style. Coverage spans a broad but valuable range of important mental health topics and addresses them alongside their implications for health care professionals. It takes on both client and caregiver perspectives, resulting in a powerful book that explores the behaviors, emotions, and coping mechanisms encountered in a variety of health care situations and settings. Real-world examples and activities that encourage students to examine their own behaviors round out the book's comprehensive approach, making this a must-have tool for health care programs. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. **The Role of Family Physicians in Older People Care** Springer Nature This book provides family doctors with a wealth of evidence-based indications and tips regarding geriatric medicine and approaches for the management of older patients, to be applied in daily practice. After discussing old and new features of healthy ageing and the approaches required in Family Medicine Consultation, the text introduces key elements of geriatric medicine such as frailty, sarcopenia, and the comprehensive geriatric assessment (CGA), before describing a range of characteristics unique to older patients in different contexts, with a dedicated section on Palliative Care. The role of polypharmacy and the importance of quaternary prevention and deprescribing are also addressed. Finally, the book emphasizes both the importance of a humanistic approach in caring and the approach of research and meta-research in geriatrics. Though many texts explore the role of primary care professionals in geriatric medicine, the role of family doctors in older people care has not yet been clearly addressed, despite the growing burden of ageing, which has been dubbed the "silver tsunami." Family physicians care for individuals in the context of their family, community, and culture, respecting the autonomy of their patients. In negotiating management plans with their patients, family doctors integrate physical, psychological, social, cultural and existential factors, utilizing the knowledge and trust engendered by repeated visits. They do so by promoting health, preventing disease, providing cures, care, or palliation and promoting patient empowerment and self-management. This will likely become all the more important, since we are witnessing a global demographic shift and family doctors will be responsible for and involved in caring for a growing population of older patients. This book is intended for family medicine trainees and professionals, but can also be a useful tool for geriatricians, helping them to better understand some features of primary care and to more fruitfully interact with family doctors. **AJRCCM Textbook of Primary and Acute Care Medicine Year Book of Critical Care 2013** Elsevier Health Sciences The Year Book of Critical Care Medicine brings you abstracts of articles carefully selected from more than 500 journals worldwide. Expert commentaries

evaluate the clinical importance of each article and discuss its application to your practice. Topics such as Acute Lung Injury, Cardiac Arrest, Hemodynamics and Monitoring, Burns, Postoperative Management, Renal, Trauma and Overdose, and Pharmacology/Sedation-Analgesia are represented highlighting the most current and relevant articles in the field. **Comprehensive Handbook of Childhood Cancer and Sickle Cell Disease A Biopsychosocial Approach** Oxford University Press Over recent decades, tremendous advances in the prevention, medical treatment, and quality of life issues in children and adolescents surviving cancer have spawned a host of research on pediatric psychosocial oncology. This important volume fulfills the clear need for an up-to-date, comprehensive handbook for practitioners that delineates the most recent research in the field--the first of its kind in over a decade. Over 60 renowned authors have been assembled to provide a thorough presentation of the state-of-the art research and literature, with topics including: -Neuropsychological effects of chemotherapy and radiation therapy -Bone marrow transplantation -Important issues about quality of life during and following treatment -Collaborative research among child-focused psychologists -Standards of psychological care for children and adolescents -Stress and coping in the pediatric cancer experience -The role of family and peer relationships The **Comprehensive Handbook of Childhood Cancer and Sickle Cell Disease** represents both multidisciplinary and international efforts, an alliance between physicians and parents, and a combination of research and service. With a wealth of information of great interest to patients and their families, this volume will also be a welcome resource to the psychologists, psychiatrists, pediatricians, oncologists, nurses, and social workers who confront these issues as they help children and their families through the treatment, recovery, and grieving processes. **Miller's Anesthesia, 2-Volume Set E-Book** Elsevier Health Sciences Covering everything from historical and international perspectives to basic science and current clinical practice, Miller's Anesthesia, 9th Edition, remains the preeminent reference in the field. Dr. Michael Gropper leads a team of global experts who bring you the most up-to-date information available on the technical, scientific, and clinical issues you face each day - whether you're preparing for the boards, studying for recertification, or managing a challenging patient care situation in your practice. Includes four new chapters: Clinical Care in Extreme Environments: High Pressure, Immersion, and Hypo- and Hyperthermia; Immediate and Long-Term Complications; Clinical Research; and Interpreting the Medical Literature. Addresses timely topics such as neurotoxicity, palliation, and sleep/wake disorders. Streamlines several topics into single chapters with fresh perspectives from new authors, making the material more readable and actionable. Features the knowledge and expertise of former lead editor Dr. Ronald Miller, as well as new editor Dr. Kate Leslie of the University of Melbourne and Royal Melbourne Hospital. Provides state-of-the-art coverage of anesthetic drugs, guidelines for anesthetic practice and patient safety, new techniques, step-by-step instructions for patient management, the unique needs of pediatric patients, and much more - all highlighted by more than 1,500 full-color illustrations for enhanced visual clarity. **Encyclopedia of Primary Prevention and Health Promotion** Springer Science & Business Media Foundational topics such as history, ethics, and principles of primary prevention, as well as specific issues such as consultation, political issues, and financing. The second section addresses such topics as

abuse, depression, eating disorders, HIV/AIDS, injuries, and religion and spirituality often dividing such topics into separate entries addressing childhood, adolescence, and adulthood. **Lewis's Medical-Surgical Nursing E-Book Assessment and Management of Clinical Problems, Single Volume** Elsevier Health Sciences Gain the knowledge and skills you need to succeed in medical-surgical nursing with this leading textbook! Lewis's Medical-Surgical Nursing, 12th Edition uses a conversational writing style, a focus on nursing concepts and clinical trends, evidence-based content, and basic pathophysiology review to provide the solid foundation needed in a rapidly changing healthcare environment. Comprehensive chapters cover topics including nursing management and collaboration, health promotion, acute interventions, and ambulatory care. Summary tables and boxes make it easy to find essential information, and a building-block approach makes even the most complex concepts simple to grasp. In addition to three new chapters, this edition includes a stronger focus on the nursing process, clinical judgment, and preparation for the Next-Generation NCLEX® Examination. Content written and reviewed by leading experts in the field ensures that information is comprehensive, current, and clinically accurate. Interprofessional care is addressed in special Interprofessional Care sections and Interprofessional Care tables. Bridge to the NCLEX® Examination review questions reinforce key content and include both standard and alternate item format questions to help you prepare for the NCLEX exam. Coverage of cultural and ethnic health disparities highlights important issues such as risk factors, economic aspects, and access to health care. Coverage of gerontology and chronic illness is addressed in a separate chapter and highlighted in special gerontologic tables. Pathophysiology maps use flowcharts to outline complex concepts related to diseases, making them easier to understand. Focused Assessment boxes provide brief checklists for a practical "assessment on the run" or bedside approach to assessment, and can be used to evaluate the status of previously identified health problems and monitor for signs of new problems. Safety Alert boxes highlight patient safety issues and focus on the National Patient Safety Goals. Nutritional Therapy tables summarize nutritional interventions and strategies for promoting healthy lifestyles. Promoting Population Health boxes summarize health care goals as they relate to specific disorders such as cancer and diabetes, and identify strategies for health promotion. Drug Therapy tables and Drug Alerts highlight important safety considerations for key drugs. Check Your Practice boxes challenge you to think critically, analyze patient assessment data, and implement appropriate interventions. Coverage of genetics includes a separate chapter on genetics, Genetics in Clinical Practice boxes covering disorders and genetic testing, risk alerts, and links to disorders. Focus on patient and caregiver teaching shows how you can help patients and caregivers learn to manage chronic illnesses and conditions. Ethical / Legal Dilemmas boxes introduce key topics such as informed consent, advance directives, and confidentiality.
