King of the Castle

Choice and Responsibility in the Modern World

King of the Castle examines closely many of the unquestioned assumptions by which we live our lives, comparing them with the beliefs that have shaped and guided human life in the past. It begins with a consideration of how secular societies attempt to possess their citizens, body and soul and how, as a consequence, the necessity of redefining human responsibility becomes an ever more urgent imperative. The book continues with a presentation of the traditional view of man as 'God's Viceroy on Earth', with an eye to its practical implications in a world that has all but forgotten, under the pressure of mass social persuasion, that man must always be free to choose his own ultimate destiny. The author's thesis is a passionate yet incisive plea for the restoration of the sacred norms of religion, as against the debilitating and falsifying aims of a profane world-view based on no more than recent scientific and technological achievements.

Stage for Denmark's Monarch

The Travels of Christian IV and the Building of Frederiksborg Castle

Along with Hamlets Kronborg at Elsinore, Frederiksborg is the most magnificent early seventeenth-century residence in Northern Europe, visited by thousands of people from all over the world each year. Its splendid setting on three interconnected islands and the richness of its sculptural decoration is unparalleled. However, much of the structure and interior was devastated in a fire in 1859 and the large-scale damages necessitated substantial reconstruction. While the reconstruction is reasonably faithful to the original architecture, it was exceedingly lax when it came to the more than sixty

freestanding sculptures that originally adorned the castles courtyards, galleries, arches and facades. This volume recreates an idea of how Frederiksborg presented itself to its visitors in the days of Christian IV. The book further unravels the profound inspiration Christian IV drew from his sojourns to Berlin, Dresden and, especially, to England, where in the summer of 1606 he visited his brother-in-law James I at Theobalds House. This visit provided inspiration that, even while construction of his residence in Denmark was in progress, would dramatically change the overall layout and facades of Frederiksborg, thereby turning the castle into the marvel that it remains to this day. In this pioneering study, featuring more than a hundred photos and illustrations, Patrick Kragelund etches out a new and important historical and architectural dimension to this magnificent monument.

The Castle in the Wars of the Roses

Pen and Sword Military The first major study of the role of the castle in the Wars of the Roses. The Wars of the Roses is one of the most dramatic and fascinating periods in medieval history. Much has been written about the leading personalities, bitter dynastic rivalries, political intrigues, and the rapid change of fortune on the battlefields of England and Wales. However, there is one aspect that has been often overlooked, the role of castles in the conflict. Dan Spencer's original study traces their use from the outbreak of civil war in the reign of Henry VI in the 1450s to the triumph of Henry VII some thirty years later. Using a wide range of narrative, architectural, financial and administrative sources, he sheds new light on the place of castles within the conflict, demonstrating their importance as strategic and logistical centers, bases for marshaling troops, and as fortresses Dan Spencer's book provides a fascinating contribution to the literature on the Wars of the Roses and to the study of siege warfare in the Middle Ages.

King of the Castle

A Biography of William Larnach

Sometimes truth is stranger than fiction, and in the life of William Larnach, 19th century businessman and politician, this is certainly true. He is perhaps best remembered for the home he built on the Otago Peninsula, known as Larnach Castle. He also has the tragic distinction of being the only politician to commit suicide in Parliament building. His story public and personal continues to fascinate us. After years of research, author Fleur Snedden uncovered an extraordinary man (who also happened to be her great-great-grandfather) with an intriguing story. The result is an engrossing biography of an early New Zealander whose life covers a dynamic period of our history.

The Dark Half

A Novel

Simon and Schuster Master storyteller Stephen King presents the classic "wondrously frightening" (Publishers Weekly) #1 New York Times bestseller about a writer's horrific and haunting pseudonym. "I'm back...I'm back from the dead and you don't seem glad to see me at all, you ungrateful son of a bitch." After thirteen years of international bestseller stardom with his works of violent crime fiction, author George Stark is officially declared dead—revealed by a national magazine to have been killed at the hands of the man who created him: the once well-regarded but now obscure writer Thad Beaumont. Thad's even gone so far as to stage a mock burial of his wildly successful pseudonym, complete with tombstone and the epitaph "Not a Very Nice Guy." Although on the surface, it seems that Thad can finally concentrate on his own novels, there's a certain unease at the prospect of leaving George Stark behind. But that's nothing compared to the horror about to descend upon Thad's new life. There are the vicious, out-of-control nightmares, for starters. And how is he able to explain the fact that everyone connected to George Stark's untimely demise is now meeting a brutal end of their own in a pattern of homicidal savagery...and why each blood-soaked crime scene has Thad's fingerprints all over it? Thad Beaumont may have once believed that George Stark was running out of things to say, but he's going to find out just how wrong he is...

King of the Castle

Islam and the Destiny of Man

State University of New York Press Islam and the Destiny of Man by Charles Le Gai Eaton is a wide-ranging study of the Muslim religion from a unique point of view. The author, a former member of the British Diplomatic Service, was brought up as an agnostic and embraced Islam at an early age after writing a book (commissioned by T.S. Eliot) on Eastern religions and their influence upon Western thinkers. As a Muslim he has retained his adherence to the perennial philosophy which, he maintains, underlies the teachings of all the great religions. The aim of this book is to explore what it means to be a Muslim, a member of a community which embraces a quarter of the world's population and to describe the forces which have shaped the hearts and the minds of Islamic people. After considering the historic confrontation between Islam and Christendom and analysing the difference between the three monotheistic faiths (Judaism, Christianity, and Islam), the author describes the two poles of Muslim belief in terms of 'Truth' and 'Mercy'—the unitarian truth which is the basis of the Muslim's faith and the mercy inherent in this truth. In the second part of the book he explains the significance of the Qur'an and tells the dramatic story of Muhammad's life and of the early Caliphate. Lastly, the author considers the Muslim view of man's destiny, the social structure of Islam, the role of art and mysticism and the inner meaning of Islamic teaching concerning the hereafter. Throughout this book the author is concerned not with the religion of Islam in isolation, but with the very nature of religious faith, its spiritual and intellectual foundations, and the light it casts upon the mysteries and paradoxes of the human condition.
