## PSYCHOLOGY SORTED BOOK 1 - CORE APPROACHES

### KEY RESEARCH FOR STUDENTS AND TEACHERS

Written by two experienced psychology teachers, this is the second edition of Psychology Sorted Book 1, in the recent series for students and teachers. It is structured to help them understand and select from the wealth of psychological research that is relevant to the IB Diploma Psychology syllabus. The book has been developed independently of the International Baccalaureate Organization (IB), which in no way endorses it. However, the topics and content are especially chosen to be relevant to the 2019 IB Diploma psychology curriculum, while also providing useful support to teachers and students of other curricula, including those taught as part of university courses. This second edition has been updated to include new material suggested by the IB in December 2019. The book provides organised overview grids suggesting classic and recent key studies for the core biological, cognitive and sociocultural approaches. Links are made between content and studies from other areas, including the options. There are hyperlinks and details for further relevant resources, journal articles and media talks and summaries of every study, written in clear language and including evaluation points. The authors have also included critical thinking suggestions for each topic and a full bibliography and author index. Further support is available from the authors' Psychology Sorted blog and their Psychology Sorted Facebook page

### **APPLYING ISLAMIC PRINCIPLES TO CLINICAL MENTAL HEALTH CARE**

#### **INTRODUCING TRADITIONAL ISLAMICALLY INTEGRATED PSYCHOTHERAPY**

Routledge This text outlines for the first time a structured articulation of an emerging Islamic orientation to psychotherapy, a framework presented and known as Traditional Islamically Integrated Psychotherapy (TIIP). TIIP is an integrative model of mental health care that is grounded in the core principles of Islam while drawing upon empirical truths in psychology. The book introduces the basic foundations of TIIP, then delves into the writings of early Islamic scholars to provide a richer understanding of the Islamic intellectual heritage as it pertains to human psychology and mental health. Beyond theory, the book provides readers with practical interventional skills illustrated with case studies as well as techniques drawn inherently from the Islamic tradition. A methodology of case formulation is provided that allows for effective treatment planning and translation into therapeutic application. Throughout its chapters, the book situates TIIP within an Islamic epistemological and ontological framework, providing a discussion of the nature and composition of the human psyche, its drives, health, pathology, mechanisms of psychological change, and principles of healing. Mental health practitioners who treat Muslim patients, Muslim clinicians, students of the behavioral sciences and related disciplines, and anyone with an interest in spiritually oriented psychotherapies will greatly benefit from this illustrative and practical text.
