Springer Science & Business Media **The first comprehensive presentation of an explicitly transgender theory. Hierarchy in Natural and Social Sciences

Springer Science & Business Media Hierarchy is a form of organisation of complex systems that rely on or produce a strong differentiation in capacity (power and size) between the parts of the system. It is frequently observed within the natural living world as well as in social institutions. According to the authors, hierarchy results from random processes, follows an intentional design, or is the result of the organisation which ensures an optimal circulation of energy for information. This book reviews ancient and modern representations and explanations of hierarchies, and compares their relevance in a variety of fields, such as language, societies, cities, and living species. It throws light on concepts and models such as scaling laws, fractals and self-organisation that are fundamental in the dynamics and morphology of complex systems. At a time when networks are celebrated for their efficiency, flexibility and better social acceptance, much can be learned about the persistent universality and adaptability of hierarchies, and from the analogies and differences between biological and social organisation and processes. This book addresses a wide audience of biologists and social scientists, as well as managers and executives in a variety of institutions.

State Building in Revolutionary Ukraine

A Comparative Study of Governments and Bureaucrats, 1917-1922

University of Toronto Press **State Building in Revolutionary Ukraine** examines six attempts to create governments on Ukrainian territories between 1917 and 1922. Focusing on how political leaders formed and staffed administrations, this study shows that in Ukraine during this time, there was an available pool of able administrators sufficiently competent in Ukrainian to work as bureaucrats in the independent national governments. These people could sometimes implement policies, a significant accomplishment in light of the upheavals of the time. Stephen Velychenko compares Ukrainian efforts to create an independent national government with the analogous successful efforts made in Russia, Poland, Ireland and Czechoslovakia. He questions the notion that Ukrainian attempts at national independence failed because its society was 'incomplete' and its leaders unable to organize an effective administration. Pointing out that Bolshevik administrations at the time were no more effective in implementing policies than their rivals, Velychenko argues that more effective governance was not one of the reasons for the Russian Bolshevik victory in Ukraine.

Teaching Mindfulness

A Practical Guide for Clinicians and Educators

Springer The applications and use of mindfulness-based interventions in medicine, mental health care, and education have been expanding as rapidly as the empirical evidence base that is validating and recommending them. This growth has created a powerful demand for professionals who can effectively deliver these interventions, and for the training of new professionals who can enter the fold. It is intended as a practical guide to the landscape of teaching, to help those with a new or growing interest in mindfulness-based interventions to develop both the personal authenticity and the practical know-how that can make teaching mindfulness a highly rewarding and effective way of working with others. The detail of theory and praxis it contains can also help seasoned mindfulness practitioners and teachers to articulate and understand more clearly their own pedagogical approaches. Engagingly written and enriched with vignettes from actual classes and individual sessions, this unique volume: Places the current mindfulness-based interventions in their cultural and historical context to help clarify language use, and the integration of Eastern and Western spiritual and secular traditions Offers a highly relational understanding of mindfulness practice that supports moment-by-moment work with groups and individuals Provides guidance and materials for a highly experiential exploration of the reader's personal practice, embodiment, and application of mindfulness Describes in detail the four essential skill sets of the mindfulness teacher Proposes a comprehensive, systematic model of the intentions of teaching mindfulness as they are revealed in the mindfulness-based interventions Includes sample scripts for a wide range of mindfulness practices, and an extensive resource section for continued personal and career development Essential for today's practitioners and teachers of mindfulness-based interventions *Teaching Mindfulness: A Practical Guide for Clinicians and Educators* brings this increasingly important discipline into clearer focus, opening dialogue for physicians, clinical and health psychologists, clinical social workers, marriage and family therapists, professional counselors, nurses, occupational therapists, physical therapists, pastoral counselors, spiritual directors, life coaches, organizational development professionals, and teachers and professionals in higher education , in short, everyone with an interest in helping others find their way into the benefits of the present moment.

Recovering from a Disaster

A Study of the Relief and Reconstruction Process in Sri Lanka After the 2004 Indian Ocean Tsunami

On 26 December 2004 at 6.58 hours (Sri Lanka Time), a massive earthquake with its epicentre outside the coast of Sumatra generated a series of gigantic waves, tsunamis. At 8.35 hours the waves reached the eastern and southern coastline of Sri Lanka, crushing hundreds of villages and towns, killing and maiming tens of thousands of people within seconds. When the waves pulled back, and the ocean calmed down, local people came running to the scene to help. In the first couple of days after the disaster the survivors and their helpers had to manage largely on their own. When the professional experts arrived, most of them without any prior knowledge about the country, they took full command over the situation, brushing aside the local communities and their indigenous emergency systems. At this stage, those who were meant to die had already succumbed, and most of the wounded had received assistance from friends and neighbours. Today, more than ten years after, those parts of Sri Lanka that were damaged by the disaster are for the greater part reconstructed, some places even to a more advanced level than before. This has, however, not been a smooth and pain free process. This book is about what happened in the southern district of Hambantota during the disaster, and in the relief, rehabilitation and reconstruction process after the Indian Ocean Tsunami.
