The author's critical review of contemporary intellectual property philosophy suggests that justifying intellectual property protection through Locke or Hegel's property theories internalizes a theoretical paradox. "Professor Wenwei Guan's treatment of intellectual property law and practice in the PRC offers new perspectives that enrich an already active field of study. . . . This book will be a useful contribution to academic and policy discourses examining conceptual and operational dimensions of China's intellectual property protection system and the broader process of China's international engagement." - Dr. Pitman B. Potter, Professor of Law, University of British Columbia, Canada "Dr. Guan reminds us of the daunting challenge of the public-private divide in forming and reforming TRIPS regime: how this regime has failed to address development needs and public concerns in developing countries like China; and how TRIPS's 'birth defect' can be overcome and its evolution can be put back on the right track." - Dr. Yahong Li, Associate Professor at Faculty of Law, Hong Kong University **The Theory and Practice of International Criminal Law Essays in Honor of M. Violent Offenders: Theory, Research, Policy and Practice, Second Edition aims to demystify the many different types of violent offenders we hear about in the media. This newly revised and updated Second Edition is a compilation of original scholarship from an international collection of applied and academic criminologists. Based not only on history and academic research but also on the experiences of author Peter Conis as a 25 year veteran of law enforcement, it provides students with a realistic view of why people commit violent crimes and how our criminal justice system, as a whole, responds to these offenders and these violent acts. It contains cutting-edge material on the broad category of criminal predators, including homicide offenders, sex offenders, financial predators, and conventional street criminals. Unlike other texts on the subject that narrowly focus on one type of criminal (e.g., serial killers), this updated Second Edition illustrates the systemic importance of predation in antisocial behavior. This book is divided into two parts; part one covers the theoretical and disciplinary foundations of the study of violent behavior, spanning the disciplines of sociology, psychology, biology, and neuroscience. Part two covers the policy and practice of responding to violent offenders from the insightful perspectives of people who work among them on a daily basis. **New and Key Features of the Second Edition:** • Contains 10 NEW chapters (5 in theory and research and 5 in policy and practice). The contributions to "Examining Practice, Interrogating Theory: Comparative Legal Studies in Asia" analyse particular legal changes in China, Indonesia, Malaysia, Singapore, Thailand, Taiwan, and Vietnam. The contributions also concurrently critically analyse the utility of scholarly developments in comparative legal studies, particularly discourse analysis; regulatory theory; legal pluralism; and socio-legal approaches, in the study of Asian legal systems. While these approaches are regularly invoked in the study of transforming European legal systems, the debate of their relevance and explanatory capacity beyond the European context is recent. By bringing together these diverse analytical tools and enabling a comparison of their insights through Asian empirical case studies, this book makes an invaluable contribution to the debates concerning legal change and the methods by which it is analysed globally, and within Asia. **Corrections: A Text/Reader** *SAGE* Corrections: A Text/Reader, Second Edition is designed for undergraduate and/or graduate corrections courses. While the first volume, The Concept of Universal Crimes in International Law, explored the parameters and theories related to crimes under international law, this book examines the notion of punishable participation in such crimes. It presents a general theory of personal criminal liability and provides a comprehensive overview of all forms of criminal participation in international law. The authors examine numerous primary materials in international and transnational criminal law, both historical and current, relating to both international and domestic jurisprudence. They also review academic literature that attempts to explain and bring consistency to the jurisprudence, as well as other sources such as reports of the International Law Commission. This rich empirical tapestry is then used to test and further develop an overarching conceptual theory and matrix that provides a better understanding of the boundaries of personal criminal liability *lex lata* and *lex ferenda* and of the relationship between the various forms of punishable participation in universal crimes. Like the first volume, this book makes a valuable contribution to a more coherent and practical understanding of international criminal law. **Serial Crime Theoretical and Practical Issues in Behavioral Profiling** *Elsevier* Serial Crime provides a theoretical and practical foundation for understanding the motivation and dynamics in a range of serial offenses . It successfully connects concepts and creates links to criminal behavior across crimes —murder, sexual assault, and arson— something no other book available does. The connection of serial behavior to profiling, the most useful tool in discovering behavior patterns, is new to the body of literature available and serves to examine the ideal manner in which profiling can be used in conjunction with psychology to positively affect criminal investigations. The book includes case examples that offer real-world uses of behavioral profiling in investigations, and highlight a variety of issues in understanding and investigating serial crime. The book's primary audience would include criminal profilers, fire investigators, universities offering forensic science/criminal justice programs, and forensic, police, criminal, and behavioral psychologists. The secondary audience would include attorneys and judges involved in criminal litigation, and forensic scientists and consultants (generalists). * Provides a theoretical and practical foundation for understanding the motivation and dynamics in a range of serial offenses * Illustrates the promise, purposes and pitfalls of behavioral profiling in the investigation of various serial crimes * Case examples offer real-world uses of behavioral profiling in investigations, and highlight a variety of issues in understanding and investigating serial crime **Document Retrieval Index Social Courts in Theory and Practice Yugoslav Workers' Courts in Comparative Perspective** *University of Pennsylvania Press* This ethnographic study of a socialist labor court discusses the nature of social courts, which are judicial institutions staffed by lay people rather than lawyers. **Cases, Materials, and Problems on General Practice Insurance Law Applied Police Research Challenges and opportunities** *Routledge* Remarkably little has been written about the theory and practice of applied police research, despite growing demand for evidence in crime prevention. Together, the authors have almost 300 years of relevant experience across three continents. The volume contains both practical everyday advice and calls for more fundamental change in how police research is created, consumed and applied. It covers diverse topics, including the art of effective collaborations, the interaction between policing, academia and policy, the interplay between theory and practice and managing ethical dilemmas. This book will interest a broad and international audience from academics and students, to police management, officers and trainees, to policymakers and research funders. **Extraterritorial Jurisdiction in Theory and Practice [contains the Edited of a Symposium Held in Dresden Between 8 and 10 October 1993]** *Martinus Nijhoff Publishers* This work contains the proceedings of a symposium held in Dresden addressing the topic of extraterritorial jurisdiction with respect to financial services, tax, arms control, environmental law, antitrust matters and mergers and acquisitions. Drawing mostly on contexts where traditional African laws and Western laws are practised side-by-side, and where there are discontinuities between local knowledge systems, belief systems and language practices on the one hand, and official languages of law discourse, conceptualisation and jurisprudence documentation on the other, the chapters in this volume problematise, among other issues, the mediation practices (or lack thereof) of language and legal processes, discourse strategies and complexities in (mis)interpretations in second language court contexts and the miscarriage of justice that these may entail. **The Shari'a and Islamic Criminal Justice in Time of War and Peace** *Cambridge University Press* This innovative and important book applies classical Sunni Muslim legal and religious doctrine to contemporary issues surrounding armed conflict. In doing so it shows that the shari'a and Islamic law are not only compatible with contemporary international human rights law and international humanitarian law norms, but are appropriate for use in Muslim societies. By grounding contemporary post-conflict processes and procedures in classical Muslim legal and religious doctrine, it becomes more accessible to Muslim societies who are looking for appropriate legal mechanisms to deal with the aftermath of armed conflict. This book uniquely presents a critique of the violent practices of contemporary Muslims and Muslim clerics who support these practices. It rebuts Islamophobes in the West that discredit Islam on the basis of the abhorrent practices of some Muslims, and hopes to reduce tensions between Western and Islamic civilizations by enhancing common understanding of the issues. **The Principle of "equality of Arms" in Criminal Procedure Under Article 6 of the European Convention on Human Rights and Its Functions in Criminal Justice of Selected European Countries A Comparative View** *Leuven University Press* **Caring for the Vulnerable: Perspectives in Nursing Theory, Practice, and Research** *Jones & Bartlett Learning* Within an expanding field of study in both undergraduate and graduate nursing curricula, Caring for the Vulnerable explores vulnerability from the perspective of individuals, groups, communities and populations, and addresses the implication of that vulnerability for nurses, nursing, and nursing care. **Software Engineering and Knowledge Engineering: Theory and Practice Volume 2** *Springer Science & Business Media* The volume includes a set of selected papers extended and revised from the I2009 Pacific-Asia Conference on Knowledge Engineering and Software Engineering (KESE 2009) was held on December 19~ 20, 2009, Shenzhen, China. The best resource for these professionals will distill the needed information into one practical volume. Written in an accessible style, the fourth edition of Criminal Investigation maintains the same reader friendly approach that made its predecessors so popular with students, professionals, and practitioners. Beginning with an overview of the history of criminal investigation, the book explores current investigative practices and the legal issues that constrain or guide them. It discusses the wide range of sources of information available, including the internet, individuals, state and local sources, and federal agencies and commissions. Next, the book discusses other investigative techniques, including interviewing and interrogation, informants, surveillance, and undercover operations. A chapter on report writing provides explicit instructions on how to capture the most critical information needed in an investigation. Additional chapters cover the crime scene investigation and the crime laboratory. The remainder of the book delves into the specific investigative protocols for individual crimes, including sex offenses, homicide, mass and serial murder, assault and robbery, property crimes, cybercrime, and narcotics. Concluding chapters focus on the police/prosecutor relationship and investigative trends. Each chapter includes a summary, a list of key terms, and review questions so that readers can test their assimilation of the material. Clear and concise, this book is an essential resource for every criminal investigator's toolbox. **The Role of the Media in Criminal Justice Policy Prisons, Populism and the Press** *Taylor & Francis* This book provides a socio-legal examination of the media's influence on the development and implementation of criminal justice policy. This impact is often assumed. And, especially in the wake of high-profile crimes, the press is routinely observed calling for sentences to be harsher, and for governments to be tougher on crime.

But how do we know that there is a connection? To answer this question, the book draws on a case study of the media reporting of the rape and murder of Jill Meagher in Melbourne, Australia; as well as other well-known cases, including those of James Bulger, Sarah Payne, Stephen Lawrence and Michael Brown, among others. Deploying a socio-legal framework to examine how the media's often powerful and emotive narratives play a crucial role in the development and implementation of law, the book provides a deep and critical reflection on its influence. The book concludes with a number of suggestions for media reform: both to moderate the media's influence, and to incorporate a broader range of viewpoints. This multi-disciplinary book will appeal to scholars and students in sociolegal studies, criminology and criminal law as well as those working in relevant areas in sociology and media studies. **Cumulative Book Index World List of Books in English Resources in Education United States Code, 2000 Edition, V. 16, Title 27, Intoxicating Liquors, to Title 28, Judiciary and Judicial Procedure** *Government Printing Office*
