### LEARNING GROUP LEADERSHIP

---

*SAGE* Focusing on how to conduct and lead groups in a variety of therapeutic settings, *Learning Group Leadership: An Experiential Approach*, Third Edition covers theory, process, leadership, ethics, special populations, and challenges as they relate to group work in a positive, realistic, and knowledgeable way. Jeffrey A. Kottler and Matt Englar-Carlson introduce important conceptual and practical information and then use activities, exercises, field study assignments, and personal application questions to help students apply concepts to their work and lives. The fully updated Third Edition brings concepts to life through “student voices” in every chapter, examples drawn from the authors’ combined 55-plus years of experience, and demonstration video content that contains sessions corresponding with every chapter. “This is the best book out there for introducing students to the complex world of groups. The text delivers what it promises in the title. It teaches counseling graduate students how to become solid group leaders (or—to be more precise—how to begin their journey in that direction), and it does this in a way that is positive, knowledgeable, and realistic....The most impressive aspect of the material is the authors’ focus on the experiential approach (training students to be group leaders), combined with an accessible writing style, a lot of knowledge, and an enthusiastic attitude.” —Marilyn MacGregor, Western New Mexico University “It’s clear that the authors have a wealth of experience with counseling groups—information is conversationally presented and realistically discussed.” —Marla J. Muxen, South Dakota State University “This book is very readable and clearly explains the points it makes using accessible examples which students can readily understand. Skills discussed can be appreciated and applied to whatever personal experience of facilitating groups the student already has; as such it is a text which ‘grows with the student.’” —Corinne Hutt Greenyer, University of Southampton

### TRAFFIC AND GRANULAR FLOW ' 03

---

*Springer Science & Business Media* These proceedings are the fifth in the series *Traffic and Granular Flow*, and we hope they will be as useful a reference as their predecessors. Both the realistic modelling of granular media and traffic flow present important challenges at the borderline between physics and engineering, and enormous progress has been made since 1995, when this series started. Still the research on these topics is thriving, so that this book again contains many new results. Some highlights addressed at this conference were the influence of long range electric and magnetic forces and ambient fluids on granular media, new precise traffic measurements, and experiments on the complex decision making of drivers. No doubt the “hot topics” addressed in granular matter research have diverged from those in traffic since the days when the obvious analogies between traffic jams on highways and dissipative clustering in granular flow intrigued both communities alike. However, now just this diversity became a stimulating feature of the conference. Many of us feel that our joint interest in complex systems, where many simple agents, be it vehicles or particles, give rise to surprising and fascinating phenomena, is ample justification for bringing these communities together: *Traffic and Granular Flow* has fostered cooperation and friendship across the scientific disciplines.

Best Practices in Group Counselling and Psychotherapy uses research, theory, and group counseling experience to provide group leaders and researchers with the most current and best practices in

conducting group counseling and psychotherapy. Multicultural Groups follows the ASGW Principles for Diversity-Competent Group Workers and is intended to provide group leaders with essential information about different cultural groups and their world views, perceptions of groups, naturalistic healing methods, suggested group interventions, and implications for groups. Chapters cover Native-Americans, Latinos, Asians, and African-Americans, disabled persons, and gender and sexuality. Groups Across Settings includes examples of psycho-educational, counseling, and psychotherapy groups in a variety of settings. This section presents readers with theoretical and empirical support for group work in such settings as the Veterans Administration system, university counselling centers, and more. Groups Across the Lifespan consist of chapters across many age groups. For children and adolescents, cognitive and developmental issues are addressed. For adults, socialization and interpersonal issues are addressed, including separate chapters for male and female groups. Finally, a chapter on the elderly deals with cognitive, health, and life review issues. Special Topics Groups presents a continuum of different types of groups used to treat people with interpersonal and developmental issues, such as grief, substance abuse, depression, and others. Each chapter in this section provides definitions and descriptions of the issues along with theoretical and empirical support. Finally, Critical Issues and Emerging Topics attempts to reflect the zeitgeist and provide a glimpse into group interventions for the future. Emerging issues, such as online groups, prevention groups, and peer-led mutual help groups receive careful attention and analysis. The Handbook of Group Counseling and Psychotherapy, the first reference devoted to this emerging and rapidly growing field, is essential for academics, researchers, professionals, and librarians serving the group therapy community. There is no similar reference available, and it will prove a landmark volume for years to come.

## IRONIES LEADERS NAVIGATE, SECOND EDITION

### WHAT THE SCIENCE OF POWER REVEALS ABOUT THE ART OF LEADERSHIP AND THE DISTINCT ART OF CHURCH LEADERSHIP

---

*Wipf and Stock Publishers* [EPI] "... just as one cannot not communicate, you do not have the option of not using power." [EPI] For every definition of leadership, you can find a definition of power that makes the same statement. Hence, every act of leadership is an act of power, and the better we understand power, the better we understand leadership. And we misunderstand power, scholars lament, in part by under-understanding power. We equate it merely with coercion and competition, but miss how power dynamics define leadership, education, coaching, teamwork, parenting, etc. Here is a brief, contextual, synergistic, occasionally ironic study of power, which provides numerous lenses through which to examine leadership settings, including how they differ. This study (in specific, framed pages) ultimately focuses on a unique leadership setting--the local church. It ponders distinct challenges faced by church leaders, and by *The Church's Leader, Jesus Christ*.

## PSYCHOTHERAPY RELATIONSHIPS THAT WORK : THERAPIST CONTRIBUTIONS AND RESPONSIVENESS TO PATIENTS

### THERAPIST CONTRIBUTIONS AND RESPONSIVENESS TO PATIENTS

*Oxford University Press, USA* This book is the result of the American Psychological Association's Division of Psychotherapy (Div. 29) Task Force aimed at applying psychological science to the identification and promulgation of effective psychotherapy. Many efforts to improve therapy have focused on codifying evidence-based treatments, but in doing so have left the psychotherapeutic relationship behind. Clinical experience and research findings underscore that the therapeutic relationship accounts for as much of the outcome as particular treatments. This volume's 25 chapters identify the elements of effective therapy relationships and methods of customizing psychotherapy to each patient.

## GRASPING POWER

### RE-THINKING THE ACTIVE INGREDIENT IN LEADERSHIP, EDUCATION, PARENTING, GLOBAL SURVIVAL, FORGIVENESS, RESTRAINT, IDENTITY

*Wipf and Stock Publishers* Bertrand Russell defines power as the ability to produce intended effects. Robert Vecchio defines it as the ability to change the behavior of others. Dacher Keltner defines power as your capacity to make a difference in the world by influencing the states of other people. If Russell is right, then your every need, want, passion, cause, and ambition demands power. If Vecchio is right, then power inhabits every act of teaching, encouraging, parenting, storytelling, leading, and mentoring future leaders. If Keltner is correct, then my power changes your world, for better or worse. What if they're all right? What if power is all of the above? Then, at the very least, we'd all benefit from a better grasp of power.
