Making Sport History

Disciplines, identities and the historiography of sport

Routledge The field of sport history is a relatively new research domain, situated at the intersection of a number of disciplines and sub-disciplines. This interdisciplinarity has created interesting avenues for growth and fresh thinking but also inherent problems of coherence and identity. *Making Sport History* examines the development of an academic

community around sport history, exploring the roots of the discipline, its current boundaries, borders and challenges, and looking ahead at future prospects. Written by a team of world-leading sport historians, with commentaries from scholars working outside of the sport historical mainstream, the book considers key themes in the historiography of sport, including: The relationship between history, sport studies and physical education Comparative analysis of the role of historians in the writing of sport history Modern and post-modern approaches to sport history Race, gender and the sport historical establishment The role of scholarly organisations, conferences and journals in discipline-building Presenting new perspectives on what constitutes sport history and its core methodologies, the book helps explain why historians have become interested in sport, why they've chosen the topics they have, and how their work has influenced the wider world of history and been influenced by it. *Making Sport History* is essential reading for any advanced student, scholar or researcher with an interest in sport history, historiography, or the history and philosophy of the social sciences.

Modern Sports in Asia

Routledge "Modern sports" were introduced to Asia in the late nineteenth century as an innovation from the West, concurrently with the development of modern society in Asia. This book traces the historical developments of sporting cultures in Asia in specific local contexts - including Singapore, China, Myanmar, Taiwan, the Philippines, and India - and their intersections with larger social developments of colonialism, postcolonialism, nationalism, and the building of modern Asia and its place in a globalized world. The case studies herein present the social history of modern team sports with standardized rules such as basketball and cricket, and less familiar sports such as fives and chinlone, as they vacillate between global and local perspectives. This book also shows that modern sports have had an important influence on the makeup of everyday life in Asia, and the essays here also consider sports' impact on gender, body culture, and celebrity culture, among other concerns. This book painstakingly bridges the gaps between Asian Studies and Sports Studies in a way that reflects the historicity and multiplicity of sports in Asian societies. By adopting multi-disciplinary approaches, this book innovatively offers significant intersection between sociology, cultural studies and Asian studies of sport in Asia. This book was published as a special issue of *Sport in Society*.

Sport, Militarism and the Great War

Martial Manliness and Armageddon

Routledge The Great War has been largely ignored by historians of sport. However sport was an integral part of cultural conditioning into both physiological and psychological military efficiency in the decades leading up to it. It is time to acknowledge that the Great War also had an influence on sport in post-war European culture. Both are neglected topics. **Sport, Militarism and the Great War** deals with four significant aspects of the relationship between sport and war before, during and immediately after the 1914-1918 conflict. First, it explores the creation and consolidation of the cult of martial heroism and chivalric self-sacrifice in the pre-war era. Second, it examines the consequences of the mingling of soldiers from various nations on later sport. Third, it considers the role of the Great War in the transformation of the leisure of the masses. Finally, it examines the links between war, sport and male socialisation. The Great War contributed to a redefinition of European masculinity in the post-war period. The part sport played in this redefinition receives attention. **Sport, Militarism and the Great War** is in two parts: the Continental (Part I) and the "Anglo-Saxon" (Part II). No study has adopted this bilateral approach to date.

Thus, in conception and execution, it is original. With its originality of content and the approaching centenary of the advent of the Great War in 2014, it is anticipated that the book will capture a wide audience. This book was originally published as a special issue of *The International Journal of the History of Sport*.

Nonlinear Pedagogy in Skill Acquisition

An Introduction

Routledge *Nonlinear pedagogy* is a powerful paradigm for understanding human movement and for designing effective teaching, coaching and training programs in sport, exercise and physical education. It addresses the inherent complexity in the learning of movement skills, viewing the learner, the learning environment and the teacher or coach as a complex interacting system, with the constraints of individual practice tasks providing the platform for functional movement behaviours to emerge. This is the first book to explain this profoundly important new approach to skill acquisition, introducing key theoretical ideas and best practice for students, teachers and coaches. The first section of the book offers a general theoretical framework to explain processes of skill acquisition and the learning of movement skills. The book then defines nonlinear pedagogy, and outlines its key principles of practice. It offers a thorough and critical appraisal of the optimal use of instructional constraints and practice design, and discusses methods for creating challenging and supportive individualised learning environments at developmental, sub-elite and elite levels of performance. Every chapter contains cases and examples from sport and exercise contexts, providing guidance on practice activities and lessons. *Nonlinear Pedagogy in Skill Acquisition* is an essential companion for any degree level course in skill acquisition, motor learning, sport science, sport pedagogy, sports coaching practice, or pedagogy or curriculum design in physical education.

Teachers and Football

Schoolboy Association Football in England, 1885-1915

Routledge The 1870 Education Act that opened up elementary education for all children contained no provision for outdoor games. This book explains how teachers, through the elementary school football association, introduced boys to organized football as an out-of-school activity. The influence and significance of this work, insofar as it relates to the elementary school curriculum and the growth of professional and amateur football are explored in detail, including: * How ideological commitments and contemporary concerns for the physical welfare of children in cities may have led teachers to promote schoolboy football when it was not permitted during school hours * The extent to which out of school organised football may have led to outdoor games being accepted as part of the school curriculum * How elementary school football in London in the late nineteenth century influenced the development of the amateur game. This is a fascinating account of the origins of schoolboy football and the factors that have influenced its development and the consequences and benefits that have followed not only for school football but for sport in schools and communities as a whole.
