### WRITE ABOUT MATH, GRADE 3

### THE TEST CONNECTION

*Carson-Dellosa Publishing* Developing communication skills in mathematics is an important part of school curriculum, and many standardized tests require written explanations on how math problems are solved. This book provides teachers strategies to engage students in math discussions, integrate the writing process, and assess their work. A writing checklist and a reflection page are also included. For students, there are opportunities to solve math problems and practice writing explanations on how the problems were solved. The activities focus on number sense and operations, geometry, measurement, and data analysis. A scoring rubric and answer key is also provided.

**ADVANCING THEORY, KNOWLEDGE, RESEARCH METHODS, TOOLS, AND APPLICATIONS**

---

*Psychology Press* Translation of cognitive representations into written language is one of the most important processes in writing. This volume provides a long-awaited updated overview of the field. The contributors discuss each of the commonly used research methods for studying translation; theorize about the nature of the cognitive and language representations and cognitive/linguistic transformation mechanisms involved in translation during writing; and make the case that translation is a higher-order executive function that is fundamental to the writing process. The book also reviews the application of research to practice -- that is, the translation of the research findings in education and the work-world for individuals who interact with others using written language to communicate ideas. This volume provides a rich resource for student, theorists, and empirical researchers in cognitive psychology, linguistics, and education; and teachers and clinicians who can use the research in their work.

**BECOMING A TEACHER OF WRITING IN ELEMENTARY CLASSROOMS**

---

*Routledge* Becoming a Teacher of Writing in Elementary Classrooms nurtures teachers' identities as writers, connects to the realities of writing instruction in real and diverse classrooms, and encourages critical and creative thinking. This text is about writing instruction as a journey teachers and students embark on together. The focus is on learning how to teach writing through specific teaching and learning structures found in the Writing Studio: mini-lessons; teacher and peer conferencing; guided writing; and sharing, celebrating, and broadcasting writing. Pedagogical features include teaching structures and strategies, "Problematizing Practice" classroom scenarios, assessment resources, and a Companion Website. Because a teacher who views him or herself as a writer is best positioned to implement the Writing Studio, a parallel text, Becoming-writer, give readers space to consider who they are as a writer, their personal process as a writer, and who they might become as a writer.

### HANDBOOK OF RESEARCH ON WRITING INSTRUCTION PRACTICES FOR EQUITABLE AND EFFECTIVE TEACHING

---

*IGI Global* Writing is a critical component for teaching children about advocacy and empowering student voice, as well as an essential tool for learning in many disciplines. Yet, writing instruction in schools often focuses on traditional methods such as the composition of five-paragraph essays or the adherence to proper grammatical conventions. While these are two components of writing instruction and preparation in education, they only provide a small glimpse into the depth and breadth of writing. As such, writing instruction is increasingly complex and requires multiple perspectives and levels of skill among teachers. The Handbook of Research on Writing Instruction Practices for Equitable and Effective Teaching serves as a comprehensive reference of issues related to writing instruction and leading research about perspectives, methods, and approaches for equitable and effective writing instruction. It includes practices beyond K-12, including best writing practices at the college level as well as the development of future teachers. Providing unique coverage on culturally relevant writing, socio- and racio-linguistic justice, and urgent writing pedagogies, this major reference work is an indispensable resource for administrators and educators of both K-12 and higher education, pre-service teachers, teacher educators, libraries, government officials, researchers, and academicians.
