A CHRISTIAN STUDENT'S GUIDE TO TRUTH IN SCIENCE [WestBow Press](#) This book exposes the attempt to teach atheistic evolution to students, often ridiculing their faith in God. The classrooms in our schools have become the battlegrounds for the minds of our children. Since the introduction of evolution by Charles Darwin there has been a growing list of atheist professors who vigorously fight any religion. The classrooms of America should not be the battlegrounds of any religion, but evolution is a religion. It has no place in the classroom since it does not offer any information that improves the teaching of any science class, except evolution itself. There is no proof of evolution, only assertions, innuendos, credulity (belief without proof), and suppositions. Fully one-third of all geology textbooks deal with evolution, which is founded only opinion and undocumented assertions. Therefore, it should be removed from all textbooks. Dr. David Menton, who taught medicine at the Washington School of Medicine in St. Louis, Missouri, for twenty-five years, stated that he never once needed to reference evolution in any medical class. A coalition of organizations such as the National Academy of Sciences, whose members are 93% atheist or agnostic, and the National Center for Science and Education control most of the government grants intended for schools' use, fully support the atheism of evolution, and they attack any criticism of evolution. Realism's Others [Cambridge Scholars Publishing](#) For at least a century, scholarship on realist narrative, and occasional polemics against realist narrative, have assumed that realism promotes the values of sameness against those of otherness, and that it does so by use of a narrative mode that excludes certain epistemologies, ideologies, and ways of thinking. However, the truth is more complex than that, as the essays in this volume all demonstrate. Realism's Others examines the various strategies by which realist narratives create the idea of difference, whether that difference is registered in terms of class, ethnicity, epistemology, nationality, or gender. The authors in this collection examine in detail not just the fact of otherness in some canonical realist and canonical magical-realist and postmodern novels, but the actual means by which that otherness is established by the text. These essays suggest that neither realist narrative nor narratives positioned as anti-realist take otherness for granted; rather, the texts discussed here actively create difference, and this creation of difference often occasions severe difficulties for the novels' representational schema. How does one represent different types of knowledge, other aesthetic modes or other spaces, for example, in texts whose epistemology has long been seen as secular and empirical, whose aesthetic mode has always been approached as pure descriptive mimesis, and whose settings are largely domestic? These essays all begin with a certain collision—of nationalities, of classes, of representational matrices, of religions—and go on to chart the challenges that this collision presents to our ideas or stereotypes of realism, or to the possibilities of writing against and beyond realism. This question motivates examination of key realist or social-realist texts, in some of these essays, by Honoré de Balzac, George Eliot, Franz Grillparzer, Theodor Storm, Gottfried Keller, Theodor Fontane, Wilhelm Raabe, María Amparo Ruiz de Burton, Henry James, William Dean Howells, Charles Chesnutt, Theodore Dreiser, H. T. Tsiang, Alan Sillitoe, and Richard Yates. However, it is no less central a question in certain non-realist texts which engage realist aims to a surprising degree, often to debate them openly; some of these essays discuss, in this light, fantastic, magical realist, and postmodern works by Abram Tertz, Paul Auster, Alejo Carpentier, Toni Morrison, Gabriel García Márquez, Salman Rushdie, and A. S. Byatt. Realism becomes more than an aesthetic aim or narrative mode. It becomes, rather, a value evoked and discussed by all of the works analyzed here, in order to reveal its impact on fiction's treatment of ethnicity, nationality, ideology, space, gender, and social class. The Person You Mean to Be How Good People Fight Bias [HarperCollins](#) "Finally: an engaging, evidence-based book about how to battle biases, champion diversity and inclusion, and advocate for those who lack power and privilege. Dolly Chugh makes a convincing case that being an ally isn't about being a good person—it's about constantly striving to be a better person." —Adam Grant, New York Times bestselling author of Give and Take, Originals, and Option B with Sheryl Sandberg Foreword by Laszlo Bock, the bestselling author of Work Rules! and former Senior Vice President of People Operations at Google An inspiring guide from Dolly Chugh, an award-winning social psychologist at the New York University Stern School of Business, on how to confront difficult issues including sexism, racism, inequality, and injustice so that you can make the world (and yourself) better. Many of us believe in equality, diversity, and inclusion. But how do we stand up for those values in our turbulent world? The Person You Mean to Be is the smart, "semi-bold" person's guide to fighting for what you believe in. Dolly reveals the surprising causes of inequality, grounded in the "psychology of good people". Using her research findings in unconscious bias as well as work across psychology, sociology, economics, political science, and other disciplines, she offers practical tools to respectfully and effectively talk politics with family, to be a better colleague to people who don't look like you, and to avoid being a well-intentioned barrier to equality. Being the person we mean to be starts with a look at ourselves. She argues that the only way to be on the right side of history is to be a good-ish—rather than good—person. Good-ish people are always growing. Second, she helps you find your "ordinary privilege"—the part of your everyday identity you take for granted, such as race for a white person, sexual orientation for a straight person, gender for a man, or education for a college graduate. This part of your identity may bring blind spots, but it is your best tool for influencing change. Third, Dolly introduces the psychological reasons that make it hard for us to see the bias in and around us. She leads you from willful ignorance to willful awareness. Finally, she guides you on how, when, and whom, to engage (and not engage) in your workplaces, homes, and communities. Her science-based approach is a method any of us can put to use in all parts of our life. Whether you are a long-time activist or new to the fight, you can start from where you are. Through the compelling stories Dolly shares and the surprising science she reports, Dolly guides each of us closer to being the person we mean to be.
