Visions

Notes on the Seminar Given in 1930-1934

Taylor & Francis For Jung, the beautiful and brilliantly creative 28-year old Christiana Morgan was an inspired force whose path in self-analysis paralleled his own quest for personal knowledge. By teaching Morgan the trance-like technique of active imagination, Jung helped her embark on a series of archetypal adventures which she depicted in paintings of great virtuosity and he candidly recounted at a seminar given to some of his closest followers. Through his eloquent description of the fiery, mythic visions of a woman discovering her repressed sexuality and feminine power, Jung reveals how deeply this encounter challenged his understanding of feminine psychology. These two volumes bring together for the first time colour reproductions of Morgan's paintings with a complete transcript of the seminar.

Computing with Instinct

Rediscovering Artificial Intelligence

Springer *Simplicity in nature is the ultimate sophistication. The world's magnificence has been enriched by the inner drive of instincts, the profound drive of our everyday life. Instinct is an inherited behavior that responds to environmental stimuli. Instinctive computing is a computational simulation of biological and cognitive instincts, which influence how we see, feel, appear, think and act. If we want a computer to be genuinely secure, intelligent, and to interact naturally with us, we must give computers the ability to recognize, understand, and even to have primitive instincts. This book, Computing with Instincts, comprises the proceedings of the Instinctive Computing Workshop held at Carnegie Mellon University in the summer of 2009. It is the first state-of-the-art survey on this subject. The book consists of three parts: Instinctive Sensing, Communication and Environments, including new experiments with in vitro biological neurons for the control of mobile robots, instinctive sound recognition, texture vision, visual abstraction, genre in cultures, human interaction with virtual world, intuitive interfaces, exploitive interaction, and agents for smart environments.*

Instinct Christian Study Guide (Umi): A Christian Workbook Companion to Instinct: The Power to Unleash Your Inborn Drive

The Forerunner

Lindhardt og Ringhof *"Should we not laugh to see a horse in corsets? The time is coming when we shall so laugh to see a woman." - The Forerunner Volume 1 (1909-1910) by Charlotte Perkins Gilman. In this anthology collection of key writings by prominent humanitarian and pro-equality writer, Charlotte Perkins Gilman, the reader is afforded a fascinating insight into the lives and societal challenges of women in the early 20th century. Through a selection of expertly written poems, essays, and fictional stories as well as non-fiction narratives, the monthly magazine excerpts include lesser-known works such as 'Our Androcentric Culture; or, The Man-Made World', the poem 'Then This', and an essay entitled 'A Small God And a Large Goddess'. The original writing showcases a progressive thinker with a strong female voice, who was ahead of her time in terms of feminism and women's rights, in this selection of politically-inspired pieces from 1909. Charlotte Perkins Gilman, also known as Charlotte Perkins Stetson, was born on 3rd July 1860 in Connecticut, USA. Her early family life was troubled, with her father abandoning his wife and family; a move which strongly influenced her feminist political leanings and advocator of women's rights. After working as a tutor and painter, Perkins - a self-declared humanist and tomboy - began to work as a writer of short stories, novels, non-fiction pieces, and poetry. Her best-known work is her semi-autobiographical short story, inspired by her post-natal depression, entitled 'The Yellow Wallpaper', which was published in 1892 and made into a film in 2011. Charlotte Perkins Gilman was a member of the American National Women's Hall of Fame and strongly believed that "the domestic environment oppressed women through the patriarchal beliefs upheld by society". A believer in euthanasia, she was diagnosed with incurable breast cancer in January 1932 and subsequently took her own life in August 1935, writing in her suicide note that she "chose chloroform over cancer".*

The Humanness of Women: Theory and Practice of Feminism (Studies and Thoughts)

e-artnow *This carefully crafted ebook: "The Humanness of Women: Theory and Practice of Feminism (Studies and Thoughts)" is formatted for your eReader with a functional and detailed table of contents. Charlotte Perkins Gilman (1860-1935) was a prominent American feminist, sociologist, novelist, writer of short stories, poetry, and nonfiction, and a lecturer for social reform. She was a utopian feminist during a time when her accomplishments were exceptional for women, and she served as a role model for future*

generations of feminists because of her unorthodox concepts and lifestyle. Her best remembered work today is her semi-autobiographical short story "The Yellow Wallpaper" which she wrote after a severe bout of postpartum psychosis. *Women and Economics - A Study of the Economic Relation Between Men and Women as a Factor in Social Evolution* is a book written by Charlotte Perkins Gilman and published in 1898. It is considered by many to be her single greatest work, and as with much of Gilman's writing, the book touched a few dominant themes: the transformation of marriage, the family, and the home, with her central argument: "the economic independence and specialization of women as essential to the improvement of marriage, motherhood, domestic industry, and racial improvement."

It also offers teens a descriptive road map of what they can expect and what they can do to help ease anxieties and fears as they encounter life's uncertainties; it helps them to be better prepared for the changes or "rebirths" into new realms of relationships and responsibilities. *The Parents' and Educators' Manual of Teenage "Rebirth"* aims to ease the journey through the dark, mysterious, and wonderful world of adolescence with its joys and struggles and beyond.

Society and Sanity

How to Live Well Together

[Ignatius Press](#) If there are two words that seem not to fit together they are "society" and "sanity." Spend twenty minutes on the freeway or ten minutes reading the newspaper, or ponder the religious and political conflicts in some regions of the world, and you will understand the point. Yet if people are to thrive--to live fully and together in peace-- we must have sanity when it comes to society. And that requires sanity when it comes to thinking about man. Sanity involves seeing things as they really are. Social sanity requires seeing man as he really is--to grasp who and what human beings are and what sort of social arrangements help or hinder human flourishing. In this classic work, *Society and Sanity*, Catholic thinker Frank Sheed brings his brilliant mind and lucid writing style to bear on the good human society. By explaining perennial truths about human nature based on the wisdom of Catholic social ethics, Sheed's book is as pertinent today with our controversies about love, the nature of marriage, the role of government, the relationship of law and morality and of Church and State, and the duties of the citizen, as when he penned the work over a half a century ago.

The Inherent Right of Self-Defence in International Law

[Springer Science & Business Media](#) Determining the earliest point in time at which international law authorises a state to exercise its inherent right of self-defence is an issue which has been debated, but unsatisfactorily reasoned, by scholars and states since the 1960's. Yet it remains arguably the most pressing question of law that faces the international community. This book unravels the legal and factual complications which have obscured the answer to this question. In contrast to most other works, it takes an historic approach by tracing the evolution of the rights, rules and principles of international law which have governed the use of force by states since the 16th century. Its emphasis on self-defence provides the reader with a new and complete understanding of how and why the international legal framework limits defensive force to repelling an imminent threat or use of offensive force which is directed at the territory of a state. Taking an historic approach enables this book to resurrect an understanding of the human defensive instinct which has guided the formation of the international law of self-defence. It also explains the true legal nature and scope of the inherent right of self-defence, of anticipatory self-defence and provides a definition of the legal commencement of an armed attack for the purpose of Article 51 of the Charter. Finally, the reader will receive a unique source of research materials and analysis of state practice and of scholarly works concerning self-defence and the use of force since the 16th century, which is suitable for all readers of international law around the world.

Memoir on the Use of Homing Pigeons for Military Purposes

Machiavelli's Ethics

Princeton University Press *Machiavelli's Ethics challenges the most entrenched understandings of Machiavelli, arguing that he was a moral and political philosopher who consistently favored the rule of law over that of men, that he had a coherent theory of justice, and that he did not defend the "Machiavellian" maxim that the ends justify the means. By carefully reconstructing the principled foundations of his political theory, Erica Benner gives the most complete account yet of Machiavelli's thought. She argues that his difficult and puzzling style of writing owes far more to ancient Greek sources than is usually recognized, as does his chief aim: to teach readers not how to produce deceptive political appearances and rhetoric, but how to see through them. Drawing on a close reading of Greek authors--including Thucydides, Xenophon, Plato, and Plutarch--Benner identifies a powerful and neglected key to understanding Machiavelli. This important new interpretation is based on the most comprehensive study of Machiavelli's writings to date, including a detailed examination of all of his major works: The Prince, The Discourses, The Art of War, and Florentine Histories. It helps explain why readers such as Bacon and Rousseau could see Machiavelli as a fellow moral philosopher, and how they could view The Prince as an ethical and republican text. By identifying a rigorous structure of principles behind Machiavelli's historical examples, the book should also open up fresh debates about his relationship to later philosophers, including Rousseau, Hobbes, and Kant.*
