Religion and Medicine

A History of the Encounter Between Humanity's Two Greatest Institutions

Oxford University Press, USA **"In Religion and Medicine, Dr. Jeff Levin, distinguished Baylor University epidemiologist, outlines the longstanding history of multifaceted interconnections between the institutions of religion and medicine. He traces the history of the encounter between these two institutions from antiquity through to the present day, highlighting a myriad of contemporary alliances between the faith-based and medical sectors. Religion and Medicine tells the story of: religious healers and religiously branded hospitals and healthcare institutions; pastoral professionals involved in medical missions, healthcare chaplaincy, and psychological counseling; congregational health promotion and disease prevention programs and global health initiatives; research studies on the impact of religious and spiritual beliefs and practices on physical and mental health, well-being, and healing; programs and centers for medical research and education within major universities and academic institutions; religiously informed bioethics and clinical decision-making; and faith-based health policy initiatives and advocacy for healthcare reform. Religion and Medicine is the first book to cover the full breadth of this subject. It documents religion-medicine alliances across religious traditions, throughout the world, and over the course of history. It summarizes a wide range of material of relevance to historians, medical professionals, pastors and theologians, bioethicists, scientists, public health educators, and policymakers. The product of decades of rigorous**

and focused research, Dr. Levin has produced the most comprehensive history of these developments and the finest introduction to this emerging field of scholarship."--

Advancing Higher Education as a Field of Study

In Quest of Doctoral Degree Guidelines - Commemorating 120 Years of Excellence

Stylus Publishing, LLC Winner of the 2015 Auburn Authors Awards Where is higher education as a field of study going in this century? How will higher education program leaders design and sustain their degree programs' vitality in the face of perennial challenges from inside and outside the academy? While in 1979 the Council for the Advancement of Standards in Higher Education (CAS) defined standards for student affairs master's level preparation, and while 2010 saw the adoption of guidelines for higher education administration and leadership preparation programs at the master's degree level, there still are, however, no guidelines that address higher education leadership doctoral programs, despite increasing demands for assessment and evaluation. This book suggests that higher education administration doctoral degree guidelines are a critical next step in advancing their program quality and continuity. It offers a review of the field's history, the condition of its higher education programs, developments from the student affairs specialization and its guidelines, and a multi-chapter dialogue on the benefits or disadvantages of having guidelines. At a time of urgency to prepare the next generation of higher education faculty and leaders, this book sets out the parameters for the debate about what the guidelines should cover to ensure the appropriate and effective preparation of students. It also offers a useful framework for enriching the knowledge of deans, chairs, program coordinators and

faculty who are engaged in program design, assessment, and revision. It will also be of interest to policymakers, the personnel of accrediting agencies, and not least graduate students within higher education preparation programs. All the contributors to this volume have the exemplary expertise, leadership experience, and a close association with higher education guidelines and standards, and have extensively contributed to the literature on higher education.

Unequal Higher Education

Wealth, Status, and Student Opportunity

Rutgers University Press **American higher education is often understood as a vehicle for social advancement. However, the institutions at which**

students enroll differ widely from one another. Some enjoy tremendous endowment savings and/or collect resources via research, which then offsets the funds that students contribute. Other institutions rely heavily on student tuition payments. These schools may struggle to remain solvent, and their students often bear the lion's share of educational costs. Unequal Higher Education identifies and explains the sources of stratification that differentiate colleges and universities in the United States. Barrett J. Taylor and Brendan Cantwell use quantitative analysis to map the contours of this system. They then explain the mechanisms that sustain it and illustrate the ways in which rising institutional inequality has limited individual opportunity, especially for students of color and low-income individuals.

Forces Shaping Community College Missions

New Directions for Community Colleges, Number 180

John Wiley & Sons Historically, community colleges have served societal and functional missions that expanded over time, with the result of trying to achieve multiple goals for multiple audiences. This volume explores the forces currently shaping community college missions and the resulting tension between stated goals, assumed goals, and achievement of those goals. In an era of increasing accountability, tighter coupling, and the need to do ever more with fewer resources, mission focus is vital to college survival. Explore such issues as: the unspoken social contract, transfer, developmental education, noncredit education, dual enrollment, workforce development, the free college movement, and planning for the future. The topics are explored thoughtfully from both scholarly and practical perspectives, highlighting the forces that shape community college missions. This is the 180th volume of this Jossey-Bass quarterly report series. Essential to the professional libraries of presidents, vice presidents, deans, and other leaders in today's open-door institutions, *New Directions for Community Colleges* provides expert guidance in meeting the challenges of their distinctive and expanding educational mission.

Sticky Faith Service Guide

Moving Students from Mission Trips to Missional Living

Zondervan Anyone who serves teenagers today knows that more and more young people are eager to make a difference in the world. When students participate in short-term missions, service, and justice causes, parents and youth leaders hope these experiences will lead to real transformation. But research shows that our efforts don't always stick. If we truly want short-term work to translate into long-term change, leaders and students must spend more time before, during, and after service projects preparing for and processing their experiences. The sessions in this leader's guide will help you create experiences that stick—both for the students you take and the communities you serve. This guidebook offers a host of practical and field-tested exercises for each phase of your experience, whether it's a half-day local service project or a two-week trip overseas. Participants will engage in hands-on experiences to gain new insights about themselves, their relationship with God, their teammates, and the world we're called to love and serve. Each of these steps is a catalyst in helping students apply what they have learned in the field to their own lives back at home. Also included are ideas to help get parents and the whole church engaged in service together. A companion student journal is also available to boost the potential for personal application throughout the journey.

Frontiers: Geography, Explorers, and Literature

PRUFROCK PRESS INC. What is a frontier? What are the frontiers of the future? What frontiers are being explored today? These and other questions are presented in this series on frontiers that help make this concept come alive to all students. The books in Prufrock's new Differentiated Curriculum Kits employ a differentiated, integrated curriculum based on broad themes. This all-in-one curriculum helps

teachers save planning time, ensure compliance with national standards, and most importantly, pique their students' natural excitement and interest in discovery. By participating in the wide variety of activities in the Differentiated Curriculum Kit for Grade 6, students will discover the frontiers around them and gain a lifelong desire to learn. In *Frontiers Book 2: Geography, Explorers, and Literature*, students will discover the transcontinental railroad, the discoveries of Lewis and Clark, the mission to Mars, political cartoons, freedom of speech, and book bans.

The Palgrave Handbook of Learning and Teaching International Business and Management

Springer Nature This handbook, which serves as a follow-up text to **The Palgrave Handbook of Experiential Learning In International Business**, reviews theoretical and empirical approaches of experiential learning pedagogy, and its role in increasing the effectiveness in teaching and learning of international business, and also, in the incorporation of international business-related concepts and competences in business and non-business programs. This edition offers a broader and updated perspective on experiential learning pedagogy for international business and management, and beyond. The first part provides an updated overview of the theories of experiential learning and effectiveness of teaching and learning in international business through the use of experiential learning projects. Part two provides a collection of specific applications of experiential learning in International Business and related fields. This handbook is a one-stop source for international managers, business educators, and trainers seeking to either select and use an existing experiential learning project or develop new projects and exercises of this kind.
