Among these substances are polyphenols, tocopherols, and phytosterols. Studies have shown that saline irrigated varieties of olives have demonstrated advantages over those irrigated with tap water. This is just one of the aspects of desert cultivation of olives that is covered in Desert Olive Oil Advanced Biotechnologies. Based on 20 years of research, the book expounds on the appropriate selection of olive varieties with high productivity and oil quality, the impact of foliar nutrition on decreasing alternate bearing and increasing fruit quality, improving efficiency of mechanical harvesting, and increasing efficiency of oil extraction and oil quality regulating analysis. Addresses olive cultivation methods for semi-arid environments Focuses on intensive cultivation using saline and municipal waste recycled irrigation water and their significant impact on the production and nutritional value of olive oil Integrated and multidisciplinary approaches providing a comprehensive view of the desert olive industry Provides key considerations including ecological, biotechnological, agricultural and political impacts **The Shattering City** [Createspace Independent Publishing Platform](#) A novel of an older artist, as he interacts with women in his life. Yamana-English A Dictionary of the Speech of Tierra Del Fuego By Thomas Bridges Edited by Ferdinand Hestermann and Martin Gusinde Merry's **Book of Travel and Adventure Licht - Raum** [Axel Menges](#) The ongoing paradigm change in regard to the use of energy, its efficient usage and the consumption of resources is giving rise to new light systems and lighting appliances. This development might also lead to the use of light as a building material in its own right, comparable to traditional building materials, making it possible to create light space productions something that did not seem feasible up to now due to the high cost of energy and of light systems. The goal of this book is to develop temporary light spaces that re-interpret the existing urban environment on a seasonal basis or over a cycle of several years. As a result, the city will literally appear in a new light. Strollers in the city streets will experience their familiar environment in a new way. Illuminated planes interlacing with planes made by linear fields of light beams will create immaterial material space experiences: still lifes of light within which one can move about and light choreographies that move barely noticeably, creating still lifes in motion. Current research aims at exploring, imagining and inventing stand-alone spatial structures of light, adding on to and transforming existing spaces, creating a new spatial awareness that may enable people to experience urban space in a different way. Similar to the process of architectural design, where haptic built volumes create interspaces, the light spaces that are presently being designed make these interspaces visible and allow urban dwellers to experience unexpected spatial constellations. The discourse in this book starts with essays introducing aspects of light spaces, including the following: Christian Bartenbach on the perception of light as something that creates space; Niels Gutschow on the ritual dimension of light, an element in the history of creation; Samuel Widmer on light in near-death experiences; Aldous Huxley on light as the messenger from a world we perceive on an unconscious level; Junichiro Tanizaki on the world of the shadow and Tadashi Endo on movement as a relation between time and space in Butoh, the Japanese dance of darkness. The discourse concludes with documents on light spaces by Wolfgang Rang collected over a period of 30 years showing how these light spaces were regarded in the writings of con-temporaries, including Max Bächer on the dawn of a new era; Hans-Peter Schwarz on the deconstruction of space by light; Jürgen Hasse on light as a discourse fragment of public space; Manuel Cuadra on red luminescence; and Antonio de Campos on shadow as an expression of light.

Learning with Information Systems Learning Cycles in Information Systems Development [Routledge](#) In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

Historical Dictionary of Ancient India [Rowman & Littlefield](#) India's history and culture is ancient and dynamic, spanning back to the beginning of human civilization. Beginning with a mysterious culture along the Indus River and in farming communities in the southern lands of India, the history of India is punctuated by constant integration with migrating peoples and with the diverse cultures that surround the country. Placed in the center of Asia, history in India is a crossroads of cultures from China to Europe, as well as the most significant Asian connection with the cultures of Africa. The Historical Dictionary of Ancient India provides information ranging from the earliest Paleolithic cultures in the Indian subcontinent to 1000 CE. The ancient history of this country is related in this book through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on rulers, bureaucrats, ancient societies, religion, gods, and philosophical ideas.

Spaceborne Radar Observations A Guide for Magellan Radar-image Analysis [The New Harvest](#) **Agricultural Innovation in Africa** [OUP Us](#) African agriculture is currently at a crossroads, at which persistent food shortages are compounded by threats from climate change. But, as this book argues, Africa can feed itself in a generation and can help contribute to global food security. To achieve this Africa has to define agriculture as a force in economic growth by advancing scientific and technological research, investing in infrastructure, fostering higher technical training, and creating regional markets.

Text and Genre in Reconstruction Effects of Digitalization on Ideas, Behaviours, Products and Institutions [Open Book Publishers](#) In this broad-reaching, multi-disciplinary collection, leading scholars investigate how the digital medium has altered the way we read and write text. In doing so, it challenges the very notion of scholarship as it has traditionally been imagined. Incorporating scientific, socio-historical, materialist and theoretical approaches, this rich body of work explores topics ranging from how computers have affected our relationship to language, whether the book has become an obsolete object, the nature of online journalism, and the psychology of authorship. The essays offer a significant contribution to the growing debate on how digitization is shaping our collective identity,

for better or worse. Text and Genre in Reconstruction will appeal to scholars in both the humanities and sciences and provides essential reading for anyone interested in the changing relationship between reader and text in the digital age. Made Realities Photographs by Thomas Demand, Philip-Lorca DiCorcia, Andreas Gursky and Jeff Wall [Hirmer Verlag GmbH](#) Recognising strangeness in familiar objects, the present in the past, the construed in what is authentic -- the four masterly photographers show excerpts from our world in which the boundary between reality and imagination becomes blurred. From fleeting everyday scenes to mysterious happenings and historical events, they reveal a complex and multi-layered reality. Thomas Demand, Philip-Lorca diCorcia, Andreas Gursky and Jeff Wall use the proximity to reality and the momentary nature of photography in order to create their idiosyncratic viewpoints of reality. What is real? They play with the viewers' perceptions, irritate and invite them to an individual interpretation of what is shown. This exclusive volume presents the works of the stars of the contemporary international photography scene magnificently and in clearly narrated texts. Gas Engines and Co-generation Papers Presented at a Seminar Organized by the Combustion Engines Group of the Institution of Mechanical Engineers, and Held at the National Motor Museum, Solihull, West Midlands, on 10/11 May 1990 Britain was one of the pioneers of the use of sewage gas in engines and in the use of a range of gaseous fuels in dual fuel engines. Gas engines, usually spark ignited, have probably been most widely used in the USA. Today, there is world-wide interest in using natural gas in IC engines for power generation and in heat recovery. Cogeneration is commercial in more and more countries as power demands exceed installed capabilities. combustion under any normal regime produces virtually no carbon (soot) nor hydrocarbons heavier than methane. For a given energy release, Methane produces less CO2 than any other hydrocarbon fuel. Nox control from its in IC engines is possible by using lean-burn techniques or catalytic control. packaged cogeneration; catalytic exhaust gas cleaning for engines used in cogeneration; emission control for IC including diesel engines; oxygen control for gas engines with catalytic convertors; controls and monitoring of gas engines; a model to predict performance and heat release in dual-fuel diesel engines.
