Seduced by Metaphor

Timothy Pilgrim Collected Published Poems

Seduced by metaphor is a collection of the published work of Montana native and Pacific Northwest poet Timothy Pilgrim. It includes his first poem published in 1959, one of over 400 poems accepted by over 100 American and international periodicals and books through 2020. Published by Cairn Shadow Press, the tight, vivid poems in this book are powered by seductive, current, authentic life metaphors lithe upon the page. Throughout its 438 pages in three sections - Pilgrim in his own wright, Part professor, part poet, and Early Pilgrim, reluctant cowboy - the stories and insights gather weight and take shape. Pilgrim's breadth and quality of wordplay add richness to his work, and, without cease, transfer genuine emotion to the page. Replete with poems steeped in Montana, Idaho, and Washington culture and outdoor splendor, the collection is a soundtrack of life. Readers are immersed into a range of themes - family, love, loss, societal stress, climate change, war, violent masculinity, elitism, misogyny, science, philosophy, criticism - and immediately rewarded by Pilgrim's extraordinary skill at turning a phrase, often humorously. timeless.

Introduction to Laser Technology

[John Wiley & Sons](#) The only introductory text on the market today that explains the underlying physics and engineering applicable to all lasers Although lasers are becoming increasingly important in our high-tech environment, many of the technicians and engineers who install, operate, and maintain them have had little, if any, formal training in the field of electro-optics. This can result in less efficient usage of these important tools. Introduction to Laser Technology, Fourth Edition provides readers with a good understanding of what a laser is and what it can and cannot do. The book explains what types of laser to use for different purposes and how a laser can be modified to improve its performance in a given application. With a unique combination of clarity and technical depth, the book explains the characteristics and important applications of commercial lasers worldwide and discusses light and optics, the fundamental elements of lasers, and laser modification.? In addition to new chapter-end problems, the Fourth Edition includes new and expanded chapter material on: Material and wavelength Diode Laser Arrays Quantum-cascade lasers Fiber lasers Thin-disk and slab lasers Ultrafast fiber lasers Raman lasers Quasi-phase matching Optically pumped semiconductor lasers Introduction to Laser Technology, Fourth Edition is an excellent book for students, technicians, engineers, and other professionals seeking a fuller, more formal introduction to the field of laser technology.

The Text Message

Mj Padgett Books The text message was clearly meant for her brother, Patrick. There was no way Adam Norcross intended to text Emily Waters--his best friend's sister, his arch-enemy, his nemesis... Okay, maybe that's going too far, but Adam never liked Emily, a fact made perfectly clear on the day of Patrick's funeral. Emily has a plan for her future. It's simple--get out of her small hometown and never look back. It's the only way she knows to escape the onslaught of memories that seem to pop up everywhere she goes. Adam's plan is a little different--wallow in self-pity, anger, and frustration until he explodes in a sensational display of emotional overload. It's the only way he knows to cope with his guilt over his best friend's death. On the first day of senior year, Emily receives a mysterious text message. At first, she assumes it's a mistake, but soon, she realizes it was meant for her deceased brother. When the identity of the sender is revealed, the adventure that follows sends Emily into a tailspin she won't see coming. When the smoke clears, all she is left with are the broken pieces of her life and one echoing question... can you ever really go back home?
