THINKING SECURITY

STOPPING NEXT YEAR'S HACKERS

Addison-Wesley Professional If you're a security or network professional, you already know the "do's and don'ts": run AV software and firewalls, lock down your systems, use encryption, watch network traffic, follow best practices, hire expensive consultants . . . but it isn't working. You're at greater risk than ever, and even the world's most security-focused organizations are being victimized by massive attacks. In *Thinking Security*, author Steven M. Bellovin provides a new way to think about security. As one of the world's most respected security experts, Bellovin helps you gain new clarity about what you're doing and why you're doing it. He helps you understand security as a systems problem, including the role of the all-important human element, and shows you how to match your countermeasures to actual threats. You'll learn how to move beyond last year's checklists at a time when technology is changing so rapidly. You'll also understand how to design security architectures that don't just prevent attacks wherever possible, but also deal with the consequences of failures. And, within the context of your coherent architecture, you'll learn how to decide when to invest in a new security product and when not to. Bellovin, co-author of the best-selling *Firewalls and Internet Security*, caught his first hackers in 1971. Drawing on his deep experience, he shares actionable, up-to-date guidance on issues ranging from SSO and federated authentication to BYOD, virtualization, and cloud security. Perfect security is impossible. Nevertheless, it's possible to build and operate security systems far more effectively. *Thinking Security* will help you do just that.

PYTHON FOR PROBABILITY, STATISTICS, AND MACHINE LEARNING

Springer This book, fully updated for Python version 3.6+, covers the key ideas that link probability, statistics, and machine learning illustrated using Python modules in these areas. All the figures and numerical results are reproducible using the Python codes provided. The author develops key intuitions in machine learning by working meaningful examples using multiple analytical methods and Python codes, thereby connecting theoretical concepts to concrete implementations. Detailed proofs for certain important results are also provided. Modern Python modules like Pandas, Sympy, Scikit-learn, Tensorflow, and Keras are applied to simulate and visualize important machine learning concepts like the bias/variance trade-off, cross-validation, and regularization. Many abstract mathematical ideas, such as convergence in probability theory, are developed and illustrated with numerical examples. This updated edition now includes the Fisher Exact Test and the Mann-Whitney-Wilcoxon Test. A new section on survival analysis has been included as well as substantial development of Generalized Linear Models. The new deep learning section for image processing includes an in-depth discussion of gradient descent methods that underpin all deep learning algorithms. As with the prior edition, there are new and updated *Programming Tips* that illustrate effective Python modules and methods for scientific programming and machine learning. There are 445 run-able code blocks with corresponding outputs that have been tested for accuracy. Over 158 graphical visualizations (almost all generated using Python) illustrate the concepts that are developed both in code and in mathematics. We also discuss and use key Python modules such as Numpy, Scikit-learn, Sympy, Scipy, Lifelines, CvxPy, Theano, Matplotlib, Pandas, Tensorflow, Statsmodels, and Keras. This book is suitable for anyone with an undergraduate-level exposure to probability, statistics, or machine learning and with rudimentary knowledge of Python programming.

DEAD ON THE VINE

A FINN FAMILY FARM MYSTERY

Crooked Lane Books Perfect for fans of B. B. Haywood and Peg Cochran, Ellie B. White's whimsical series debut is full of farm fun, complete with a helpful baby pig. Reluctant farmer Charlotte Finn needs the help of the livestock to sleuth a mysterious death. Charlotte Finn never wanted to inherit the family's produce farm--much less plow a heap of money into it. Her plan is to hammer a great big FOR SALE sign into the farm's fallow furrows--but Charlotte's sunny hopes of a quick sale succumb to a killing frost when she finds a dead body entwined supine in the tomato vines. The poor man, it seems, was run through...with a pitchfork? Now, Charlotte is stuck with running the farm in the midst of a murder investigation. Charlotte's knowledge of farming is smaller than her bank balance, so she relies on caretakers Joe and Alice Wong and their farmhands. Can she trust them? She doesn't know them. There's also farmer Samuel Brown, who still carries a childhood grudge. But the case gets personal when Charlotte learns that the victim might have been her own kin--and seeds of suspicion grow into a fertile field of suspects. Charlotte turns to the farm's pig to help root out the killer. Soon, the goats, geese, and horse join in, but will Charlotte harvest a murderer--or buy the farm?

LINGUISTIC DIVERSITY AND SOCIAL JUSTICE

AN INTRODUCTION TO APPLIED SOCIOLINGUISTICS

Oxford University Press Understanding and addressing linguistic disadvantage must be a central facet of the social justice agenda of our time. This book explores the ways in which linguistic diversity mediates social justice in liberal democracies undergoing rapid change due to high levels of migration and economic globalization. Focusing on the linguistic dimensions of economic inequality, cultural domination and imparity of political participation, *Linguistic Diversity and Social Justice* employs a case-study approach to real-world instances of linguistic injustice. Linguistic diversity is a universal characteristic of human language but linguistic diversity is rarely neutral; rather it is accompanied by linguistic stratification and linguistic subordination. Domains critical to social justice include employment, education, and community participation. The book offers a detailed examination of the connection between linguistic diversity and inequality in these specific contexts within nation states that are organized as liberal democracies. Inequalities exist not only between individuals and groups within a state but also between states. Therefore, the book also explores the role of linguistic diversity in global injustice with a particular focus on the spread of English as a global language. While much of the analysis in this book focuses on language as a means of exclusion, discrimination and disadvantage, the concluding chapter asks what the content of linguistic justice might be.

LANGUAGE, GENDER, AND SEXUALITY

AN INTRODUCTION

Routledge *Language, Gender, and Sexuality* offers a panoramic and accessible introduction to the ways in which linguistic patterns are sensitive to social categories of gender and sexuality, as well as an overview of how speakers use language to create and display gender and sexuality. This book includes discussions of trans/non-binary/genderqueer identities, embodiment, new media, and the role of language and interaction in sexual harassment, assault, and rape. Drawing on an international range of examples to illustrate key points, this book addresses the questions of: how language categorizes the gender/sexuality world in both grammar and interaction; how speakers display, create, and orient to gender, sexuality, and desire in interaction; how and why people display different ways of speaking based on their gender/sexual identities. Aimed at students with no background in linguistics or gender studies, this book is essential reading for anyone studying language, gender, and sexuality for the first time.

A CRITICAL GUIDE TO UNIVERSAL STUDIOS' SCIENCE FICTION, HORROR AND MYSTERY FILMS, 1929-1939

McFarland While Universal's *Dracula* and *Frankenstein* (both 1931) have received the most coverage of any of the studio's genre releases, it is the lesser known films that have long fascinated fans and historians alike. Starting with *The Last Warning*, a 1929 movie released as both a silent and a talkie, Universal provided a decade of films that entertained audiences and sometimes frustrated critics. Each of Universal's horror, science fiction and "twisted mystery" films receives an in-depth essay for each film. The focus is first on the background to the making of the movie and its place in the Universal catalog. A detailed plot synopsis with critical commentary follows. Filmographic data for the film conclude the entry. Universal's *The Shadow* short film series is covered in an appendix. Many rare illustrations and movie posters are also included.

GALEN AND THE WORLD OF KNOWLEDGE

Cambridge University Press "This volume of new essays is based on a conference with the same title held at the University of Exeter in 2005. All those speaking on that occasion have written chapters in this volume, along with Riccardo Chiaradonna whose chapter has been specially prepared for the volume. The aim of this volume, like the conference on which it is based, is to contribute to the upsurge of new research on Galen by focusing on a topic that bridges the interests of specialists in ancient medical history and Classicists and philosophers more generally. The conference also represents the convergence of two current focuses of research in the Department of Classics and Ancient History at Exeter, on ancient medicine especially Galen and on Hellenistic and Imperial Greek culture more generally"--Provided by publisher.
