The Praetorian STARShip : the untold story of the Combat Talon

DIANE Publishing Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

Revolution in Wazobia

The Revolutionary Vision of the Triumph of a Triumvirate

Ann's Indulgence Limited The Plot of the Book Title: Revolution in Wazobia: The Revolutionary Vision of the Triumph of a Triumvirate Written in 407 pages including the preliminary pages, 14 Chapters and a Postscript Copyright: Anene Nwuzor, 2013. Published in 2015 Publishers: Ann's Indulgence Limited (AIL), Abuja, Nigeria. The book is a historical fiction for a general readership. The author, Anene Nwuzor, used a fictional approach to deal with realities in Africa. Bad leadership and corruption have contributed to having most of the African countries falling behind with failed education, economic and socio-political systems. Just like many innovations, which come with imaginations turned into clear visions, the author put up a challenge to a possibility, which with commitment can be brought to reality. Just a reminiscent of the saying, 'with imagination one can fly', with his vision in order to inspire in the people a rethink, hope and confidence for a change towards for growth and development of African countries. The author's analogy of the prevailing pathetic state of African countries, using an imaginary country in this book started in his earlier book; Educating for Democracy in Nigeria, a psycho-socio analysis, which specifically analysed the systems' failure in Nigeria. The book pitched from helping readers in understanding human and developmental psychology went on explaining to readers what contributed to the systems' abnormalities. With an unassuming boldness, the author in this new book traced the need for social change, reformation of minds and use of scientific innovation (Nanotechnology) to offer what will help change the systems. While some people have given up hope on a change to normal standard systems, some have the notion that for the countries in Africa, if at all a positive change will come, it will come with revolution, which has been mostly viewed as one of violence, bloodshed. However, the author in another different stroke daringly offered a practical solution on how the needed change can happen. Committed to impacting on societal growth and development, he reaffirmed the need for a radical change-not one of bloodshed-but in attitude with Revolution in Wazobia. Despite portraying the disheartening tales of abnormal things that have become normal things, which people seem not working on changing but rather devising means to living with or leaving for some other foreign lands, Revolution in Wazobia created a fascinating and mind-boggling thriller of the tales that make readers to laugh hilariously (this is possibly to nerve the readers while exposing the weak structure of the educational, economic, social and political institutions), but then the readers pause and think. The book somewhat taught what democratic leadership and followership should offer. The author found a figure, a woman, Andora, who despite the odds surrounding her sexuality-in most African cultures is subjected for no just cause to social, economic and moral deprivation-triumphed along with two other major characters. They promoted an ideology and a movement that helped change the people's executive, legislature and judiciary systems. Nwuzor tactically employed the skills of a teacher, a historian, a psycho-socio analyst and many years of experience as a researcher to analyse the behaviour of the polity in most of the African countries. The story completed in 2013, in simple past tense tells of a modest future triumph for Africans. His work depicted with utmost precision what played out in Nigeria's 2015 general election. The work is a result of thorough analysis, and thus deemed worth reading for the actualization of its actual vision. It has an audio and e-book versions. Fighting the Dragon

How I Beat Multiple Sclerosis

Createspace Independent Pub For decades, traditional medicine had very little to offer for individuals suffering from multiple sclerosis and other autoimmune diseases. Today, medical science has brought us wave upon wave of immunomodulatory medications to try to slow disease progression. Unfortunately, these medications come with their own health- and life-threatening side effects. And sometimes, they just stop working. "Fighting the Dragon: How I Beat Multiple Sclerosis" is the story of one woman's thirty year battle with multiple sclerosis and what she did to reclaim her life when she realized she would need an assisted living facility within a few years. The book contains detailed descriptions of what worked and what did not, where she got the help she needed (and how the reader can locate these resources within his/her own community), and the logic behind the non-conventional therapies. "Fighting the Dragon" is a narrative of courage—courage driven by desperation, a story written by a patient who decided, when her neurologist told her, "You will never walk normally again," that she would dance. "Fighting the Dragon" is also a book the MS patient can take to his/her physician . . . it contains well-researched, easy-to-follow guidelines for what to do and how. The information is also applicable to a wide range of other autoimmune conditions, cancers, and AIDS. ***** Excerpt: .

... if your car kept breaking down and the mechanic you took it to kept doing the same thing to fix it—but it did not stay fixed, you would question the mechanic's competence. Maybe the mechanic pulled out a technical manual. "See. I fixed it exactly as the manual said. This is the industry-approved way to solve this problem." When the car broke down again a week later, would you be satisfied? Probably not. You might decide it is time to replace the car. But that might be too expensive. So, what to do? If you were smart, you would probably try to find a new mechanic. You might ask your friends who they would recommend. You might search on the Internet to see if other people had the same experience with their cars . . . and what caused the problem. You might telephone some repair shops to get some idea of what they thought the problem might be. If you found a new mechanic and that mechanic looked over the car and said, "I have a solution that is not in any industry-approved repair manuals, but it is safe and it works,"—would you walk away and go back to the first mechanic who never got it right? Why is your health worth any less than your car?
