Dear Dumb Diary Year Two #2: The Super-Nice Are Super-Annoying

Scholastic Inc. Do NOT read Jamie Kelly's top-secret diaries! "Sometimes it amazes me how ingenious I am about everything." --Jamie Kelly We've been with Jamie Kelly through her search for inner beauty, poofy bridesmaid dresses, and desperate attempts to make money during summer vacation. Now Jamie's upcoming diaries have a fresh look and a fun twist. It's Dear Dumb Diary: Year Two! The diary entries are still laugh-out-loud funny -- but this is a whole new beginning. A DISTANT THUNDER

AuthorHouse Shane Ryan is a wrong guy. Wrong race. Wrong gender. Wrong class. Wrong side of the tracks. Wrong attitude. America in the near future is a cold, cruel place, especially in the hardscrabble rural Pacific Northwest. There's war in the Middle East, a revived draft, mass unemployment, an economy permanently on the skids, greed and corruption, incompetence and stupidity at the top. Poor blue-collar kids from the trailer park are last in line for everything. America has screwed Shane Ryan, and he returns the favor. He joins the Northwest Volunteer Army, a terrorist organization dedicated to overthrowing the United States government and establishing an independent nation. America is about to learn the hard way that what goes around, comes around.

The Hill of the Ravens

AuthorHouse It is morning in America, many years in the future. As the 22nd century approaches, the United States and Canada have been shattered by war and upheaval and have broken up into separate ethnic, racial, and political enclaves. On the east coast a crumbling, bankrupt and tottering United States government still holds a weak and impotent sway over a ragged collection of tattered states and cities, but life is chaotic and plagued with poverty, violence, and desperation. The entire Southwest, beginning with Texas and extending westward to southern California and north as far as Utah, has become the Spanish-speaking Mexican state of Aztlan. And in the Pacific Northwest, from northern California on up to Alaska, a brutal fascist and white supremacist dictatorship rules the Northwest American Republic. Colonel Donald Redmond of the Bureau of State Security (BOSS) is one of the Northwest Republic's most ruthless and skillful political policemen. Then on a bright October morning he is called into the office of the State President, where he is given a top-secret assignment. A skeleton from the bloody and treacherous days of the revolution against America is about to emerge from the closet, and one of the most carefully guarded and suppressed mysteries of that revolution may become public knowledge. That long hidden truth may undermine the very moral and political foundations of the white supremacist state. A woman's life hangs in the balance, but possibly even the fate of a continent as well, as Donald Redmond and his partner Sergeant Nel plunge into the past and seek for the answer: who betrayed the Olympic Flying Column, and why? In *The Hill of the Ravens*, underground cult novelist H. A. Covington offers us a grim and chilling view of a future that may yet come to be.

Topics covered in clued learning, autonomous navigation in unmodified, noisy and unpredictable environments, and high fidelity robot simulation. This new edition has been updated to include a new chapter on novelty detection, and provides a very practical introduction to mobile robotics for a general scientific audience. It is essential reading for 2nd and 3rd year undergraduate students and postgraduate students studying robotics, artificial intelligence, cognitive science and robot engineering. The update and overview of core concepts in mobile robotics will assist and encourage practitioners of the field and set challenges to explore new avenues of research in this exiting field. The author is Senior Lecturer at the Department of Computer Science at the University of Essex. "A very fine overview over the relevant problems to be solved in the attempt to bring intelligence to a moving vehicle." Professor Dr. Ewald von Puttkamer, University of Kaiserslautern "Case studies show ways of achieving an impressive repertoire of kinds of learned behaviour, navigation and map-

building. The book is an admirable introduction to this modern approach to mobile robotics and certainly gives a great deal of food for thought. This is an important and though-provoking book." Alex M. Andrew in Kybernetes Vol 29 No 4 and Robotica Vol 18
