SEX AND DEATH

A REAPPRAISAL OF HUMAN MORTALITY

Polity For centuries people have debated the nature of the human self. Running beneath these various arguments lie three certainties - we are born, reproduce sexually, and die. The models of spirituality which dominate the Western tradition have claimed that it is possible to transcend these aspects of human physicality by ascribing to human beings alternative traits, such as consciousness, mind and reason. By locating the essence of human life outside its basic physical features, mortality itself has come to be viewed as a problem, for it appears to render human life both meaningless and absurd. Complex connections have then been made between the key features of life: sex is linked with death, and birth becomes the event that introduces the child to the world of decay - and ultimately to death itself. This fascinating book exposes the way in which the preoccupation with transcendence in both religious and secular thinking has distorted our sense of what it is to be human. At the same time, Sex and Death offers an alternative approach to the debate, based on an acceptance of mortality that emphasizes the depth and profundity possible in human life. It is an argument which will be essential reading for students of philosophy or religion, as well as the general reader interested in these debates.

HOW TO BE A FAILURE AND STILL LIVE WELL

A PHILOSOPHY

Bloomsbury Publishing In consumer economies, success has increasingly been defined in terms of material attainment and the achievement of status. This model of 'the good life' and its formulas for success ignore the haunting possibility that one may not succeed and as a result be deemed 'a failure'. How to be a Failure and Still Live Well explores that often neglected theme of failure, not just as the opposite of achievement, but also, and more importantly, how it has been conflated with loss: that which haunts all transient, mortal human experience. Understanding loss as a form of failure affects our ability to cope with the everyday losses that permeate existence as a result of the natural processes of ageing, death, and decay. Engaging with loss and thinking about what it inevitability means for our lives and commitments, allows different values to emerge than those connected to success as attainment. Relationships, spontaneity, and generosity are explored as qualities that arise from taking seriously our vulnerability and that form the basis for richer accounts of what it might mean to 'live well'.

FREUD ON THE COUCH

A CRITICAL INTRODUCTION TO THE FATHER OF PSYCHOANALYSIS

Simon and Schuster A major new, myth-busting introduction to one of the 20th century's greatest thinkers Sigmund Freud (1856-1939), founder of psychoanalysis, is one of the most famous thinkers of modern times. But despite (and perhaps because of) his notoriety, his work is frequently encumbered by mistranslations, clichés, and misconceptions. In this landmark assessment of the great theorist, Professor Beverley Clack reveals a more complex Freud than the one with whom we are commonly presented. Casting new light on a man often unfairly derided as obsessed with sex and rigid theory, Clack argues that he was as concerned with "the death drive" as the "sex drive" and that his fierce critique of religion masked a fascination with spiritual, existential, and philosophical questions. Revealing how the work of philosophers such as Schopenhauer and Nietzsche influenced Freud far more than he cared to admit, Clack explains his key ideas and case studies in the context of his eventful life. Including a detailed exploration of hysteria and its foundational role in his theories, this myth-busting introduction is a vital insight into why Freud's thought is still so relevant today.

A THEOLOGY OF LOVE

A&C Black This book explores the different dimensions of Christian love. It argues that all expressions of love are wrestling with the challenge of otherness.

RESEARCH AWARDS INDEX

DEMOCRATIC ANXIETIES

SAME-SEX MARRIAGE, DEATH, AND CITIZENSHIP

Lexington Books **Democratic Anxieties: Same-Sex Marriage, Death, and Citizenship** takes contemporary opposition to same-sex marriage as a starting point to consider anxieties about sex and death within conceptions of democratic citizenship. It pursues a less anxious democratic citizenship in creative readings of Jean-Jacques Rousseau, Hannah Arendt, and Friedrich Nietzsche, and demonstrates how developing an appreciation of mortality is essential to the continued pluralization of democracy.

PESTILENCE IN MEDIEVAL AND EARLY MODERN ENGLISH LITERATURE

Routledge **Pestilence in Medieval and Early Modern English Literature** examines three diseases--leprosy, bubonic plague, and syphilis--to show how doctors, priests, and literary authors from the Middle Ages through the Renaissance interpreted certain illnesses through a moral filter. Lacking knowledge about the transmission of contagious diseases, doctors and priests saw epidemic diseases as a punishment sent by God for human transgression. Accordingly, their job was to properly read sickness in relation to the sin. By examining different readings of specific illnesses, this book shows how the social construction of epidemic diseases formed a kind of narrative wherein man attempts to take the control of the disease out of God's hands by connecting epidemic diseases to the sins of carnality.

SOCIAL, POLITICAL AND CULTURAL DIMENSIONS OF HEALTH

Springer This book comprehensively explores social, political and cultural dimensions of health in contemporary society. It addresses many issues and pertinent questions, including the following: Are we over diagnosed and over medicated? How can patients participate in their own care? Do pharmaceutical companies coerce us into medication regimes? What drives inequalities in health outcomes? What is the experience of health care for indigenous communities? Why do different countries have such different health care systems? How do we respond to life-changing conditions? Can we achieve a 'good death'? How do new genetics shape our identities? Is public health a force of liberation or disempowerment? The book incorporates the range of levels of influence on health, covering individual patient experiences, the health professions, multinational corporations, the state, global organisations as well as examining trends in social organisation, cultural expression and technological developments. It volume provides an accessible, yet in-depth, overview and discussion of the sociology of health. The chapters include an illustrative case study and further readings relating to the topic.

INTERNATIONAL DIFFERENCES IN MORTALITY AT OLDER AGES

DIMENSIONS AND SOURCES

National Academies Press In 1950 men and women in the United States had a combined life expectancy of 68.9 years, the 12th highest life expectancy at birth in the world. Today, life expectancy is up to 79.2 years, yet the country is now 28th on the list, behind the United Kingdom, Korea, Canada, and France, among others. The United States does have higher rates of infant mortality and violent deaths than in other developed countries, but these factors do not fully account for the country's relatively poor ranking in life expectancy. *International Differences in Mortality at Older Ages: Dimensions and Sources* examines patterns in international differences in life expectancy above age 50 and assesses the evidence and arguments that have been advanced to explain the poor position of the United States relative to other countries. The papers in this deeply researched volume identify gaps in measurement, data, theory, and research design and pinpoint areas for future high-priority research in this area. In addition to examining the differences in mortality around the world, the papers in *International Differences in Mortality at Older Ages* look at health factors and life-style choices commonly believed to contribute to the observed international differences in life expectancy. They also identify strategic opportunities for health-related interventions. This book offers a wide variety of disciplinary and scholarly perspectives to the study of mortality, and it offers in-depth analyses that can serve health professionals, policy makers, statisticians, and researchers.

CURING THE DREAD OF DEATH

THEORY, RESEARCH AND PRACTICE

Australian Academic Press This unique book explores the dread of death and its management from a wide range of perspectives with researchers and writers from a variety of cultures, academic traditions and disciplines across the globe. The fields covered are broad — including palliative care and grief, psychodynamic theory, social, developmental and clinical psychology, sociology and anthropology, counselling practice as well as history, art, and philosophy.

CONTEMPORARY ISSUES IN HUMAN DEVELOPMENT

A SOUTH AFRICAN FOCUS

International Thomson Publishing Services This book provides useful and contextual insights by several progressive social scientists. It tackles topics not normally encountered in the more traditional texts on human development, including teenage pregnancy, violence, physical disability, childhood sexuality, and alcohol misuse in South Africa.

INTERNATIONAL HANDBOOK OF ADULT MORTALITY

Springer Science & Business Media This handbook presents a comprehensive and up-to-date overview of unprecedented substantive, theoretical, methodological, and statistical developments and insights, and an in-depth examination of trends and patterns, in adult mortality around the world. With over two dozen chapters and more than 50 authors, this volume draws from top international mortality experts to provide one of the best overviews of life expectancy extant. The book documents remarkable gains in life expectancy,

which stand out as one of the most important accomplishments of the twentieth century. Individuals in more developed countries can expect to live longer now than ever before, especially the Japanese who enjoy record-setting life expectancies. The book also explores unfortunate declines in life expectancy in selected countries brought on by such factors as infectious diseases; accidents, suicides, and homicides; and political and economic conflict and turmoil. This book synthesizes the wealth of mortality information available, clearly articulates the central findings to-date, identifies the most appropriate datasets and methods currently available, illuminates the central research questions, and develops an agenda to address these research questions. The authors carefully examine central factors related to mortality, including health behaviors, socioeconomic status, social relations, biomarkers, and genetic factors. The book will prove especially relevant to researchers, students, and policy makers within social and health sciences who want to better understand international trends and patterns in adult mortality.

CUMULATED INDEX MEDICUS

DIGESTIVE DISEASES IN THE UNITED STATES

EPIDEMIOLOGY AND IMPACT

This is a compendium of descriptive statistics on digestive diseases in the United States. Each chapter provides analyses of primary data from recent, large U.S. surveys as well as an interpretative review of the known epidemiology of each disease or condition. These statistics cover both specific diseases as well as conditions or syndromes, specific digestive symptoms, and gastrointestinal procedures. Topics covered include cost of digestive diseases in the United States; infectious diarrheas; viral hepatitis; esophageal cancer; gastric cancer; colorectal cancer; liver cancer; pancreatic cancer; hemorrhoids; esophageal diseases; peptic ulcer; gastritis/nonulcer dyspepsia; acute appendicitis; abdominal wall hernia; inflammatory bowel diseases; diverticular disease of the colon; constipation; irritable bowel syndrome; chronic liver disease and cirrhosis; gallstones; pancreatitis; etc.

DIGESTIVE DISEASES IN THE UNITED STATES

EPIDEMIOLOGY AND IMPACT

DIANE Publishing A compendium of descriptive statistics on digestive diseases in the U.S. Each chapter provides analyses of primary data from recent, large U.S. surveys as well as interpretative review of the known epidemiology of each disease or condition. Covers: infectious diarrheas; viral hepatitis; esophageal, colorectal, liver & pancreatic cancer; hemorrhoids; peptic ulcer; constipation; gallstones; inflammatory bowel diseases; pancreatitis; & many more. Also discusses cost of digestive diseases in the U.S.; ICD-9-CM & ICD-10 Digestive Disease Codes.

DISEASE AND MORTALITY IN SUB-SAHARAN AFRICA

World Bank Publications Current data and trends in morbidity and mortality for the sub-Saharan Region as presented in this new edition reflect the heavy toll that HIV/AIDS has had on health indicators, leading to either a stalling or reversal of the gains made, not just for communicable disorders, but for cancers, as well as mental and neurological disorders.

MEDIEVAL SUFFOLK

AN ECONOMIC AND SOCIAL HISTORY, 1200-1500

Boydell & Brewer Ltd No description available.

THE OXFORD ENCYCLOPEDIA OF ECONOMIC HISTORY

What were the economic roots of modern industrialism? Were labor unions ever effective in raising workers' living standards? Did high levels of taxation in the past normally lead to economic decline? These and similar questions profoundly inform a wide range of intertwined social issues whose complexity, scope, and depth become fully evident in the Encyclopedia. Due to the interdisciplinary nature of the field, the Encyclopedia is divided not only by chronological and geographic boundaries, but also by related subfields such as agricultural history, demographic history, business history, and the histories of technology, migration, and transportation. The articles, all written and signed by international

contributors, include scholars from Europe, Latin America, Africa, and Asia. Covering economic history in all areas of the world and segments of economies from prehistoric times to the present, The Oxford Encyclopedia of Economic History is the ideal resource for students, economists, and general readers, offering a unique glimpse into this integral part of world history.

ANNUAL REPORT - DEPARTMENT OF TRANSPORTATION

NUTRITION AND HEALTH IN DEVELOPING COUNTRIES

Springer Science & Business Media This updated and expanded book was written with the underlying conviction that global health and nutrition problems can only be solved through a firm understanding of the different levels of causality and the interactions between the various determinants. This volume provides policy makers, nutritionists, students, scientists, and professionals with the most recent and up-to-date knowledge regarding major health and nutritional problems in developing countries.

DEATH STUDIES

SUCCESSFUL AGEING

Oxford University Press, USA The purpose of Successful Ageing is simple - to promote 'wellness' and fulfillment in later life. For too long the aged, even the middle aged, have been the victims of the 'youth culture', and negative stereotypes about ageing have been popularized. Dr Robert Gingold's book seeks to dispel these myths which equate ageing with disease and disablement. It is never too late to adopt a healthy lifestyle in order to remain attractive, mentally alert and physically vital. A lifetime of good health can be achieved by implementing the preventative measures detailed in Successful Ageing. They include attention to a nutritional based diet, plenty of moderate exercise, and the need to achieve emotional tranquility. Successful Ageing contains up-to-date information about the prevention of heart disease, cancer, dementia and many other common diseases. It also provides strategies for overcoming the psychological challenges caused by retirement and bereavement. Anyone - but especially those over fifty - will benefit from the practical suggestions contained in Successful Ageing.

THE SPIRITUAL LIVES OF BEREAVED PARENTS

Routledge This book describes how parents lose, find, or relocate spiritual anchors after the death of their child. It describes how ordinary people reconstruct their lives after their foundations have shifted, and how they make sense of their world after one of their centers of meaning has been removed. Klass grounds his descriptions of spirituality in his scholarly study of comparative religions, and in his two decades studying the lives of bereaved parents. He argues that continuing bonds with their dead children can give parents a new transcendent reality. Deceased children, like saints or bodhisattvas, can offer a bridge between the profane and sacred worlds, support parents as they find meaning in a world made forever poorer, and bind together a community adequate to parents' grief. The book reports Klass's clinical practice and his work as advisor to a bereaved parents self-help support group.

SOCIAL JUSTICE AND THE EXPERIENCE OF EMOTION

Routledge First Published in 2011. Routledge is an imprint of Taylor & Francis, an informa company.

SLEEP DISORDERS AND SLEEP DEPRIVATION

AN UNMET PUBLIC HEALTH PROBLEM

National Academies Press Clinical practice related to sleep problems and sleep disorders has been expanding rapidly in the last few years, but scientific research is not keeping pace. Sleep apnea, insomnia, and restless legs syndrome are three examples of very common disorders for which we have little biological information. This new book cuts across a variety of medical disciplines such as neurology, pulmonology, pediatrics, internal medicine, psychiatry, psychology, otolaryngology, and nursing, as well as other medical practices with an interest in the management of sleep pathology. This area of research is not limited to very young and old patients—sleep disorders reach across all ages and ethnicities. **Sleep Disorders and Sleep Deprivation** presents a structured analysis that explores the following: Improving awareness among the general public and health care professionals. Increasing investment in interdisciplinary somnology and sleep medicine research training and mentoring activities. Validating and developing new and existing technologies for diagnosis and treatment. This book will be of interest to those looking to learn more about the enormous public health burden of sleep disorders and sleep deprivation and the strikingly limited capacity of the health care enterprise to identify and treat the majority of individuals suffering from sleep problems.

DEATH RITES

LAW AND ETHICS AT THE END OF LIFE

Routledge First published in 2012. Routledge is an imprint of Taylor & Francis, an informa company.

EXPLORING SEX AND GENDER IN BIOARCHAEOLOGY

University of New Mexico Press This volume brings together the latest approaches in bioarchaeology in the study of sex and gender. Archaeologists have long used skeletal remains to identify gender. Contemporary bioarchaeologists, however, have begun to challenge the theoretical and methodological basis for sex assignment from the skeleton. Simultaneously, they have started to consider the cultural construction of the gendered body and gender roles, recognizing the body as uniquely fashioned from the interaction of biological, social, and environmental factors. As the contributors to this volume reveal, combining skeletal data with contextual information can provide a richer understanding of life in the past.
