For a decade, From Silence to Voice has provided nurses with the tools they need to explain the breath and complexity of nursing work. Bernice Buresh and Suzanne Gordon have helped nurses around the world speak up and convey to the public that nursing is more than dedication and caring-it demands specialized knowledge, expertise across a range of medical technologies, and decision-making about life-and-death issues. "Nurses and nursing organizations," they write, "must go out and tell the public what nurses really do so that patients can actually get the benefit of their expert care." The comprehensively revised and updated third edition of From Silence to Voice will help nurses construct messages using a range of traditional and new social media that accurately

describe the true nature of their work. Because nurses are busy, the communication techniques in this book are designed to integrate naturally into nurses' everyday lives and to complement nurses' work with patients and families. **Varney's Midwifery** Jones & Bartlett Learning Known as the "bible" of midwifery, this new edition of Varney's Midwifery has been extensively revised and updated to reflect the full scope of current midwifery practice in a balance of art and science, a blend of spirituality and evidence-based care, and a commitment to being with women. **Dimensions of Professional Nursing A Nurse's Step-By-Step Guide to Publishing a Dissertation or DNP Project** Sigma As a newly minted PhD or DNP, you've completed your dissertation or scholarly project. Congratulations! Wondering whether or how to publish? Confused about the publication process? Feeling overwhelmed? You are not alone. A Nurse's Step-By-Step Guide to Publishing a Dissertation or DNP Project is a concise guide to preparing and polishing your work for publication. In a straightforward, conversational tone, author Karen Roush offers encouragement as well as information on everything from honing essential writing skills to choosing a publisher to submitting your manuscript—and all the steps in between. This book will help you navigate the world of scholarly publishing with less frustration—and more confidence—on the way to disseminating your research and knowledge. **Writing for Health Professionals A Manual for Writers** Springer I try to leave out the parts that people skip. Elmore Leonard This book is all about writing: it is both a practical and a personal account. When you write a book like this you put yourself on the line: you run the risk of people reading what you have written and saying 'he's saying one thing and doing another'. You stand to break the rules that you set up - quite badly. That is probably not such a terrible thing; besides, that should be part of the process of using this book. As you read it, notice when rules are broken. Check the phrasing, the sentence and paragraph construction, and see whether or not I have stuck to the rules. Then see whether or not the rules would have improved the passage in question. Begin to read books as much for their style, layout and general format as for their content. If you are going to write, you need to see plenty of examples of all of these things - good, bad and indifferent. to write for some time but was always This is a book I have wanted nervous of writing, so here it is: an introduction to some of the ways and means of writing. It is, as I say, personal; I hope it will be useful. A word about sexism and the writing process. I find the use of 'his or her' and its variants clumsy. **The Writer's Workbook Health Professionals' Guide to Getting Published** Jones & Bartlett Learning The Writer's Workbook, Second Edition gives you the skills you need to succeed in today's health care publishing marketplace. In nine easy lessons, the author addresses how to get started, what types of manuscripts publishers look for, and reasons that manuscripts get rejected. If you are a dean or director, nurse educator, graduate student, or practitioner, you will be better prepared to write and get published after using this workbook. **Writing for Social Scientists How to Start and Finish Your Thesis, Book, or Article: Second Edition** University of Chicago Press Students and researchers all write under pressure, and those pressures—most lamentably, the desire to impress your audience rather than to communicate with them—often lead to pretentious prose, academic posturing, and, not infrequently, writer's block. Sociologist Howard S. Becker has written the classic book on how to conquer these pressures and simply write. First published nearly twenty years ago, Writing for Social Scientists has become a lifesaver for writers in all fields, from beginning students to published authors. Becker's message is clear: in order to learn how to write, take a deep breath and then begin writing. Revise. Repeat. It is not always an easy process, as Becker wryly relates. Decades of teaching, researching, and writing have given him plenty of material, and Becker neatly exposes the foibles of academia and its "publish or perish" atmosphere. Wordiness, the passive voice, inserting a "the way in which" when a simple "how" will do—all these mechanisms are a part of the social structure of academic writing. By shrugging off such impediments—or at the very least, putting them aside for a few hours—we can reform our work habits and start writing lucidly without worrying about grades, peer approval, or the "literature." In this new edition, Becker takes account of major changes in the computer tools available to writers today, and also substantially expands his analysis of how academic institutions create problems for them. As competition in academia grows increasingly heated, Writing for Social Scientists will provide solace to a new generation of frazzled, would-be writers. **A Bibliography of Nursing Literature The Holdings of the Royal College of Nursing, 1976-1980** Library Assn Pub Limited Contains core nursing materials, as well as works that deal with related areas, e.g., health service developments, other health problems, and the patient's point of view. Emphasizes nursing in the United Kingdom. Classified arrangement. Entries give bibliographical information. Author index. **The Language of Kindness The No. 1 Sunday Times bestselling nursing memoir** Random House 'It made me cry. It made me think. It made me laugh' Adam Kay Christie Watson was a nurse for twenty years. Taking us from birth to death and from A&E to the mortuary, The Language of Kindness is an astounding account of a profession defined by acts of care, compassion and kindness. We watch Christie as she nurses a premature baby who has miraculously made it through the night, we stand by her side during her patient's agonising heart-lung transplant, and we hold our breath as she washes the hair of a child fatally injured in a fire, attempting to remove the toxic smell of smoke before the grieving family arrive. In our most extreme moments, when life is lived most intensely, Christie is with us. She is a guide, mentor and friend. And in these dark days of division and isolationism, she encourages us all to stretch out a hand. 'A powerful insight into the life of nurses' The Times, Books of the Year 'A remarkable book about life and death and so brilliantly written it makes you hold your breath' Ruby Wax **Cumulative Index to Nursing Literature Resources for Nursing Research An Annotated Bibliography** SAGE 'The 4th edition of this extensive text is an outstanding resource prepared by nurses (and a librarian) for nurses. In a structured and helpful style it presents thousands of items from the literature - published papers, reports, books and electronic resources - as a clear, accessible, and most of all useful collection. The efforts to signpost and lead the reader to the sought-for information are effective and well-conceived, and the "How to use this book" section is remarkably simple...the book should be found in every nursing and health library, every research institute and centre, and close to many career researchers' desks' - RCN Research This latest edition of Resources for Nursing Research provides a comprehensive bibliography of sources on nursing research, and includes references for books, journal papers and Internet resources. Designed to act as a 'signpost' to available literature in the area, this Fourth Edition covers the disciplines of nursing, health care and the social sciences. Entries are concise, informative and accessible, and are arranged under three main sections: 'Sources of Literature' covers the process of literature searching, including using libraries and other tools for accessing literature 'Methods of Inquiry' includes an introduction to research, how to conceptualize and design nursing and health research, measurement and data collection, and the interpretation and presentation of data 'The Background to Research in Nursing' encompasses the development of nursing research; the profession's responsibilities; the role of government; funding; research roles and careers; and education for research. Fully revised and updated, the Fourth Edition includes just under 3000 entries, of which 90% are new. It has extensive coverage of US, UK literature and other international resources. This new edition will be an essential guide for all those with an interest in nursing research, including students, teachers, librarians, practitioners and researchers. **Code of Ethics for Nurses with Interpretive Statements** Nursesbooks.org Pamphlet is a succinct statement of the ethical obligations and duties of individuals who enter the nursing profession, the profession's nonnegotiable ethical standard, and an expression of nursing's own understanding of its commitment to society. Provides a framework for nurses to use in ethical analysis and decision-making. **The Future of Nursing Leading Change, Advancing Health** National Academies Press The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing. **Research Methodology and Its Application to Nursing** John Wiley & Sons **Nursing Mirror Minimum Writing Competencies for Nursing Students The Nurse's Communication Advantage** Sigma Theta Tau Tips for communication skills for nurses. **ORL-head and Neck Nursing Official Journal of the Society of Otorhinolaryngology and Head-Neck Nurses Critical Care Nursing** Elsevier Health Sciences Endorsed by the Australian College of Critical Care Nurses (ACCCN) ACCCN is the peak professional organisation representing critical care nurses in Australia Written by leading critical care nursing clinicians, Leanne Aitken, Andrea Marshall and Wendy Chaboyer, the 4th edition of Critical Care Nursing continues to encourage and challenge critical care nurses and students to develop world-class practice and ensure the delivery of the highest quality care. The text addresses all aspects of critical care nursing and is divided into three sections: scope of practice, core components and specialty practice, providing the most recent research, data, procedures and guidelines from expert local and international critical care nursing academics and clinicians. Alongside its strong focus on critical care nursing practice within Australia and New Zealand, the 4th edition brings a stronger emphasis on international practice and expertise to ensure students and clinicians have access to the most contemporary practice insights from around the world.
