Problems in Lexicography

A Critical / Historical Edition

Indiana University Press Problems in Lexicography is an essential, classic work of practical lexicography (the practice of writing dictionaries) and meta-lexicography. Originally published over sixty years ago, it was based on the proceedings of the Indiana University Conference on Lexicography, held November 11-12, 1960. It set a standard that still holds today, three generations later. This critical and historical edition, brilliantly researched and presented by Michael Adams, explores the enduring legacy of this classic work and promises to extend its life further into the twenty-first century. Problems in Lexicography: A Critical / Historical Edition amply demonstrates that this unique work is a book of

historical significance and a worthy prologue to lexicography's present.

Afghanistan

A Bibliography

BRILL Presents a thematically indexed bibliography devoted to Afghanistan. Following the pattern established by one of its major data sources, viz, the acclaimed Index Islamicus, both journal articles and book publications are included and indexed.

The Boundaries of Afghans' Political Imagination

The Normative-Axiological Aspects of Afghan Tradition

Cambridge Scholars Publishing In this book, *The Boundaries of Afghans' Political Imagination*, the author seeks an answer to the question of how tradition, specifically its normative-axiological aspects, shapes the political attitudes and actions of the Afghans. The author points to two different concepts of social order which are moulded by the Pashtunwali: on the one hand, a tribal code which is part of Pashto language tradition; and on the other hand, by Sufism, the religious and philosophical current in Islam expressed mainly in the Dari (Persian) language. The two systems offer a different hierarchy of values, and organize social reality by referring to two different models of order: the circle and the pyramid. While making an in-depth analysis of the topic, the author asserts that the social organization of the Pashtuns is based on the principle of representation and consensus. Tribalism is shaped in the structure of a circle, in which a group is the fundamental category. Where tribal structure no longer performs its regulatory and organizational functions, the pattern of social order is offered by the Sufi Brotherhoods, which had long been very popular and powerful in this part of Asia. The hierarchical organization of Sufism, based on a disciple-master relationship and the principle of authoritarianism, gradually established the structure of the pyramid as a model of social order, and also of political order. Religious Sufi Brotherhoods became the most accessible leadership pattern, besides the tribal one, to be fixed in the Afghans' social imagination. This analysis from the perspective of sociocultural and political anthropology will be indispensable for those interested in Afghan and Islamic societies.
