PDF Forms Using Acrobat and LiveCycle Designer Bible John Wiley & Sons *This comprehensive guide to creating fillable forms with the latest release of Adobe Acrobat is packed with real-world insights and techniques gained from daily use of Adobe Acrobat and Adobe LiveCycle Designer under business deadline situations. You'll get step-by-step instructions that show you how to easily create and implement interactive PDF forms using both Adobe Acrobat and Adobe LiveCycle Designer. Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.* **Statelessness in the Caribbean The Paradox of Belonging in a Postnational World** University of Pennsylvania Press *Statelessness in the Caribbean demonstrates how people can be forcibly displaced under nonconflict conditions without having fled a home, and how democracies force people into statelessness—the condition of not being a citizen anywhere—through the cover of bureaucratic procedures, neutral laws, and sovereign claims to determine membership.* **Public Health and Disasters Health Emergency and Disaster Risk Management in Asia** Springer Nature *This book presents the health emergency and disaster risk management (H-EDRM) research landscape, with examples from Asia. In recent years, the intersection of health and disaster risk reduction (DRR) has emerged as an important interdisciplinary field. In several landmark UN agreements adopted in 2015–2016, including the Sendai Framework for Disaster Risk Reduction 2015–2030, the 2030 Sustainable Development Goals (SDGs), the Paris climate agreement, and the New Urban Agenda (Habitat III), health is acknowledged as an inevitable outcome and a natural goal of disaster risk reduction, and the cross-over of the two fields is essential for the successful implementation of the Sendai Framework. H-EDRM has emerged as an umbrella field that encompasses emergency and disaster medicine, DRR, humanitarian response, community health resilience, and health system resilience. However, this fragmented, nascent field has yet to be developed into a coherent discipline. Key challenges include redundant research, lack of a strategic research agenda, limited development of multisectoral and interdisciplinary approaches, deficiencies in the science-policy-practice nexus, absence of standardized terminology, and insufficient coordination among stakeholders. This book provides a timely and invaluable resource for undergraduate and postgraduate students, researchers, scholars, and frontline practitioners as well as policymakers from across the component domains of H-EDRM.* **The Wretched of the Earth** Grove Press **Adobe Creative Suite 4 Bible** John Wiley & Sons *As one of the few books to cover integration and workflow issues between Photoshop, Illustrator, InDesign, GoLive, Acrobat, and Version Cue, this comprehensive reference is the one book that Creative Suite users need* *Two well-known and respected authors cover topics such as developing consistent color-managed workflows, moving files among the Creative Suite applications, preparing files for print or the Web, repurposing documents, and using the Creative Suite with Microsoft Office documents* *More than 1,200 pages are packed with valuable advice and techniques for tackling common everyday issues that designers face when working with programs in the Creative Suite* **Role of Seismic Testing Facilities in Performance-Based Earthquake Engineering SERIES Workshop** Springer Science & Business Media *Nowadays research in earthquake engineering is mainly experimental and in large-scale; advanced computations are integrated with large-scale experiments, to complement them and extend their scope, even by coupling two different but simultaneous tests. Earthquake engineering cannot give answers by testing and qualifying few, small typical components or single large prototypes. Besides, the large diversity of Civil Engineering structures does not allow drawing conclusions from only a few tests; structures are large and their seismic response and performance cannot be meaningfully tested in an ordinary lab or in the field. So, seismic testing facilities should be much larger than in other scientific fields; their staff has to be resourceful, devising intelligent ways to carry out simultaneously different tests and advanced computations. To better serve such a mission European testing facilities and researchers in earthquake engineering have shared their resources and activities in the framework of the European project SERIES, combining their research and jointly developing advanced testing and instrumentation techniques that maximize testing capabilities and increase the value of the tests. This volume presents the first outcomes of the SERIES and its contribution towards Performance-based Earthquake Engineering, i.e., to the most important development in Earthquake Engineering of the past three decades. The concept and the methodologies for performance-based earthquake engineering have now matured. However, they are based mainly on analytical/numerical research; large-scale seismic testing has entered the stage recently. The SERIES Workshop in Ohrid (MK) in Sept. 2010 pooled together the largest European seismic testing facilities, Europe's best experts in experimental earthquake engineering and select experts from the USA, to present recent research achievements and to address future developments. Audience: This volume will be of interest to researchers and advanced practitioners in structural earthquake engineering, geotechnical earthquake engineering, engineering seismology, and experimental dynamics, including seismic qualification.* **The Transition from Graduation to Work Challenges and Strategies in the Twenty-First Century Asia Pacific and Beyond** Springer *This book reports on the findings from a research study of vocational and higher education graduates' employability challenges. The nature and extent of these challenges, their underlying causes, and effective strategies to address the problems in this area are all analysed from a multiple-stakeholder paradigm. The primary focus of the book is on governments; secondary, vocational, and higher education systems; and industry employers - rather than graduates themselves - in order to highlight the policy and strategy implications for governments, industry and educational systems. Readers will acquire comprehensive information on the nature and extent of graduate employability in terms of country-specific challenges, together with a deeper understanding of their complex causes, and the inter-relatedness between governments, educational systems, industry sectors, and potential employers. They will also be provided with a broad range of stakeholder strategies designed to effectively address these challenges within integrated national and regional approaches.* **Future Information Technology 6th International Conference on Future Information Technology, FutureTech 2011, Crete, Greece, June 28-30, 2011.**

Proceedings, Part II Springer This two-volume-set constitutes the refereed proceedings of the 6th International Conference on Future Information Technology, FutureTech 2011, held in Crete, Greece, in June 2011. The 123 revised full papers presented in both volumes were carefully reviewed and selected from numerous submissions. The papers are organized in topical sections on future information technology, IT service and cloud computing; social computing, network, and services; forensics for future generation communication environments; intelligent transportation systems and applications; multimedia and semantic technologies; information science and technology. **A Guide to the Electronic Document Body of Knowledge** MC2 Books The EDBOK explains industry processes and technologies using a standard vocabulary. The topics follow two common timelines: 1) The day-to-day Production Workflow, which covers ten production job-steps that every document goes through, from Data to Doorstep. 2) The long-term Document Lifecycle, which covers the life of a document and includes requirements gathering, business-casing, development, and ongoing production. **Innovations for Metropolitan Areas Intelligent Solutions for Mobility, Logistics and Infrastructure designed for Citizens** Springer Nature This book presents human-centered concepts and solutions for mobility, logistics and infrastructure that will make our growing metropolitan areas more livable and sustainable. The still accelerating megatrend of urbanization is leading to constantly growing metropolitan areas. This creates a whole series of challenges for municipalities, as well as citizens, such as overcrowded traffic routes, limited building space and an increasingly difficult supply situation. With this book we want to answer the following question: How can people live in densely populated areas and meet their needs in terms of mobility, freedom, self-determination, security, prosperity, communication or in other words: how can metropolitan regions be made humane? The answer to this question requires innovative ideas and approaches in various areas: Sustainable designs of infrastructure Economically and ecologically efficient logistics and mobility approaches Intelligent applications for navigation and communication All these ideas must be measured against the needs of citizens and should thus be developed following a human-centered design approach. This ensures that innovative solutions will be widely accepted by the public. In addition, they also have the potential to turn citizens into active co-designers of future metropolitan areas. **Strengthening Forensic Science in the United States A Path Forward** National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators. **Handbook of Water Resources Management: Discourses, Concepts and Examples** Springer Nature This book provides an overview of facts, theories and methods from hydrology, geology, geophysics, law, ethics, economics, ecology, engineering, sociology, diplomacy and many other disciplines with relevance for concepts and practice of water resources management. It provides comprehensive, but also critical reading material for all communities involved in the ongoing water discourses and debates. The book refers to case studies in the form of boxes, sections, or as entire chapters. They illustrate success stories, but also lessons to be remembered, to avoid repeating the same mistakes. Based on consolidated state-of-the-art knowledge, it has been conceived and written to attract a multidisciplinary audience. The aim of this handbook is to facilitate understanding between the participants of the international water discourse and multi-level decision making processes. Knowing more about water, but also about concepts, methods and aspirations of different professional, disciplinary communities and stakeholders professionalizes the debate and enhances the decision making. **Atlas of Taphonomic Identifications 1001+ Images of Fossil and Recent Mammal Bone Modification** Springer The aim of the atlas is to provide images of taphonomic modifications, making it as comprehensive as possible with evidence presently available. This volume is intended both as a field guide for identifying taphonomic modifications in the field, and for use in the laboratory when collections of fossils are being analyzed. Images in the book are a combination of scanning electron micrographs, regular photographs, cross-sections of bones and line drawings and graphs. By providing good quality illustrations of taphonomic modifications, with links between similar types of modification, the atlas provides a reference source for identifying the agents responsible for the modifications, the processes by which they were formed, and the potential bias introduced by the processes. The authors also aim to emphasize on the directions they consider taphonomic studies should be headed. Firstly, we should seek to quantify the degree of bias introduced into a fossil fauna and to take account of this bias before interpreting the palaeoecology of the fossil site. Secondly, we should recognize that taphonomic modifications increase the information encoded in fossils by identifying perimortem and postmortem contexts. This provides a more dynamic and realistic view of the past. **The Practice of Everyday Life** Univ of California Press Repackage of a classic sociology text in which the author develops the idea of resistance to social and economic pressures. **Essentials of Testing and Assessment: A Practical Guide for Counselors, Social Workers, and Psychologists** Cengage Learning Comprehensive and easy to read, Neukrug and Fawcett's ESSENTIALS OF TESTING AND ASSESSMENT: A PRACTICAL GUIDE FOR COUNSELORS, SOCIAL WORKERS, AND PSYCHOLOGISTS, 3rd Edition, introduces learners to the concepts and applications of assessment and testing. Case vignettes, samples of real tests, and additional activities and exercises increase understanding. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. **Bridging the Education Divide Using Social Technologies Explorations in Rural India** Springer Nature This book explains the concept of education divide in rural India and identifies various factors that shape and sustain such a divide. In doing so, it also discusses a range of attempts undertaken to bridge the education divide. Subsequently, the book has attempted in providing a socio-technical framework towards optimally deploying social technologies for addressing the issue of education divide of marginalized communities. The proposed framework offers a transition from traditional content-centric, teacher-centric and centralized education ecosystem to a connection-centric, learner-centric and decentralized education ecosystem of the socio-digital

age. It demonstrates how Internet-enabled digital platforms, based on the principles of sharism and mass collaboration using social technologies, could help to solve one of the greatest problems facing the world: mitigating the extant education divide by delivering quality education to underprivileged sections of society. The book also presents empirical validation of the proposed framework to show how a community-driven blended learning platform can mobilize the dormant knowledge capital of domain experts to teach underprivileged rural Indian children, as well as help form communities of practice to enable lifelong learning for the rural adult population. The book closes by pointing out the challenges involved in building an equitable education ecosystem using social technologies and ultimately the possibility of creating a fair and equitable society. Given its scope, the book offers a valuable resource for researchers, policymakers and practitioners in the domain of education who want to transform education ecosystems by using technological and process-related innovations to improve educational practices for underprivileged sections of society. **Proceedings of the Ocean Drilling Program Initial report. Part A Developing the Capacity of ESCWA Member Countries to Address the Water and Energy Nexus for Achieving Sustainable Development Goals Regional Policy Toolkit** United Nations The water and energy nexus regional policy toolkit was prepared as part of the United Nations Development Account (UNDA) project on developing the capacity of ESCWA Member Countries to address the water and energy nexus for achieving Sustainable Development Goals. This project aims to build the capacity of ministries and public service providers in the Arab region to examine and address the water and energy nexus in an integrated manner. **Digital Cinematography Fundamentals, Tools, Techniques, and Workflows** CRC Press First published in 2014. Routledge is an imprint of Taylor & Francis, an informa company. **Paradise Lost A Poem, in Twelve Books. The Author John Milton Immigration Nation Aid, Control, and Border Politics in Morocco** Cambridge University Press An examination of the role played by aid, from donors, International Organisations and NGOs, in everyday border and migration control. **Global Migration, Gender, and Health Professional Credentials Transnational Value Transfers and Losses** University of Toronto Press Bringing together diverse approaches and case studies of international health worker migration, *Global Migration, Gender, and Health Professional Credentials* critically reimagines how we conceptualize the transfer of value embodied in internationally educated health professionals (IEHPs). This volume provides key insights into the economic and feminist concepts of global value transmission, the complexity of health worker migration, and the gendered and intersectional intricacies involved in the workplace integration of immigrant health care workers. The contributions to this edited collection uncover the multitude of actors who play a role in creating, transmitting, transforming, and utilizing the value embedded in international health migrants. **Green, Pervasive, and Cloud Computing 12th International Conference, GPC 2017, Cetara, Italy, May 11-14, 2017, Proceedings** Springer This book constitutes the proceedings of the 12th International Conference on Green, Pervasive, and Cloud Computing, GPC 2017, held in Cetara, Italy, in May 2017 and the following colocated workshops: First International Workshop on Digital Knowledge Ecosystems 2017; and First Workshop on Cloud Security Modeling, Monitoring and Management, CS3M 2017. The 58 full papers included in this volume were carefully reviewed and selected from 169 initial submissions. They deal with cryptography, security and biometric techniques; advances network services, algorithms and optimization; mobile and pervasive computing; cybersecurity; parallel and distributed computing; ontologies and smart applications; and healthcare support systems. **Europe 2020 Towards a More Social EU?** Peter Lang This book attempts to answer the question: "How can Europe 2020, the EU's new strategy for smart, sustainable and inclusive growth, lead to a stronger social EU with less poverty and greater social cohesion?" Examined in depth are achieving the EU's ambitious social objectives to lift at least 20 million people out of the risk of poverty and exclusion by 2020 and the Union's four other mutually reinforcing targets. A key objective of the book is to take a critical look at and draw lessons from the past, 2000-2010 Lisbon Strategy. Another important objective is to explore the format and role of EU coordination and cooperation in the social field in the new EU governance framework, in a context marked by slow recovery after the global economic crisis. Finally, the book also makes proposals for the further reinforcement of this coordination and cooperation and for the improvement of the different instruments available at EU, national and sub-national levels. **ICSBE 2018 Proceedings of the 9th International Conference on Sustainable Built Environment** Springer This book highlights current research and development in the area of sustainable built environments, currently one of the most important disciplines in civil engineering. It covers a range of topics, including sustainable construction and infrastructures, waste and wastewater management, enhanced sustainability, renewable and clean energy, sustainable materials and industrial ecology, building automation and virtual reality, and impact of climate change. As such it provides vital insights into responsible urbanization practices, and new tools and technologies in civil engineering that can mitigate the negative effects of the built environment. **Visual Servoing in Robotics** MDPI Visual servoing is a well-known approach to guide robots using visual information. Image processing, robotics, and control theory are combined in order to control the motion of a robot depending on the visual information extracted from the images captured by one or several cameras. With respect to vision issues, a number of issues are currently being addressed by ongoing research, such as the use of different types of image features (or different types of cameras such as RGBD cameras), image processing at high velocity, and convergence properties. As shown in this book, the use of new control schemes allows the system to behave more robustly, efficiently, or compliantly, with fewer delays. Related issues such as optimal and robust approaches, direct control, path tracking, or sensor fusion are also addressed. Additionally, we can currently find visual servoing systems being applied in a number of different domains. This book considers various aspects of visual servoing systems, such as the design of new strategies for their application to parallel robots, mobile manipulators, teleoperation, and the application of this type of control system in new areas. **Routledge Handbook of Global Mental Health Nursing Evidence, Practice and Empowerment** Taylor & Francis Awarded second place in the 2017 AJN Book of the Year Awards in Psychiatric and Mental Health Nursing. "I welcome, at long last, a book on global mental health targeted to nurses, the front-line health worker for billions of people around the world.? The roles that nurses can, and should, play in mental health care are diverse and this book addresses both well-trod as well as emerging concerns across the continuum of care from promotion to prevention to treatment. Importantly, at the heart of this diversity is the foundation of compassion and care, the hallmark of the nursing profession." – Vikram Patel, Professor of International Mental Health and Wellcome Trust Principal Research Fellow in Clinical Science, Centre for Global Mental Health, London School of Hygiene and Tropical Medicine, UK Psychiatric disorders have consistently been identified as serious and significant global burdens of disease, yet meeting the needs of people in mental distress has not often been a priority in health care. This important reference work sets out the knowledge base for understanding the state of mental health care globally, and translating that into effective practice. The Handbook provides a historical and contemporary context of mental

health care, identifies and discusses evidence-based standards of care and strategies for mental health promotion and explores the need to deliver care from interdisciplinary and community-based models, placing these imperatives within a human rights and empowerment framework. It is made up of four core sections which look at: Key and emerging issues that affect global mental health practice and research, including the social context of health; Evidence-based health promotion strategies for major areas of practice internationally; A range of country studies, reflecting different problems and approaches to mental health and mental health care internationally; and What constitutes empowering practice. The only comprehensive work looking at global perspectives on mental health nursing, this is an invaluable reference for all students, academics and professionals involved in mental health research with an interest in global or cross-cultural issues. **Global Trends 2040 A More Contested World** Cosimo Reports "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading. **ICGR 2019 2nd International Conference on Gender Research Academic Conferences and publishing limited Systems Analysis Approach for Complex Global Challenges** Springer This book, which contains a collection of review articles as well as focus on evidence-based policy making, will serve as a valuable resource not just for all postgraduate students conducting research using systems analysis thinking but also for policy makers. To our knowledge, a book of this nature which also has a strong African focus is currently not available. The book examines environmental and socio-economic risks with the aim of providing an analytical foundation for the management and governance of natural resources, disasters, addressing climate change, and easing the technological and ecological transitions to sustainability. It provides scientific and strategic analysis to better understand the dynamics of future energy transitions, their main driving forces, enabling factors, barriers, as well as their consequences for the social, economic and environmental dimensions of human wellbeing. Science-based policy advice is achieved through an integrated assessment and modeling of how to simultaneously address the major energy policy challenges in the areas of environment (climate change and air pollution), energy poverty (or access to affordable and clean energy for the poor), energy security and reliability. It also aims to improve our understanding of ecosystems and their management in today's changing world—in particular, the current state of ecosystems, and their ecological thresholds and buffering capacities. It provides support for policy makers in developing rational, realistic and science-based regional, national and global strategies for the production of fuel, food and fibre that sustain ecosystem services and safeguard food security. Finally, it addresses the human development dimension of global change based on comprehensive studies on the changing size and composition of human populations around the world by analyzing both their impacts and the differential vulnerabilities by age, gender and level of education. **Research Anthology on Measuring and Achieving Sustainable Development Goals** IGI Global The Sustainable Development Goals are an ongoing focus around the world as the needs of people and society continue to evolve at a rapid pace. The need for a more sustainable future has never been more pressing as issues such as climate change, natural disasters, and overpopulation present unique difficulties for the decision makers of the world. In order for them to make the best decisions regarding current priorities and strategies, up-to-date and detailed research regarding where we currently are as a society, where we want to be, and the many challenges that stand in the way is crucial. The Research Anthology on Measuring and Achieving Sustainable Development Goals is a comprehensive assessment of the current innovative research and discussions on the challenges to achieving the UN's Sustainable Development Goals and the measures that have already been put in place to achieve them. Covering topics such as green consumer behavior and peace promotion, this book is vital for academicians, scientists, researchers, students, postdoctoral students, specialists, practitioners, businesses, governmental institutions, decision makers, environmentalists, and policymakers. **The Politics of Distributing Social Transfers** Oxford University Press This book provides a systematic analysis of the political processes shaping the distribution of social transfers in six countries in Sub-Saharan Africa and South Asia. **Foundations of Education: An EMS Approach** Jones & Bartlett Learning The evolving field of emergency medical services (EMS) requires professional educators who are knowledgeable about teaching and learning strategies, classroom management, assessment and evaluation, technology in learning, legal implications in education, program infrastructure design, and administering programs of excellence to meet state and national accreditation guidelines. Foundations of Education: An EMS Approach, Third Edition, provides EMS educators with the tools, ideas, and information necessary to succeed in each of these areas. The content reflects how current educational knowledge and theory uniquely apply to EMS students, educators, and programs. This textbook is used in the NAEMSE Instructor Courses, and is an excellent reference for all EMS educators, as well as educators in allied health professions. **Evidence-Based Content** In addition to foundational topics such as teaching philosophy and classroom management, the text covers brain-based learning, accreditation and program evaluation, emerging technologies, and assessment strategies. It guides educators to write objectives, prepare lesson plans, and deliver education in engaging ways to maximize student learning. Grounded in this information, EMS educators can promote effective education regardless of the type of course or setting. **Highlights** -Covers current educational theory and teaching methodologies specific to EMS -Meets and exceeds the latest DOT National Guidelines for Educating EMS Instructors -Offer practical advice and scenarios in the form of Teaching Tips and Case in Points **Distributed Graph Analytics Programming, Languages, and Their Compilation** Springer Nature This book brings together two important trends: graph algorithms and high-performance computing. Efficient and scalable execution of graph processing applications in data or network analysis requires innovations at multiple levels: algorithms, associated data structures, their implementation and tuning to a particular hardware. Further, programming languages and the associated compilers play a crucial role when it comes to automating efficient code generation for various architectures. This book discusses the essentials of all these aspects. The book is divided into three parts: programming, languages, and their compilation. The first part examines the manual parallelization of graph algorithms, revealing various parallelization patterns

encountered, especially when dealing with graphs. The second part uses these patterns to provide language constructs that allow a graph algorithm to be specified. Programmers can work with these language constructs without worrying about their implementation, which is the focus of the third part. Implementation is handled by a compiler, which can specialize code generation for a backend device. The book also includes suggestive results on different platforms, which illustrate and justify the theory and practice covered. Together, the three parts provide the essential ingredients for creating a high-performance graph application. The book ends with a section on future directions, which offers several pointers to promising topics for future research. This book is intended for new researchers as well as graduate and advanced undergraduate students. Most of the chapters can be read independently by those familiar with the basics of parallel programming and graph algorithms. However, to make the material more accessible, the book includes a brief background on elementary graph algorithms, parallel computing and GPUs. Moreover it presents a case study using Falcon, a domain-specific language for graph algorithms, to illustrate the concepts.

The Conquest of Cancer A distant goal
Springer Based on 30 years of clinical and research experience, backed by a careful assessment of four decades of published data, Dr. Faguet documented in *The War on Cancer* (Springer 2005), early advances in cancer treatment and patient survival that soon stalled. Ten years later and after an exhaustive analysis of evidence-based data available through 2013 that incorporates 755 references, he reveals the root causes of the stagnation in cancer control, including the role played by major stakeholders and advocates a coordinated national effort, akin to the Apollo program, to unveil the causes of cancer and their mastery. In the interim, Dr. Faguet urges caregivers to manage patients according to the four ethical principles of beneficence, non-maleficence, respect for patients' autonomy and justice especially at the end of life.

Socio-Cultural Influences on Teenage Pregnancy and Contemporary Prevention Measures IGI Global Teenage pregnancy is a public health concern that is growing more prevalent in both developed and developing countries. Understanding the problems of teenage motherhood and suggesting relevant preventive strategies and interventions can help break the cycle of poverty, poor education, and risky behaviors that can lead to health and child welfare issues. *Socio-Cultural Influences on Teenage Pregnancy and Contemporary Prevention Measures* is an essential reference source that discusses the causes and factors responsible for early motherhood, as well as the mental and psychological outlooks of teen mothers. Featuring research on topics such as minority populations, family dynamics, and sex education, this book is ideally designed for healthcare students, medical professionals, practitioners, nurses, and counselors seeking coverage on the issues, reasons, and outcomes of teenage pregnancy, as well as preventive strategies to combat teenage motherhood.

Policies and Procedures for the Implementation of Safe and Healthy Educational Environments: Post-COVID-19 Perspectives IGI Global The COVID-19 pandemic has impacted all aspects of human existence—including the education sector. The pandemic has triggered a paradigm shift in the future of education, and thus, the current practices must transition to the “new normal.” For better or for worse, the practices and technologies used within learning environments must drastically change in the aftermath of the COVID-19 pandemic. *Policies and Procedures for the Implementation of Safe and Healthy Educational Environments: Post-COVID-19 Perspectives* discusses the policies and procedures used in the implementation of safe and healthy educational environments both during and after the COVID-19 pandemic. It shares the best practices and presents the opportunity to learn from educator experiences in the time of crisis. Covering topics such as digital accessibility, healthy educational environments, and social-emotional development, this book is essential for educators in both K-12 and higher education settings, researchers, education administrators, policymakers, pre-service teachers, and academicians.

Computers Helping People with Special Needs 15th International Conference, ICCHP 2016, Linz, Austria, July 13-15, 2016, Proceedings, Part I Springer The two volume set LNCS 9758 and 9759, constitutes the refereed proceedings of the 15th International Conference on Computers Helping People with Special Needs, ICCHP 2015, held in Linz, Austria, in July 2016. The 115 revised full papers and 48 short papers presented were carefully reviewed and selected from 239 submissions. The papers included in the first volume are organized in the following topical sections: Art Karshmer lectures in access to mathematics, science and engineering; technology for inclusion and participation; mobile apps and platforms; accessibility of web and graphics; ambient assisted living (AAL) for aging and disability; the impact of PDF/UA on accessible PDF; standard tools and procedures in accessible e-book production; accessible e-learning - e-learning for accessibility/AT; inclusive settings, pedagogies and approaches in ICT-based learning for disabled and non-disabled people; digital games accessibility; user experience and emotions for accessibility (UEE4A).

Inequality and Organizational Practice Volume I: Work and Welfare Springer Bringing together international authors, this edited collection addresses the need for greater inclusivity within organizational policy and practice, in order to tackle both visible and invisible inequalities amongst employees. Evidence suggests that more positive employment relationships can be brought about by tackling diversity issues, yet there are still ‘grey areas’ existing in the current legislative framework. Volume I explores the way that these hidden inequalities can be used to identify an individual as ‘other,’ and how this ultimately affects their wellbeing and welfare at work. Analysing social justice and stigma, as well as nuanced issues within the workplace, this book is a thought-provoking read for scholars of HRM, practitioners and policy-makers.

Shaping Images Scholarly Perspectives on Image Manipulation Walter de Gruyter GmbH & Co KG Images play a key role for scholarly work in many ways - they facilitate communication and support understanding or make research results look more appealing. At the same time powerful image-editing programs have profoundly changed how image manipulations are perceived today. This book explores how scholars from different domains conceive image manipulation. The study is based on research carried out at the Interdisciplinary Laboratory Image Knowledge Gestaltung at Humboldt University Berlin. Informants from the field of biology, computer science, art history and design explain how they differentiate between appropriate and inappropriate image manipulation. Furthermore these experts report on whether guidelines or practical logics shape their work with images.
