Handbook of Research on Managing and Designing Online Courses in Synchronous and Asynchronous Environments

IGI Global In order to be successful, online learning should be planned systematically. It can be said that offering distance education courses without preparation and knowledge about the theoretical background can cause drawbacks. While distance education has become widespread and popular, it is observed that there could be problems in its application. Such problems can include technical problems, inability to meet the learning needs at the learners' own speeds, lack of communication among learners and between learners and teachers, and lack of quality materials appropriate for online learning or the inclusion of materials used in traditional methods directly into online learning. For successful online courses, these critical aspects of distance education are important, and they should be taken into account by the institutions and the instructors offering online courses. The Handbook of Research on Managing and Designing Online Courses in Synchronous and Asynchronous Environments provides up-to-date knowledge and experiences regarding technologies, processes, and environments for online course design in distance education systems and covers topics related to the aspects of successful distance education systems with a focus on teaching and learning in online environments. Focusing on topics such as instructional design and integrated systems, it is an ideal guide for online course designers, instructional designers, curricula developers, administrators, educators, researchers, trainers, and students.

IAP Measuring History complements the cases presented in *Wise Social Studies Practices* (Yeager & Davis, 2005). Yeager and Davis highlight the rich and ambitious teaching that can occur in the broad context of state-level testing. In this book, the chapter authors and I bring the particular state history tests more to the fore and examine how teachers are responding to them. At the heart of Measuring History are cases of classroom teachers in seven states (Florida, Kentucky, Michigan, New York, Texas, Mississippi, and Virginia) where new social studies standards and new, and generally high-stakes, state-level history tests are prominent. In these chapters, the authors describe and analyze the state's testing efforts and how those efforts are being interpreted in the context of classroom practice. The results both support and challenge prevailing views on the efficacy of testing as a vehicle for educational reform. Catherine Horn (University of Houston) and I lay the groundwork for the case studies through a set of introductory chapters that examine the current environment, the research literature, and the technical qualities of history tests.

Technology Use and Research Approaches for Community Education and Professional Development

IGI Global As the areas of community education and professional development continue to expand, the technologies that are utilized in these programs are also progressively advancing. However, it can sometimes be difficult to pinpoint the best system in such a vast, ever-changing world of technology. *Technology Use and Research Approaches for Community Education and Professional Development* investigates how the role of information technology is impacting the academic and workplace environments. This publication will explore areas such as unique learning styles, various methods of disseminating information, and technology's role and impact within these settings. Researchers, practitioners, and instructors in the areas of adult, continued, and higher education will benefit from this text's innovative way of addressing efficient methods of utilizing technology.

Test Yourself: Research Methods and Design in Psychology

Learning through assessment

SAGE Electronic Inspection Copy available for instructors here Test Yourself: Research Methods and Design in Psychology provides essential learning and practice through assessment for psychology students. It enables year 1 and 2 undergraduates to assess their confidence and competence and tackle the types of questions they will face in their formal university assessments. The book includes over 200 multiple-choice and extended multiple-choice

questions, designed to assess depth of knowledge. At the end of each chapter sample essay questions are provided, plus further guidance, to complement the multiple-choice questions and further test understanding. Information is provided to help students make sense of their results and identify strengths and weaknesses.

Innovation in Information Systems and Technologies to Support Learning Research

Proceedings of EMENA-ISTL 2019

Springer Nature This book provides glimpses into contemporary research in information systems & technology, learning, artificial intelligence (AI), machine learning, and security and how it applies to the real world, but the ideas presented also span the domains of telehealth, computer vision, the role and use of mobile devices, brain-computer interfaces, virtual reality, language and image processing and big data analytics and applications. Great research arises from asking pertinent research questions. This book reveals some of the authors' "beautiful questions" and how they develop the subsequent "what if" and "how" questions, offering readers food for thought and whetting their appetite for further research by the same authors.

Empowering Students Through Questioning

Addressed is the purpose of questioning, pitfalls in developing questions, types of questions to use for assessments, and activities to use to determine question effectiveness"--

Statistics Using Technology, Second Edition

Lulu.com Statistics With Technology, Second Edition, is an introductory statistics textbook. It uses the TI-83/84 calculator and R, an open source statistical software, for all calculations. Other technology can also be used besides the TI-83/84 calculator and the software R, but these are the ones that are presented in the text. This book presents probability and statistics from a more conceptual approach, and focuses less on computation. Analysis and interpretation of data is more important than how to compute basic statistical values.

Conceptualizing Deviance

A Cross-Cultural Social Network Approach to Comparing Relational and Attribute Data

Rowman & Littlefield This book compares traditional attribute data methods for assessing perceptions of deviance to emerging relational data-based social network methods using a cross-cultural sample from the United States and South Korea. It offers new insights into the conceptualization of deviance and the application of social network analysis as a new tool for studying social influence and perceptions.

Research and Advanced Technology for Digital Libraries

5th European Conference, ECDL 2001, Darmstadt, Germany, September 4-9, 2001. Proceedings

Springer Digital libraries (DLs) are major advances in information technology that frequently fall short of expectations [7, 28]. Covi & Kling [7] argue that understanding the wider context of technology use is essential to understanding digital library use and its implementation in different social worlds. Recent health informatics research also suggests that social and organisational factors can determine the success or failure of healthcare IT developments [8, 11, 12]. Heathfield [11] suggests that this is due to the complex, autonomous nature of the medical discipline and the specialized (clinician or software engineer) approach to system development. Negative reactions to these systems is often due to inappropriate system design and poor implementation. However, there may be other less obvious social and political repercussions of information system design and deployment. Symon et al [26] have identified, within a hospital scenario, how social structures and work practices can be disrupted by technology implementation. Although these systems often deal with sensitive, personal information, other system design research has found that apparently innocuous data can be perceived as a threat to social and political stability [1,2,3]. To understand the impact of DLs within the medical profession, an in-depth evaluation is required of the introduction and later development of these applications within their specific social and organisational settings. However, as Covi & Kling [7] have highlighted, there are few high-level theories that aid designers in understanding the implication of these issues for DL design and implementation.

Cases in Online Interview Research

SAGE Publications In an era of constrained research budgets, online interviewing opens up immense possibilities: a researcher can literally conduct a global study without ever leaving home. But more than a decade after these technologies started to become available, there are still few studies on how to utilize online interviews in research. This book provides 10 cases of research conducted using online interviews, with data collected through text-based, videoconferencing, multichannel meetings, and immersive 3-D environments. Each case is followed by two commentaries: one from another expert contributor, the second from Janet Salmons, as editor.

Final FRCR Part A Modules 4-6 Single Best Answer MCQS

The SRT Collection of 600 Questions with Explanatory Answers

CRC Press Single best answer (SBA) questions have been introduced into the FRCR Part 2A examination of the Royal College of Radiologists in the UK for the first time. This book of 600 SBA questions and explanatory answers has been written to aid students preparing for the exam by current trainees in clinical radiology, coordinated through The Society of Radiologists in Training (SRT). Questions are grouped by topic and each topic is split into three papers of 70 questions, with explanations separated into chapters to enable readers to either attempt a whole mock exam paper or to browse question by question. The book is a bridge between a pure revision aid and a reference text, including a bibliography of useful references for further information. Candidates for other professional exams in Radiology will find the text useful, as will and those from other specialties wishing to explore the radiological aspects of their syllabus in greater depth. This is a companion volume to Final FRCR Part A Modules 4-6 Single Best Answer MCQs by the same team.
