The book tells the kind of story that often gets buried beneath images of violence' LitHub In 2012 the rebel suburb of Daraya in Damascus was brutally besieged by Syrian government forces. Four years of suffering ensued, punctuated by shelling, barrel bombs and chemical gas attacks. People's homes were destroyed and their food supplies cut off; disease was rife. Yet in this man-made hell, forty young Syrian revolutionaries embarked on an extraordinary project, rescuing all the books they could find in the bombed-out ruins of their home town. They used them to create a secret library, in a safe place, deep underground. It became their school, their university, their refuge. It was a place to learn, to exchange ideas, to dream and to hope. Based on lengthy interviews with these young men, conducted over Skype by the award-winning French journalist Delphine Minoui, **The Book Collectors of Daraya** is a powerful testament to freedom, tolerance and the power of literature. On April 10, 1834, firefighters

smashed through a padlocked attic door in the burning Royal Street mansion of Creole society couple Delphine and Louis Lalaurie. In the billowing smoke and flames they made an appalling discovery: the remains of Madame Lalaurie's chained, starved, and mutilated slaves. This house of horrors in the French Quarter spawned a legend that has endured for more than one-hundred-and-fifty years. But what actually happened in the Lalaurie home? Rumors about her atrocities spread as fast as the fire. But verifiable facts were scarce. Lalaurie wouldn't answer questions. She disappeared, leaving behind one of the French Quarter's ghastliest crime scenes, and what is considered to be one of America's most haunted houses. In *Madame Lalaurie*, Victoria Cosner Love and Lorelei Shannon "shed light on what is fact and what is purely fiction in a tale that's still told nightly on the streets of New Orleans" (Deep South Magazine).

**Mental Capital and Wellbeing** John Wiley & Sons This major new reference presents The Foresight Mental Capital and Wellbeing Project (a UK Government project in the Government Office for Science). It offers a comprehensive exploration of how mental capital and wellbeing operate over the lifespan; how experiences in the family, in school, at work and following retirement augment or reduce mental capital and wellbeing, and the impact that this has for the individual and for the welfare and economic progress of the nation. Mental Capital and Wellbeing comprises a series of scientific reviews written by leading international scientists and social scientists in the field. The reviews undertake systematic analyses of the evidence base surrounding five key themes, on which they propose future policies will have to be based. An internationally renowned team of Editors introduce each theme and draw together conclusions in terms of both policy and practice.

**Section 1 (Mental Capital and Wellbeing Through Life)**- Mental capital refers to the totality of an individual's cognitive and emotional resources, including their cognitive capability, flexibility and efficiency of learning, emotional intelligence and resilience in the face of stress. The extent of an individual's resources reflects his or her basic endowment (e.g. genes and early biological programming), motivation and experiences (e.g. education) which take place throughout the life course. This section presents the very latest on the science of mental capital throughout life.

**Section 2 (Learning Through Life)** provides a coherent overview of a fast-moving and complex field of policy and practice. Educational attainment has a considerable impact on physical and mental wellbeing, both directly and indirectly, by enabling people better to achieve their goals. The ability to continue learning throughout the lifespan is critical to a successful and rewarding life in contemporary societies.

**Section 3 (Mental Health and Ill-Health)** draws together the most recent evidence about positive mental health as well as a range of mental disorders to consider their importance to the population and economy in terms of prevalence and disability and the wider burden on society.

**Section 4 (Wellbeing and Work)** - It is estimated that 13 million working days are lost through stress each year, costing the economy over £3.7 billion per annum. This theme explores those drivers that influence the nature and structure of work and the impact this has on employee wellbeing.

**Section 5 (Learning Difficulties)** - This theme provides a cutting-edge picture of how recent insights from genetics, cognitive and neuroscience improve our understanding of learning difficulties such as dyslexia, dyscalculia and attention-deficit-hyperactivity disorder. Reviews focus on how current research can contribute to early diagnosis and improved intervention.

**Radical Markets** Uprooting Capitalism and Democracy for a Just Society Princeton University Press Revolutionary ideas on how to use markets to achieve fairness and prosperity for all. Many blame today's economic inequality, stagnation, and political instability on the free market. The solution is to rein in the market, right? *Radical Markets* turns this thinking on its head. With a new foreword by Ethereum creator Vitalik Buterin and virtual reality pioneer Jaron Lanier as well as a new afterword by Eric Posner and Glen Weyl, this provocative book reveals bold new ways to organize markets for the good of everyone. It shows how the emancipatory force of genuinely open, free, and competitive markets can reawaken the dormant nineteenth-century spirit of liberal reform and lead to greater equality, prosperity, and cooperation. Only by radically expanding the scope of markets can we reduce inequality, restore robust economic growth, and resolve political conflicts. But to do that, we must replace our most sacred institutions with truly free and open competition—*Radical Markets* shows how.

**At Home** An Anthropology of Domestic Space Syracuse University Press In a volume that brings together a wide range of disciplines—art history, sociology, architecture, cultural anthropology, and environmental psychology—Irene Cieraad presents a collection of articles that focuses on the practices and symbolism of domestic space in Western society. **Returning to Reims** Penguin UK 'A deeply intelligent and searching book, one that makes you re-consider the narrative of your own life and reframe the story you tell yourself' Hilary Mantel "There was a question that had come to trouble me a bit earlier, once I had taken the first steps on this return journey to Reims... Why, when I

have had such an intense experience of forms of shame related to class ... why had it never occurred to me to take up this problem in a book?" Returning to Reims is a breath-taking memoir of return, a family story of class, sexuality, gender and of the shifting political allegiances of the French working classes. A phenomenon in France and a huge bestseller in Germany, Didier Eribon has written the defining memoir of our times. *Underground Time* A&C Black Translated from the French by George Miller The new novel from the author of *No and Me Improvising Cinema* Amsterdam University Press - F This spirited volume explores the history and diversity of improvisation in the cinema, including works by Jean Renoir, Jean-Luc Godard, and Nobuhiro Suwa. Gilles Mouéllic examines improvisational practices that can be specifically attributed to the cinema and argues in favor of their powers as instigators of unprecedented forms of expression. *Improvising Cinema* reflects both on the permanence of attempting improvisation and the relationship between technology and aesthetics. Mouéllic concludes preservation becomes even more invaluable in the case of improvisation, as the creative act exists only within the brief time span of the performance. *Camilla, Or, A Picture of Youth Capital and Ideology* Belknap Press Thomas Piketty's *Capital in the Twenty-First Century* showed that capitalism, left to itself, generates deepening inequality. In this audacious follow-up, he challenges us to revolutionize how we think about ideology and history, exposing the ideas that have sustained inequality since premodern times and outlining a fairer economic system. *Game Engine Black Book* Wolfenstein 3D Software Wizards How was Wolfenstein 3D made and what were the secrets of its speed? How did id Software manage to turn a machine designed to display static images for word processing and spreadsheet applications into the best gaming platform in the world, capable of running games at seventy frames per seconds? If you have ever asked yourself these questions, *Game Engine Black Book* is for you. This is an engineering book. You will not find much prose in here (the author's English is broken anyway.) Instead, this book has only bit of text and plenty of drawings attempting to describe in great detail the Wolfenstein 3D game engine and its hardware, the IBM PC with an Intel 386 CPU and a VGA graphic card. *Game Engine Black Book* details techniques such as raycasting, compiled scalars, deferred rendition, VGA Mode-Y, linear feedback shift register, fixed point arithmetic, pulse width modulation, runtime generated code, self-modifying code, and many others tricks. Open up to discover the architecture of the software which pioneered the First Person Shooter genre. *Towards a Climate-Neutral Europe Curbing the Trend* Routledge This book explains the EU's climate policies in an accessible way, to demonstrate the step-by-step approach that has been used to develop these policies, and the ways in which they have been tested and further improved in the light of experience. The latest changes to the legislation are fully explained throughout. The chapters throughout this volume show that no single policy instrument can bring down greenhouse gas emissions. The challenge facing the EU, as for many countries that have made pledges under the Paris Agreement, is to put together a toolbox of policy instruments that is coherent, delivers emissions reductions, and is cost-effective. The book stands out by the fact it covers the EU's emissions trading system, the energy sector and other economic sectors, including their development in the context of international climate policy. This accessible book will be of great relevance to students, scholars and policy makers alike. *The Management of Living Beings or Emo-management* John Wiley & Sons This book is based on the author's research carried out over the last ten years in terms of emotional management. It establishes the intervention of emotions at all levels of management: the Littré definition, management being the art of the possible, "the art of guiding, managing, handling, motivating ... even resolving and arranging". Emotion is a subject studied particularly in management in English speaking countries and has become a topic of growing interest in organizational behavior. E-motion is, in this book, considered based on its etymological origin (ex-movere: put into action by the external factors). The objective is to demonstrate a new vision of responsible management and to confront the current challenges in motion. In this way, the latter tends to take into consideration the 'living', i.e. the psychobiological, neurological and sociological aspects of people in business. *The River Between Us* Puffin Books During the early days of the Civil War, the Pruitt family takes in two mysterious young ladies who have fled New Orleans to come north to Illinois. An ALA Notable Book & Best Book for Young Adults. Reprint. *World Report 2019 Events of 2018* Seven Stories Press The best country-by-country assessment of human rights. Reflecting extensive investigative work undertaken by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual World Report is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe. *Exploring Universal Basic Income A Guide to Navigating Concepts, Evidence, and Practices* World Bank Publications Universal basic income (UBI) is emerging as one of the most hotly debated issues in development and social protection policy. But what are the features of UBI? What is it meant to achieve? How do we know, and what don't we know, about its performance? What does it take to implement it in practice? Drawing from global evidence, literature, and survey data, this volume provides a framework to elucidate issues and trade-offs in UBI with a view to help inform choices around its appropriateness and feasibility in different contexts. Specifically, the book examines how UBI differs from or complements other social assistance programs in terms of objectives, coverage, incidence, adequacy, incentives, effects on poverty and inequality, financing, political economy, and implementation. It also reviews past and current country experiences, surveys the full range of existing policy proposals, provides original results from micro-tax benefit simulations, and sets out a range of considerations around the analytics and practice of UBI. *Geographical Indications at the Crossroads of Trade, Development, and Culture* Cambridge University Press Historically, few topics have proven to be so controversial in international intellectual property as the protection of geographical indications (GIs). The adoption of TRIPS in 1994 did not resolve disagreements, and countries worldwide continue to quarrel today as to the nature, the scope, and the enforcement of GI protection nationally and internationally. Thus far, however, there is little literature addressing GI protection from the point of view

of the Asia-Pacific region, even though countries in this region have actively discussed the topic and in several instances have promoted GIs as a mechanism to foster local development and safeguard local culture. This book, edited by renowned intellectual property scholars, fills the void in the current literature and offers a variety of contributions focusing on the framework and effects of GI protection in the Asia-Pacific region. The book is available as Open Access. Delphine Left Out of the Bargain Settlements in Foreign Bribery Cases and Implications for Asset Recovery World Bank Publications It is a conservative estimate that every year, through corruption, between 20 billion dollars and 40 billion dollars are diverted from developing countries and find safe haven in foreign jurisdictions. In several countries that are party to the Organization for Economic Co-operation and Development (OECD) anti-bribery convention, a very high proportion of cases of foreign bribery and related offenses have been resolved short of a full trial. Anticorruption practitioners and policy makers in countries where officials were allegedly bribed have (along with other interested stakeholders) therefore raised concerns about whether settlements might impede their own criminal or enforcement investigations and affect the liability of multinational companies in third countries. This study seeks to fill knowledge gap by: (i) informing policy makers and practitioners about the frameworks for settlements in various legal systems, (ii) examining settlements in practice and their implications for international cooperation, and (iii) analyzing how settlements relate to asset recovery in foreign bribery cases. An additional goal is to inform the general public (including civil society organizations) about these frameworks. This study describes and analyzes, both qualitatively and quantitatively, settlements in cases of foreign bribery and related offenses, and their implications for international cooperation and asset recovery. This report is structured as follows: chapter one adopts a broad definition of settlements as various procedures short of trials and analyzes the legal frameworks in a number of civil and common law countries. Chapter two traces the general trends and developments in settlements and considers the rationale for settlements. Chapter three analyzes the impact of settlements in one jurisdiction on pending and future investigations in other countries. Chapter four explores the link between asset recovery and settlements through the lens of United Nations Convention against Corruption (UNCAC). Chapter five offers conclusions. Chapter six presents detailed summaries of 14 significant cases. From the Difficulty Xlibris Corporation A true story of a character named (FD). The protagonist of this story is called From the Difficulty (FD), and tells of a life where he was born to an elite father and a semi-illiterate mother, driven, at an early age, to participate in the family business of working the farm and selling things. He lives an unnamed, in a region replete with civil war, FDs home becomes a center for freedom fighters mobilization, hes eventually moved away from the war zone to those areas insulated from much of the conflict. FD later on leaves this part of the world to ...a place perceived by many as a land which flows with milk and honey, a land in which he would sometimes wonder about what happened to the value of education and where was the American dream hiding. Such is New York City in America. AuthorMr. M The Novel Map Space and Subjectivity in Nineteenth-Century French Fiction Northwestern University Press Revised and expanded version of the author's dissertation--Harvard, 2005, under the title: Novel selves: mapping the subject in Stendhal, Nerval and Proust. The Royal Path of Life Or, Aims and Aids to Success and Happiness The Voice in Cinema Chion analyzes imaginative uses of the human voice by directors like Lang, Hitchcock, Ophuls, Duras, and de Palma. Man-made Vitreous Fibres World Health Organization Reports the conclusions of a scientific working group of 19 experts from 11 countries convened by the Monographs Programme of the International Agency for Research on Cancer (IARC) on the re-evaluation of the carcinogenic risk of airborne man-made vitreous fibres. The World of Yesterday An Autobiography U of Nebraska Press Stefan Zweig (1881-1942) was a poet, novelist, and dramatist, but it was his biographies that expressed his full genius, recreating for his international audience the Elizabethan age, the French Revolution, the great days of voyages and discoveries. In this autobiography he holds the mirror up to his own age, telling the story of a generation that "was loaded down with a burden of fate as was hardly any other in the course of history." Zweig attracted to himself the best minds and loftiest souls of his era: Freud, Yeats, Borgese, Pirandello, Gorky, Ravel, Joyce, Toscanini, Jane Addams, Anatole France, and Romain Rolland are but a few of the friends he writes about. Chains of Finance How Investment Management Is Shaped Oxford University Press Investment is no longer a matter of individual savers directly choosing which shares or bonds to buy. Rather, most of their money flows through a 'chain': an often extended sequence of intermediaries. What goes on in that chain is of huge importance: The world's investment managers, who are now almost as well paid as top bankers, control assets equivalent in value to around a year of total global economic output. In Chains of Finance, five social scientists discuss the ways in which the intermediaries in the chain influence each other, channel the flows of savers' money, enhance investment decisions, and form audiences for each other's performances of financially competent selves. The central argument of the book is that investment management is fashioned profoundly by the opportunities and constraints this chain creates. Whether chains constrain or enable, however, they always entangle, tying intermediaries to each other - silently and profoundly shaping the investment management industry. Chains of Finance is a novel analysis that will make students, social scientists, financial professionals, and regulators looking at the workings of financial markets in a new light. A must-read for anyone looking for insights into the decision-making processes of investment managers and those influenced by and working for them. Vast changes to our home lives, social interactions, government functioning and relations between countries have swept the world in a few months and are difficult to hold in one's mind at one time. That is why a collaborative effort such as this edited, multidisciplinary collection is needed. This book confronts the vulnerabilities and interconnectedness made visible by the pandemic and its consequences, along with the legal, ethical and policy responses. These include vulnerabilities for people who have been harmed or will be harmed by the virus directly and those harmed by measures taken to slow its relentless march; vulnerabilities exposed in our institutions, governance and legal structures; and vulnerabilities in other countries and at the global level where persistent injustices harm us all. Hopefully, COVID-19 will force us to deeply reflect on how we govern and our policy priorities; to focus preparedness, precaution, and recovery to include all, not just some. Published in English with some chapters in French.
