**The Politics of Online Copyright Enforcement in the EU Access and Control Springer** This book investigates recent policy initiatives dealing with the online enforcement of copyright in the European Union, providing unique insights into the current stalemate in the field. It is a timely contribution to the next steps of policy-making on copyright enforcement and Internet governance. The author brings to light tensions in how we encourage knowledge and cultural creation, and importantly how we regulate the Internet. In this study, online copyright enforcement is situated within the wider debate on Internet governance. Intermediary liability is a focal point. It provides an explanation of recent online copyright enforcement policy initiatives is based on an in-depth investigation of the ideas, interests, institutions and discourses involved in three EU level and two member state level initiatives. Seventy-two expert interviews complement the policy analysis conducted. **Guiding Principles on Business and Human Rights Implementing the United Nations "Protect, Respect and Remedy" Framework United Nations Publications** "This publication contains the 'Guiding Principles on Business and Human Rights: Implementing the United Nations Protect, Respect and Remedy Framework', which were developed by the Special Representative of the Secretary-General on the issue of human rights and transnational corporations and other business

enterprises. The Special Representative annexed the Guiding Principles to his final report to the Human Rights Council (A/HRC/17/31), which also includes an introduction to the Guiding Principles and an overview of the process that led to their development. The Human Rights Council endorsed the Guiding Principles in its resolution 17/4 of 16 June 2011."--P. iv. Mental Capacity Act 2005 code of practice [large print 2007 final edition] The Stationery Office The Mental capacity Act 2005 provides a statutory framework for people who lack the capacity to make decisions for themselves, or for people who want to make provision for a time when they will be unable to make their own decisions. This code of practice, which has statutory force, provides information and guidance about how the Act should work in practice. It explains the principles behind the Act, defines when someone is incapable of making their own decisions and explains what is meant by acting in someone's best interests. It describes the role of the new Court of Protection and the role of Independent Mental Capacity Advocates and sets out the role of the Public Guardian. It also covers medical treatment and the way disputes can be resolved. The book is written for researchers and professionals working in the field of IS research or the research of SMEs. Moreover, the book will be a reference for researchers, professionals and students in management information systems science and related fields. Communications Data DRAFT Code of Practice Streaming and Copyright Law An end-user perspective Taylor & Francis This book examines the challenges posed to Australian copyright law by streaming, from the end-user perspective. It compares the Australian position with the European Union and United States to draw lessons from them, regarding how they have dealt with streaming and copyright. By critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses, it argues for strengthening end-user rights. The rising popularity of streaming has resulted in a revolutionary change to how digital content, such as sound recordings, cinematographic films, and radio and television broadcasts, is used on the internet. Superseding the conventional method of downloading, using streaming to access digital content has challenged copyright law, because it is not clear whether end-user acts of streaming constitute copyright infringement. These prevailing grey areas between copyright and streaming often make end-users feel doubtful about accessing digital content through streaming. It is uncertain whether exercising the right of reproduction is appropriately suited for streaming, given the ambiguities of "embodiment" and scope of "substantial part". Conversely, the fair dealing defence in Australia cannot be used aptly to defend end-users' acts of streaming digital content,

because end-users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review, news reporting, parody or satire, or research or study. When considering a temporary copy exception, end-users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content, even if they lack any knowledge about the content's infringing nature. Moreover, the grey areas in circumventing geo-blocking have made end-users hesitant to access websites through streaming because it not clear whether technological protection measures apply to geo-blocking. End-users have a severe lack of knowledge about whether they can use circumvention methods, such as virtual private networks, to access streaming websites without being held liable for copyright infringement. Despite the intricacies between copyright and access to digital content, the recently implemented website-blocking laws have emboldened copyright owners while suppressing end-users' access to digital content. This is because the principles of proportionality and public interest have been given less attention when determining website-blocking injunctions. The Yearbook of Consumer Law 2007 Ashgate Publishing, Ltd. The Yearbook of Consumer Law provides a valuable outlet for high-quality scholarly work which tracks developments in the consumer law field with a domestic, regional and international dimension. Governance in "Cyberspace": Access and Public Interest in Global Communications Kluwer Law International B.V. 'Cyberspace' is the emerging invisible, intangible world of electronic information and processes stored at multiple interconnected sites. The digital revolution leads to 'convergence' (of telecommunications, computer/Internet and broadcasting) and to dynamic multimedia value chains. Deregulation and competition are major driving forces in the new interactive electronic environment. This volume contains normative proposals for 'cyber'-regulation, including self-regulation, grounded on developments in the EU, US and the Far East, in international organisations (WTO, OECD, WIPO, ITU), in business fora, in NGOs, in the 'Internet community' and in academic research. The multi-actor (government, business, civil society) and multi-level analysis (subsidiarity) pertains e.g. to ex-ante and ex-post access-regulation, competition, network economics (external effects, essential facilities), public interest principles (human dignity, free speech, privacy, security), development and culture, consumer protection, cryptography, domain names and copyright. Lawyers, regulators, business executives, investment bankers, diplomats, and civil society representatives need shared essentials of plurilateral 'governance' to safeguard both competition and public interest objectives, at a scale congruent to 'cyberspace', in the transition to an 'international law of cooperation'. eHealth: Legal, Ethical and Governance Challenges Springer Science & Business Media This publication identifies and discusses important challenges affecting eHealth in the EU and North America in the three areas of law, ethics and governance. It makes meaningful contributions to the eHealth discourse by suggesting solutions

and making recommendations for good practice and potential ways forward. Legal challenges discussed include issues related to electronic medical records, telemedicine, the Internet and pharmaceutical drugs, healthcare information systems and medical liability. Ethical challenges focus on telehealth and service delivery in the home, Web 2.0 and the Internet, patient perceptions and ethical frameworks. Governance challenges focus on IT governance in healthcare, governance and decision-making in acute care hospitals, and different models of eHealth governance. The publication provides useful support materials and readings for persons active in developing current understandings of the legal, ethical and governance challenges involved in the eHealth context.

**Comparative Law Yearbook of International Business Volume 43 Kluwer Law International B.V. The Comparative Law Yearbook of International Business**, published under the auspices of the Center for International Legal Studies, in this 43rd volume spans an arc of timely and challenging concerns for business law practitioners and academics alike. It discusses: how arbitrability of intellectual property rights disputes might improve worldwide IPR enforcement; how the “disregard of legal entity” may be used to establish implied consent by a person or entity that is not a signatory to an arbitration agreement; how an effective cross-border insolvency framework under the Indian insolvency and bankruptcy code can borrow from the UNCITRAL Model Law’s and other jurisdictions’ approaches to the tension between “universality” and “territoriality”; how a promising new mediation act for Pakistan may help resolve a backlog of millions of cases in a jurisdiction with a patchwork of traditional and modern alternative dispute resolution mechanisms; how the European Union seeks to balance the taxation of digital services; how Brazil is addressing the taxation of offshore indirect transfers; how private equity capital structures in the unique market of professional sports create opportunities as well as risks; how Securities Market Regulation theory plays a role in the organization and development of active securities markets, particularly in emerging markets; and how non-signatories can be bound by arbitration agreements in Brazil through “disregard of legal entity” to ascertain implied consent. The authors are practitioners and

academics from Brazil, England, France, India, Pakistan, Singapore, the United States and Uzbekistan. They offer a broad and diverse perspective on some of today's pressing business law issues in a shrinking world.

**Tourism Management in Warm-water Island Destinations** CABI Warm-water islands are a cohesive group of islands distinguished by their geography and remoteness, history as former colonial territories, and dependence on external stakeholders for their economic and social development. Warm-water island destinations also have a year-round tourism industry. These island tourism destinations are facing unprecedented adjustment challenges in the wake of increasing globalization and susceptibility to external shocks, and are in search of appropriate policy responses to that

globalization. It is critical for small islands to understand how these challenges affect tourism performance and how they impact their residents. **Tourism Management in Warm-water Island Destinations** unearths the critical aspects that contribute to tourism development and growth in islands. Particular emphasis is placed on destinations such as the Caribbean, with lessons learned that are applicable to other island tourism contexts in the Mediterranean, Indian Ocean and the Pacific. This book provides a platform for emerging systemic perspectives of the various aspects of island tourism, with the view that strategies for the management and development of tourism in island environments can be improved and will be of interest to those studying and researching within destination management. **Directories in Print ICANN and the WHOIS database : providing access to protect consumers from phishing : hearing DIANE Publishing Digital Phenotyping/Digital Biomarkers to Monitor Psychiatric Disorders Frontiers Media SA Proceedings of the 9th ACM Conference on Computer and Communications Security CCS 2002 : November 18-22, 2002, Washington, DC, USA Assn for Computing Machinery Business Communication: In Person, In Print, Online Cengage Learning BUSINESS COMMUNICATION: IN PERSON, IN PRINT, ONLINE, 10E** prepares readers to become successful employees and leaders with a realistic approach to communication. **Language Management From Bricolage to Strategy in British Companies** Channel View Publications This book draws on case studies of language management within British organisations to examine the decisions they make about language diversity in their professional communications in order to be successful in a multilingual world. It explores the practices that the organisations use to manage language diversity in interorganisational relationships, and why certain practices occur in some situations and not others. The book highlights how organisations rely on individual employees to perform a variety of language tasks and the implications of this; the effect of English as a global lingua franca; and the translation challenges which organisations face. The book demonstrates that practices to manage language diversity are often a result of the resources organisations have at given moments in time, rather than being part of a deliberate language management strategy.

**Federal Register Submarine Cables Protection and Regulations A Comparative Analysis and Model Framework** Springer Nature This book highlights the critical importance of laying, quick relinking, and protecting submarine cables with timely approval for carriers and cable repairing ships and how these are most challenging in many jurisdictions. It identifies that a dedicated national instrument on submarine cable as a way forward is yet to be appreciated by many States, and presently, there is no model legal framework for national instruments on submarine cables available. To bridge these gaps, the book undertakes a systematic inquiry and analysis of submarine cable regimes' and relevant authorities. It consults existing knowledge on international law on cables and analyzes specific principles and provisions on laying repair and maintenance of submarine cables and states' obligations towards protecting cables from vulnerabilities. It touches upon cable regulation in the deep sea concerning the International Seabed Authority and proposed biodiversity agreement. It indicates suitable measures on cable laying, etc., and security risks in the marine space beyond the national jurisdictions. To map States' response, it explores the domestic cable regimes, including both the selected jurisdictions and Australia and New Zealand, analyses specific legal provisions and institutional set-up, and demonstrates state practices, approaches, and loopholes in the governance of the cable system within national jurisdictions. The book suggests adopting the spatial ocean

management approach, dedicated regulatory authority, a competent enforcement agency, strict liability with exemplary punishment on cable damage, and the cable system to strengthen the cable system's management. Finally, it arranges the fundamental premises of a common minimum framework for national instruments seeking coastal states' deliberations in implementing initiatives towards a robust law and policy for reliability, resiliency, and security of the cable system. The cable industries, pipeline, fishing, shipping industries, academicians, government authorities, international bodies, and the maritime community worldwide are looking at the issues and challenges of submarine cable regimes, particularly national regimes and suggestive remedial measures. These stakeholders will find the book a useful reference. The Academic Book of the Future Springer This book is open access under a CC-BY licence. Part of the AHRC/British Library Academic Book of the Future Project, this book interrogates current and emerging contexts of academic books from the perspectives of thirteen expert voices from the connected communities of publishing, academia, libraries, and bookselling.

**People Like Us** What it Takes to Make it in Modern Britain Profile Books A New Statesman Book of the Year AS HEARD ON BBC RADIO 4'S BOOK OF THE WEEK 'Hashi Mohamed powerfully exposes the alienating and segregating effect of social immobility in this country.' David Lammy 'A moving, shocking and clear-eyed account of the increasingly rare phenomenon of social mobility. Using his own extraordinary story as a spine [Hashi Mohamed] has written an analysis, how-to-guide and polemic on getting on and up in Britain today.' - Grayson Perry 'Beautifully written and powerfully argued, *People Like Us* is essential reading' The Secret Barrister What does it take to make it in modern Britain? Ask a politician, and they'll tell you it's hard work. Ask a millionaire, and they'll tell you it's

talent. Ask a CEO and they'll tell you it's dedication. But what if none of those things is enough? Raised on benefits and having attended some of the lowest-performing schools in the country, barrister Hashi Mohamed knows something about social mobility. In *People Like Us*, he shares what he has learned: from the stark statistics that reveal the depth of the problem to the failures of imagination, education and confidence that compound it. We live in a society where the single greatest indicator of what your job will be is the job of your parents. Where power and privilege are concentrated among the 7 per cent of the population who were privately educated. Where, if your name sounds black or Asian, you'll need to send out twice as many job applications as your white neighbour. Wherever you are on the social spectrum, this is an essential investigation into our society's most intractable problem. We have more power than we realise to change things for the better.

**Planning Sustainable Cities** An infrastructure-based approach Routledge *Planning Sustainable Cities: An infrastructure-based approach* provides an analytical framework for urban sustainability, focusing on the services and performance of infrastructure systems. The book approaches infrastructure as a series of systems that function in synergy and are directly linked with urban planning. This method streamlines and guides the planning process, while still highlighting detail, each infrastructure system is decoded in four "system levels". The levels organize the processes, highlight connections between entities and decode the high-level planning and decision making process affecting infrastructure. For each system level strategic objectives of planning are determined. The objectives correspond to the five focus areas of the Zofnass program: Quality of life, Natural World, Climate and Risk, Resource Allocation, Leadership. Developed through the Zofnass Program at the Harvard Graduate School of Design, this approach integrates the key infrastructure systems of Energy, Landscape, Transportation, Waste, Water, Information and Food and explores their synergies through land use planning, engineering, economics and policy. The size and complexity of infrastructure systems means that multiple stakeholders facing their own challenges and agendas are involved in planning; this book creates a common, collaborative platform between public authorities, planners, and engineers. It is an essential resource for those seeking Envision Sustainability Professionals accreditation.

**Model Rules of Professional Conduct** American Bar Association *The Model Rules of Professional Conduct* provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your

clients, colleagues and the courts. **Strengthening Forensic Science in the United States A Path Forward** National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. **Strengthening Forensic Science in the United States: A Path Forward** provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. **Strengthening Forensic Science in the United States** gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators. **The Greenhouse Gas Protocol A Corporate Accounting and Reporting Standard** World Resources Inst The GHG Protocol Corporate Accounting and Reporting Standard helps companies and other organizations to identify, calculate, and report GHG emissions. It is designed to set the standard for accurate, complete, consistent, relevant and transparent accounting and reporting of GHG emissions. **The Content Analysis Guidebook** SAGE Content analysis is one of the most important but complex research methodologies in the social sciences. In this thoroughly updated Second Edition of **The Content Analysis Guidebook**, author Kimberly Neuendorf provides an accessible core text for upper-level undergraduates and graduate students across the social sciences. Comprising step-by-step instructions and practical advice, this text unravels the complicated aspects of content analysis.
