singlecomprehensive volume. To that end, the present work thoroughly examines the development, both functionally and artistically, of the ancient Greek helmet from the Bronze Age through the Hellenistic period (ca. 2000-31 BC), and catalogs the large number of helmets that have survived: over two thousand examples, tracing their historical development and identifying specific workshops, regional styles, and the work of individual armor smiths. The book is heavily illustrated with over 700 original photo-realistic illustrations and thousands of images of ancient Greek helmets. It will be the standard reference work on the subject for many years to come and makes for a visually powerful coffee table art book. **Romans on the Rampage** Penguin UK Perilus is a Roman boy who is crazy about chariot racing. He loves to practise in his own homemade chariot (pulled by the family goat) and dreams of riding in the Circus Maximus himself one day. In ancient times, large fleets of Roman merchant ships set sail from Egypt on voyages across the Indian Ocean. They sailed from Roman ports on the Red Sea to distant kingdoms on the east coast of Africa and southern Arabia. Many continued their voyages across the ocean to trade with the rich kingdoms of ancient India. Along these routes, the Roman Empire traded bullion for valuable goods, including exotic African products, Arabian incense, and eastern spices. This book examines Roman commerce with Indian kingdoms from the Indus region to the Tamil lands. It investigates contacts between the Roman Empire and powerful African kingdoms, including the Nilotic regime that ruled Meroe and the rising Axumite Realm. Further chapters explore Roman dealings with the Arab kingdoms of southern Arabia, including the Saba-Himyarites and the Hadramaut Regime, which sent caravans along the incense trail to the ancient rock-carved city of Petra. The first book to bring these subjects together in a single comprehensive study, *The Roman Empire and the Indian Ocean* reveals Rome's impact on the ancient world and explains how international trade funded the legions that maintained imperial rule. **The Boy At the Back of the Class** Hachette UK A World Book Day 2020 Author WINNER OF THE BLUE PETER BOOK AWARD 2019 WINNER OF THE WATERSTONES CHILDREN'S BOOK PRIZE 2019 SHORTLISTED FOR THE JHALAK PRIZE 2019 Told with heart and humour, *The Boy at the Back of the Class* is a child's perspective on the refugee crisis, highlighting the importance of friendship and kindness in a world that doesn't always make sense. There used to be an empty chair at the back of my class, but now a new boy called Ahmet is sitting in it. He's nine years old (just like me), but he's very strange. He never talks and never smiles and doesn't like sweets - not even lemon sherbets, which are my favourite! But then I learned the truth: Ahmet really isn't very strange at all. He's a refugee who's run away from a War. A real one. With bombs and fires and bullies that hurt people. And the more I find out about him, the more I want to help. That's where my best friends Josie, Michael and Tom come in. Because you see, together we've come up with a plan. . . With beautiful illustrations by Pippa Curnick **Democracy and Education** Read Books Ltd This antiquarian

Placing emphasis on the technical aspects of the subject, the author follows the process of building through each stage -- from quarry to standing wall, from tree to roof timbers -- and describes how these materials were obtained or manufactured. The author also discusses interior decoration and looks at the practical aspects of water supply, heating and roads. **Human Dimension & Interior Space A Source Book of Design Reference Standards** Watson-Guptill Publications Standards for the design of interior spaces should be based on the measurement of human beings and their perception of space, with special consideration for disabled, elderly, and children **Enslaved** Island Books Where are all the real men? she wondered... For Lady Diana Davenport, they existed only in her books and dreams. There she could lose herself, becoming the licentious Diana, goddess of the hunt--far from the rigid restraints of eighteenth-century London, where she was courted by fops and fools. That is, until she tried on an authentic Roman helmet in an antiques store and was catapulted back in time, landing in Marcus Magnus's arms. This was no dream! She was lost in Aquae Sulis, the city she knew as Bath, prisoner of a Roman general who accused the violet-eyed beauty of being a Druid spy--and then made her his slave! "COME TO ME." His words were soft, imperious, charged with danger and desire. Marcus Magnus was powerful, arrogant, and infuriating. A real man. And now Lady Diana was his slave, hostage to his will, vowing to fight him to the end--with every seductive weapon she possessed.... Virginia Henley is the author of eight romances published by Dell, including the New York Times bestsellers *Seduced and Desired*. She divides her time between Ontario, Canada, and St. Petersburg, Florida. **The Fall of Rome And the End of Civilization** OUP Oxford Why did Rome fall? Vicious barbarian invasions during the fifth century resulted in the cataclysmic end of the world's most powerful civilization, and a 'dark age' for its conquered peoples. Or did it? The dominant view of this period today is that the 'fall of Rome' was a largely peaceful transition to Germanic rule, and the start of a positive cultural transformation. Bryan Ward-Perkins encourages every reader to think again by reclaiming the drama and violence of the last days of the Roman world, and reminding us of the very real horrors of barbarian occupation. Attacking new sources with relish and making use of a range of contemporary archaeological evidence, he looks at both the wider explanations for the disintegration of the Roman world and also the consequences for the lives of everyday Romans, in a world of economic

collapse, marauding barbarians, and the rise of a new religious orthodoxy. He also looks at how and why successive generations have understood this period differently, and why the story is still so significant today. **Signs and Symbols Their Design and Meaning** Discusses the elements of a sign, and looks at pictograms, alphabets, calligraphy, monograms, text type, numerical signs, symbols, and trademarks **Roman Imperial Armour The Production of Early Imperial Military Armour** [Oxbow Books Limited](#) The Roman Empire depended on the power of its armies to defend and extend the imperial borders, enabling it to dominate much of Europe, Northern Africa and the Middle East. Success was, in large part, founded on well-trained, well-disciplined soldiers who were equipped with the most advanced arms and armour available at that time. This is the story of the production of that armour. Roman Imperial Armour presents an examination of the metals the armour was made from, of how the ores containing those metals were extracted from the earth and transformed into workable metal and of how that raw product was made into the armour of the Roman army. The policing and protecting of such a huge empire required a large and well-organised force and the book goes on to consider the organisation of the army, its size, composition, the logistics involved in its deployment and provisioning and the training, remuneration and benefits offered to its men at arms. **Good Strategy/Bad Strategy The difference and why it matters** [Profile Books](#) When Richard Rumelt's Good Strategy/Bad Strategy was published in 2011, it immediately struck a chord, calling out as bad strategy the mish-mash of pop culture, motivational slogans and business buzz speak so often and misleadingly masquerading as the real thing. Since then, his original and pragmatic ideas have won fans around the world and continue to help readers to recognise and avoid the elements of bad strategy and adopt good, action-oriented strategies that honestly acknowledge the challenges being faced and offer straightforward approaches to overcoming them. Strategy should not be equated with ambition, leadership, vision or planning; rather, it is coherent action backed by an argument. For Rumelt, the heart of good strategy is insight into the hidden power in any situation, and into an appropriate response - whether launching a new product, fighting a war or putting a man on the moon. Drawing on examples of the good and the bad from across all sectors and all ages, he shows how this insight can be cultivated with a wide variety of tools that lead to better thinking and better strategy, strategy that cuts through the hype and gets results. **Guidelines for personal protection when handling and applying pesticides International Code of Conduct on Pesticide Management** [Food & Agriculture Org.](#) These guidelines are intended to provide guidance on pesticide risk reduction through reduced exposure by effective personal protection with special attention to the use of Personal Protective Equipment (PPE). First, they provide technical information on personal protection and on the selection and use of PPE. Second, in line with the FAO/WHO International Code of Conduct on Pesticide Management, they address policy issues and recommend measures to improve personal protection and specifically the use and availability of adequate quality and affordable PPE. They are primarily aimed at government authorities in charge of pesticide management and risk reduction, but are also considered useful to public and private sectors such as pesticide industry, non-governmental organisations (NGO) and other relevant

entities. More specifically, these guidelines are targeted at stakeholders in low and middle income countries (LMICs) where it is acknowledged that there is limited legislation, compliance and enforcement, and PPE availability. These Guidelines were developed by the FAO/WHO Joint Meeting on Pesticide Management (JMPM) to provide guidance on provisions in the Code of Conduct on Pesticide Management that are related to personal protection of pesticide users. They are meant to enhance current national legislation and regulations on personal protection and personal protective equipment (PPE) or where there is none, to provide guidance. They reflect the FAO/WHO joint approach on pesticide management, thus addressing personal protection of both agricultural and public health operators/applicators, the latter being engaged in using insecticides for vector control.

**Le Morte D'Arthur** Hackett Publishing This brisk retelling of Le Morte D'Arthur highlights the narrative drive, humor, and poignancy of Sir Thomas Malory's original while updating his fifteenth-century English and selectively pruning over-elaborate passages that can try the patience of modern readers. The result is an adaptation that readers can enjoy as a fresh approach to Malory's sprawling masterpiece. The book's most famous episodes--the sword in the stone, the cataclysmic final battle--are all here, while lesser-known key episodes stand forth with new brightness and clarity. The text is accompanied by an up-to-date bibliography, including websites and video resources, and a descriptive index keyed--like the retelling itself--to the book and chapter divisions of William Caxton's first printed edition of 1485.

**Are We Rome? The Fall of an Empire and the Fate of America** HMH What went wrong in imperial Rome, and how we can avoid it: "If you want to understand where America stands in the world today, read this." —Thomas E. Ricks The rise and fall of ancient Rome has been on American minds since the beginning of our republic. Depending on who's doing the talking, the history of Rome serves as either a triumphal call to action—or a dire warning of imminent collapse. In this "provocative and lively" book, Cullen Murphy points out that today we focus less on the Roman Republic than on the empire that took its place, and reveals a wide array of similarities between the two societies (*The New York Times*). Looking at the blinkered, insular culture of our capitals; the debilitating effect of bribery in public life; the paradoxical issue of borders; and the weakening of the body politic through various forms of privatization, Murphy persuasively argues that we most resemble Rome in the burgeoning corruption of our government and in our arrogant ignorance of the world outside—two things that must be changed if we are to avoid Rome's fate. "Are We Rome? is just about a perfect book. . . . I wish every politician would spend an evening with this book." —James Fallows

Careful attention is given to the ideological clash that continues between whole language and direct instruction and currently permeates every aspect of theory and research into reading and reading instruction. To aid readers in making up their own minds, each chapter concludes with a brief statement of "Issues." **Understanding Reading: A Psycholinguistic Analysis of Reading and Learning to Read, Sixth Edition** is designed to serve as a handbook for language arts teachers, a college text for basic courses on the psychology of reading, a guide to relevant research on reading, and an introduction to reading as an aspect of thinking and learning. **Pugio-gladius Brevis Est History and Technology of the Roman Battle Dagger** British Archaeological Reports Limited "This study examines in depth the pugio (pl. pugiones), a short daggersword and one of the weapons of choice of the Roman army -- it was the weapon that killed Julius Caesar. Its rich decoration and the use of precious metals have given it legendary status, which has been enhanced by a scarcity of literary sources and the lack of a clear explanation of its function or the specific use soldiers made of it. This work tries to fill this gap, basing its finds exclusively on undisputed data and sources. This study of the pugio takes us through the history and evolution of the Roman army itself"--Publisher's web site.

Few observers of the late twentieth century have their fingers so presciently on the pulse of the global political and economic realignment ushering in the new millennium as do James Dale Davidson and Lord William Rees-Mogg. Their bold prediction of disaster on Wall Street in *Blood in the Streets* was borne out by Black Tuesday. In their ensuing bestseller, *The Great Reckoning*, published just weeks before the coup attempt against Gorbachev, they analyzed the pending collapse of the Soviet Union and foretold the civil war in Yugoslavia and other events that have proved to be among the most searing developments of the past few years. In *The Sovereign Individual*, Davidson and Rees-Mogg explore the greatest economic and political transition in centuries -- the shift from an industrial to an information-based society. This transition, which they have termed "the fourth stage of human society," will liberate individuals as never before, irrevocably altering the power of government. This outstanding book will replace false hopes and fictions with new understanding and clarified values. **Evaluation in Health Promotion Principles and Perspectives** WHO Regional Office Europe This book is the result of the WHO European Working Group on Health Promotion Evaluation which examined the current range of qualitative and quantitative evaluation methods to provide guidance to policy-makers and practitioners. Through this World report on child injury prevention, the World Health Organization, the United Nations Children's Fund and many partners have set out to elevate child injury to a priority for the global public health and development communities. The knowledge and experience of nearly two hundred experts from all continents and various sectors were invaluable in grounding the report in the realities faced in many countries. This World report on child injury prevention should be seen as a complement to the UN Secretary-General's study on violence against children released in late 2006. That report addressed violence-related or intentional injuries. Both reports suggest that child injury and violence prevention programmes need to be integrated into child survival and other broad strategies focused on improving the lives of children. Evidence demonstrates the dramatic successes in child injury prevention in countries which have made a concerted effort. These results make a case for increasing investments in human resources and institutional capacities. This would permit the development, implementation and evaluation of programmes to stem the tide of child injury and enhance the health and well-being of children and their families the world over. Implementing proven interventions could save more than a thousand children's lives a day." - p. vii. **The Iliad** Aegitas The Iliad is an ancient Greek epic poem in dactylic hexameter, traditionally attributed to Homer. SPQR is a new look at Roman history from one of the world's foremost classicists.
