 Pre-Incident Indicators of Terrorist Incidents The Identification of  
 Behavioral, Geographic and Temporal Patterns of Preparatory Conduct  
 DIANE Publishing This is a print on demand edition of a hard to find  
 publication. Explores whether sufficient data exists to examine the  
 temporal and spatial relationships that existed in terrorist group planning,  
 and if so, could patterns of preparatory conduct be identified? About one-  
 half of the terrorists resided, planned, and prepared for terrorism  
 relatively close to their eventual target. The terrorist groups existed for  
 1,205 days from the first planning meeting to the date of the  
 actual/planned terrorist incident. The planning process for specific acts  
 began 2-3 months prior to the terrorist incident. This study examined  
 selected terrorist groups/incidents in the U.S. from 1980-2002. It provides  
 for the potential to identify patterns of conduct that might lead to  
 intervention prior to the commission of the actual terrorist incidents.
