## Virtual Product Creation in Industry

### The Difficult Transformation from IT Enabler Technology to Core Engineering Competence

*Springer Nature* **Today, digital technologies represent an absolute must when it comes to creating new products and factories. However, day-to-day product development and manufacturing engineering operations have still only unlocked roughly fifty percent of the "digital potential". The question is why? This book provides compelling answers and remedies to that question. Its goal is to identify the main strengths and weaknesses of today's set-up for digital engineering working solutions, and to outline important trends and developments for the future. The book concentrates on explaining the critical basics of the individual technologies, before going into deeper analysis of the virtual solution interdependencies and guidelines on how to best align them for productive deployment in industrial and collaborative networks. Moreover, it addresses the changes needed in both, technical and management skills, in order to avoid fundamental breakdowns in running information technologies for virtual product creation in the future.**

## Black Yanks in the Pacific

### Race in the Making of American Military Empire after World War II

*Cornell University Press* **By the end of World War II, many black citizens viewed service in the segregated American armed forces with distaste if not disgust. Meanwhile, domestic racism and Jim Crow, ongoing Asian struggles against European colonialism, and prewar calls for Afro-Asian solidarity had generated considerable black ambivalence toward American military expansion in the Pacific, in particular the impending occupation of Japan. However, over the following decade black military service enabled tens of thousands of African Americans to interact daily with Asian peoples—encounters on a scale impossible prior to 1945. It also encouraged African Americans to share many of the same racialized attitudes toward Asian peoples held by their white counterparts and to identify with their government's foreign policy objectives in Asia. In Black Yanks in the Pacific, Michael Cullen Green tells the story of African American engagement with military service in occupied Japan, war-torn South Korea, and an emerging empire of bases anchored in those two nations. After World War II, African Americans largely embraced the socioeconomic**

opportunities afforded by service overseas—despite the maintenance of military segregation into the early 1950s—while strained Afro-Asian social relations in Japan and South Korea encouraged a sense of insurmountable difference from Asian peoples. By the time the Supreme Court declared de jure segregation unconstitutional in its landmark 1954 *Brown v. Board of Education* decision, African American investment in overseas military expansion was largely secured. Although they were still subject to discrimination at home, many African Americans had come to distrust East Asian peoples and to accept the legitimacy of an expanding military empire abroad.

## An Introduction to International Health

*Canadian Scholars' Press* At a time when developed world populations are healthier and richer than they have ever been, why is there still so much poverty and disease in the world? Why do rich countries hold so many poor countries in debt and why do millions of children die every year from avoidable diseases? This new edition attempts to answer these pressing questions. *An Introduction to International Health, Second Edition* is a comprehensive and detailed exploration of international health and the modern aid industry. This provocative new edition is masterfully constructed around four essential themes: What is international health? Why is population health so poor in developing countries? What is the extent of the problem? What can be done about it? The thoroughly updated second edition provides answers to these questions and includes new discussions on war, governance and human rights in developing countries, and the various issues surrounding water, sanitation, and infectious diseases. Solutions are examined via primary health care strategies, poverty alleviation, and developing world debt relief, as well as human rights interventions. Unique to this book is its "how-to" component. ## Adoption and impact of OER in the Global South

*African Minds* Education in the Global South faces several key interrelated challenges, for which Open Educational Resources (OER) are seen to be part of the solution. These challenges include: unequal access to education; variable quality of educational resources, teaching, and student performance; and increasing cost and concern about the sustainability of education. The Research on Open Educational Resources for Development (ROER4D) project seeks to

build on and contribute to the body of research on how OER can help to improve access, enhance quality and reduce the cost of education in the Global South. This volume examines aspects of educator and student adoption of OER and engagement in Open Educational Practices (OEP) in secondary and tertiary education as well as teacher professional development in 21 countries in South America, Sub-Saharan Africa and South and Southeast Asia. The ROER4D studies and syntheses presented here aim to help inform Open Education advocacy, policy, practice and research in developing countries.

## A West African Model to Address Human Trafficking

*Springer Nature* This book describes the nature of trafficking in persons in West Africa, focusing on labor and sexual exploitation in the region, and recommends tailor-made solutions established by the Catholic Church in light of governmental authorities failure to effectively combat this scourge of humanity. While states efforts to fulfill their international obligations in developing anti-trafficking legislations are recognized, their failure to carry out prosecutions of offenders and ensure protection of the victims reveals that law alone is not a sufficient instrument for realizing human rights and improving peoples lives. Faced with the sobering background of less than successful efforts by governmental entities to end the trade in humans, this research study recommends adopting essential elements of Catholic social teaching, which rests on the inherent dignity of human beings allowing the development of political, socio-cultural, and religious reforms that will increase the effectiveness of existing legislation designed to combat trafficking. This faith-based approach highlights the role that religion may play in fulfilling the discretionary provisions of the Palermo Protocol by promoting the welfare and protecting the life and dignity of the victims. Additionally, religion is composed of sound moral ethics that determine people's behavior to refrain from the sinful conduct of trafficking. It also creates a sense of ethical responsibility that promotes supply chain transparency and ethical purchasing as well as advocating social reforms and anti-trafficking legislations initiatives. In fact, the author's approach, may be a model for other regions in the world and will be of interest to scholars, law and policy makers, human rights advocates and law enforcement agents working in the field of trafficking in persons. .

## The New Politics of Regionalism

## Perspectives from Africa, Latin America and Asia-Pacific

This edited volume approaches regionalism as one potential pattern in a changing global order. Since the end of the Cold War, different forms of territorialization have emerged and we are confronted with an increasing number and variety of actors that are establishing regional projects. This volume offers an innovative contribution to the study of this new complexity by exploring constellations of regional actors, spatial scales and imaginations beyond state-centred perspectives as well as on multiple, often overlapping levels. The chapters analyse the emergence, trajectories and outcomes of regionalisms from the perspective of the Global South, specifically concentrating on regional projects in Latin America and Africa, but also in the Asia-Pacific. They attempt to identify the specific conditions and junctures of different forms of region-making in their external (global) and internal (local/national) dimensions. The volume also places special emphasis on interactions, spatial entanglements and comparisons between regionalisms in different parts of the world. By expanding beyond the perspective of North-South transfers, this book seeks to better understand the dynamics and diversity of interregional interactions. This volume will appeal to scholars of global studies, international political economy, international relations, human geography, and development studies, as well as area studies specialists who focus on Latin America and Africa.

# The Strategy of Denial

# American Defense in an Age of Great Power Conflict

*Yale University Press* Why and how America's defense strategy must change in light of China's power and ambition Elbridge A. Colby was the lead architect of the 2018 National Defense Strategy, the most significant revision of U.S. defense strategy in a generation. Here he lays out how America's defense must change to address China's growing power and ambition. Based firmly in the realist tradition but deeply engaged in current policy, this book offers a clear framework for what America's goals in confronting China must be, how its military strategy must change, and how it must prioritize these goals over its lesser interests. The most informed and in-depth reappraisal of America's defense strategy in decades, this book outlines a rigorous but practical approach, showing how the United States can prepare to win a war with China that we cannot afford to lose—precisely in order to deter that war from happening.

# The Rise and Return of the Indo-Pacific

*Oxford University Press, USA* In the 21st century, the Indo-Pacific region has become the new centre of the world. The concept of the 'Indo-Pacific', though still under construction, is a potentially 'pivotal' site, where various institutions and intellectuals of statecraft are seeking common ground on which to anchor new regional coalitions, alliances. and allies to better serve their respective national agendas. This book explores the 'Indo-Pacific' as an ambiguous and hotly contested regional security construction. It critically examines the major drivers behind the revival of classical geopolitical concepts and their deployment through different national lenses. The book also analyses the presence of India and the U.S in the Indo-Pacific, and the manner in which China has reacted to their positions in the Indo-Pacific to

date. It suggests that national constructions of the Indo-Pacific region are more informed by domestic political realities, anti-Chinese bigotries, distinctive properties of 21st century U.S hegemony, and narrow nation-statist sentiments rather than genuine pan-regional aspirations. The Rise and Return of the Indo-Pacific argues that the spouting of contested depictions of the Indo-Pacific region depend on the fixed geo-strategic lenses of nation-states, but what is also important is the re-emergence of older ideas - a class conceptual revival - based on early to mid-20th century geopolitical ideas in many of these countries. The book deliberately raises the issue of the sea and constructions of 'nature', as these symbols are indispensable parts of many of these Indo-Pacific regional narratives. Despite the existence of diverse nation-statist, pan- and sub-regional discourses, the narratives of the most powerful states still dominate 21st century Indo-Pacific statecraft. The term 'Indo-Pacific' has the potential of unsettling various existing bilateral and multilateral geopolitical equations within the Indian Ocean region. Despite substantial heterogeneity in Indo-Pacific regional imaginations, the most dominant 'stories' and 'maps' are crafted and disseminated by the most dominant nation -in this case, the U.S- as it grapples with new ways of retaining its hegemony into the 21st century.

## The Lesser-Known Varieties of English

### An Introduction

*Cambridge University Press* This is the first ever volume to compile sociolinguistic and historical information on lesser-known, and relatively ignored, native varieties of English around the world. Exploring areas as diverse as the Pacific, South America, the South Atlantic and West Africa, it shows how these varieties are as much part of the big picture as major varieties and that their analysis is essential for addressing some truly important issues in linguistic theory, such as dialect obsolescence and death, language birth, dialect typology and genetic classification, patterns of diffusion and transplantation and contact-induced language change. It also shows how close interwoven fields such as social history, contact linguistics and variationist sociolinguistics are in accounting for their formation and maintenance, providing a thorough description of the lesser-known varieties of English and their relevance for language spread and change.
