AGING

CONCEPTS AND CONTROVERSIES

*SAGE Publications Presenting current research in an innovative text-reader format, **Aging: Concepts and Controversies, Ninth Edition** encourages students to become involved and take an informed stand on the major aging issues we face as a society. Not simply a summary of research literature, Harry R. Moody and Jennifer R. Sasser's text focuses on controversies and questions, rather than on assimilating facts or arriving at a single "correct" view about aging and older people. Drawing on their extensive expertise, the authors first provide an overview of aging in three domains: aging over the life course, health care, and the socioeconomic aspects of aging. Each section is followed by a series of edited readings, offering different perspectives from experts and specialists on that subject. New readings focus on whether current federal spending on the elderly is sustainable and fair to other groups, how older consumers are reshaping the business landscape, and the challenges of marketing and selling to customers 60 and over. More emphasis is placed on how social class and inequality earlier in life can shape our final years and the number of older Americans living in poverty. The section on Aging and Health Care has been thoroughly updated to reflect the latest data about chronic diseases that affect the elderly, government spending on health care, and policy changes to programs like Medicaid and Medicare. The section on the Social and Economic Outlook for an Aging Society gives the most current picture of the racial and ethnic diversity of older Americans, their*

participation in the labor force, and their income and wealth.

THERE IS NO SUCH THING AS A NATURAL DISASTER

RACE, CLASS, AND HURRICANE KATRINA

[Routledge](#) There is No Such Thing as a Natural Disaster is the first comprehensive critical book on the catastrophic impact of Hurricane Katrina on New Orleans. The disaster will go down on record as one of the worst in American history, not least because of the government's inept and cavalier response. But it is also a huge story for other reasons; the impact of the hurricane was uneven, and race and class were deeply implicated in the unevenness. Hartman and Squires assemble two dozen critical scholars and activists who present a multifaceted portrait of the social implications of the disaster. The book covers the response to the disaster and the roles that race and class played, its impact on housing and redevelopment, the historical context of urban disasters in America and the future of economic development in the region. It offers strategic guidance for key actors - government agencies, financial institutions, neighbourhood organizations - in efforts to rebuild shattered communities.

BRET EASTON ELLIS'S CONTROVERSIAL FICTION

WRITING BETWEEN HIGH AND LOW CULTURE

*A&C Black Both literary author and celebrity, Bret Easton Ellis represents a type of contemporary writer who draws from both high and the low culture, using popular culture references, styles and subject matters in a literary fiction that goes beyond mere entertainment. His fiction, arousing the interest of the academia, mass media and general public, has fuelled heated controversy over his work. This controversy has often prevented serious analysis of his fiction, and this book is the first monograph to fill in this gap by offering a comprehensive textual and contextual analysis of his most important works up to the latest novel *Imperial Bedrooms*. Offering a study of the reception of each novel, the influence of popular, mass and consumer culture in them, and the analysis of their literary style, it takes into account the controversies surrounding the novels and the changes produced in the shifty terrain of the literary marketplace. It offers anyone studying contemporary American fiction a thorough and unique analysis of Ellis's work and his own place in the literary and cultural panorama.*

HANDBOOK OF RESEARCH ON TEACHING DIVERSE YOUTH LITERATURE TO PRE-SERVICE PROFESSIONALS

IGI Global Perspectives and identity are typically reinforced at a young age, giving teachers the responsibility of selecting reading material that could potentially change how the child sees the world. This is the importance of sharing diverse literature with today's children and young adults, which introduces them to texts that deal with religion, gender identities, racial identities, socioeconomic

conditions, etc. Teachers and librarians play significant roles in placing diverse books in the hands of young readers. However, to achieve the goal of increasing young people's access to diverse books, educators and librarians must receive quality instruction on this topic within their university preparation programs. *The Handbook of Research on Teaching Diverse Youth Literature to Pre-Service Professionals* is a comprehensive reference source that curates promising practices that teachers and librarians are currently applying to prepare aspiring teachers and librarians for sharing and teaching diverse youth literature. Given the importance of sharing diverse books with today's young people, university educators must be aware of engaging and effective methods for teaching diverse literature to pre-service teachers and librarians. Covering topics such as syllabus development, diversity, social justice, and activity planning, this text is essential for university-level teacher educators, library educators who prepare pre-service teachers and librarians, university educators, faculty, adjunct instructors, researchers, and students.

MARKING THE "INVISIBLE"

ARTICULATING WHITENESS IN SOCIAL STUDIES EDUCATION

IAP Substantial research has been put forth calling for the field of social studies education to engage in work dealing with the influence of race and racism within education and society (Branch, 2003; Chandler, 2015; Chandler & Hawley, 2017; Husband, 2010; King & Chandler, 2016; Ladson-Billings, 2003; Ooka Pang, Rivera & Gillette, 1998). Previous contributions have examined the presence and influence of race/ism within the field of social studies teaching and research (e.g. Chandler, 2015, Chandler & Hawley, 2017; Ladson-Billings, 2003; Woyshner & Bohan, 2012). In order to challenge the presence of racism within social studies, research must attend to the control that whiteness and white supremacy maintain within the field. This edited volume builds from these previous works to take on whiteness and white supremacy directly in social studies education. In Marking the "Invisible", editors assemble original

contributions from scholars working to expose whiteness and disrupt white supremacy in the field of social studies education. We argue for an articulation of whiteness within the field of social studies education in pursuit of directly challenging its influences on teaching, learning, and research. Across 27 chapters, authors call out the strategies deployed by white supremacy and acknowledge the depths by which it is used to control, manipulate, confine, and define identities, communities, citizenships, and historical narratives. This edited volume promotes the reshaping of social studies education to: support the histories, experiences, and lives of Students and Teachers of Color, challenge settler colonialism and color-evasiveness, develop racial literacy, and promote justice-oriented teaching and learning. Praise for Marking the "Invisible" "As the theorization of race and racism continues to gain traction in social studies education, this volume offers a much-needed foundational grounding for the field. From the foreword to the epilogue, Marking the "Invisible" foregrounds conversations of whiteness in notions of supremacy, dominance, and rage. The chapters offer an opportunity for social studies educators to position critical theories of race such as critical race theory, intersectionality, and settler colonialism at the forefront of critical examinations of whiteness. Any social studies educator -researcher concerned with the theorization or teaching of race should engage with this text in their work." Christopher L. Busey, University of Florida

- Takes an interdisciplinary approach to studying disability in America
- Traces the evolution of U.S. attitudes and policies towards disability through primary documents featuring context-setting headnotes
- Provides easy reference via a glossary of terms related to disability studies, including those in the areas of law, health, arts, and culture
- Includes contributions from major scholars across disciplines involved in the study of disability

ISSUES IN AGING

Routledge Issues in Aging combines social, psychological, biological, and philosophical perspectives to present a multifaceted picture of aging. Novak illustrates both the problems and the opportunities that accompany older age. This text helps students understand the tremendous variability in aging and introduces them to careers working with older adults. This new edition reflects the continued changes in the way we age. The fourth edition has been updated to include emerging issues in aging. These include the prevalence of HIV/AIDs in later life, current research on mental potential in old age, the creation of age-friendly cities, and new options for end-of-life

care. Each chapter begins with a set of learning objectives to guide students in their reading, and concludes with a list of main points, questions for discussion or study, suggested readings, and relevant web sites to consult. Each chapter also includes up-to-date charts and graphs as well as key terms to help students understand the issues presented. Break out boxes reveal the human side of aging through the stories of individuals in real life and in the media.

FOUNDATIONS OF SOCIAL WORK PRACTICE IN THE FIELD OF AGING

A COMPETENCY-BASED APPROACH

National Assn of Social Workers Press *The aging of societies is a global phenomenon. In the United States alone, the life expectancy for both men and women will continue to increase over the next few decades and with that a population explosion of older adults. The dramatic increase in the number and diversity of older adults elevates the visibility of gerontological matters. As a result, social work practice is becoming more multigenerational, thereby demanding social workers, regardless of their professional endeavors, to be equipped with the most innovative theories and practices to serve older adults and their families. This comprehensive text spans the new knowledge and skills required in direct practice areas, group work, and macro practice. It also outlines the Geriatric Social Work Competencies, as developed by social work educators, necessary to serve the older adult population and suggests how these competencies can be integrated into foundation curriculum. Social work educators, students, practitioners, administrators, and policymakers will find updated, useful information in this text regarding * assessment tools * cultural influences * evidence-based practices * intervention techniques * theoretical examples. "Individuals are living longer and healthier lives in part because of the extraordinary growth of biomedical knowledge and public health initiatives. The confluence of the rapid and large increase of the older population and the exponential increase in the dissemination of knowledge create an imperative for social workers to employ the most recent knowledge in their practice with people living increasingly long lives." -- JoAnn Damron-Rodriguez Department of Social Welfare University of California, Los Angeles*

HANDBOOK OF RESEARCH ON CHILDREN'S AND YOUNG ADULT LITERATURE

Routledge This landmark volume is the first to bring together leading scholarship on children's and young adult literature from three intersecting disciplines: Education, English, and Library and Information Science. Distinguished by its multidisciplinary approach, it describes and analyzes the different aspects of literary reading, texts, and contexts to illuminate how the book is transformed within and across different academic figurations of reading and interpreting children's literature. Part one considers perspectives on readers and reading literature in home, school, library, and community settings. Part two introduces analytic frames for studying young adult novels, picturebooks, indigenous literature, graphic novels, and other genres. Chapters include commentary on literary experiences and creative production from renowned authors and illustrators. Part three focuses on the social contexts of literary study, with chapters on censorship, awards, marketing, and literary museums. The singular contribution of this Handbook is to lay the groundwork for colleagues across disciplines to redraw the map of their separately figured worlds, thus to enlarge the scope of scholarship and dialogue as well as push ahead into uncharted territory.

TEXTBOOK OF FAMILY MEDICINE E-BOOK

Elsevier Health Sciences This text has been admired for as long as Family Medicine has been a recognized specialty. Edited by the legendary Robert E. Offers a free CD-rom containing video clips of diabetes testing, stress test and all the illustrations from the book! Contains new chapters on complementary

and alternative medicine. Takes a fresh new approach to evidence based medicine in clinical practice. Uses a visually appealing, functional 4-color design and a full-color insert.

WONG'S ESSENTIALS OF PEDIATRIC NURSING - E-BOOK

Elsevier Health Sciences As the #1 title in the pediatric nursing market for over 40 years, Wong's Essentials of Pediatric Nursing, 11th Edition continues to leverage its trademark developmental approach as it equips readers with the very latest research and guidelines for treating children today. The text utilizes a highly-readable writing style and encourages a whole-body approach — beginning with child development and health promotion to better understand the later chapters on specific health problems. This new eleventh edition also features Next Generation NCLEX®-style case studies and questions, a new chapter covering all systems cancers, additional case studies within the nursing care plans, and updated and expanded evidence-based content throughout to best reflect the latest standards and trends impacting pediatric nursing care today. Developmental approach clearly identifies developmental tasks and influences at each stage of a child's growth. Emphasis on wellness features health promotion chapters for each developmental stage of childhood. Critical thinking case studies with answers are found throughout the text. Quality patient outcomes are highlighted within nursing management discussions for major diseases and disorders. Drug alerts draw attention to potential safety issues, reflecting QSEN safety initiative. Family focus includes a separate family chapter as well as family content and Family-Centered Care boxes integrated throughout the text. Community Focus boxes provide resources and guidance on caring for children outside the clinical setting. Evidence-Based Practice boxes focus attention on the application of research and critical thought processes to support and guide the outcomes of nursing care. Chapter on complementary & alternative therapy cover timely topics to aid in providing complete, comprehensive care. Nursing care plans provide a model for planning patient care and include rationales that provide the "why." Research Focus boxes highlight current studies that impact pediatric nursing today. Cultural content and Cultural Considerations boxes are integrated throughout the text to draw attention to customs and beliefs of different cultures that influence childcare. Atraumatic Care boxes contain techniques for care that minimize pain, discomfort, or stress. Nursing tips offer helpful hints and practical, clinical information of a non-emergency nature. Nursing alerts feature critical information that **MUST BE** considered in providing care. Emergency Treatment sections provide a quick reference in critical situations. Nursing care guidelines provide clear, step-by-step instructions for performing specific skills or procedures.

THE EAGLE AND THE DRAGON

GLOBALIZATION AND EUROPEAN DREAMS OF CONQUEST IN CHINA AND AMERICA IN THE SIXTEENTH CENTURY

John Wiley & Sons In this important new book the renowned historian Serge Gruzinski returns to two episodes in the sixteenth century which mark a decisive stage in global history and show how China and Mexico experienced the expansion of Europe. In the early 1520s, Magellan set sail for Asia by the Western route, Cortes seized Mexico and some Portuguese based in Malacca dreamed of colonizing China. The Aztec Eagle was destroyed but the Chinese Dragon held strong and repelled the invaders - after first seizing their cannon. For the first time, people from three continents encountered one other, confronted one other and their lives became entangled. These events were of great interest to contemporaries and many people at the time grasped the magnitude of what was going on around them. The Iberians succeeded in America and failed in China. The New World became inseparable from the Europeans who were to conquer it, while the Celestial Empire became, for a long time to come, an unattainable goal. Gruzinski explores this encounter between civilizations that were different from one another but that already fascinated contemporaries, and he shows that our world today bears the mark of this distant age. For it was in the sixteenth century that human history began to be played out on a global stage. It was then that connections between different parts of the world began to accelerate, not only between Europe and the Americas but also between Europe and China. This is what is revealed by a global history of the sixteenth century, conceived as another way of reading the Renaissance, less Eurocentric and more in tune with our age.

THE SACRAMENT OF THE WORD MADE FLESH

THE EUCHARISTIC THEOLOGY OF THOMAS F. TORRANCE

Wipf and Stock Publishers Endorsements: ""Robert Stamps offers us a compelling case for the significance of the theology of Thomas Torrance to current discussions about Trinitarian doctrine and worship. He shows that Torrance's Christology and Eucharistic thought validates the Reformed confession of a profound, real spiritual presence in the Eucharist. This book serves as a helpful introduction to Torrance, especially his framing of revelation. Moreover, it invigorates our understanding of the theological meaning of sacramental devotion. Its readers will be stimulated, provoked, and, dare I say, inspired by its insights into--and critiques of--one of the most important and recent Reformed thinkers. In sum, this is a timely and exciting book. It will well serve pastors, theologians, and thoughtful Christians of many theological perspectives."" MARK VALERI, E. T. Thompson Professor of Church History, Union Theological Seminary, Virginia ""One of the values of this work is that it has deliberately sought not so much to discuss a particular problem or a

collection of issues as to identify Torrance as an example of an archetypal Reformed theology of the Eucharist. To say that Dr. Stamps has been industrious is patently an understatement: the truth is that he has been indefatigable in his search for the least morsel that Torrance offers. Yet it is not so much as a study of Torrance that this book is to be commended: its great value is that it offers a contextualization of Torrance's thinking on the Eucharist--in ecclesiology, the more general dimension of an incarnational theology--as well as his understanding of cosmology and epistemology. . . . I hope that Dr. Stamps' book will not only find grateful readers but will be repaid by profound reflection on this symbol of the heart of faith." TEACHING CONTROVERSIAL ISSUES IN AMERICAN SCHOOLS

University of Chicago Press From the fights about the teaching of evolution to the details of sex education, it may seem like American schools are hotbeds of controversy. But as Jonathan Zimmerman and Emily Robertson show in this insightful book, it is precisely because such topics are so inflammatory outside school walls that they are so commonly avoided within them. And this, they argue, is a tremendous disservice to our students. Armed with a detailed history of the development of American educational policy and norms and a clear philosophical analysis of the value of contention in public discourse, they show that one of the best things American schools should do is face controversial topics dead on, right in their classrooms. Zimmerman and Robertson highlight an aspect of American politics that we know all too well: We are terrible at having informed, reasonable debates. We opt instead to hurl insults and accusations at one another or, worse, sit in silence and privately ridicule the other side. Wouldn't an educational system that focuses on how to have such debates in civil and mutually respectful ways improve our public culture and help us overcome the political impasses that plague us today? To realize such a system, the authors argue that we need to not only better prepare our educators for the teaching of hot-button issues, but also provide them the professional autonomy and legal protection to do so. And we need to know exactly what constitutes a controversy, which is itself a controversial issue. The existence of climate change, for instance, should not be subject to discussion in schools: scientists overwhelmingly agree that it exists. How we prioritize it against other needs, such as economic growth, however—that is worth a debate. With clarity and common-sense wisdom, Zimmerman and Robertson show that our squeamishness over controversy in the classroom has left our students woefully underserved as future citizens. But they also show that we can fix it: if we all just agree to disagree, in an atmosphere of mutual respect.

PUBLIC HUMANITIES AND THE SPANISH CIVIL WAR

CONNECTED AND CONTESTED HISTORIES

Springer This interdisciplinary collection of essays examines contemporary public history's engagement with the Spanish Civil War. The chapters discuss the history and mission of the main institutional archives of the war, contemporary and forensic archaeology of the conflict, burial sites, the affordances of digital culture in the sphere of war memory, the teaching of the conflict in Spanish school curricula, and the place of war memory within human rights initiatives. Adopting a strongly comparative focus, the authors argue for greater public visibility and more nuanced discussion of the Civil War's legacy, positing a virtual museum as one means to foster

dialogue.
