### **BUILDING COMMUNITIES OF ENGAGED READERS**

---

#### **READING FOR PLEASURE**

Routledge Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. Building Communities of Engaged Readers highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.

## ENGLISH AS A GLOBAL LANGUAGE

---

Cambridge University Press David Crystal's classic English as a Global Language considers the history, present status and future of the English language, focusing on its role as the leading international language. English has been deemed the most 'successful' language ever, with 1500 million speakers internationally, presenting a difficult task to those who wish to investigate it in its entirety. However, Crystal explores the subject in a measured but engaging way, always backing up observations with facts and figures. Written in a detailed and fascinating manner, this is a book written by an expert both for specialists in the subject and for general readers interested in the English language.

## UNDERSTANDING CORE FRENCH GRAMMAR

---

Vernon Press This book contains an explanatory treatment of the core areas of difficulty for the English speaking learner of French. It deals with the key issues in tense formation and use and verbal structures and processes such as negation, passives and subjunctives along with a highly exemplified treatment of pronouns and a section dealing with adjectives and other elements of the grammar. It fills a gap between general text books of French in which grammatical issues are frequently treated piecemeal and scattered throughout the book in between more communicative information on one hand and exhaustive reference grammars aimed at graduate and research students on the other which would be beyond the level of intellectual maturity of most school children and some non-specialist undergraduates. It has the advantage of treating each grammatical issue in detail but without being too long-winded, explaining the systems and processes which underlie the facts of the language. The emphasis is on explanation and not merely the listing of facts, enabling the learner to master the system and become an independent user of the language. It could be used highly successfully either as a classroom aid alongside the more usual textbooks which are organized typically around topics and themes in society or for self-study for the committed individual learner of any age. There are extensive exercises and answers for all topics covered.

## BALANCING THE COMMON CORE CURRICULUM IN MIDDLE SCHOOL EDUCATION

---

## COMPOSING ARCHIMEDES' LEVER, THE EQUATION, AND THE SENTENCE AS AN INTERDISCIPLINARY UNITY

---

Springer This book examines the idea of 'good education' which is thought to include a scientific and technical component, a mathematical component, a writing component, and an ethical and aesthetic component. Bunn proposes a new three-way intersection in these

---

teachings: the basic sciences and mechanics of levering on a seesaw, the basic formulations of patterning an algebraic equation, and the basic rules for writing a sentence in English. In all three forms of inquiry, balance is the mainstay through which problems in US middle school education are brought together and analyzed.
