This book investigates the digital public sphere by drawing parallels to another leisure space that shares its rhetoric of being open, democratic, and free for all: the urban park. It makes the case that the history and politics of public parks as an urban commons provides fresh insight into contemporary debates on corporatization, democratization and privatization of the digital commons. This book takes the reader on a metaphorical journey through multiple forms of public parks such as Protest Parks, Walled Gardens, Corporate Parks, Fantasy Parks, and Global Parks, addressing issues such as virtual activism, online privacy/surveillance, digital labor, branding, and globalization of digital networks. Considering the auspicious symbolism surrounding the fenghuang, it is fitting that on 18 October 2017, President Xi Jinping took to the stage of the Nineteenth Party Congress to proclaim the beginning of a 'new era' for Chinese socialism. However, in spite of such ecumenical proclamations, it became immediately evident that not all in China would be welcome to reap the rewards promised by the authorities. Migrant workers, for one, remain disposable. Lawyers, activists and even ordinary citizens who dare to express critical views also hardly find a place in Xi's brave new world. This Yearbook traces the stark new 'gilded age' inaugurated by the Chinese Communist Party. It does so through a collection of more than 40 original essays on labour, civil society and human rights in China and beyond, penned by leading scholars and practitioners from around the world. **Social Media in Employee Selection and Recruitment Theory, Practice, and Current Challenges Springer** This timely resource offers fresh research on companies' use of social media platforms—from Twitter and Facebook to LinkedIn and other career sites—to find and hire personnel.
