#### **NEW SYSTEMS THROUGHOUT COVID-19 PANDEMICS**

---

*Springer Nature* This book comes from genuine research from various universities in Asia, such as in South East Asia and India. Since COVID-19 pandemic is spreading all over the world, most schools and institutions of higher learning have opted online-based learning for their teaching and learning (T&L) activities. Previously, the common practices in T&L are face to face (F2F). Therefore, online T&L is a new normal not just for the students but also for the instructors as well as the parents. In this book, different online teaching methods via technology-supported teaching have been implemented, and at the end of the lesson, based on the feedback from students on these online technology-supported teaching tools, most educators found that there are positive responses from majority of students, in terms of their learning, attitudes, thinking and decision-making process, apart from the challenges faced by the students in the beginning, with regards to the new approaches and methodology used by their teachers during online teaching. There are eight contributed chapters in this book covering secondary school-level curriculum up to higher institutional-level curriculum that forming a new system of T&L for post-COVID-19 pandemic. The topics under consideration include active learning (AL) and cooperative learning (CL) for T&L, task-based instruction (TBI), transition students adaptability to post-COVID-19, creative and innovative teaching methods for secondary school-level mathematics, project-based learning (PPBL) for geophysics and impact of Socratic method and SOLO taxonomy. This book is suitable for postgraduate students, teachers, instructor, educational researchers, as well as policy makers in education and other scientists who are dedicated in teaching and educate students.

### **EXTREME PROGRAMMING AND AGILE PROCESSES IN SOFTWARE ENGINEERING**

---

### **4TH INTERNATIONAL CONFERENCE, XP 2003, GENOVA, ITALY, MAY 25-29, 2003, PROCEEDINGS**

---

*Springer* This book contains most of the papers presented at the 4th International Conference on Extreme Programming and Agile Processes in Software Engineering (XP 2003), held in Genoa, Italy, May 2003. The XP 200n series of conferences were started in 2000 to promote the change of new ideas, research and applications in the emerging field of agile methodologies for software development. Over the years, the conference has become the main world forum for all major advances in this important field. Also this year the contributions to Agile Methodologies and Extreme Programming were substantial. They demonstrate that the topic is continuing to gain more and more momentum. In spite of some criticism of agile methodologies, everyone agrees that they address some unresolved needs of software practitioners. People still do not know how to develop software on time, with the desired features, and within the given budget! This volume is divided into several thematic sections, easing reader's navigation through the content. Full papers are presented first, followed by research reports, papers from the Educational Symposium, and papers from the Ph.D. Symposium. The presentations given during three panel sessions held at the conference conclude the book. The section on Managing Agile Processes includes contributions highlighting the sometimes difficult relationship between agile methodologies and management, and includes approaches and suggestions that should facilitate the acceptance of agile methodologies at the different levels of management.
