Assessing English Language Learners in the Content Areas A Research-into-Practice Guide for Educators *University of Michigan Press* *Assessing English Language Learners in the Content Areas: A Research-into-Practice Guide for Educators* seeks to provide guidance to classroom teachers, staff developers, and test-item designers who want to improve ELL assessment outcomes, particularly in the areas of math, science and social studies. The first two chapters of the book establish the background for the discussion of content-area assessment for ELLs, examining several important characteristics of this rapidly growing student population (as well as critical legislation affecting ELLs) and providing a description of various forms of assessment, including how ELL assessment is different from the assessment of English-proficient students. Important assessment principles that educators should use in their evaluation of tests or other forms of measurement are provided. Other chapters review ELL test accommodations nationwide (because, surprisingly, most teachers do not know what they can and cannot allow) and the research on the effectiveness of these types of accommodations. The book analyzes the characteristics of alternative assessment; it discusses three popular alternative assessment instruments (performance assessment, curriculum-based measurement, and portfolios) and makes recommendations as to how to increase the validity, reliability, and practicality of alternative assessments. The book proposes fundamental assessment practices to help content area teachers in their evaluation of their ELL progress.

A Manual for Indochinese Refugee Education, 1976-1977 Proceedings of the Southern Illinois Language Testing Conference (formerly the International Conference on Frontiers in Language Proficiency and Dominance Testing) Held at Southern Illinois University, Carbondale, October 6-7, 1980 Language Planning in Higher Education A Case Study of Pakistan *Oxford University Press, USA* Based on an in-depth sociolinguistic case study of language planning in Pakistan, this book examines the extent of the linguistic support in Urdu, English or the mother tongue available to students to cope with their courses in higher education. Keeping in view the paucity of research in the area of sociolinguistics, bilingual education, and language planning in the Pakistani and the South Asian context, this volume will be of interest not only to language planners and curriculum developers, but also to English language teachers and students in Pakistan and abroad. This study is unique in that it illustrates the sociolinguistic profile in Pakistan and provides insights into the complex issues of multiculturalism and ethnicity, and their impact on linguistic, educational and socio-cultural outcomes. It focuses particularly on problems confronting language planning in higher education, along with guidelines for its implementation.

Language Transfer in Language Learning *John Benjamins Publishing* The study of native language influence in Second Language Acquisition has undergone significant changes over the past few decades. This book, which includes 12 chapters by distinguished researchers in the field of second language acquisition, traces the conceptual history of language transfer from its early role within a Contrastive Analysis framework to its current position within Universal Grammar. The introduction presents a continuum of thought starting from the late 70s, a time in which major rethinking in the field regarding the concept of language transfer was beginning to take place, and continuing through the present day in which language transfer is integrated within current concepts and theoretical models. The afterword unites the issues discussed and allows the reader to place these issues in the context of future research. For the present book, the 1983 edition has been thoroughly revised, and some papers have been replaced and added.

The Generative Study of Second Language Acquisition *Psychology Press* The vast majority of work in theoretical linguistics from a generative perspective is based on first language acquisition and performance. The vast majority of work on second language acquisition is carried out by scholars and educators working within approaches other than that of generative linguistics. In this volume, this gap is bridged as leading generative linguists apply their intellectual and disciplinary skills to issues in second language acquisition. The results will be of interest to all those who study second language acquisition, regardless of their theoretical perspective, and all generative linguists, regardless of the topics on which they work.
