HISPANIC ENGINEER & IT

[Hispanic Engineer & Information Technology](#) is a publication devoted to science and technology and to promoting opportunities in those fields for Hispanic Americans.

AMERICAN UNIVERSITIES AND COLLEGES, 19TH EDITION [2 VOLUMES]

NINETEENTH EDITION

ABC-CLIO For well over a half century, [American Universities and Colleges](#) has been the most comprehensive and highly respected directory of four-year institutions of higher education in the United States. A two-volume set that [Choice](#) magazine hailed as a most important resource in its November 2006 issue, this revised edition features the most up-to-date statistical data available to guide students in making a smart yet practical decision in choosing the university or college of their dreams. In addition, the set serves as an indispensable reference source for parents, college advisors, educators, and public, academic, and high school librarians. These two volumes provide extensive information on 1,900 institutions of higher education, including all accredited colleges and universities that offer at least the baccalaureate degree. This essential resource offers pertinent, statistical data on such topics as

tuition, room and board; admission requirements; financial aid; enrollments; student life; library holdings; accelerated and study abroad programs; departments and teaching staff; buildings and grounds; and degrees conferred. Volume two of the set provides four indexes, including an institutional Index, a subject accreditation index, a levels of degrees offered index, and a tabular index of summary data by state. These helpful indexes allow readers to find information easily and to make comparisons among institutions effectively. Also contained within the text are charts and tables that provide easy access to comparative data on relevant topics.

THE ALCALDE

As the magazine of the Texas Exes, The Alcalde has united alumni and friends of The University of Texas at Austin for nearly 100 years. The Alcalde serves as an intellectual crossroads where UT's luminaries - artists, engineers, executives, musicians, attorneys, journalists, lawmakers, and professors among them - meet bimonthly to exchange ideas. Its pages also offer a place for Texas Exes to swap stories and share memories of Austin and their alma mater. The magazine's unique name is Spanish for "mayor" or "chief magistrate"; the nickname of the governor who signed UT into existence was "The Old Alcalde."

KU Leuven

AMERICA'S BEST VALUE COLLEGES

The Princeton Review This informative guide profiles 77 schools that not only charge less in tuition but are more likely to help students with financial aid, scholarships and grants.

COMPARATIVE GUIDE TO SCIENCE AND ENGINEERING PROGRAMS

HarperCollins Publishers A key focus is to examine how is humanitarian intervention legitimate in present diplomatic dialogues. In exploring how far there has been a change of norm in the society of states in the 1990s, the book defends the broad based constructivist claim that state actions will be constrained if they cannot be legitimated, and that new norms enable new practices but do not determine these. The book concludes by considering how far contemporary practices of humanitarian intervention support a new solidarism, and how far this resolves the traditional conflict between order and justice in international society."--BOOK JACKET.

EXEMPLARY COLLEGE SCIENCE TEACHING

NSTA Press “Since K-12 students taught using the new [Next Generation Science Standards] will be arriving in college classrooms prepared in a different way from those in our classrooms currently, it would behoove college teachers to be prepared to alter their teaching methods ... or be perceived to be dinosaurs using the older teaching methods.” — From Exemplary College Science Teaching If you’re looking for inspiration to alter your teaching methods to match new standards and new times, this book is for you. As the first in the Exemplary Science series to focus exclusively on college science teaching, this book offers 16 examples of college teaching that builds on what students learned in high school. Understanding that college does not exist in a vacuum, the chapter authors demonstrate how to adapt the methods and frameworks under which secondary students have been working and make them their own for the college classroom, adding new technologies when appropriate and letting the students take an active role in their learning. Among the innovative topics and techniques the essays in this book explore are • Lecture-free college science teaching • Peer-led study groups as learning communities • Jigsaw techniques that enhance learning • Inquiry incorporated into large-group settings • Interactive video conferences for assessing student attitudes and behaviors The clichéd image of the professor droning on before a packed lecture hall is a thing of the past. The essays in this book explain why—and offer the promise of a better future.

EBONY is the flagship magazine of Johnson Publishing. Founded in 1945 by John H. Johnson, it still maintains the highest global circulation of any African American-focused magazine.

HEARINGS

REPORT OF THE NATIONAL SCIENCE BOARD

SCIENCE INDICATORS

THE NSF SCIENCE DEVELOPMENT PROGRAMS

ASSURING THE U.S. DEPARTMENT OF DEFENSE A STRONG SCIENCE, TECHNOLOGY, ENGINEERING, AND MATHEMATICS (STEM)

WORKFORCE

National Academies Press The ability of the nation's military to prevail during future conflicts, and to fulfill its humanitarian and other missions, depends on continued advances in the nation's technology base. A workforce with robust Science, Technology, Engineering and Mathematics (STEM) capabilities is critical to sustaining U.S. preeminence. Today, however, the STEM activities of the Department of Defense (DOD) are a small and diminishing part of the nation's overall science and engineering enterprise. Assuring the U.S. Department of Defense a Strong Science, Technology, Engineering, and Mathematics (STEM) Workforce presents five principal recommendations for attracting, retaining, and managing highly qualified STEM talent within the department based on an examination of the current STEM workforce of DOD and the defense industrial base. As outlined in the report, DOD should focus its investments to ensure that STEM competencies in all potentially critical, emerging topical areas are maintained at least at a basic level within the department and its industrial and university bases.
