In this concluding volume, the author powerfully points out the principles involved in the impending conflict and how each person can stand firmly for God and His truth. Rest in Christ "Rest in Christ reviews the principles of finding rest in Jesus Christ. It shows how sitting at the feet of Jesus can bring genuine spiritual, mental, relational, and physical rest"-- The Adventist home counsels to Seventh-Day Adventist families Review and Herald Pub Assoc Public Health Consequences of E-Cigarettes National Academies Press Millions of Americans use e-cigarettes. Despite their popularity, little is known about their health effects. Some suggest that e-cigarettes likely confer lower risk compared to combustible tobacco cigarettes, because they do not expose users to toxicants produced through combustion. Proponents of e-cigarette use also tout the potential benefits of e-cigarettes as devices that could help combustible tobacco cigarette smokers to quit and thereby reduce tobacco-related health risks. Others are concerned about the exposure to potentially toxic substances contained in e-cigarette emissions, especially in individuals who have never used tobacco products such as youth and young adults. Given their relatively recent introduction, there has been little time for a scientific body of evidence to develop on the health effects of e-cigarettes. Public Health Consequences of E-Cigarettes reviews and critically assesses the state of the emerging evidence about e-cigarettes and health. This report makes recommendations for the improvement of this research and highlights gaps that are a priority for future research. Counsels on Sabbath School Work Review and Herald Pub Assoc Adventist Interchurch Relations A Study in Ecumenics Vandenhoeck & Ruprecht This study presents the first comprehensive analysis of Seventhday Adventist interchurch relations - a 20-million member body whose ecumenical stance has so far been underresearched. For the sake of interpreting denominational involvement and reservations in Adventism as well as beyond, the study develops a new academic approach to ecumenism based on Relational Models Theory, a comprehensive social science paradigm of interpreting human relationships. The resulting typology of ecumenical interactions and the historical case study of Adventism suggest that such a relational interpretation of ecumenical interaction sheds light on many of the unresolved issues in ecumenics - such as divergent concepts of unity, difficulties in recognition processes, and the permanence of denominationalism. James The David Story: A Translation with Commentary of 1 and 2 Samuel W. W. Norton & Company "A masterpiece of contemporary Bible translation and commentary."—Los Angeles Times Book Review, Best Books of 1999 Acclaimed for its masterful new translation and insightful commentary, The David Story is a fresh, vivid rendition of one of the great works in Western literature. Robert Alter's brilliant translation gives us David, the beautiful, musical hero who slays Goliath and, through his struggles with Saul, advances to the kingship of Israel. But this David is also fully human: an ambitious, calculating man who navigates his life's course with a flawed moral vision. The consequences for him, his family, and his nation are tragic and bloody. Historical personage and full-blooded imagining, David is the creation of a literary artist comparable to the Shakespeare of the history plays. Animal (De)liberation Should the Consumption of Animal Products Be Banned? Ubiquity Press In this book, Jan Deckers addresses the most crucial question that people must deliberate in relation to how we should treat other animals: whether we should eat animal products. Many people object to the consumption of animal products from the conviction that it inflicts pain, suffering, and death upon animals. This book argues that a convincing ethical theory cannot be based on these important concerns: rather, it must focus on our interest in human health. Tending to this interest demands not only that we extend speciesism—the attribution of special significance to members of our own species merely because they belong to the same species as ourself—towards nonhuman animals, but also that we safeguard the integrity of nature. In this light, projects that aim to engineer the genetic material of animals to reduce their capacities to feel pain and to suffer are morally suspect. The same applies to projects that aim to develop in-vitro flesh, even if the production of such flesh should be welcomed on other grounds. The theory proposed in this book is accompanied by a political goal, the 'vegan project', which strives for a qualified ban on the consumption of animal products. Deckers also provides empirical evidence that some support for this goal exists already, and his analysis of the views of others—including those of slaughterhouse workers—reveals that the vegan project stands firm in spite of public opposition. Many charges have been pressed against vegan diets, including: that they alienate human beings from nature; that they increase human food security concerns; and that they are unsustainable. Deckers argues that these charges are legitimate in some cases, but that, in many situations, vegan diets are actually superior. For those who remain doubtful, the book also contains an appendix that considers whether vegan diets might actually be nutritionally adequate. Lesson Study for Learning Community A guide to sustainable school reform Routledge Lesson Study has been actively introduced from Japan to various parts of the world, starting with the US. Such introduction is heavily connected with a focus on mathematics education and there is a strong misconception that Lesson Study is only for mathematics or science. The introduction is usually done at the departmental or form level and there has been a strong question about its sustainability in schools. This book comprehensively explores the idea of Lesson Study for Learning Community (LSLC) and suggests that reform for the culture of the school is needed in order to change learning levels among the children, teachers and even parents. In order for this to happen, the ways of management and leadership are also included as objectives of LSLC, as are practices at the classroom level. It argues that LSLC is a comprehensive vision and framework of school reform and needs to be taken up in a holistic way across disciplines. Chapters include: How to Create Time How to Build the Team How to Promote Reform How to Reform Daily Lessons How to Conduct a Research Lesson How to Discuss Observed Lessons How to Sustain School Reform based on LSLC Strong interest in LSLC is already prevalent in Asian countries, such as Japan, China, Korea, Taiwan, Indonesia, Vietnam and Singapore and is now being introduced more in the west. This book will be of great interest to those involved in education policy and reform, and for practitioners of education at all levels. We are all so different—we have assorted talents, perspectives, struggles, and triumphs. What does it mean to be Adventist, to be part of the Adventist Church? Andy Nash explores issues that Adventists grapple with collectively. He ponders the reason young people are leaving the church. He studies the backgrounds of various Bible passages. He wonders how Jesus would do church, and challenges us to give up our dream—as part of living out the first commandment. Decolonizing Methodologies Research and Indigenous Peoples Bloomsbury Publishing 'A landmark in the process of decolonizing imperial Western knowledge.' Walter Mignolo, Duke University To the colonized, the term 'research' is conflated with European colonialism; the ways in which academic research has been implicated in the throes of imperialism remains a painful memory. This essential volume explores intersections of imperialism and research - specifically, the ways in which imperialism is embedded in disciplines of knowledge and tradition as 'regimes of truth.' Concepts such as 'discovery' and 'claiming' are discussed and an argument presented that the decolonization of research methods will help to reclaim control over indigenous ways of knowing and being. Now in its eagerly awaited second edition, this bestselling book has been substantially revised, with new case-studies and examples and important additions on new indigenous literature, the role of research in indigenous struggles for social justice, which brings this essential volume urgently up-to-date. The Great Controversy Between Christ and Satan: From the Destruction of Jerusalem to the End of the Controversy Yesterday's World Publishing "The Lord has shown me that Satan was once an honored angel in heaven, next to Jesus Christ. His countenance was mild, expressive of happiness like the other angels. His forehead was high and broad, and showed great intelligence. His form was perfect. He had noble, majestic bearing. And I saw that when God said to his Son, Let us make man in our image, Satan was jealous of Jesus. He wished to be consulted concerning the formation of man. He was filled with envy, jealousy and hatred. He wished to be the highest in heaven, next to God, and receive the highest honors. Until this time all heaven was in order, harmony and perfect subjection to the government of God."-Ellen G White Curating Research Data Data are becoming the proverbial coin of the digital realm: a research commodity that might purchase reputation credit in a disciplinary culture of data sharing, or buy transparency when faced with funding agency mandates or publisher scrutiny. Unlike most monetary systems, however, digital data can flow in all too great an abundance. Not only does this currency actually grow on trees, but it comes from animals, books, thoughts, and each of us! And that is what makes data curation so essential. The abundance of digital research data challenges library and information science professionals to harness this flow of information streaming from research discovery and scholarly pursuit and preserve the unique evidence for future use. Volume One of Curating Research Data explores the variety of reasons, motivations, and drivers for why data curation services are needed in the context of academic and disciplinary data repository efforts. Twelve chapters, divided into three parts, take an in-depth look at the complex practice of data curation as it emerges around us. Part I sets the stage for data curation by describing current policies, data sharing cultures, and collaborative efforts currently underway that impact potential services. Part II brings several key issues, such as cost recovery and marketing strategy, into focus for practitioners when considering how to put data curation services in action. Finally, Part III describes the full lifecycle of data by examining the ethical and practical reuse issues that data curation practitioners must consider as we strive to prepare data for the future. Digital data is ubiquitous and rapidly reshaping how scholarship progresses now and into the future. The information expertise of librarians can help ensure the resiliency of digital data, and the information it represents, by addressing how the meaning, integrity, and provenance of digital data generated by researchers today will be captured and conveyed to future researchers.
