## One Green Apple

*Houghton Mifflin Harcourt Farah feels alone, even when surrounded by her classmates. She listens and nods but doesn't speak. It's hard being the new kid in school, especially when you're from another country and don't know the language. Then, on a field trip to an apple orchard, Farah discovers there are lots of things that sound the same as they did at home, from dogs crunching their food to the ripple of friendly laughter. As she helps the class make apple cider, Farah connects with the other students and begins to feel that she belongs. Ted Lewin's gorgeous sun-drenched paintings and Eve Bunting's sensitive text immediately put the reader into another child's shoes in this timely story of a young Muslim immigrant.*

## Opening Texts

## Using Writing to Teach Literature

*Boynton/Cook Opening Texts* is a book for classroom teachers who have been frustrated by their students' inability to respond critically to literature. Without being prescriptive, Kathleen Andrasick offers a flexible model of a collaborative, interactive classroom that can be readily applied to a teacher's particular needs and students. She gives concrete examples of lessons and student work that show ways in which students can engage with literary texts and then distance themselves in order to act critically. She provides both theory and practice based on success with real students in real classroom situations. *Opening Texts* is not a collection of formulas, but a presentation of the best we know about how readers and writers make meanings. It is written for secondary and college teachers who want a practical model for their classrooms.

## Creativity in the Classroom

## Schools of Curious Delight

*Taylor & Francis* The fourth edition of this well-known text continues the mission of its predecessors "to help teachers link creativity research and theory to the everyday activities of classroom teaching. Part I (chs 1-5) includes information on models and theories of creativity, characteristics of creative people, and talent development. Part II (chapters 6-10) includes strategies explicitly designed to teach creative thinking, to weave creative thinking into content area instruction, and to organize basic classroom activities (grouping, lesson planning, assessment, motivation and classroom organization) in ways that support students' creativity. *Changes in this Edition: Improved Organization* -- This edition has been reorganized from 8 to 10 chapters allowing the presentation of theoretical material in clearer, more manageable chunks. *New Material* -- In addition to general updating, there are more examples involving middle and secondary school teaching, more examples linking creativity to technology, new information on the misdiagnosis of creative students as ADHD, and more material on cross-cultural concepts of creativity, collaborative creativity, and linking creativity to state standards. *Pedagogy & Design* -- Chapter-opening vignettes, within-chapter reflection questions and activities, sample lesson ideas from real teachers, and end-of-chapter journaling activities help readers adapt content to their own teaching situations.

*Also, a larger trim makes the layout more open and appealing and a single end-of-book reference section makes referencing easier. Targeted specifically to educators (but useful to others), this book is suitable for any course that deals wholly or partly with creativity in teaching, teaching the gifted and talented, or teaching thinking and problem solving. Such courses are variously found in departments of special education, early childhood education, curriculum and instruction, or educational psychology.*

## Bringing Schools into the 21st Century

*Springer Science & Business Media Shift happens: Emerging technologies and globalization have resulted in political, social and cultural changes. These changes have a profound impact on all aspects of human life, including education. Yet while society has changed and continues to change, schools are slow to keep up. This book explores issues related to transforming and modernizing our educational systems,*

*including the impact of societal shifts on education, the efforts at various levels to bring schools into the 21st century, the identification of 21st century skills, the reformation of the curriculum, the creation of alternative models of schooling, the innovative use of technology in education, and many others. It addresses questions like the following: Should schools systems adapt to better meet the needs of tomorrow's world and how should this be accomplished? How can society better prepare students for a changing and challenging modern world? What skills do students need to lead successful lives and become productive citizens in the 21st century? How can educators create learning environments that are relevant and meaningful for digital natives? How can the school curriculum be made more rigorous to meet the needs of the 21st century? This book encourages readers to transcend the limits of their own educational experience, to think beyond familiar notions of schooling, instruction and curriculum, to consider how to best structure learning so that it will benefit future generations. It encourages a deeper analysis of the existing education system and offers practical insights into future directions focused on preparing students with 21st century skills.*

## Living and Learning with New Media

### Summary of Findings from the Digital Youth Project

*MIT Press This report summarizes the results of an ambitious three-year ethnographic study, funded by the John D. and Catherine T. MacArthur Foundation, into how young people are living and learning with new media in varied settings -- at home, in after school programs, and in online spaces. It offers a condensed version of a longer treatment provided in the book *Hanging Out, Messing Around, and Geeking Out* (MIT Press, 2009). The authors present empirical data on new media in the lives of American youth in order to reflect upon the relationship between new media and learning. In one of the largest qualitative and ethnographic studies of American youth culture, the authors view the relationship of youth and new media not simply in terms of technology trends but situated within the broader structural conditions of childhood and the negotiations with adults that frame the experience of youth in the United States. The book that this report summarizes was written as a collaborative effort by members of the Digital Youth Project, a three-year research effort funded by the John D. and Catherine T. MacArthur Foundation and conducted at the University of California, Berkeley, and the University of Southern California. John D. and Catherine T. MacArthur Reports on Digital Media and Learning*

## Downriver

*Simon and Schuster Will Hobbs's classic tale of whitewater adventure is back in print with an exciting new look. No adults, no permit, no river map. After fifteen-year-old Jessie gets sent to Discovery Unlimited, an outdoor education program, she and six*

companions “borrow” the company’s rafting gear and take off down the Colorado River through the Grand Canyon on their own. Floating beneath sheer red walls, camping on white sand beaches, and exploring caves and waterfalls, Jessie and the others are having the time of their lives—at first. But when they’re pursued by helicopters, they boldly push on into the black-walled inner gorge, the heart of the Grand Canyon, only to encounter huge rapids, bone-chilling rain, injuries, and conflict within the group. What will be the consequences of their reckless adventure? This riveting novel includes an author’s note about his own rafting experiences and has been ranked by the American Library Association as a “100 Best of the Best” for twenty-five years—a testament to the enduring popularity of the action and adventure that await in *Downriver*.

## Media Rich Instruction

# Connecting Curriculum To All Learners

*Springer E-learning has brought an enormous change to instruction, in terms of both rules and tools. Contemporary education requires diverse and creative uses of media technology to keep students engaged and to keep up with rapid developments in the ways they learn and teachers teach. Media Rich Instruction addresses these requirements with up-to-date learning theory and practices that incorporate innovative platforms for information delivery into traditional areas such as learning skills and learner characteristics. Experts in media rich classroom experiences and online instruction delve into the latest findings on student cognitive processes and motivation to learn while offering multimedia classroom strategies geared to specific curriculum areas. Advances such as personal learning environments, gamification, and the Massive Open Online Course are analyzed in the context of their potential for collaborative and transformative learning. And each chapter features key questions and application activities to make coverage especially practical across grade levels and learner populations. Among the topics included: Building successful learning experiences online. Language and literacy, reading and writing. Mathematics teaching and learning with and through education technology. Learning science through experiment and practice. Social studies teaching for learner engagement. The arts and Technology. Connecting school to community. At a time when many are pondering the future of academic standards and student capacity to learn, Media Rich Instruction is a unique source of concrete knowledge and useful ideas for current and future researchers and practitioners in media rich instructional strategies and practices.*
