## Spanish Women Writers and Spain's Civil War

**Taylor & Francis** The Spanish Civil War (1936-1939) pitted conservative forces including the army, the Church, the Falange (fascist party), landowners, and industrial capitalists against the Republic, installed in 1931 and supported by intellectuals, the petite bourgeoisie, many campesinos (farm laborers), and the urban proletariat. Provoking heated passions on both sides, the Civil War soon became an international phenomenon that inspired a number of literary works reflecting the impact of the war on foreign and national writers. While the literature of the period has been the subject of scholarship, women's literary production has not been studied as a body of work in the same way that literature by men has been, and its unique features have not been examined. Addressing this lacuna in literary studies, this volume provides fresh perspectives on well-known women writers, as well as less studied ones, whose works take the Spanish Civil War as a theme. The authors represented in this collection reflect a wide range of political positions. Writers such as Maria Zambrano, Mercè Rodoreda, and Josefina Aldecoa were clearly aligned with the Republic, whereas others, including Mercedes Salisachs and Liberata Masoliver, sympathized with the Nationalists. Most, however, are situated in a more ambiguous political space, although the ethics and character portraits that emerge in their works might suggest Republican sympathies. Taken together, the essays are an important contribution to scholarship on literature inspired by this pivotal point in Spanish history.

(Published in cloth as Santa Maria del Monte)

**Princeton University Press** This study of a northern Spanish community shows how the residents of Santa MarÁa del Monte have acted together at critical times to ensure the survival of their traditional forms of social organization. ### Durable Ethnicity

#### Mexican Americans and the Ethnic Core

**Oxford University Press, USA** "Despite the common perception that most persons of Mexican origin in the U.S are undocumented immigrants or the young children of immigrants, the majority are citizens and have been living in the U.S. for three or more generations. This group initially makes strides on education, English language use, socioeconomic status, intermarriage, residential segregation, and political participation, but progress halts at the second generation as poverty rates remain high, educational attainment declines for the third and fourth generations, and ethnic identity remains generally strong. In these ways, the experience of Mexican Americans differs considerably from previous waves of white European immigrants that were incorporated and assimilated fully into the mainstream within two or three generations. This book examines what ethnicity means and how it is negotiated in the lives of multiple generations of Mexican Americans. Rooted in a large-scale longitudinal and representative survey of 1,500 Mexican Americans living in the West across 35 years, Telles and Sue draw on 72 in-depth interviews to examine individual ethnic strategies and demonstrate that integration is often a process that varies by individual rather than a one-way movement. They detail the myriad ways Mexican Americans understand themselves in relation to their ethnicity, how ethnic identity is often consequential rather than symbolic or optional, that ethnic identity and national identity often co-exist, the meaning of speaking or not speaking Spanish, and their attitudes towards immigration. Telles and Sue are able to show how, when, and why ethnicity matters or does not for multiple generations of Mexican Americans and argue their experiences lie somewhere between Mexican and American."--

Diversification of Mexican Spanish

A Tridimensional Study in New World Sociolinguistics

**Walter de Gruyter GmbH & Co KG** This book offers a diversification model of transplanted languages that facilitates the exploration of external factors and internal changes. The general context is the New World and the variety that unfolded in the Central Highlands and the Gulf of Mexico, herein identified as Mexican Colonial Spanish (MCS). Linguistic corpora provide the evidence of (re)transmission, diffusion, metalinguistic awareness, and select focused variants. The tridimensional approach highlights language data from authentic colonial documents which are connected to socio-historical reliefs at particular periods or junctions, which explain language variation and the dynamic outcome leading to change. From the Second Letter of Hernán Cortés (Seville 1522) to the decades preceding Mexican Independence (1800-1821) this book examines the variants transplanted from the peninsular tree into Mesoamerican lands: leveling of sibilants of late medieval Spanish, direct object (masc. sing.) pronouns LO and LE, pronouns of address (vos, tu, vuestra merced plus plurals), imperfect subjunctive endings in -SE and -RA), and Amerindian loans. Qualitative and quantitative analyses of variants derived from the peninsular tree show a gradual process of attrition and recovery due to their saliency in the new soil, where they were identified with ways of speaking and behaving like Spanish speakers from the metropolis. The variants analyzed in MCS may appear in other regions of the Spanish-speaking New World, where change may have proceeded at varying or similar rates. Additional variants are classified as optimal residual (e.g. dizque) and popular residual (e.g. vide). Both types are derived from the medieval peninsular tree, but the former are vital across regions and social strata while the latter may be restricted to isolated and / or marginal speech communities. Each of the ten chapters probes into the pertinent variants of MCS and the stage of development by century. Qualitative and quantitative analyses reveal the trails followed by each select variant from the years of the Second Letter (1520-1522) of Hernán Cortés to the end of the colonial period. The tridimensional historical sociolinguistic model offers explanations that shed light on the multiple causes of change and the outcome that eventually differentiated peninsular Spanish tree from New World Spanish. Focused-attrition variants were selected because in the process of transplantation, speakers assigned them a social meaning that eventually differentiated the European from the Latin American variety. The core chapters include narratives of both major historical events (e.g. the conquest of Mexico) and tales related to major language change and identity change (e.g. the socio-political and cultural struggles of Spanish speakers born in the New World). The core chapters also describe the strategies used by prevailing Spanish speakers to gain new speakers among the indigenous and Afro-Hispanic populations such as the appropriation of public posts where the need arose to file documents in both Spanish and Nahuatl, forced and free labor in agriculture, construction, and the textile industry. The examples of optimal and popular residual variants illustrate the trends unfolded during three centuries of colonial life. Many of them have passed the test of time and have survived in the present Mexican territory; others are also vital in the U.S. Southwestern states that once belonged to Mexico. The reader may also identify those that are used beyond the area of Mexican influence. Residual variants of New World Spanish not only corroborate the homogeneity of Spanish in the colonies of the Western Hemisphere but the speech patterns that were unwrapped by the speakers since the beginning of colonial times: popular and cultured Spanish point to diglossia in monolingual and multilingual communities. After one hundred years of study in linguistics, this book contributes to the advancement of newer conceptualization of diachrony, which is concerned with the development and evolution through history. The additional sociolinguistic dimension offers views of social significant and its thrilling links to social movements that provoked a radical change of identity. The amplitude of the diversification model is convenient to test it in varied contexts where transplantation occurred.

### Contrastive Analysis of English and Polish Surveying Terminology

**Cambridge Scholars Publishing** This book, with a focus on English and Polish, is a study of surveying terminology, which may be considered as an under-researched area when compared to legal, medical or business terminologies. It examines differences between terms and concepts in the two languages. The purpose of the book is three-fold: firstly, to investigate how surveying terms are created and how they are named in English and Polish; secondly, to analyse concept systems of the two languages with respect to surveying terminology; and thirdly, to indicate the areas of surveying in which terminological and conceptual differences occur, the factors that trigger them and translation strategies which are used to solve them. The book offers a systematic, corpus-based approach to terminology. Data for analyses come from the English and Polish surveying corpora compiled specifically for this project. The author of the book attempts to provide a wide picture of surveying terminology by looking at problems that diversified groups of users may identify. The book is directed towards terminologists and lexicographers, for whom it provides a set of guidelines on how to enrich the content of surveying dictionaries, translators and technical writers, who may find information on how to deal with conceptual mismatches, and to specialists in the surveying field, who are interested in finding equivalents for problematic terms.

### Ontopoietic Expansion in Human Self-Interpretation-in-Existence

### The I and the Other in their Creative Spacing of the Societal Circuits of Life Phenomenology of Life and the Human Creative Condition (Book III)

**Springer Science & Business Media** The societal web of life is underpinned by one concept - that of Self and Other - which emerged earlier in this century. The concept has received a new formulation within the field of the phenomenology of life and the human creative condition, finding a foothold, a point of reference that radiates novel, seminal insights. It is nothing other than the creative fulcrum of human functioning. The self-individualisation of the human being, as revealed in the present collection, is existentially and vitally intertwined with that of the Other. Tymieniecka's seminal idea of the 'trans-actional' is explored in this collection of essays, which reveals a variety of significant perspectives, weaving the cycles of the human universe of existence in an essential oscillation between the Self and the Other. In this oscillation we throw out our existential tentacles, trying to gain a living space with respect to each other, all the while engaging in a mutual creative prompting and attunement.
