## Where is My Office?

## Reimagining the Workplace for the 21st Century

*Bloomsbury Publishing A fascinating and accessible guide to the effective management of corporate real estate--an underestimated element of business management which can have a dramatic impact upon employee satisfaction and organizational efficiency. In the current age of remote working and flexible work hours, why have most office spaces remained relatively unchanged for decades? In Where is My Office?, Chris Kane highlights the importance of workplace agility and innovative corporate real estate (CRE) thinking in ensuring the productivity and efficiency of any organization, while at the same time offering insights into the future of our work environments and the implications for CRE investors. The book assesses the major issues facing CRE sectors around the world - issues*

that leave businesses out of pocket and employees unhappy with the workspaces in which they are expected to spend a major part of their day. The author presents adaptable and actionable solutions to these issues, emphasizing the need for interdepartmental collaboration and the implementation of new technology, all of which can bring about a holistic and adaptable solution to the challenges of workplace efficiency, which in turn can cut costs, minimize risks and increase productivity. *Where is My Office?* is an accessible guide for business leaders and HR professionals, providing an adaptable framework through which they can ensure that their approach to work-space management is aligned with the needs of their business and employees. Chris poses his ground-breaking 'Smart Value' formula which underpinned the success of his work at The Walt Disney Company and the BBC, and which can be adapted to enact meaningful and lasting organizational change in any business.

## Appraisal and Evaluation in Central Government : Treasury Guidance

Stationery Office This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

## The Dark Heritage of Long Kesh / Maze Prison

Oxford University Press This volume reveals the seminal role of material culture in understanding the Long Kesh / Maze prison during the course of the Troubles in Northern Ireland continuing into the peace process. Using a multitude of sources, it provides an interpretation of the Troubles and the continuing destabilizing role of material remnants of the conflict.

## Post & Telecommunications

Elsevier The review describes the publicly available sources of statistical information about postal and telecommunications in the United Kingdom. It covers public letter and parcel mail, postal orders, telephone, telegraph, telex, data and facsimile services. Given the 1981 Post Office reorganisation and the 1984 privatisation of British Telecom, this volume should prove a valuable resource to researchers and professionals requiring a guide to information in this rapidly changing field.

## Improving the efficiency of postal services procurement in the public sector

The Stationery Office All public sector organisations rely to varying degrees on postal services, costing nearly £650 million annually of which £250 million is spent by central government departments. The two biggest spenders are the Department for Work and Pensions and HM Revenue and Customs which account for over half this amount, with ten organisations accounting for 95 per cent of the total. Despite the growth in the use of internet and email, at least for the foreseeable future conventional mail will remain essential to the way public bodies communicate with the public. This NAO report examines how public sector organisations can become more effective in their procurement and management of postal services, and identifies six main areas where further improvements can be made in order to realise an estimated £31 million a year in savings by 2008-09. Two accompanying documents are available separately: case studies which examine the use of postal services in five organisations (HCP 946-II, ISBN 0102937354); and a guide which sets out examples of good practice across public and private sectors (HCP 946-III, ISBN 0102937362).

## National planning policy framework 2012

The Stationery Office *The National Planning Policy Framework 2012 sets out the Government's planning policies for England in achieving sustainable development and how these are expected to be applied. It sets out the requirements for the planning system only to the extent that it is relevant, proportionate and necessary to do so. It provides a framework within which local people and their accountable councils can produce their own distinctive local and neighbourhood plans, which reflect the needs and priorities of their communities. This Framework does not contain specific policies for nationally significant projects for which particular considerations apply. Divided into thirteen chapters, with three annexes, it looks at the following areas, including: building a competitive economy; ensuring town centre vitality; supporting a high quality communications infrastructure; delivering high quality homes; protecting the Green Belt; meeting the challenges of climate change, flooding and coastal change; conserving the natural and historic environments and facilitating the sustainable use of minerals.*

## Solutions to knife crime: a path through the red sea?

Vernon Press *This book addresses one of the UK's most persistent and serious concerns: knife crime. While research diagnosing the cause of rising knife crime abounds, few studies articulate effective solutions to this complex social problem. Drawing on data from cities across the UK, Sue Roberts suggests concrete forms of collaboration that may just spare future generations from the worst of this terrifying scourge. "Solutions to knife crime: a path through the red sea?" will fascinate law-enforcers, policy-makers, criminologists and other specialists both within and outside academia. It will also appeal to anyone who's been affected, or is simply concerned, by this blight on British society.*

## Public Services Inspection in the UK

Jessica Kingsley Publishers *Public Services Inspection in the UK provides a detailed account of the changing role of inspection in public services management. It analyses the key debates about the role that inspection plays in increasing public accountability and encouraging service improvement. Contributors describe current inspection methods across the key public sectors of education, social care, the criminal justice system, local government services and healthcare, and examine the underlying issues and tensions associated with public services inspection. They compare approaches adopted in different parts of the UK and present evidence that can be drawn on to develop more effective practice, as well as offering recommendations for future policy and research. Public Services Inspection in the UK is essential reading for public service managers, social workers, policy makers, researchers, academics, students and professionals working in public services who have an involvement in the inspection process. Research Highlights in Social Work This topical series examines areas of particular interest to those in social and community work and related fields. Each book draws together different aspects of the subject, highlighting relevant research and drawing out implications for policy and practice. The project is under the editorial direction of Professor Joyce Lishman, Head of the School of Applied Social Studies at the Robert Gordon University.*

## Cloud Native Transformation

## Practical Patterns for Innovation

O'Reilly Media *In the past few years, going cloud native has been a big advantage for many companies. But it's a tough technique to get right, especially for enterprises with critical legacy systems. This practical hands-on guide examines effective architecture, design, and cultural patterns to help you transform your organization into a cloud native enterprise—whether you're moving from older architectures or creating new systems from scratch. By following Wealth Grid, a fictional company, you'll understand the challenges, dilemmas, and considerations that accompany a move to the cloud. Technical managers and architects will learn best practices for taking on a successful company-wide transformation. Cloud migration consultants Pini Reznik, Jamie Dobson, and Michelle Gienow draw patterns from the growing community of expert practitioners and enterprises that have successfully built cloud native systems. You'll learn what works and what doesn't when adopting cloud native—including how this transition affects not just your technology*

but also your organizational structure and processes. You'll learn: What cloud native means and why enterprises are so interested in it  
Common barriers and pitfalls that have affected other companies (and how to avoid them) Context-specific patterns for a successful cloud native transformation  
How to implement a safe, evolutionary cloud native approach How companies addressed root causes and misunderstandings that hindered their progress  
Case studies from real-world companies that have succeeded with cloud native transformations

# Putting Users at the Heart of Government's Digital Services, the Cabinet Office

The Stationery Office As the government strives to get everyone using online services, it must make sure it doesn't ignore people without internet access. This group of approximately 4 million people is skewed towards those aged over 65, in lower socio-economic groups or with disability. The Cabinet Office needs to make sure it understands these people's needs better and move forward with its plans to support them. They must not be put at a disadvantage because they either can't or don't want to go online. In some cases, fewer than 50% of transactions are completed online. To achieve its expectation that 82% of transactions are completed online, the Cabinet Office needs to understand better and break down the barriers that stop people with internet access from using online government services.

## Building ERP Solutions with Microsoft Dynamics NAV

Packt Publishing Ltd Create real-world enterprise solutions with NAV, Cloud, and the Microsoft stack About This Book Integrate NAV with various offerings of the Microsoft stack to create enterprise-ready and service-oriented solutions Use Power BI and Universal Windows Platform for effective data analysis and real-time tracking with NAV Discover the services offered by Microsoft Azure and implement them in different industries using real-world case scenarios Who This Book Is For This book is for NAV developers and solution architects who need to implement real-world enterprise solutions based on Microsoft Dynamics NAV. Knowledge of the NAV programming language (C/AL) and C# language is recommended. Knowledge of ASP.NET and Visual Studio development would help, but is not necessary. What You Will Learn Configure NAV Web Services and create external applications with Visual Studio, .NET, and .NET Core Solve technical architectural problems by implementing enterprise solutions with NAV Develop applications and solutions with Microsoft Dynamics NAV and the Microsoft technology stack Create a Power BI dashboard for rich reporting and NAV data analysis Find out how to transmit your device location from a UWP application to NAV in order to implement a distributed solution for managing couriers in a sales company Make the most of Microsoft Azure and its services Create enterprise solutions with NAV by using Azure App Service Use Azure Service Bus for managing distributed NAV applications In Detail Implementing Microsoft Dynamics NAV in the real world often requires you to integrate the ERP with external applications or solve complex architectural tasks in order to have a final successful project. This book will show you how to extend a Microsoft Dynamics NAV installation to the enterprise world in a practical way. The book starts with an introduction to Microsoft Dynamics NAV architecture and then moves on to advanced topics related to implementing real-world solutions based on NAV and external applications. You will learn how an enterprise distributed architecture with NAV at the core can be implemented. Through a series of real-world cases on every topic and every industry (sales, retail, manufacturing, distribution, healthcare, and so on), you'll see step by step how to efficiently solve a technical problem. These common problems encountered in a NAV implementation will be solved using the entire technology stack that Microsoft offers. By the end of the book, you will have the knowledge to efficiently solve certain scenarios, you will know which is the best solution architecture to propose to a customer and how to implement it. Style and approach Taking you through a variety of real-world use cases, the book will show you step by step all you need to know to tackle these problems and give you creative ideas to implement in related problems you might come across in the real world.

## Growing the Productivity of Government Services

Edward Elgar Publishing 'Carrera and Dunleavy provide a crystal clear and comprehensive account of the complex issues involved in how best to improve the productivity of government services. They offer a nuanced but powerful explanation of productivity puzzles, conundrums and dilemmas in the public sector. But they also offer solutions to many of these problems. Finally, I have found a text on public economics that makes sense, gives genuine management insights and offers real suggestions to practitioners as to what to do next.' - Barry Quirk, Chief Executive, London Borough of Lewisham, UK 'This book presents a welcome and sobering analysis of productivity performance in UK central government - a subject that has received remarkably little serious academic attention up to now, in spite of decades of general commentary on managerialism.' - Christopher Hood, All Souls College, UK 'Leandro Carrera and Patrick Dunleavy have performed an amazing feat in this book through their rigorous examination of a thorny topic that has dogged pundits and academics alike. Just how efficient is government and how well does it do its job? As a result of an impressive - but accessible - set of data analyses, the authors make an authoritative attack on the proponents of the New Public Management, and offer some clear recommendations for reform based on better use of new technology.' - Peter John, University College London, UK Productivity is essentially the ratio of an organization's outputs divided by its inputs. For many years it was treated as always being static in government agencies. In fact productivity in government services should be rising rapidly as a result of digital changes and new management approaches, and it has done so in some agencies. However, Dunleavy and Carrera show for the first time how complex are the factors affecting productivity growth in government organizations - especially management practices, use of IT, organizational culture, strategic mis-decisions and political and policy churn. With government budgets under stress in many

countries, this pioneering book shows academics, analysts and officials how to measure outputs and productivity in detail; how to cope with problems of quality variations; and how to achieve year-on-year, sustainable improvements in the efficiency of government services.

### Prevent strategy

The Stationery Office The Prevent strategy, launched in 2007 seeks to stop people becoming terrorists or supporting terrorism both in the UK and overseas. It is the preventative strand of the government's counter-terrorism strategy, CONTEST. Over the past few years Prevent has not been fully effective and it needs to change. This review evaluates work to date and sets out how Prevent will be implemented in the future. Specifically Prevent will aim to: respond to the ideological challenge of terrorism and the threat we face from those who promote it; prevent people from being drawn into terrorism and ensure that they are given appropriate advice and support; and work with sectors and institutions where there are risks of radicalization which need to be addressed
