Water Paper Paint

Exploring Creativity with Watercolor and Mixed Media

Quarry Books This book is not only for "painters" but for all types of creative individuals who want to experience and play with watercolor, whether their background is mixed-media, textile art, journaling, or paper craft. Unlike the typical watercolor text books, this unique, beautiful volume is a field book of inspiration, creative ideas, how to's, and projects, all from an artist's perspective. Each creative exercise features a technique, shows step-by-step photographs, and includes a clever idea for a gift or project that can be made from the painted samples.

Water Quality for Treatment of Paper and Textiles

Closed White Water System for Paper Making Process

LAP Lambert Academic Publishing This book mainly focuses on the reduction of fresh water consumption and the effluent discharge from the pulp and paper industry. It includes various methods of paper mill wastes. Emphasis is given to the internal recycling of the waste water than to discharge it after an external treatment. This could help to decrease the amount of fresh water, effluent and the BOD load. The recovery of valuable fibers and fillers from the waste water are an added advantage.

Native Guard (enhanced Audio Edition)

Poems

HarperCollins Included in this audio-enhanced edition are recordings of the U.S. Poet Laureate Natasha Trethewey reading *Native Guard* in its entirety, as well as an interview with the poet from the HMH podcast *The Poetic Voice*, in which she recounts what it was like to grow up in the South as the daughter of a white father and a black mother and describes other influences that inspired the work. Experience this Pulitzer Prize-winning collection in an engaging new way. Growing up in the Deep South, Natasha Trethewey was never told that in her hometown of Gulfport, Mississippi, black soldiers had played a pivotal role in the Civil War. Off the coast, on Ship Island, stood a fort that had once been a Union prison housing Confederate captives. Protecting the fort was the second regiment of the Louisiana Native Guards -- one of the Union's first official black units. Trethewey's new book of poems pays homage to the soldiers who served and whose voices have echoed through her own life. The title poem imagines the life of a former slave stationed at the fort, who is charged with writing letters home for the illiterate or invalid POWs and his fellow soldiers. Just as he becomes the guard of Ship Island's memory, so Trethewey recalls her own childhood as the daughter of a black woman and a white man. Her parents' marriage was still illegal in 1966 Mississippi. The racial legacy of the Civil War echoes through elegiac poems that honor her own mother and the forgotten history of her native South. *Native Guard* is haunted by the intersection of national and personal experience.

The Global Water System in the Anthropocene

Challenges for Science and Governance

Springer The *Global Water System in the Anthropocene* provides the platform to present global and regional perspectives of world-wide experiences on the responses of water management to global change in order to address issues such as variability in supply, increasing demands for water, environmental flows and land use change. It helps to build links between science and policy and practice in the area of water resources management and governance, relates institutional and technological innovations and identifies in which ways research can assist policy and practice in the field of sustainable freshwater management. Until the industrial revolution, human beings and their activities played an insignificant role influencing the dynamics of the Earth system, the sum of our planet's interacting physical, chemical, and biological processes. Today, humankind even exceeds nature in terms of changing the biosphere and affecting all other facets of Earth system functioning. A growing number of scientists argue that humanity has entered a new geological epoch that needs a corresponding name: the Anthropocene. Human activities impact the global water system as part of the Earth system and change the way water moves around the globe like never before. Thus, managing freshwater use wisely in the planetary water cycle has become a key challenge to reach global environmental sustainability.

The Seekin Trilogy: Book One

Awaken one...awaken them all. Insomniac Piper Laurel focuses on the simple things, the feel-good things. She likes her coffee black, her wine cheap, and her men gone by morning. But when her last living relative dies, she must confront the feel-bad things. She's the last Laurel, she's almost thirty, and she's completely alone. When she returns to her sleepy seaside hometown, her ex is still as yummy as ever, and a familiar-seeming stranger is also there to tug at her heartstrings. But a love triangle isn't the only thing waiting for her. The immortal Anik has spent centuries plotting to claim the last Laurel--and a lot of innocent souls in the bargain. To survive Anik and the Realm Wars, Piper must forget her version of reality and awaken to her destiny as a Seekin, Guardian of Souls. With two men vying for her heart and hellhounds on her heels, Piper must decide who she trusts and who she loves while embracing her destiny with her eyes wide open.
