Why Boys Fail

Saving Our Sons from an Educational System That's Leaving Them Behind

AMACOM Selected as one of the Top 5 Educational Books by Literacy News The signs and statistics are undeniable: boys are falling behind in school. Contrary to conventional wisdom, the biggest culprits are not video games, pop culture, or female-dominated schools biased toward girls. The real problem is that boys have been thrust into a bewildering new school environment that demands high-level reading and writing skills long before they are capable of handling them. Lacking the ability to compete, boys fall farther and farther behind. Eventually, the problem gets pushed into college, where close to 60% of the graduates are women. In a time when even cops, construction foremen, and machine operators need post-high school degrees, that's a problem. Why Boys Fail takes a hard look at how this ominous reality came to be, how it has worsened in recent years, and why attempts to resolve it often devolve into finger-pointing and polarizing politics. But the book also shares some good news. Amidst the alarming proof of failure among boys-around the world-there are also inspiring case studies of schools where something is going right. Each has come up with realistic ways to make sure that every student-male and female-has the tools to succeed in school and later in life. Educators and parents alike will take heart in these promising developments, and heed the book's call to action-not only to demand solutions but also to help create them for their own students and children.

Masculinities in Contemporary American Culture

An Intersectional Approach to the Complexities and Challenges of Male Identity

Taylor & Francis Masculinities in Contemporary American Culture offers readers a multidisciplinary, intersectional overview of masculinity studies that includes both theoretical and applied lenses. Keith combines current research with historical perspectives to demonstrate the contexts in which masculine identities have come evolved. With an emphasis on popular culture -- particularly film, TV, video games, and music -- this text invites students to examine their gendered sensibilities and discuss the ways in which different forms of media appeal to toxic masculinity.

The Naturally Good Man And the Ten Thousand Blades of Life

Trafford Publishing Men inherit definitions about manhood, but many of these definitions no longer fit. A society that was once based on power, assumptions, and stereotypes is changing. Few people take time to learn about the history of male oppression, the foundations of male masculinity, and the evolution of the modern man. Join author Rod E. Keays as he examines these important topics and more, including why boys and men accept certain roles; why men bully each other; why its important to deal with emotions; and why its so hard for men to talk about sexuality. Keays explores his own experiences coping with the twists and turns that come with being a man. One thing he learns early on is that most men dont talk about their emotional highs and lows. As someone who likes to talk openly and frankly, he feels isolated, but he continues living life on his terms. Discover what good men have been doing for thousands of years and how mens groups can help men achieve their goals. The world may have its share of problems, but The Naturally Good Man continues to contribute to society.

Smart Girls

Success, School, and the Myth of Post-Feminism

Univ of California Press Are girls taking over the world? It would appear so, based on magazine covers, news headlines, and popular books touting girls' academic success. Girls are said to outperform boys in high school exams, university entrance and graduation rates, and professional certification. As a result, many in Western society assume that girls no longer need support. But in spite of the messages of post-feminism and neoliberal individualism that tell girls they can have it all, the reality is far more complicated. Smart Girls investigates how academically successful girls deal with stress, the "supergirl" drive for perfection, race and class issues, and the sexism that is still present in schools. Describing girls' varied everyday experiences, including negotiations of traditional gender norms, Shauna Pomerantz and Rebecca Raby show how teachers, administrators, parents, and media commentators can help smart girls thrive while working toward straight As and a bright future.

Changing Minds, If Not Hearts

Political Remedies for Racial Conflict

University of Pennsylvania Press Americans preach egalitarianism, but democracy makes it hard for minorities to win. Changing Minds, If Not Hearts explores political strategies that counteract the impulse of racial majorities to think about racial issues as a zero-sum game, in which a win for one group means a loss for another. James M. Glaser and Timothy J. Ryan argue that, although political processes often inflame racial tensions, the tools of politics also can alleviate conflict. Through randomized experiments conducted in South Carolina, California, Michigan, Mississippi, Oklahoma, and New Jersey, Glaser and Ryan uncover the racial underpinnings of disputes over affirmative action, public school funding initiatives, Confederate flag displays on government buildings, reparations, and racial profiling. The authors examine whether communities rife with conflict endorse different outcomes when issues are cast in different terms—for example, by calling attention to double standards, evoking alternate conceptions of fairness and justice, or restructuring electoral choices to offer voters greater control. Their studies identify a host of tools that can help overcome opposition to minority interests that are due to racial hostility. Even in communities averse to accommodation, even where antipathy and prejudice linger, minorities can win. With clearly presented data and compelling prose, Changing Minds, If Not Hearts provides a vivid and practical illustration of how academic theory can help resolve conflicts on the ground.

Victorian Women and Wayward Reading

Crises of Identification

Cambridge University Press [Explains how Victorian women readers strategically identified with literature to defy stereotypes and inspire their action and creativity.](#)

The Robot Factory

Pseudoscience in Education and Its Threat to American Democracy

Springer [This book exposes a disturbing misuse of the scientific method to advance policies and agendas that are in fact detrimental to both science and education. The author, a physics professor, examines two related trends in education - the practice of "data-driven" reform and the disparaging of the traditional liberal arts in favor of programs with a heavy emphasis on science and technology. Many of the reforms being foisted on educators have more in common with pseudo-science than real science. The reduction of education to a commodity, and the shilling of science as a means to enhance corporate profits, lead to an impoverished and stunted understanding of science in particular, and of education in general. How is it possible for: • schools with all students learning at grade-level to be rated as failing? • teachers to be rated as ineffective after all their students meet their learning outcomes? • rising grade-school math standards to result in more college students needing remedial math? • politicians to disparage scientists and their results but argue that more students should study science? These bizarre outcomes have happened and are the result of an education system that misuses and misrepresents math and science in the classroom and in crafting education policies. This book exposes the flawed and fallacious thinking that is damaging education at all levels throughout the United States, and makes a compelling case for rethinking the standardized, optimized, and quantified approaches in vogue in education today to accommodate the different needs of individual teachers and students.](#)

The War Against Boys

How Misguided Policies are Harming Our Young Men

Simon and Schuster [An updated and revised edition of the controversial classic--now more relevant than ever--argues that boys are the ones languishing socially and academically, resulting in staggering social and economic costs. Girls and women were once second-class citizens in the nation's schools. Americans responded with concerted efforts to give girls and women the attention and assistance that was long overdue. Now, after two major waves of feminism and decades of policy reform, women have made massive strides in education. Today they outperform men in nearly every measure of social, academic, and vocational well-being. Christina Hoff Sommers contends that it's time to take a hard look at present-day realities and recognize that boys need help. Called "provocative and controversial . . . impassioned and articulate" \("The Christian Science M"onitor\), this edition of "The War Against Boys" offers a new preface and six radically revised chapters, plus updates on the current status of boys throughout the book. Sommers argues that the problem of male underachievement is persistent and worsening. Among the new topics Sommers tackles: how the war against boys is harming our economic future, and how boy-averse trends such as the decline of recess and zero-tolerance disciplinary policies have turned our schools into hostile environments for boys. As our schools become more feelings-centered, risk-averse, competition-free, and sedentary, they move further and further from the characteristic needs of boys. She offers realistic, achievable solutions to these problems that include boy-friendly pedagogy, character and vocational education, and the choice of single-sex classrooms. "The War Against Boys" is an incisive, rigorous, and heartfelt argument in favor of recognizing and confronting a new reality: boys are languishing in education and the price of continued neglect is economically and socially prohibitive.](#)

Searching for Tom Sawyer

How Parents and Congregations Can Stop the Exodus of Boys from Church

WestBow Press The Story of Boys—Lost in the Twenty-first Century: 70% of all Ds and Fs go to boys 85% of stimulant-addressing medications prescribed in the world are prescribed to US boys Boys are falling behind girls in virtually every area of life 70 -90% of boys will leave the church in their teens and early twenties Searching for Tom Sawyer offers parents and church leaders a compelling vision and practical principles for how, together, they can change that storyline by forging boys into heroic men. “More than 70% of the young men who are raised in church abandon it during their teens and twenties ... Tim Wright examines the problem and offers real solutions to one of the greatest challenges facing the church today.” —David Murrow, author of Why Men Hate Going to Church “No one who cares for boys, and equally no one who cares for kids and families should miss Searching for Tom Sawyer.” —Leonard Sweet, professor at Drew University and George Fox University “Tim Wright’s diagnosis of why most of our congregations struggle to connect with guys is eye-opening and stunning ... As the father of three boys, I wish I’d had this book years ago. As the pastor of a congregation, I’m glad I have it now.” —Pastor Jeff Marian, Prince of Peace Lutheran Church, Burnsville, Minnesota

The New Female Antihero

The Disruptive Women of Twenty-First-Century US Television

University of Chicago Press “The last ten years have presented television viewers with a host of female characters the likes of which we’ve never seen before. Selfish, vengeful, and often deeply unlikeable, they fly in the face of our expectations for women. In The New Female Antihero, Sarah Hagelin and Gillian Silverman probe the stories of female protagonists who eschew aspirations for a career, marriage, and children, swerving instead toward utter apathy, at one end of the spectrum, or unadulterated power at the other. From the bloodthirsty queens of Game of Thrones, The Americans, Scandal, and Homeland to the shrugging failures of Girls, Broad City, Insecure, and SMILF, female antiheroes register a deep ambivalence about the promises of liberal feminism in contemporary America. As Hagelin and Silverman show, their narratives of ruthlessness, insanity, hedonism, and precarity call into question both the possibility and the desirability of the “good life” their forebears achieved through entitlement, pluck, and leaning in”--

Love, Money, and Parenting

How Economics Explains the Way We Raise Our Kids

Princeton University Press An international and historical look at how parenting choices change in the face of economic inequality Love, Money, and Parenting investigates how economic forces shape how parents raise their children. In countries with increasing economic inequality, parents push harder to ensure their children have a path to security and success. In the United States, this force has transformed the hands-off parenting of the 60s and 70s into a frantic, overscheduled activity. Growing inequality has also resulted in an increasing “parenting gap” between richer and poorer families, raising the disturbing prospect of diminished social mobility. Drawing from the experiences of countries of high and low economic inequality, Matthias Doepke and Fabrizio Zilibotti discuss how changes to public policy can contribute to the ideal of equal opportunity for all.

Deep Secrets

Boys' Friendships and the Crisis of Connection

Harvard University Press “Boys are emotionally illiterate and don’t want intimate friendships.Ó In this empirically grounded challenge to our stereotypes about boys and men, Niobe Way reveals the intense intimacy among teenage boys especially during early and middle adolescence. Boys not only share their deepest secrets and feelings with their closest male friends, they claim that without them they would go Ówacko.Ó Yet as boys become men, they become distrustful, lose these friendships, and feel isolated and alone. Drawing from hundreds of interviews conducted throughout adolescence

with black, Latino, white, and Asian American boys, *Deep Secrets* reveals the ways in which we have been telling ourselves a false story about boys, friendships, and human nature. Boys' descriptions of their male friendships sound more like *Something out of Love Story than Lord of the Flies*. Yet in late adolescence, boys feel they have to *man up* by becoming stoic and independent. Vulnerable emotions and intimate friendships are for girls and gay men. *No homo* becomes their mantra. These findings are alarming, given what we know about links between friendships and health, and even longevity. Rather than a *boy crisis*, Way argues that boys are experiencing a *crisis of connection* because they live in a culture where human needs and capacities are given a sex (female) and a sexuality (gay), and thus discouraged for those who are neither. Way argues that the solution lies with exposing the inaccuracies of our gender stereotypes and fostering these critical relationships and fundamental human skills.

On the Rocketship

How Top Charter Schools Are Pushing the Envelope

John Wiley & Sons The face of American education is evolving—and the roadmap is clear *On the Rocketship: How Top Charter Schools are Pushing the Envelope* examines the rise and expansion of leading charter school network *Rocketship*, revealing the "secret sauce" that makes a successful program. A strong narrative with a timely message, the book explores how *Rocketship* started and the difficulties encountered as it expands. Designing schools for children who have been failed by traditional schools is extremely challenging work. Setbacks are inevitable. Later in the book the narrative shifts to the national picture, exploring how high performing charter schools are changing the education landscape in cities such as Denver, Memphis, and Houston. The book emerges just as charter schools are running into stiff political opposition in New York City and elsewhere. Even in San Jose, *Rocketship's* home base, the pushback against charter schools is gaining speed. *On the Rocketship* becomes a valuable resource for explaining what's at stake in this battle. Lose these schools, in New York, San Jose and other cities, and low-income and minority students lose their best shot at a quality education. Written by a veteran journalist who followed *Rocketship* through a school year, the book explores some of the factors that make *Rocketship* and other charters successful, including the blended learning that was pioneered at charter schools, especially *Rocketship*. Many schools around the country are looking to *Rocketship* as a model for implementing blended learning. The interplay between charter schools and blended learning is setting a change in motion, and the American education system is ready to evolve. *On the Rocketship* details this phenomenon, providing insights for educators across the nation.

The Bee Eater

Michelle Rhee Takes on the Nation's Worst School District

John Wiley & Sons The inside story of a maverick reformer with a take-no-prisoners management style Hailed by Oprah as a "warrior woman for our times," reviled by teachers unions as the enemy, Michelle Rhee, outgoing chancellor of Washington DC public schools, has become the controversial face of school reform. She has appeared on the cover of *Time Magazine*, and is currently featured as a hero in the documentary "Waiting for Superman." This is the story of her journey from good-girl daughter of Korean immigrants to tough-minded political game-changer. When Rhee first arrived in Washington, she found a school district that had been so broken for so long, that everyone had long since given up. The book provides an inside view of the union battles, the school closings, and contentious community politics that have been the subject of intense public interest and debate ? along with a rare look at Rhee's upbringing and life before DC. Rhee has been featured in the documentary "Waiting for Superman" Rhee's story points to a fresh way of addressing school improvement Addresses fundamental problems in our current education system, and the politics of leadership The book includes an insert with photos from Rhee's personal and professional life, and an "exit" interview that sheds light on what she's learned and where the future might take her.

Writing the Playbook

Corwin Press Jump-start boys' achievement with a step-by-step leadership plan that draws on brain research to provide a blueprint for creating schools where boys (and girls!) thrive.

The B. A. Breakthrough

How Ending Diploma Disparities Can Change the Face of America

The Victorian Era in Twenty-First Century Children's and Adolescent Literature and Culture

Routledge Victorian literature for audiences of all ages provides a broad foundation upon which to explore complex and evolving ideas about young people. In turn, this collection argues, contemporary works for young people that draw on Victorian literature and culture ultimately reflect our own disruptions and upheavals, particularly as they relate to child and adolescent readers and our experiences of them. The essays therein suggest that we struggle now, as the Victorians did then, to assert a cohesive understanding of young readers, and that this lack of cohesion is a result of or a parallel to the disruptions taking place on a larger (even global) scale.

The Victorian Period in Twenty-First Century Children's and Adolescent Literature and Culture

Routledge Victorian literature for audiences of all ages provides a broad foundation upon which to explore complex and evolving ideas about young people. In turn, this collection argues, contemporary works for young people that draw on Victorian literature and culture ultimately reflect our own disruptions and upheavals, particularly as they relate to child and adolescent readers and our experiences of them. The essays therein suggest that we struggle now, as the Victorians did then, to assert a cohesive understanding of young readers, and that this lack of cohesion is a result of or a parallel to the disruptions taking place on a larger (even global) scale.

Building an Opportunity Society

A Realistic Alternative to an Entitlement State

Routledge Twenty-first-century US policymakers face a great challenge: How can federal government help more people achieve the American dream? Specifically, how can we provide greater opportunities for less-prosperous individuals, enabling them to succeed through hard work, on their merits, and take increased responsibility for their lives? Lewis D. Solomon sees this as the challenge of our time. He seeks to thread the fine public policy needle between social democratic efforts to perfect the world and those who negatively view public sector programs. Based on the premise that capitalism is not inherently unjust and defective, and American capitalism's structural features do not inexorably thwart opportunity, Building an Opportunity Society offers the possibility of more limited, carefully structured, cost-effective, empirically verified federal policies and programs. Solomon first provides the background and context of many existing domestic challenges and problems that the current and proposed federal policies and programs seek to address. He then analyses the federal safety net that keeps Americans from poverty and helps reduce income inequality. Finally, he presents a lifecycle analysis of current federal policies and programs, preventive and remedial, designed as part of the Entitlement State, but if restructured could facilitate the building of an Opportunity Society. Solomon challenges policymakers to take a fresh look at how best to achieve society's goals for all citizens.

Saving Our Sons

Raising Black Children in a Turbulent World

Mango Raising Black Teen Boys in Turbulent Times "It is always heartening to see women step up to the writer's table. When the results are as adroit and affecting as Marita Golden's work, it is more than satisfying; it is a cause for celebration."--Toni Morrison, Nobel Laureate Two decades ago, Marita was the first Black writer to address the horrifying statistic that haunts all Black mothers: the leading cause of death among Black males under twenty-one is homicide. Today, police brutality rages on as millions call for the reformation of our broken law enforcement in the wake of the traumatic murders of Black teen boys like Trayvon Martin, Michael Brown and Daunte Wright. Read an intimate account of a mother's efforts to save her son. Writing her son's story against the backdrop of a society plagued by systemic racism, economic inequality, and mass incarceration, Golden offers a form of witness and testimony in a time of crisis for Black Americans. Learn how to grapple with the realities of Black America. Join Golden as she confronts the root causes of violence inflicted upon Black teen boys and reassesses the legacy of her own generation's struggle for civil rights. Explore Black boys' difficult road to adulthood in the U.S. and learn why single Black mothers are often wrongly blamed for their sons' actions. Gain invaluable advice and knowledge from trustworthy sources. In *Saving Our Sons*, Golden documents her conversations with psychologists, writers, and young Black males themselves. This book is designed to help you: Discuss and unpack generational trauma with loved ones Gain deeper insight into the injustices Black children face in the U.S. Recognize the importance of community for the success of Black teen boys If you liked *Decoding Boys*, *Mother & Son: Our Back & Forth Journal*, *The Boy Crisis* or *Boy Mom*, you'll love *Saving Our Sons*.

New Books on Women and Feminism

New Books on Women, Gender and Feminism

Men on Strike

Why Men are Boycotting Marriage, Fatherhood, and the American Dream--and why it Matters

Encounter Books Demonstrates that society has become anti-male, and reveals why men are either consciously or unconsciously going on strike due to the laws, attitudes, and hostility against them for being male in the twenty-first century.

Ringleaders and Sidekicks

How to Help Your Son Cope with Classroom Politics, Bullying, Girls and Growing Up

Hachette UK When Rosalind Wiseman published her bestseller *Queen Bees and Wannabes* in 2001, it fundamentally changed the way that parents, educators and the media looked at the impact of girls' social dynamics and created a road map for girls to develop better relationships and higher self-esteem. Now Rosalind turns her attention to the tricky terrain of Boy World. Drawing on 20 years of work with boys and her own experience as a mother of two sons, Rosalind will help parents understand their tween and teenage sons better. The book will cover such timely issues as video games, online identities and social networking sites. This is an essential manual that will help any parent build a stronger, more meaningful relationship with their son.

Paul Ricoeur

Honoring and Continuing the Work

Lexington Books This collection of essays is dedicated to the prolific career of Paul Ricoeur. Honoring his work, this anthology addresses questions and concerns that defined Ricoeur s."

Manning Up

How the Rise of Women Has Turned Men into Boys

Hachette UK In Manning Up, Manhattan Institute fellow and City Journal contributing editor Kay Hymowitz argues that the gains of the feminist revolution have had a dramatic, unanticipated effect on the current generation of young men. Traditional roles of family man and provider have been turned upside down as "pre-adult" men, stuck between adolescence and "real" adulthood, find themselves lost in a world where women make more money, are more educated, and are less likely to want to settle down and build a family. Their old scripts are gone, and young men find themselves adrift. Unlike women, they have no biological clock telling them it's time to grow up. Hymowitz argues that it's time for these young men to "man up."

Wings Press This American classic has been corrected from the original manuscripts and indexed, featuring historic photographs and an extensive biographical afterword.

The Trouble with Boys

A Surprising Report Card on Our Sons, Their Problems at School, and What Parents

and Educators Must Do

Harmony From the moment they step into the classroom, boys begin to struggle. They get expelled from preschool nearly five times more often than girls; in elementary school, they're diagnosed with learning disorders four times as often. By eighth grade huge numbers are reading below basic level. And by high school, they're heavily outnumbered in AP classes and, save for the realm of athletics, show indifference to most extracurricular activities. Perhaps most alarmingly, boys now account for less than 43 percent of those enrolled in college, and the gap widens every semester! The imbalance in higher education isn't just a "boy problem," though. Boys' decreasing college attendance is bad news for girls, too, because admissions officers seeking balanced student bodies pass over girls in favor of boys. The growing gender imbalance in education portends massive shifts for the next generation: how much they make and whom they marry. Interviewing hundreds of parents, kids, teachers, and experts, award-winning journalist Peg Tyre drills below the eye-catching statistics to examine how the educational system is failing our sons. She explores the convergence of culprits, from the emphasis on high-stress academics in preschool and kindergarten, when most boys just can't tolerate sitting still, to the outright banning of recess, from the demands of No Child Left Behind, with its rigid emphasis on test-taking, to the boy-unfriendly modern curriculum with its focus on writing about "feelings" and its purging of "high-action" reading material, from the rise of video gaming and schools' unease with technology to the lack of male teachers as role models. But this passionate, clearheaded book isn't an exercise in finger-pointing. Tyre, the mother of two sons, offers notes from the front lines—the testimony of teachers and other school officials who are trying new techniques to motivate boys to learn again, one classroom at a time. *The Trouble with Boys* gives parents, educators, and anyone concerned about the state of education a manifesto for change—one we must undertake right away lest school become, for millions of boys, unalterably a "girl thing."

Rare Earth

Why Complex Life is Uncommon in the Universe

Springer What determines whether complex life will arise on a planet, or even any life at all? Questions such as these are investigated in this groundbreaking book. In doing so, the authors synthesize information from astronomy, biology, and paleontology, and apply it to what we know about the rise of life on Earth and to what could possibly happen elsewhere in the universe. Everyone who has been thrilled by the recent discoveries of extrasolar planets and the indications of life on Mars and the Jovian moon Europa will be fascinated by *Rare Earth*, and its implications for those who look to the heavens for companionship.

Writing the Playbook

A Practitioner's Guide to Creating a Boy-Friendly School

Corwin Press Your game plan for getting boys on the path to higher achievement As a school leader, Kelley King has walked the talk: she successfully led her own staff to close the achievement gap between boys and girls in reading and writing in just one year. In this book, readers get King's step-by-step, research-based leadership plan for jump-starting boys' achievement. King shares: Critical insight into the brain-based differences between boys and girls First-hand leadership and classroom experiences to provide educators with a blueprint for creating schools where boys (and girls!) thrive Ready-to-use activities and resources for leading a successful gap-closing initiative

The End of Men

And the Rise of Women

Penguin UK What Betty Friedan, Simone de Beauvoir, Susan Faludi and Naomi Wolf did for feminism, senior editor of *The Atlantic* Hanna Rosin does for a new generation of women: an explosive new argument for why women are winning the battle of the sexes and why men are no longer top dog. Women are no longer catching up with men. By almost every measure, they are out-performing them. We

are at an unprecedented moment in history. In 2010, for the first time, the balance of the British workforce tipped towards women, who now hold around half of the nation's jobs. In the US, meanwhile, for every two men that receive a BA, three women will achieve the same. Not only do women now dominate colleges and professional schools on every continent except Africa, young single women in the US now earn more than their male counterparts, and more than a third of mothers in the UK and the US are their family's main breadwinner. The tides have turned. The 'age of testosterone' is decisively over. At almost every level of society women are proving themselves far more adaptable and suited to a job market that rewards people skills and intelligence, and a world that has a dramatically diminishing need for traditional male muscle. In this landmark, once-in-a-generation book, Hanna Rosin reveals how this new world order came to be and its profound implications for marriage, sex, children, work, families and society. Unhampered by old assumptions and ideologies and drawing on examples from across the globe, *The End of Men* helps us see how both men and women can - and must - adapt for a radically new era. 'In this bold and inspired dispatch, Rosin upends the common platitudes of contemporary sexual politics with a deeply reported meditation from the unexpected frontiers of our rapidly changing culture' Katie Roiphe, author of *The Morning After* and *Uncommon Arrangements* 'The End of Men describes a new paradigm that can, finally, take us beyond 'winners' and 'losers' in an endless 'gender war.' What a relief! Ultimately, Rosin's vision is both hope-filled and creative, allowing both sexes to become far more authentic: as workers, partners, parents...and people' Peggy Orenstein, author of *Cinderella Ate My Daughter* and *Schoolgirls* Hanna Rosin is a senior editor at *The Atlantic* magazine and a founder and co-editor of *DoubleX*, *Slate's* women's section. She has written for the *New Yorker*, *The New York Times*, *GQ*, and *The New Republic*, and for a number of years covered politics and religion for the *Washington Post*. In 2009 she was nominated for a National Magazine Award, and in 2010 she won one. She is the author of a previous book, *God's Harvard: A Christian College on a Mission to Save America*. Rosin lives in Washington, DC, with her husband, *Slate* editor David Plotz, and their three children.

Behold a Pale Horse

Light Technology Publishing Bill Cooper, former United States Naval Intelligence Briefing Team member, reveals information that remains hidden from the public eye. This information has been kept in Top Secret government files since the 1940s. His audiences hear the truth unfold as he writes about the assassination of John F. Kennedy, the war on drugs, the Secret Government and UFOs. Bill is a lucid, rational and powerful speaker who intent is to inform and to empower his audience. Standing room only is normal. His presentation and information transcend partisan affiliations as he clearly addresses issues in a way that has a striking impact on listeners of all backgrounds and interests. He has spoken to many groups throughout the United States and has appeared regularly on many radio talk shows and on television. In 1988 Bill decided to "talk" due to events then taking place worldwide, events which he had seen plans for back in the early '70s. Since Bill has been "talking," he has correctly predicted the lowering of the Iron Curtain, the fall of the Berlin Wall and the invasion of Panama. All Bill's predictions were on record well before the events occurred. Bill is not a psychic. His information comes from Top Secret documents that he read while with the Intelligence Briefing Team and from over 17 years of thorough research. "Bill Cooper is the world's leading expert on UFOs." -- Billy Goodman, KVEG, Las Vegas. "The onlt man in America who has all the pieces to the puzzle that has troubled so many for so long." -- Anthony Hilder, Radio Free America "William Cooper may be one of America's greatest heros, and this story may be the biggest story in the history of the world." -- Mills Crenshaw, KTALK, Salt Lake City. "Like it or not, everything is changing. The result will be the most wonderful experience in the history of man or the most horrible enslavement that you can imagine. Be active or abdicate, the future is in your hands." -- William Cooper, October 24, 1989.

Radical

Fighting to Put Students First

Harper Collins In *Radical*, Michelle Rhee, a fearless and pioneering advocate for education reform, draws on her own life story and delivers her plan for better American schools. Rhee's goal is to ensure that laws, leaders, and policies are making students—not adults—our top priority, and she outlines concrete steps that will put us on a dramatically different course. Informing her critique are her extraordinary experiences in education: her years of teaching in inner-city Baltimore; her turbulent tenure as chancellor of the Washington, DC public schools; and her current role as CEO of the education nonprofit *StudentsFirst*. Rhee draws on dozens of compelling examples from schools she's worked in and studied, from students who've left behind unspeakable home lives and thrived in the classroom to teachers whose groundbreaking methods have produced unprecedented leaps in student achievement. An incisive and intensely personal call-to-arms, Michelle Rhee's *Radical* is required reading for anyone who seeks a guide to not only the improvement of our schools, but also a brighter future for America's children.

Planets Beyond

Discovering the Outer Solar System

Courier Corporation This book serves as a fascinating progress report on the outer solar system, offering a way to better appreciate the newest findings. It unlocks some of the mysteries surrounding Uranus, Neptune, and Pluto — from the drama of their discoveries to the startling results of Voyager 2's historic 1989 encounter with Neptune.

The Atmosphere and Climate of Mars

Cambridge University Press Humanity has long been fascinated by the planet Mars. Was its climate ever conducive to life? What is the atmosphere like today and why did it change so dramatically over time? Eleven spacecraft have successfully flown to Mars since the Viking mission of the 1970s and early 1980s. These orbiters, landers and rovers have generated vast amounts of data that now span a Martian decade (roughly eighteen years). This new volume brings together the many new ideas about the atmosphere and climate system that have emerged, including the complex interplay of the volatile and dust cycles, the atmosphere-surface interactions that connect them over time, and the diversity of the planet's environment and its complex history. Including tutorials and explanations of complicated ideas, students, researchers and non-specialists alike are able to use this resource to gain a thorough and up-to-date understanding of this most Earth-like of planetary neighbours.

The Bee Eater

Michelle Rhee Takes on the Nation's Worst School District

John Wiley & Sons The inside story of a maverick reformer with a take-no-prisoners management style Hailed by Oprah as a "warrior woman for our times," reviled by teachers unions as the enemy, Michelle Rhee, outgoing chancellor of Washington DC public schools, has become the controversial face of school reform. She has appeared on the cover of Time Magazine, and is currently featured as a hero in the documentary "Waiting for Superman." This is the story of her journey from good-girl daughter of Korean immigrants to tough-minded political game-changer. When Rhee first arrived in Washington, she found a school district that had been so broken for so long, that everyone had long since given up. The book provides an inside view of the union battles, the school closings, and contentious community politics that have been the subject of intense public interest and debate ? along with a rare look at Rhee's upbringing and life before DC. Rhee has been featured in the documentary "Waiting for Superman" Rhee's story points to a fresh way of addressing school improvement Addresses fundamental problems in our current education system, and the politics of leadership The book includes an insert with photos from Rhee's personal and professional life, and an "exit" interview that sheds light on what she's learned and where the future might take her.

Information Needs of Communities

The Changing Media Landscape in a Broadband Age

DIANE Publishing In 2009, a bipartisan Knight Commission found that while the broadband age is enabling an info. and commun. renaissance, local communities in particular are being unevenly served with critical info. about local issues. Soon after the Knight Commission delivered its findings, the FCC initiated a working group to identify crosscurrent and trend, and make recommendations on how the info. needs of communities can be met in a broadband world. This report by the FCC Working Group on the Info. Needs of Communities addresses the rapidly changing media landscape in a broadband age. Contents: Media Landscape; The Policy and Regulatory Landscape; Recommendations. Charts and tables. This is a print on demand report.

The Brown Center Report on American Education

Brookings Institution Press The Brown Center on Education Policy conducts research on topics in American education, with a special focus on efforts to improve academic achievement in elementary and secondary schools. The center seeks to inform policymakers at all levels of government, to influence the course of future educational research, and to produce a body of work not only valuable to policymakers and scholars, but also parents, teachers, administrators, taxpayers, school board members, and the general public. This annual report card analyzes the state of American education using the latest measures of student learning, uncovers and explains important trends in achievement test scores, and identifies promising and disappointing educational reforms. Unlike similar reports intended solely for government use, the Brown Center annual report card is written for an audience of parents, teachers, and policymakers.
