**Classical Mythology: The Basics** Taylor & Francis This new edition introduces the core elements of ancient Greek and Roman narratives about immortal gods and heroic humans. It explains how myths once shaped ancient ways of thinking, and how they have fascinated and inspired artists, writers, musicians, scientists, and scholars since. In six clear and concise chapters, this book explains what myths are, sketches the main stories about divinities, heroes and heroines, and explores through specific case studies the ways in which they influenced modern culture, from Renaissance opera to contemporary video games and social movements. The second edition also features a new chapter analyzing how myths have been used in politics from antiquity to the present day. More than two dozen illustrations, maps, and charts complement the text. No prior knowledge of mythology is assumed, and the book incorporates the latest scholarship on classical mythology, providing annotated lists of further readings. Anyone who has encountered Greek or Roman myths in literature, art, or pop culture and wants to know more about the cultural contexts for the stories will benefit from this compact book. Intended for a wide readership, the second edition of Classical Mythology: The Basics continues to offer a clear introduction to the subject for undergraduates, scholars, and the general reader.

**Animals in Greek and Roman Religion and Myth** Cambridge Scholars Publishing This volume brings together a variety of approaches to the different ways in which the role of animals was understood in ancient Greco-Roman myth and

religion, across a period of several centuries, from Preclassical Greece to Late Antique Rome. Animals in Greco-Roman antiquity were thought to be intermediaries between men and gods, and they played a pivotal role in sacrificial rituals and divination, the foundations of pagan religion. The studies in the first part of the volume examine the role of the animals in sacrifice and divination. The second part explores the similarities between animals, on the one hand, and men and gods, on the other. Indeed, in antiquity, the behaviour of several animals was perceived to mirror human behaviour, while the selection of the various animals as sacrificial victims to specific deities often was determined on account of some peculiar habit that echoed a special attribute of the particular deity. The last part of this volume is devoted to the study of animal metamorphosis, and to this end a number of myths that associate various animals with transformation are examined from a variety of perspectives. **Anthology of Classical Myth Primary Sources in Translation**

Hackett Publishing This new edition of Anthology of Classical Myth offers selections from key Near Eastern texts—the Babylonian Epic of Gilgamesh, Epic of Creation (Enuma Elish), and Atrahasis; the Hittite Song of Emergence; and the flood story from the book of Genesis—thereby enabling students to explore the many similarities between ancient Greek and Mesopotamian mythology and enhancing its reputation as the best and most complete collection of its kind. **Classics in Translation, Volume II Latin Literature** Univ of Wisconsin Press Here, translated

into modern idiom, are many works of the authors whose ideas have constituted the mainstream of classical thought. This volume of new translations was born of necessity, to answer the needs of a course in Greek and Roman culture offered by the Department of Integrated Liberal Studies at the University of Wisconsin. Since its original publication in 1952, Classics in Translation has been adopted by many different academic institutions to fill similar needs of their undergraduate students. This new printing is further evidence of this collection's general acceptance by teachers, students, and the reviewing critics. **Мифология за 30 секунд** Рипол

Explores the interplay between the dramatic form of the dialogue and the basic themes it addresses. The Statesman is among the most widely ranging of Plato's dialogues, bringing together in a single discourse disparate subjects such as politics, mathematics, ontology, dialectic, and myth. The essays in this collection consider these subjects and others, focusing in particular on the dramatic form of the dialogue. They take into account not only what is said but also how it is said, by whom and to whom it is said, and when and where it is said. In this way, the contributors approach the text in a manner that responds to the dialogue itself rather than bringing preconceived questions and scholarly debates to bear on it. The essays are especially attuned to the comedic elements that run through much of the dialogue and that are played out in a way that reveals the subject of the comedy. In the Statesman, these comedies reach their climax when the statesman becomes a participant in a comedy of animals and thereby is revealed in his true nature. .

**Meaning and Being in Myth** Penn State University Press Norman Austin has organized his analysis of classical Greek myths around Lacan's dichotomy between (ineffable) Being and the meanings imposed upon Being by culturally determined signifiers. The primary signifiers in myth (the gods), as projections of contradictory meanings, impel human consciousness in contradictory directions: toward heroic self-realization, on the one hand, and into the fear, guilt, and despair resulting from failure, on the other. The gods both reveal and occlude that which they signify—the signified; ultimately, Being itself. Austin includes one chapter on the father's ghost in Shakespeare's *Hamlet*, and another on Albert Camus's *The Stranger*, as examples of the power of mythical archetypes to reveal and occlude Being, even when the apparatus of gods has been excluded. Despite their pessimism, ancient myths also affirm that the paradoxes are not insoluble. Austin concludes by outlining the profile of the Universal Self intimated in myth, religion, and philosophy as the joint venture of the world realized in consciousness, consciousness realized in consciousness, and consciousness realized in the world.

**Primary Sources and Asian Pasts** Walter de Gruyter GmbH & Co KG This conference volume unites a wide range of scholars working in the fields of history, archaeology, religion, art, and philology in an effort to explore new perspectives and methods in the study of primary sources from premodern South and Southeast Asia. The contributions engage with primary sources (including texts, images, material artefacts, monuments, as well as archaeological sites and landscapes) and draw needed attention to highly adaptable, innovative, and dynamic modes of cultural production within traditional idioms. The volume works to develop categories of historical analysis that cross disciplinary boundaries and represent a wide variety of methodological concerns. By revisiting premodern sources, *Asia Beyond Boundaries* also addresses critical issues of temporality and periodization that attend established categories in Asian Studies, such as the “Classical Age” or the “Gupta Period”. This volume represents the culmination of the European Research Council (ERC) Synergy project *Asia Beyond Boundaries: Religion, Region, Language and the State*, a research consortium of the British Museum, the British Library and the School of Oriental and African Studies, in partnership with Leiden University.

**Classical Myths and Legends in the Middle Ages and Renaissance A Dictionary of Allegorical Meanings** Greenwood Classical myths and legends had a vigorous life long after the fall of Rome. During the Middle Ages and Renaissance, classical lore was interpreted in light of Christianity, and poets and mythographers attached allegorical significance to the ancient myths. Medieval and Renaissance authors such as Chaucer and Shakespeare drew upon the Greek and Roman myths to convey the values of Christian culture allegorically. Classical dictionaries identify characters and tales of Greek and Roman mythology, but these works do not explain the allegorical significance attached to the myths during the Renaissance and Middle Ages. Moreover, modern readers are generally unfamiliar with these allegorical meanings. This reference book provides entries for several hundred figures from classical mythology and explains how these figures were allegorically interpreted during the Middle Ages and Renaissance. Each entry includes examples of allegorical usage drawn from literature and art, and a bibliography. An extensive bibliography of primary and secondary sources concludes the volume.

**Encyclopedia of Literary Translation Into English: A-L** Taylor &

Francis Includes articles about translations of the works of specific authors and also more general topics pertaining to literary translation. **Literary Devices and Rhetorical Techniques in the Works of Hélienne de Crenne Plato's Exceptional City, Love, and Philosopher** Routledge This book reconnoiters the appearances of the exceptional in Plato: as erotic desire (in the Symposium and Phaedrus), as the good city (Republic), and as the philosopher (Ion, Theaetetus, Sophist, Statesman). It offers fresh and sometimes radical interpretations of these dialogues. Those exceptional elements of experience – love, city, philosopher – do not escape embodiment but rather occupy the same world that contains lamentable versions of each. Thus Pappas is depicting the philosophical ambition to intensify the concepts and experiences one normally thinks with. His investigations point beyond the fates of these particular exceptions to broader conclusions about Plato's world. Plato's Exceptional City, Love, and Philosopher will be of interest to any readers of Plato, and of ancient philosophy more broadly. **Epos Reconsidering Greek Epic and Aegean Bronze Age Archaeology : Proceedings of the 11th International Aegean Conference Contributions to Comparative Mythology Studies in Linguistics and Philology, 1972-1982** Walter de Gruyter **Mytologi på 30 sekunder : den viktigaste klassiska myterna, gudarna, hjältarna och monstren, var och en förklarad på en halv minut** Tukan Förlag Varför måste Herkules utföra sina tolv storverk? **Time and Space in Ancient Myth, Religion and Culture** Walter de Gruyter GmbH & Co KG From Homer to Sophocles and Greek Middle Comedy, and from Plato and Protagoras to Ovid, this volume features a panoramic and cross-generic overview of the diverse handling and ad hoc elaboration of the overarching literary notions of "time" and "space". The twenty-one contributions of this volume written by an international group of esteemed scholars provide an equal number of hermeneutic approaches to individual, distinct aspects of Greek and Latin literature. The volume is purposely designed not as a linear display of knowledge, but rather as an anthology of select paradigms that aim to demonstrate the multidimensional function and multifaceted role of the twin notions of "time" and "space" throughout ancient Greek and Latin literary texts. The volume opens with analyses of conspicuous cases from epic poetry, proceeds with examples from drama (tragedy and comedy), and concludes with diverse instances of chronotopes (empirical, imaginary, and even shifting ones), in various literary genres. The volume is of greatest relevance since it meets the cultural and theoretical trends of today's Classics. It therefore will attract not only the interest of specialised Classicists but it is also intended for a wider general readership.

**The Cultural Roots of Strategic Intelligence** Lexington Books Strategic Intelligence is a form of meaning that promises the possibility of strategic advantage, dignity, the achievement of objective, and the fulfillment of potential in hostile environments. In *The Cultural Roots of Strategic Intelligence* Gino LaPaglia demonstrates that the strategic aspect of reason—arising in human experience, encoded as value, and born by culture as a strategic resource—has been encoded as values that have been memorialized in culturally authoritative sources in various Eurasian cultures for thousands of years. These sources have validated a strategic orientation in the world, legitimized the strategist as a heroic identity, and transmitted a coherent world view that enables the practitioner of strategy to overcome asymmetric threat. By excavating the provenance of strategic thought expressed in the cultural identity of the strategist in the most culturally authoritative mythological, literary, philosophical and religious sources, and excavating the underlying strategic values expressed in cultural products, LaPaglia demonstrates that the strategic aspect of human rationality is one of the most basic structural dynamics of human meaning, and that the transmission of this strategic way of being and acting in the world offers hope for life's underdogs.

**Humanities Classics in Translation Primary Education II Decameron The Mycenaean Origin of Greek Mythology** "Nilsson studied the geographical aspects of the Greek myths. He proved that almost without exception, the places in the myths, especially those in

the great cycle of stories, are the very same places as those now known from archaeology to have been important Bronze-Age sites ... Nilsson made it amply clear, in a host of interesting details which he worked out with ingenuity and almost always good sense, that the memory of the great Bronze-Age centres survived, and that the stories told of them ... truly reflected, in Classical times, the Mykenaian Age. To have discovered this great bridge was the triumphant achievement of Nilsson." [Back cover]. **Tao Teh Ching** Shambhala Publications Written more than two thousand years ago, the Tao Teh Ching, or "The Classic of the Way and Its Virtue," has probably had a greater influence on Asian thought than any other single book. It is also one of the true classics of world literature. Traditionally attributed to the near-legendary "Old Master," Lao Tzu, the Tao Teh Ching teaches that the qualities of the enlightened sage or ideal ruler are identical with those of the perfected individual. Today, Lao Tzu's words are as useful in mastering the arts of leadership in business and politics as they are in developing a sense of balance and harmony in everyday life. To follow the Tao or Way of all things and realize their true nature is to embody humility, spontaneity, and generosity. **The Mycenaean World** Cambridge University Press Describes the Mycenaean and Minoan civilizations that developed on the Grecian mainland and on Crete during the Late Bronze Age **Choice A Classified Cumulation : Volumes 1-10, March 1964--February 1974** Totowa, N.J. : Rowman and Littlefield **Encyclopedia of Goddesses and Heroines** New World Library More Than 1,000 Goddesses & Heroines from around the World Groundbreaking scholar Patricia Monaghan spent her life researching, writing about, and documenting goddesses and heroines from all religions and all corners of the globe. Her work demonstrated that from the beginning of recorded history, goddesses reigned alongside their male counterparts as figures of inspiration and awe. Drawing on anthropology, folklore, literature, and psychology, Monaghan's vibrant and accessible encyclopedia covers female deities from Africa, the eastern Mediterranean, Asia and Oceania, Europe, and the Americas, as well as every major religious tradition. **Medieval Listening and Reading The Primary Reception of German Literature 800-1300** Cambridge University Press This study brings recent scholarly debates on oral cultures and literate societies to bear on the earliest recorded literature in German (800-1300). It considers the criteria for assessing what works were destined for listeners, what examples anticipated readers, and how for both modes of reception could apply to one work, exploring the possible interplay between them. The opening chapters review previous scholarship and the introduction of writing into preliterate Germany. The core of the book presents lexical and non-lexical evidence for the different modes of reception, taken from the whole spectrum of genres, from dance songs to liturgy, from drama and heroic literature to the court narrative and lyric poetry. The social contexts of reception and the physical process of reading books are also considered. Two concluding chapters explore the literary and historical implications of the slow interpenetration of orality and literacy. There is a comprehensive bibliographical index of primary sources. **Books of 1912- Cumulated from the Book Bulletin of the Chicago Public Library Greek Religion: Oxford Bibliographies Online Research Guide** Oxford University Press, USA This ebook is a selective guide designed to help scholars and students of the ancient world find reliable sources of information by directing them

**Historicizing Race A Global History** Bloomsbury Publishing What led so many intellectuals, politicians and scientists to believe in, and insist on, the existence of race? In exploring this question this book examines themes in the history of race, including nationalism, imperialism, colonialism, eugenics, biopolitics, fascism, Nazism and communism, from 1789 to the present day. Race and Modernity provides an easily accessible, but conceptually challenging, synthesis of the current research into the relationship between race and modernity, richly illustrated with reference to primary source material. Specifically, the book examines how societies the world over appropriated the concept of race as a vehicle for transmitting social and political messages that transgressed political differences and opposing ideological camps. The authors examine case studies from the UK, the United States, Japan, Romania, Greece and Sudan, among others, and use these to chart the emergence and evolution of the concept of race, and look at the legacy of these ideas for the present day.

**The Eagle and the Dragon Globalization and European Dreams of Conquest in China and America in the Sixteenth Century** John Wiley & Sons In this important new book the renowned historian Serge Gruzinski returns to two episodes in the sixteenth century which mark a decisive stage in global history and show how China and Mexico experienced the expansion of Europe. In the early 1520s, Magellan set sail for Asia by the Western route, Cortes seized Mexico and some Portuguese based in Malacca dreamed of colonizing China. The Aztec Eagle was destroyed but the Chinese Dragon held strong and repelled the invaders - after first seizing their cannon. For the first time, people from three continents encountered one other, confronted one other and their lives became entangled. These events were of great interest to contemporaries and many people at the time grasped the magnitude of what was going on around them. The Iberians succeeded in America and failed in China. The New World became inseparable from the Europeans who were to conquer it, while the Celestial Empire became, for a long time to come, an unattainable goal. Gruzinski explores this encounter between civilizations that were different from one another but that already fascinated contemporaries, and he shows that our world today bears the mark of this distant age. For it was in the sixteenth century that human history began to be played out

on a global stage. It was then that connections between different parts of the world began to accelerate, not only between Europe and the Americas but also between Europe and China. This is what is revealed by a global history of the sixteenth century, conceived as another way of reading the Renaissance, less Eurocentric and more in tune with our age. **The Bookseller A Newspaper of British and Foreign Literature Wonders Divine The Development of Blake's Kabbalistic Myth**
