Methodology for Impact Assessment of Free Trade Agreements

Asian Development Bank This publication displays the menu for choice of available methods to evaluate the impact of Free Trade Agreements (FTAs). It caters mainly to policy makers from developing countries and aims to equip them with some economic knowledge and techniques that will enable them to conduct their own economic evaluation studies on existing or future FTAs, or to critically re-examine the results of impact assessment studies conducted by others, at the very least.

Global Capitalism and the Crisis of Humanity

Cambridge University Press This book discusses the nature of the new global capitalism, the rise of a globalized production and financial system, a transnational capitalist class, and a transnational state and warns of the rise of a global police state to contain the explosive contradictions of a global capitalist system that is crisis-ridden and out of control.

International Trade in East Asia

University of Chicago Press The practice of trading across international borders has undergone a series of changes with great consequences for the world trading community, the result of new trade agreements, a number of financial crises, the emergence of the World Trade Organization, and countless other less obvious developments. In **International Trade in East Asia**, a group of esteemed contributors provides a summary of empirical factors of international trade specifically as they pertain to East Asian countries such as China, Japan, Korea, and Taiwan. Comprised of twelve fascinating studies, **International Trade in East Asia** highlights many of the trading practices between countries within the region as well as outside of it. The contributors bring into focus some of the region's endemic and external barriers to international trade and discuss strategies for improving productivity and fostering trade relationships. Studies on some of the factors that drive exports, the influence of research and development, the effects of foreign investment, and the ramifications of different types of protectionism will particularly resonate with the financial and economic communities who are trying to keep pace with this dramatically altered landscape.

The Handbook of Global Trade Policy

John Wiley & Sons Provides a state-of-the-art overview of international trade policy research **The Handbook of Global Trade Policy** offers readers a comprehensive resource for the study of international trade policy, governance, and

financing. This timely and authoritative work presents contributions from a team of prominent experts that assess the policy implications of recent academic research on the subject. Discussions of contemporary research in fields such as economics, international business, international relations, law, and global politics help readers develop an expansive, interdisciplinary knowledge of 21st century foreign trade. Accessible for students, yet relevant for practitioners and researchers, this book expertly guides readers through essential literature in the field while highlighting new connections between social science research and global policy-making. Authoritative chapters address new realities of the global trade environment, global governance and international institutions, multilateral trade agreements, regional trade in developing countries, value chains in the Pacific Rim, and more. Designed to provide a well-rounded survey of the subject, this book covers financing trade such as export credit arrangements in developing economies, export insurance markets, climate finance, and recent initiatives of the World Trade Organization (WTO). This state-of-the-art overview: Integrates new data and up-to-date research in the field Offers an interdisciplinary approach to examining global trade policy Introduces fundamental concepts of global trade in an understandable style Combines contemporary economic, legal, financial, and policy topics Presents a wide range of perspectives on current issues surrounding trade practices and policies The Handbook of Global Trade Policy is a valuable resource for students, professionals, academics, researchers, and policy-makers in all areas of international trade, economics, business, and finance.

The African Continental Free Trade Area

Economic and Distributional Effects

The African Continental Free Trade Area (AfCFTA) agreement will create the largest free trade area in the world, measured by the number of countries participating. The pact will connect 1.3 billion people across 55 countries with a combined GDP valued at \$3.4 trillion. It has the potential to lift 30 million people out of extreme poverty by 2035. But achieving its full potential will depend on putting in place significant policy reforms and trade facilitation measures. The scope of the agreement is considerable. It will reduce tariffs among member countries and cover policy areas, such as trade facilitation and services, as well as regulatory measures, such as sanitary standards and technical barriers to trade. It will complement existing subregional economic communities and trade agreements by offering a continent-wide regulatory framework and by regulating policy areas--such as investment and intellectual property rights protection--that have not been covered in most subregional agreements. The African Continental Free Trade Area: Economic and Distributional Effects quantifies the long-term implications of the agreement for growth, trade, poverty reduction, and employment. Its analysis goes beyond that in previous studies that have largely focused on tariff and nontariff barriers in goods--by including the effects of services and trade facilitation measures, as well as the distributional impacts on poverty, employment, and wages of female and male workers. It is designed to guide policy makers as they develop and implement the extensive range of reforms needed to realize the substantial rewards that the agreement offers. The analysis shows that full implementation of AfCFTA could boost income by 7 percent, or nearly \$450 billion, in 2014 prices and market exchange rates. The agreement would also significantly expand African trade--particularly intraregional trade in manufacturing. In addition, it would increase employment opportunities and wages for unskilled workers and help close the wage gap between men and women.

The United States Government Manual

Global Value Chains Development Report

Global value chains (GVCs) break up the production process so that different steps can be carried out in different countries. Many smart phones and televisions, for example, are designed in the United States or Japan. They have sophisticated inputs, such as semiconductors and processors, which are produced in Korea or Taiwan Province of China. And they are assembled in China. They are then marketed and receive after-sale servicing in Europe and the United States. These complex global production arrangements have transformed the nature of trade. But their complexity has also created difficulties in understanding trade and in formulating policies that allow firms and governments to capitalize on GVCs and to mitigate negative side effects. This publication provides a detailed map of GVCs, enabling policymakers to have a better understanding of the ongoing development and evolution of GVCs and the relationship between economic development and GVC participation. Copublished with the World Bank, OECD, IDE-JETRO, and the Research Center for Global Value Chain Research. The joint research undertaken by these organizations aims to synthesize the parties' knowledge and expertise on GVC studies and to contribute to better policymaking by the international community.

Climate Friendly Goods and Technologies in Asia

Opportunities for Trade

Springer This book investigates the potential trade opportunity of climate friendly goods and technology (CFGT) in Asia and South Asia region, and uses a case study of India to clarify India's position on global warming and efforts to mitigate climate change impacts regionally and globally. In four main sections, the book applies econometric techniques to analyze the trade performance of CFGTs in nations in Asia and South Asia, in order to assess trade gaps and map the movement of CFGTs in these regions. The major themes addressed in the book include climate change and trade, issues that shape regional and national policies, and strategies for implementing global climate change mitigation on trade opportunities and developments. Section 1 introduces readers to some background on global climate change threats and its effects on trade, as well as the need to develop trade for CFGTs. Section 2 assesses the trade performance of CFGTs in Asia, and South Asia, and the competitiveness of CFGT trade. Section 3 uses a regional orientation index to analyze CFGT trade. Section 4 discusses the potential business applications of CFGT trade in the Asia, South Asia region, and uses a case study on India to analyze climate change mitigation effects on trade and policy. The book will be of interest to researchers, students, governments, and policy makers.

Trade Agreements, Investment Protection and Dispute Settlement in Latin America

Trade Agreements, Investment Protection and Dispute Settlement in Latin America analyses the evolution and current landscape of dispute settlement in trade and investment agreements in the Americas. In recent years many Latin American countries have liberalized their trade and investment regimes, opening their markets to free international trade. At the same time, regional economic integration has boomed. This book is the first systematic analysis in any language of these globally significant developments, and the first comprehensive legal study of dispute settlement relating to foreign direct investment and trade in the region. The book looks beyond focusing on formalized dispute settlement mechanisms to underline other techniques such as alternative dispute resolution channels, including dispute prevention practices. In proposing solutions to the current challenges, the book taps into the precedents and practice, stressing the relevant domestic and international case law on dispute resolution applicable to these treaties. What's in this book: Undertaken by an expert in the field, this study describes the current institutional framework of Latin American trade and investment law as well as specialized legal issues in the region's various economic blocs. Among the many issues and topics raised, the following may be mentioned: questions of compliance and procedure in the context of today's international investment regime; formalized dispute settlement mechanisms; alternative dispute resolution channels, including dispute prevention practices; legitimacy and transparency of the various dispute settlement mechanisms; inclusion of social clauses in trade and investment agreements; and avoidance of investment

treaty liability. In order to offer a most accurate view of the effectiveness of the protection granted to foreign investors, special attention is given to relevant case law - completely covering the period 1985-2015 - as well as arbitral precedents before international bodies and in jurisdictions across the region. The book concludes with a critical examination of the future prospects of international economic law dispute settlement in the Americas, pinpointing current trends and unveiling future possible avenues for change. How this will help you: As an in-depth explication of how the rules and principles of international economic law are applied in Latin America, this book has no peers. For practitioners drafting business agreements with Latin American companies, or needing to ensure availability of appropriate remedies, this book's detailed insight into international litigation in the region, including case law illustrating the main topics, will prove to be of immeasurable value. Professionals in the arbitral community worldwide, as well as governments, dedicated research centres, and officials in international organizations will welcome this book's model for comparative integration studies, systematic guidance on procedure and case law of domestic and international courts and arbitral tribunals, and extensive treatment of dispute settlement mechanisms in trade and investment agreements.

Multilateralizing Regionalism

Challenges for the Global Trading System

Middle East, the Strategic Hub

A Bibliographic Survey of Literature

Trading Promises for Results

What Global Integration Can Do for Latin America and the Caribbean

Inter-American Development Bank Thirty years after the region embarked on large-scale liberalization, trade policy could have been expected to become all but irrelevant. Instead, a mismatch between expectations and what could realistically be delivered set the stage for much of the disappointment, skepticism, and fatigue regarding trade policy in the region, particularly in the early 2000s. By setting the bar unrealistically high, governments and analysts made trade policies an easy target for special interests that were hurt by liberalization and for those ideologically opposed to free trade. The most immediate victims were the more tangible growth and welfare gains, whose relevance was lost amid the noise of grandiose visions.

Strengthening Forensic Science in the United States

A Path Forward

National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Border Management Modernization

World Bank Publications Border clearance processes by customs and other agencies are among the most important and problematic links in the global supply chain. Delays and costs at the border undermine a country's competitiveness, either by taxing imported inputs with deadweight inefficiencies or by adding costs and reducing the competitiveness of exports. This book provides a practical guide to assist policy makers, administrators, and border management professionals with information and advice on how to improve border management systems, procedures, and institutions.

Assessing Regional Integration in Africa IX

Next Steps for the African Continental Free Trade Area

UN Signed by 52 African countries, the African Continental Free Trade Area (AfCFTA) is, by the number of participating countries, the largest trade agreement since the formation of the WTO. This report recognizes that it is not enough for the AfCFTA to be merely negotiated, concluded and ratified. It must also change lives, reduce poverty and contribute to economic development. For this, the AfCFTA must be effectively operationalized, but also supported with complementary measures that leverage it as a vehicle for economic development. Among the most important of the next steps is the phase II negotiations scheduled to commence on intellectual property rights, investment and competition policy in late 2019.

Assessing the Economic Impacts of Recreation and Tourism

Asia and Global Production Networks

Implications for Trade, Incomes and Economic Vulnerability

Edward Elgar Publishing This timely book deploys new tools and measures to understand how global production networks change the nature of global economic interdependence, and how that in turn changes our understanding of which policies are appropriate in this new environment.

The Development and Finance of Global Private Power

Greenwood Publishing Group A rationale for the emergence of private power, and a comprehensive, lucid discussion of ways in which nations, regions, and businesses are making it happen.

Index to Legal Periodicals & Books

Handbook of Commercial Policy

Elsevier Handbook of Commercial Policy explores three main topics that permeate the study of commercial policy. The first section presents a broad set of basic empirical facts regarding the pattern and evolution of commercial policy, with the second section investigating the crosscutting legal issues relating to the purpose and design of agreements. Final sections cover key issues of commercial policy in the modern global economy. Every chapter in the book provides coverage from the perspectives of multilateral, and where appropriate, preferential trade agreements. While most other volumes are policy-oriented, this comprehensive guide explores the ways that intellectual thinking and rigor organize research, further making frontier-level synthesis and current theoretical, and empirical, research accessible to all. Covers the research areas that are critical for understanding how the world of commercial policy has changed, especially over the last 20 years Presents the way in which research on the topic has evolved Scrutinizes the economic modeling of bargaining and legal issues Useful for examining the theory and empirics of commercial policy

Global Report on Trafficking in Persons 2020

UN The 2020 UNODC Global Report on Trafficking in Persons is the fifth of its kind mandated by the General Assembly through the 2010 United Nations Global Plan of Action to Combat Trafficking in Persons. It covers more than 130 countries and provides an overview of patterns and flows of trafficking in persons at global, regional and national levels, based primarily on trafficking cases detected between 2017 and 2019. As UNODC has been systematically collecting data on trafficking in persons for more than a decade, trend information is presented for a broad range of indicators.
